ADVERTISEMENT.

THE rapid sale of four large editions of Captain Cochrane's Narrative, without exhausting the demand, has induced the Proprietors of "Constable's Miscellany" to give it a place in their Collection; and they hope that the high price at which it has hitherto been sold, in addition to the intense interest of the Work itself, will render all other apology for its insertion unnecessary.

It would have been desirable to have prefixed to this edition some account of the enterprising traveller; and no small exertion has been used to accomplish it: but, beyond the simple fact of his having died in South America, in August 1825, little has been ascertained which his own pages

do not furnish. It appears that Captain John Dundas Cochrane was a native of North Britain, and nearly connected with the noble family of that name, being grandson of Thomas, eighth Earl of Dandonald, nephew of the Honourable Admiral Sir Alexander F. J. Cochrane, and born in 1793. At the early age of ten, he entered the British Navy, and subsequently, as he has told us himself, served, partly under his uncle's flag, for a period of nearly ten years, "in some of the worst corners of the West Indies." At the conclusion of the general peace, he made some pedestrian excursions through parts of France, Spain, and Portugal; when, thoroughly convinced of the hardihood of his constitution, seeing no chance of professional employment, and possessing the most uncontrollable spirit of locomotion, he projected an exploratory journey into the interior of Africa. Although his Memorial on this subject was unfavourably received, his determination to undertake some arduous enterprize seems to have been unsubdued; for, soon after, having obtained leave of absence for two years, in the spring of 1820 he set out on

that perilous journey which forms the subject of the following narrative. His subsequent adventures are detailed in these volumes, and they will be read with the deepest interest.

Upon his return to England, Captain Cochrane again offered his services to attempt a journey into the interior of Africa; but these were again refused. He now published his *Tour in Russia*, which rapidly attained to a second edition; but having engaged in some mining speculations in South America, he left London for that country in June 1824, on the very day that the new edition appeared. In the meantime, his *Work* attracted the notice of the *Quarterly Review*, and was honoured with a critique, on the whole of a complimentary kind, but which contained several allusions and charges of such a personal description, that they demanded an instant refutation. Whether these offensive passages hastened his return, we are unable to say; but the new edition having also met with a ready sale, certain it is, that Captain Cochrane arrived in London just in time to prefix to another * a

* A fourth edition followed within a few months.

most spirited answer to the reviewer, which will be read with the highest interest. Without entering into the merits of this dispute, we may at least be permitted to say, that the remarks alluded to are characterised by the greatest indelicacy, if not injustice; and that the allusion to Mrs Cochrane was totally uncalled for. Both by her birth and by her attainments, this lady was entitled to respect, and, although a "Kamtchatka girl,"* that she was not deficient in personal charms, her portrait, which accompanies our second volume, can testify.

It is unnecessary to follow the Reviewer through those charges which the author himself has combated. Captain Cochrane's volumes may furnish few scientific details, because the imperfect nature of his education unfitted him for entering upon such subjects; but a more interesting personal narrative is nowhere to be met with. He entered, moreover, upon an untrodden path,

* She is daughter to Captain Ricord, Chief of Kamtchatka, (vide vol. I. p. 320.) This amiable woman survived her husband, and returned to Russia; and by her beauty and accomplishments, no less than by the interest attached to her situation, soon met with admirers. She is again married, and resides at Cronstadt.

and on this account also, they are of the highest importance. Siberia was absolutely a *terra incognita* previous to his gigantic undertaking; but he has opened the way to new sources of knowledge, by giving us glimpses of countries advancing rapidly in the scale of civilisation, and rich in such luxuries as British enterprise may turn to advantage.

Of Captain Cochrane, we regret to say, that little more can be added. He returned to America by the Frolic, Leeward Island Packet; and shortly after his arrival, on the 12th August 1825, he died of fever at Valencia in Columbia.

TO HIS EXCELLENCY

MICHAEL SPERANKSI,

LATE

GOVERNOR-GENERAL OF SIBERIA,

&c &c. &c.

MOST EXCELLENT SIR,

In taking the liberty, without having in the first place asked your Excellency's permission, of dedicating this New Edition of the following Narrative of my Journey through Russia and Siberian Tartary to your Excellency, I do so, to express my grateful remembrance of the kindness and assistance which your Excellency afforded me in the heart of Siberia, as well as elsewhere.

Unaccustomed to the language of adulation,—and your Excellency's desires are above it,—I claim but the continuation of that kindness, condescension, and good opi-

nion which I was honoured with : and trusting to the well-known generosity of your Excellency to pardon unintentional faults, I subscribe myself,

With all respect,

Your Excellency's

Most obedient and

Faithfully obliged Servant,

JOHN DUNDAS COCHRANE.

PREFACE

TO THE FIRST EDITION.

IT has not been the kind partiality of my friends, the common apology for an uninteresting or ill written book, which has induced me to launch upon the world the following narrative of my journey to the utmost northern and eastern limits of the Russian empire; nor has it arisen from a vain idea of my being qualified for a task of the kind. No person (except the foreign nobleman under whose special countenance the principal part of the undertaking was accomplished) has recommended such a proceeding. The publication, therefore, whether of merit or demerit, is entirely prompted by the novelty of the journey, and of the mode of accomplishing it; for, even in these days of wonderful achievements, it has excited some surprise that a Captain of the British Navy should undertake a journey of many thousands of miles, alone, on foot,

and over a country considered as next to impassable. That the journey has only in part been performed on foot, is to be attributed to the liberality of the Russian government, as well as to the hospitality of its people. Had the Emperor Alexander, however, refused the assistance I required, solicited, and obtained, I am free to declare that it is next to impossible to traverse his empire on foot. I fairly made the experiment. For a long time I adopted that economical mode of travelling, until the pressing solicitations of every one convinced me it would be folly to decline any longer the acceptance of such offers as they were pleased, from real benevolence, to make me.

I frequently walked, and as frequently rode, and was thus enabled to go over a vast extent of country in a short time ; and such is the kind disposition of the Russian character towards a stranger, as evinced in my case, I feel convinced that, by studying their manners and customs, partaking of their amusements, showing respect to their religion, and otherwise conforming to their rude notions, the empire of Russia may be traversed by a foreigner in every direction, with much convenience, plenty of food, good lodgings, and even suitable raiment, without molestation, and this for so inconsiderable a sum, that to name it were to challenge disbelief. I shall, therefore, only state, that the expenses of my journey from Moscow to

Irkutsk (by the route I went, six thousand miles,) certainly fell short of *a guinea*.

Such being the case, such being the novelty of the journey, such being our ignorance of Siberia, and every thing connected with the public institutions of that distant part of the world, I consider it my duty, as well as my interest, to submit to the candour of an indulgent public the following pages. Effectually to disarm the critic, I need only say that I entered into the cockpit of a man-of-war at the very early age of *ten*. If that be not sufficient, let the fact of a journey of more than thirty thousand miles, performed under peculiar circumstances, be taken as a set-off against a want of powers better fitting an author than a traveller.

I cannot, however, but entertain a hope, that the narrative will be found not void of interest. It contains no alterations from the original notes; it has simply been lopped of those branches which could not interest the English reader; probably, it has not even yet been sufficiently pruned, for I fear I have still left marks of having pryed into proceedings which may appear not to have come within my province. When my readers, however, consider the peculiar situation in which I was placed for more than three years, I hope they will give me credit for the impartiality of my opinions, and the truth of my statements. Respecting the

character of the Russians, I do not feel myself competent to give what may be termed a proper description. I might be charged with a want of impartiality, and therefore prefer that my readers should form their own estimate, after a due consideration of the facts stated in my narrative. The variety of conflicting testimonies has rendered the task still more difficult ; some who have written upon the subject have grossly exaggerated, while others have advanced assertions totally unfounded. Thus much, however, I will take upon myself to say, that no people have made more rapid strides towards civilisation, and moral and intellectual improvement, than all classes of the Russians ; and further I say, that their catalogue of failings, for they do not merit the appellation of crimes, by no means exceeds those of other countries.

There is another ground on which I would fain persuade myself that these pages may be productive of some good ;—may they not prove the means of stirring up the enterprising spirit of those who have better means and greater talents than I pretend to ? Should a traveller who has the pecuniary means, the requisite talents, and the spirit and perseverance indispensable, enter upon the vast fields of Tartary, he will find ample scope for the exercise of his genius, whether he be a philosopher, a botanist, a naturalist, or an historian. For myself, I profess only to have acted in the capa-

city of a rough pioneer ; and, having cleared the way, I leave the road open for the scientific, to pursue his journey when it best suits him.

To the impatient mind these pages may also afford a salutary lesson. Should such a character peruse this narrative, and trace me through a long, laborious, and highly perilous journey, contrasting the frequent miserable situations in which I have been placed with his comparatively happy one, he will, I trust, learn “to be content ;” he will also learn, that there are few difficulties which patience and spirit may not overcome, and that man may fearlessly go where he will, so long as his conduct answers to his movements.

I may be allowed to add, that, after such a journey, I might be supposed cured of the spirit of travelling, at least in so eccentric a way ; yet the supposition is far from the fact, for as I am conscious that I was never so happy as in the wilds of Tartary, so have I never been so anxious to enter on a similar field as at this moment.

THE AUTHOR.

PREFACE

TO THE SECOND EDITION.

IN presenting to the public an enlarged and corrected edition of this Work, the Author avails himself of such an opportunity to return to the public who have read, and to those reviewers who have kindly criticised it, his thanks for the patronage of the former, and for the liberal indulgence which has been extended to him by the latter. The few critics who have in any way censured the peculiar mode of travelling adopted by the Author in the prosecution of his journey, may rest assured, that in no other manner could he have proceeded to the extremities of Asia; and as he is quite satisfied that such observations could only have arisen from mistake, he begs leave to return them also his thanks for the attention which they have drawn to his work.

June, 1824.

PREFACE

TO THE THIRD EDITION.

I SHOULD, indeed, ill deserve the attention which the Editor of the *Quarterly Review* has devoted to the Narrative of my Journey through Siberia and Tartary, were I to feel ruffled by either of the severe remarks which, in his judgment, it has been necessary to visit me with ; so far from such a feeling, I feel obliged to *him*—nor, indeed, am I disappointed ; I am only surprised that I have not been more severely handled by the learned critics in general, in spite of the original preface which I had hoped would have disarmed them. With respect to the *Quarterly*, in particular, I can only say, that although it has had no effect in causing this *third* edition, still I feel confident it will have the effect of rendering more rapid the sale of it ; for whoever will read the flattering concluding paragraphs, will, I doubt not, come to the same satisfactory inference.

Having thus made due acknowledgments, I shall beg leave to remark upon a few of their *unsupported* charges ; and in doing so I hope to proceed with perfect good humour, conscious that no ill will was intended ; and if I do it in a slovenly manner, I still hope for fresh latitude, in consideration of this third edition being ready for binding—a circumstance I could not have known in time, *arriving*, as I have done, only this day from South America ; coupled also with the singular fact, that the second edition was published the very day that I *left* London.

The first charge brought against me consists in the assertion, that the work is in general without *dates*, and that, therefore, what I have *told has not always been correctly told*. Now, I am no logician, but this does not appear to me a candid or justifiable mode of criticizing a work, because it is a direct tax upon veracity *alone*. Surely a fact may be stated, without specifying the time when it took place ;—nor is the Editor borne out in his assertion, or insinuation, by his supposed subsequent proof, that I have asserted what I could not have known. In order, however, to account for the omission of dates, I must tell the public, that if a blunder was committed, it has not been by me, but by no less a literary gentleman than Mr Barrow ; his opinion and advice, with such a novice as I am, in a literary view, ought to have

been followed ; his knowledge of the most agreeable forms of bringing a work before the public is so well known, that I am certain the same public, as well as the *Quarterly*, will excuse the blunder, and leave veracity as it stood.

The circumstances which led to the general omission of dates were rather curious ; and as Mr Barrow may have forgot the conversation which passed between us at the Admiralty, I shall relate it, and I do so, because I have not time to acquaint that gentleman with my intention of publishing it,—this explanation will, I hope, plead my apology with Mr Barrow :—Upon my return to England, from Russia, and when about to commence the narrative of my journey, I was desired to submit it to Mr Barrow, previous to publication—I did so, with a perfect knowledge that it would benefit much. When he came to that part of it which states my departure from St Petersburg on the 24th *May*, I remarked that the *moon was near her full* ; Mr Barrow, with his accustomed ingenuity and foresight, referred to the almanack, by which it appeared that there was *no moon at all on the 24th May* ; accordingly, at our next meeting, he, wishing to prevent my falling into so gross an error, kindly said, “ that I intended keeping company with Bruce, the African traveller, who showed the Abyssinians an eclipse which was not visible in Africa, although it was so elsewhere.” Con-

scious that I had not written what was not true, he referred to my assertion of the near *full moon* on the 24th, and compared it with the almanack ; I referred to my passport, it is dated the 24th, and I knew the moon to be full on that day, for it was *old style*,—the riddle was thus explained ; for new style being the 12th May, the moon *was near her full*. While in Russia, I adapted myself, as nearly as possible, to every circumstance connected with that empire ; among others, to that of following their O. S. I, however, agreed with Mr Barrow that it would be better to leave dates out, as such might cause a confusion ; and where only a personal narrative was intended, could not consider it of much consequence. This tedious explanation, I hope, will be pardoned, in consequence of the hasty inference drawn from it by the *Quarterly*.

With respect to the next charge, a *supposed* more serious one. I think differently. I was not employed by the Admiralty to undertake a journey through Siberia or Tartary ; as such I cannot have acted derogatory to my rank or character. The Admiralty, while I was on half-pay, had nothing to do with the one or the other. I got no L.5000 advance to fit me out with telescopes, thermometers, barometers, or the like appendages of a scientific expedition. I had no such object in view. It was enough for me that I had their Lordships' leave to travel, upon certain conditions—those

conditions I complied with; and it matters not how I travelled, how I dressed, how I fared, or how I got on. I did certainly intend a pedestrian trip; that I found impossible in many cases, from a variety of causes, none so strong as the hospitality of the Russians, *who will not allow you to travel on foot if they have a horse to lend*; nay, what will the Editor of the *Quarterly* say, when I assert, and appeal to the Governor-General Spersanski for the truth of my assertion, that officers of the highest cast, when travelling in Siberian Tartary, scarcely ever pay for provisions?—the natives will *not take* the money, and if they did, I doubt what they could or would charge, when the extraordinary low price of provisions is taken into consideration. I have often seen the owners of horses fighting for the honour of driving a superior officer, *gratis*; also have I seen them tackle on three and four extra horses, that such an officer should go with more *than state*, that is, with great inconvenience; and, were it not for the beauty and breadth of the roads, I might say *with danger*. To sum up with the hospitality of the Russians, especially those of Siberia, I will only add, that nothing is so easy as to gain admittance into their mansions or dwellings, nor any thing so difficult as to leave them.

The charge brought against me, of stating the degrees of cold in the valley of Sartan, without the

aid of a thermometer, is also without foundation. It is, however, true, that I lost the few instruments I had taken from St Petersburg soon after I left that capital; but such a fact was no reason why I could not, or did not, procure others. Does the Editor of the *Quarterly* suppose, that Russia is so backward in the possession of astronomical instruments? If so, it is a mistake; and I could say, that their officers are possessed of more scientific instruments than ours in general are. The truth is, I procured a thermometer at Moscow, a second at Yakutsk, and a third at the Kolyma. When I have marked so low as 42° of Reaumur, I beg to inform the Reviewer that he must not suppose that, in Siberia, there are not hundreds of spirit thermometers, and, such being the case, I marked what number of degrees it showed by Reaumur, and not by Fahrenheit, which I then considered was a thermometer more befitting a warm climate.

When I stated having seen the thermometer so low as 42° of Reaumur, and brought in the testimonies of Admiral Saretcheff and Captain Billings to bear out my assertion, I did it, not from a doubt of its truth, but from a desire that the unfounded assertion of this *same Quarterly Reviewer*, some years ago, should not be tolerated,—that Captain Parry had wintered on the coldest spot of the globe. I do not believe a thing of the kind. I cannot doubt but that many of the most eastern parts of Nor-

thern Siberia are infinitely colder than Melville Island. My assertion of 42° of cold *would have been discredited*, when the *Quarterly* knew my entire want of scientific knowledge, and the superabundant quantity possessed by him and Captain Parry, who found no more than 57° of Fahrenheit.

I thank the Editor of the *Quarterly* for his very ingenious and logical query, (vide p. 224,) where he says, "We are not surprised that these poor people (the inhabitants of the Kolyma) should be subject to many diseases, more especially the scurvy; but we are somewhat *staggered* with the Captain's assertion, that it is cured 'by the consumption of raw fish, during the winter;' but, if cured in the winter, how happens it that 'in summer, the disease never fails to abate with the arrival of fresh fish?' If it be cured in the winter, and abates in the summer, when does it exist in force?" I reply, in winter the scurvy *rages*, and that it is cured in winter by the consumption of raw fish; also I agree that it abates with the arrival of fresh fish. To get out of this apparent logical difficulty, to the *Quarterly* would be a hard task; not so to me, who am now taking advantage of the shrewd and active mind so graciously granted me by the *Quarterly*.

The scurvy rages during winter with the poorer and consequently with the greater, proportion of the inhabitants of the Kolyma, because they, the

poorer sort, cannot *afford* to eat raw fish, it being an article of *luxury*. It is true, that a most prodigious quantity of fish is caught on the banks of the Kolyma, but it does not follow that such a quantity is eaten *raw*; indeed it is only a very small proportion that can be so consumed, and that quantity is naturally bought up and retained by the more wealthy part of the community.

Herrings are the principal productions of the Kolyma, and are retained for the dogs. Red salmon constitute the next quantity, and are universally used by all classes, by being boiled, or dried up into *youkola*. The *nailma*, and, I think the *osioter*, being white fish, are the only species that are eaten in a *raw state*; while *mocksou* and *mockson* are expressly converted into *youkola*, one for man and the other for dogs. There is also another reason why the poorer classes cannot partake of raw fish; it is not only dear and scarce, but it is a most extravagant mode of eating fish, for a person can consume three times the quantity in a raw state, than he can either boiled or in the way of *youkola*. I hope this statement will be understood by my readers.

With respect to the memoir which I addressed to the Royal Society,* and which may be deemed

* This Memoir, and the Map which illustrates it, will be found in the second volume.—ED. of C. M.

unintelligible without at all offending me, I have nothing to say. Had there been any real and substantial reason for refusing the memoir, I feel certain the all-knowing Editor would freely have given it. Be this as it may, I do still maintain that I had a right to expect common civility and common courtesy from Sir H. Davy and his colleagues in council; and I still assert that their conduct has betrayed a want of fair dealing, unpardonable in any one, but more especially censurable in a learned, an enlightened, and a public body.

In page 226 the learned Editor seems to forget his own want of propriety. He has before much harped upon the derogatory manner in which I travelled, &c. so improper for a person of *my rank*; and yet, in speaking of my wife, he terms her a *Kamtchatka girl*. As far as age could warrant the term, he may be correct; but I should have expected *his very refined notions of propriety* might have induced him to have extended the trouble he took in writing about her, to have called her a young lady. There, however, seems to have been a lurking desire to have added more than had a reference to my narrative;—the causes are known to me as well as to the Editor.

With respect to that hankering after reasons why I did not go over to America, and the desire the Editor has to induce me to charge the Russian government with preventing it, because there was

already a Russian Expedition there,—I unequivocally declare there was nothing of the kind. I never was stopped by them from going where I chose; they did me the honour to grant me a *carte blanche*, which I did not abuse. With regard to the assertion, that I have referred to the reasons *before given*, and, as the Editor says, *nowhere stated*, he might have imagined what was correct, viz. that I referred to the reasons given for not going with Baron Wrangel, in a letter dated from the Kolyma, and which were such as any honourable officer would have given, conscious of his own capacity, and jealous of his own honour.

The Editor is very fertile in finding out doubts of my veracity, and yet he finds fault with my having previously advanced testimonies of it, as it ought not to be doubted; but, he lastly tells me, that the cause of my saying that there are no females in Maimatchin, arises from merely the fact, that the Chinese told me so. Pray how would this Oriental reviewer have had me to inquire and satisfy myself except as I did? I have no doubt of the truth of what I have stated, for the houses are not so contrived, as I have explained in the narrative, as to admit of a space and secret room; and, as I have also stated, the Chinese at Maimatchin, and the Russians at Kiakhta, live upon more friendly terms than can be expected else-

where, and not more closely averse with respect to showing their ladies, as asserted by the reviewer. I could certainly give other reasons in corroboration of my assertion, did propriety permit me ; nor do I think the refined delicacy of the Editor such as to have induced his noticing a circumstance of the kind, for, in various parts of the same number, he seems peculiarly susceptible of his tender organs.

Touching the extraordinary stories I have reported of the gluttony of the Yakuti, &c. I am not only obliged to the *Quarterly* for putting me in the company of Captain Bobadil, but also in company of two of his “ declared bright examples for the youths of ages to come,” viz. Captains Parry and Lyon. Methinks the Editor feels rather sore upon this subject, else I feel confident, neither the asserted gluttony nor my abstemiousness would have been taken notice of. It is, however, not unamusing to read the comparative and significant remarks attending his bright and scientific examples, and those thrown at me ; but, I will tell the Editor, I would rather eat raw fish (and I regret that I cannot send him some for trial) than be starved in the midst of plenty, in the one instance ; or, in the other, be compelled to roast old shoes, stew down old clothes, nay, to eat a parcel of my own dead companions.

I again thank the *Quarterly* for his complimen-

tary concluding paragraphs, for which I now present him a third edition, and, spite of fate, hope to send him a fourth in a short time.

J. D. COCHRANE.

JOURNEY

THROUGH

RUSSIA AND SIBERIAN TARTARY.

CHAPTER I.

Motives for undertaking the Journey—Dieppe—Rouen—Paris—La Ferté—Chalons—St Dizier—Nancy—Metz—Sarrebuck—Landshut—Kaisers Lautern—Frankfort—Schlucten—Fuld—Erfurth—Leipsic—Dueben—Potsdam—Berlin.

IN the month of January, 1820, I addressed a letter to the Secretary of the Lords Commissioners of the Admiralty, offering to undertake a journey into the interior of Africa, which should have for its object the ascertaining of the course and determination of the river Niger. Besides the bent of my own inclination, I had an inducement to this step in the conviction, established by experience, of my capability to encounter the ordinary difficulties of a pedestrian traveller ; having, on the conclusion of a general peace, traversed on foot the beautiful

countries of France, Spain, and Portugal—an excursion in which I certainly underwent a full proportion of fatigue and privations ; to say nothing of those I had for years before been in the habit of undergoing ; among which I might enumerate two trips from Quebec to Lake Ontario, when in company with six hundred seamen, whose wry faces and swollen feet told me I was more of a pedestrian traveller than they.

The plan I proposed to follow was nearly that adopted by Mungo Park in his first journey ; intending to proceed alone, and requiring only to be furnished with the countenance of some constituent part of the government. With this protection, and such recommendations as it might procure me, I would have accompanied the caravans in some servile capacity, nor hesitated even to sell myself as a slave, if that miserable alternative were necessary, to accomplish the object I had in view.

In going alone, I relied upon my own individual exertions and knowledge of man, unfettered by the frailties and misconduct of others. I was then, as now, convinced that many people travelling together for the purpose of exploring a barbarous country, have the less chance of succeeding ; more especially when they go armed, and take with them presents of value. The appearance of numbers must naturally excite the natives to resistance, from motives of jealousy or fear ; and the danger would be greatly increased by the hope of plunder. The death of the whole party, and consequently the failure of the expedition, will be the probable result of such a plan. The difficulty of finding men, otherwise suitable, whose constitutions admit an equal degree of suffering and fatigue, is also great ; and that of collecting a number of people gifted

with the due portion of those virtues without which no expedition of discovery could succeed, is certainly a greater.

My answer from the Admiralty was unfavourable, expressing an unwillingness to countenance the undertaking; whether from tender regard to the safety of my person, or because they considered such an expedition foreign to their department, or from what other reason, I shall leave the reader to conjecture. I was not, however, the less convinced of the practicability of my plan; a plan which I consider was more than ordinarily feasible by me, who had been roasted in some of the worst corners of the West Indies, during a period of nearly ten years' service, without, I may say, a headach. Finding, however, that a young commander like myself was not likely to be employed afloat, much less ashore, I determined to undertake a journey, varying only the object and the scene, similar to that of the unfortunate Ledyard, viz. to travel round the globe, as nearly as can be done by land, crossing from Northern Asia to America, at Behring's Straits. I also determined to perform the journey on foot, for the best of all possible reasons, that my finances allowed of no other. Having procured two years' leave of absence, I prepared to traverse the continents of Europe, Asia, and America.

It is only candid to premise, that the account I am about to give of my travels, can but little gratify the scientific reader. I confess my ignorance of natural history, nor, had I been ever so skilful, could I, travelling on foot, have brought away with me any specimens of animals, plants, or minerals. I had no means of carrying with me such instruments as are necessary for making geographical ob-

servations of places, of the state of the air, or such other matters as are generally expected to be noted by travellers; the few instruments I did possess were taken from me, as will hereafter appear.

My first and leading object was to trace the shores of the Polar Sea along America by land, as Captain Parry is now attempting to do by sea; and, at the same time, to note my observations on men and manners in the various situations and conditions of life; for which such a journey could not fail of presenting many opportunities. Having therefore procured such documents as were necessary, and filled my knapsack with such articles as I considered requisite, to enable me to wander through the wilds, deserts, and forests of three quarters of the globe, I quitted London, and landed at Dieppe from the packet-boat.

My regret at quitting the shores of Albion was not likely to be counterbalanced by any pleasurable reflections on reaching those of France; but having been forty hours on board the packet with little or nothing to eat, I cheerfully submitted to the ordeal of the French searchers, at the modest price of a franc; and, with my knapsack on my back, walked on to one of those most accommodating of all places of entertainment, announced by the simple words of "*logement à pied ou à cheval.*" I there procured a bed and supper for the same reasonable price that I had paid for the honour done me in the official examination of my precious wallet.

Being reluctant to incur the expense of five francs, to obtain my passport on Sunday, I was content to devote the day to celebrate the eve of my birth-day, of the Carnival, and of St Valentine; having visited what may be deemed most worthy in the pretty, clean, and well-paved town of

Dieppe—the retreat for the vicious, and refuge for the unfortunate.

Monday, 14th February, I commenced my route towards Paris, over a well-cultivated but thinly peopled country, on which are a few pleasant country seats and neat villages, with a road far superior to that from the capital to Calais. I contemplated, as I jogged along, some of the differences between France and Spain, comparing the facilities of traversing the former, to the difficulties and dangers attending the latter; and contrasting the servile, frivolous, and seductive Frenchman, with the noble, proud, and hospitable Don. Nor is the scenery of the two countries less opposed; the bold, romantic, fertile, and mountainous features of Spain, to the long, low, sloping declivities, and the tame, though cultivated, eminences of France.

About a mile, however, from Rouen, the prospect became more interesting. To the right and in front wound the silvery Seine, its bosom studded with vessels to a degree extraordinary at this season of the year. In the distance, in front and to the left, stood the city of Rouen, with the spire of its truly venerable cathedral, and other steeples and public buildings, rising over various parts of the city; farther to the left, a range of hills, in a high state of cultivation, sloped down to a number of handsome chateaux and pretty cottages; while the lawns, covered with cottons and linens spread out to bleach, gave an air of cheerful and honourable industry to this portion of the department of Lower Seine.

I put up at a table-d'hôte, and, for three francs a-day, procured the opportunity of viewing the wonders of the ancient, but dirty, narrow, and

crooked-streeted city of Rouen. The cathedral is, of course, the first object of attraction ; but, however beautiful its Gothic design, or however excellent its modern improvements, the effect of both is lost from the peculiar unfriendliness of its situation ; surrounded, on three sides, by dirty lanes, so close that the backs of some of the houses are formed by the walls of the cathedral. The interior corresponds with the exterior in point of decoration ; though of its furniture little else is to be seen besides enormous piles of old chairs. I left this once so beautiful, but now disfigured edifice, to wander through the aisles of St Owen, a fine and perfect Gothic specimen, whose grandly elevated roof, and highly finished painted windows, seem capable of inspiring a religious feeling far beyond those of the cathedral. The archiepiscopal palace, the barracks on the banks of the Seine, a large Gothic building converted to public offices, and the Hotel de Ville, are also deserving attention. Rouen has a tolerable library, and a cabinet of paintings, including numerous pieces of the old school ; their description is too much out of my sphere to be entered upon ; and, were it otherwise, the indelicacy of some of them might well forbid their reception by an English public.

Ascending Mount St Catherine, I now overlooked the river and great part of the surrounding country, which, even at this season of the year, presented an interesting scene, where the boulevards, by far the cleanest part, stretch along three sides of the city to a great distance, with the cathedral and other churches ; the beautiful windings of the river, now bounded by high and chalky cliffs, and then by low meadow-lands, with its numerous inhabited and well-cultivated islands, remind-

ing me of the "Chinampas," or floating gardens of Mexico.

Mount St Catherine had some time back a strong fortress; though now scarcely the vestige of a wall remains. Possibly it was destroyed on purpose, as palpably unnecessary to the protection of the *sacred territory*. The communication across the river is formed by a heavy bridge of boats, fastened together in the most unskilful manner, the beams of wood admitting of little or no play, so necessary during the breaking up of the ice, or the freshes and swellings of the river. The *great nation* might obtain some useful information on floating bridges from Oporto to Seville.

I returned to the city, in time to witness what little public feeling was exhibited on the information just received of the Duke de Berri's assassination; and having gallantly paid my devoirs to the statue of the Maid of Orleans, departed, convinced that Rouen, like other great cities, presents too much to be seen, and too little to interest.

The first part of the journey from Rouen to Paris is on the banks of the Seine, then under Mount St Catherine, and afterwards over a considerably elevated ground. Cultivation is here pursued on an extensive scale, but the scene is uninteresting from its sameness and the total absence of inclosures, recalling to the English traveller the superior beauties of his own country. Passing a few dirty villages, you reach Bordeaux de Vigné a Magni, a considerable town, distant twenty-eight miles. From hence to Paris is a well-paved road, through the ancient town of Entreuil; the country here becomes more interesting and better peopled, though it has little else to denote its proximity to

the second capital of Europe. I arrived late, and put up at the Hotel de Conte.

I remained at Paris several days waiting for my passports, for which no less than seven signatures and as many francs were required. I was happy enough to find a worthy friend in the person of the late Colonel Mercer, who, with his amiable daughters, did every thing possible to lessen the expense and ennui of the delay. All public amusements were, however, prohibited for a certain period, in consequence of the Duke de Berri's death, much, I suspect, to the mortification of the Parisians, who, whatever be their love to the *grand monarque*, appear but little attached to his august family.

Paris has ever appeared to me dull, probably from my want of means to enter its vortex of dissipation ; but as I was not wholly insensible to the wish, I resolved immediately to quit it, leaving to others the task of describing over again what has so often been described. I set out, therefore, on the 20th, with the intention of crossing the Rhine at Frankfort, taking Nancy on the road. Twenty-two miles on my route lay the episcopal city of Meaux, whose cathedral is certainly deserving of notice, inasmuch as its exterior is completely finished, a rare case with French cathedrals. The country about it is low, and as uninteresting as the city itself. Passed the night at La Ferté sous Jouarre, a considerable town on the Marne, celebrated for its trade in mill-stones, which are thence exported in great numbers. I was too fatigued to enjoy more of the comforts of a decent auberge than that of a bed, such as it was, consisting only of a blanket, with my knapsack for a pillow. Reached Port-a-Binson, late the next evening, having gone through several considerable towns, among

which is Chateau Thierry, beautifully situated on both banks of the Marne, connected by two bridges, which are again connected by an island in the centre of the river. The country here assumes a more romantic appearance, and the people seem happier and more good natured, with less of that forward and impertinent curiosity so characteristic of French manners. At a distance of twenty-four miles, I reached Chalons, in Champagne. It was not probable I should pass this province without tapping a bottle of so celebrated a wine, with which the town of Epernay furnished me for three francs and a half.

Epernay, with its scenery, is truly romantic, as observed from an elevated situation above Chateau Thierry. It reminded me much of the scenery in the North of Portugal, near the river and bridge of Coa.

Leaving Chalons, I directed my steps towards St Dizier, over a hilly country. The road was bad, but rendered lighter by the company of some pedestrian travellers. Our route, however, was through a flourishing vineyard and a highly picturesque scenery, abounding with wood and water; but dirty and populous villages everywhere offended the eye, presenting a strange and paradoxical appearance, as if health and dirt were as congenial in France as health and cleanliness are in England.

I reached St Dizier late in the evening, exceedingly fatigued; put up at a decent public-house, where were plenty of other travellers enjoying the comforts of a Saturday night, when an extra franc is spent. The latter circumstance I mention, that gentlemen travellers (I know not to what classification of the tribe Laurence Sterne would have re-

ferred me) may observe, that we of humbler habits and pretensions have our red as well as black letter days. St Dizier is an ancient town, near the navigable part of the Marne, built in the year 951; and is the chief town in the department of the Meuse, lying in a fertile country. Grapes are here abundant, and many beautiful views may be glimpsed through thick groves and vineyards, common to this part of the country. Breakfasted at Barsur-Ornain, generally called Bar-le-Duc. The next place in point of rank, in the same department, is Ligny, with a collegiate church, and a palace belonging to the Counts of the same name. Passed through Void and St Aubin, the former, apparently, a pleasant lively place, containing three thousand inhabitants; thence, through Toul, an ancient bishopric of Lorraine. The country was hilly and fertile, producing abundance of good and tolerably cheap wine.

The following day I spent at Nancy, enjoying the beauties of this Bath of France, and capital of Lorraine. It is still a fine city, although dispossessed of its former privileges and honours. The buildings in general are noble; the Hotel de Ville superb; the Council House, in the new square, very fine; and the regularity and cleanliness of the streets deserving of praise. The promenades are kept in good order, and every thing denotes that Nancy is a well-conducted and highly civilized city. I took the benefit of a warm bath in excellent style for one franc, and next morning departed, taking the road to Metz, and enjoyed one of those delightful walks which seldom fall to the lot even of a traveller, much less to those slaves of ease who get up but to go to rest, and live but to die. The road stretched along the beautiful banks of the

Meuse, winding through numerous valleys, betwixt a succession of hills, whose summits assumed the form which sailors would term "table lands." I crossed the river by a well-built modern bridge, just at the point where the Meuse falls into the Moselle. The fertility and industry of this part of France are alike apparent; each side of the river was a continuity of vineyard or orchard, the river winding round the forest-topped hills, branching out at intervals into several streams, and then uniting in a sort of rapid. The numerous towns and villages, everywhere interspersed, exhibited their influence on the scene, pouring out to their healthful occupations a thick population of robust and cheerful labourers.

On the last day's march I fell in with one of Napoleon's soldiers, who had had the misfortune of being for two years and a half immured in a Russian prison, if the wilds of Siberian Tartary possess any building which can merit such an appellation. He protested "by his faith and respect for Napoleon;" and if I may judge from what I heard, I must suppose the expression spoke the sentiments of a large portion of the Bourbon subjects. His veracity was indeed questionable, declaring that he had been seven days without food, at Witepsk; and that out of five hundred and thirty Frenchmen confined in the same prison with himself, but twenty-three remained alive to tell the dreadful tale. It took them, he said, eight months' travelling to reach their destination at Tobolsk.

He was, however, a lively and even a serviceable companion; for, upon complaining of my feet becoming blistered, he communicated to me as a secret, a mode of cure which I have never found to fail. It is simply to rub the feet, at going to bed,

with spirits mixed with tallow dropped from a lighted candle into the palm of the hand. On the following morning no blisters will exist; the spirit seems to possess the healing power, the tallow serving only to keep the skin soft and pliant. The soles of the feet, the ankles, and insteps, should be rubbed well; and even where no blisters exist, the application may be usefully made as a preventive. Salt and water is a good substitute; and, while on this head, I would recommend foot-travellers never to wear right and left shoes; it is bad economy, and indeed serves to cramp the feet; and such I felt to be the case as I arrived at Port-à-Marsan, a pretty town, with a good inn and a better market. Thence, over a variously cultivated country, I reached the outworks of Metz, situated at the confluence of the Moselle and Seille, two rivers which are nearly carried round the city by the aid of canals, &c.

Metz is a place of great importance and strength, and has frequently endured the horrors of a siege. It is the see of a bishop, whose cathedral, like that of Rouen, is secluded among the habitations of barbers, tailors, and cobblers; like Rouen, too, it is but a dirty place. The dwellings of the Israelites are restricted to a particular part of the city; I saw a few of them, with their long beards and black cloaks—a distinctive dress which they are compelled to appear in.

Next morning, with the sound of the bugle, and at the opening of the gates, I resumed my march, having previously sent my knapsack by the diligence to Frankfort. The day proved fine, which enabled me to reach Sarrebruck, five miles within the barrier of Germany. The scenery was wild and interesting. Many cultivated spots smiled

through the immense dark forests ; and even on the frontier line, the romantic view, combined with the thought of entering a strange country, unknowing and unknown, and ignorant of its language, had nearly overpowered me, until the sight of a neat little public-house brought me back again to John Bull and his happy home. And although that part of the world may not bear a comparison with England, still the picture had many points of resemblance. The country was highly cultivated, and inhabited in the manner of straggling farms ; and the country inn, with its tap, and red-faced landlord, cheering fire, plenty of good beer, tobacco, a smoky room, with boisterous guests, all in high dispute on politics, and keeping up Saturday night, were no bad emblems of England, and, as such, truly acceptable to a cold, dispirited English traveller.

After a walk of forty miles, I supped with some itinerant Jews, upon a genuine German repast, viz. milk soup, fricasseed veal, pancakes, roast joint, with a sausage, called in London brawn. We had also our dessert, consisting of apples, pears, nuts, and good wine ; and with such fare and such company, I was bound to feel happy. Previous to retiring, I could not help remarking the difference in the education of a German and a Frenchman. The frontiers are the very best places to observe it ; address a German, however poor or vulgar his condition, upon any subject, and his answer will prove that he has been at least partially educated. Accost a Frenchman in like manner, and you will have for answer, " Monsieur, cela je ne puis pas vous dire," with a shrug of the shoulders, which none but a Frenchman can render equally expressive or ridiculous. Nor does the comparison stop here. The manners of the people, their diet, the econo-

my and cleanliness of their houses, nay, the modesty of their females—in a word, every thing that renders life agreeable, remind me forcibly that I am not going to bed in France.

I slept well, and, after paying twenty francs for the indorsement of my passport, having neglected to bring the Prussian claw from Paris, I resumed my journey. Three leagues over an uncultivated country, I passed the remains of an old castle and mutilated tower, and entered upon a finer prospect, with the pretty little town of Homburg in the foreground, at the foot of a mountainous precipice.

At Homburg I enjoyed my pipe and supper in company with my German landlord, whose extraordinary deference to my opinion was calculated to make me grow in favour with myself. My next destination was to Kaisers Lautern, over eight leagues of dreary and uninteresting country. Snow fell in considerable quantities, and every thing assumed the most dismal appearance, except that the cottages and smoke, peeping through the woods, denoted that something like man was not distant. At Landshut I attended the Protestant church, in spite of the very noisy and bad singing, and the remains of Romish indulgences, as keeping open shops, playing at cards, &c. Resumed my journey over an unpleasant wet road. The country appearing more cultivated, although barren of population, induced me to ask who tilled the lands; I could only, however, conclude that a class of people, called *Labradores* in Spain, come here to earn, like the Irish in our own country, a little money to enable them to go back to their homes.

Kaisers Lautern is a considerable town, with seven thousand inhabitants. It is well built, and so clean as to present somewhat of the appearance

of an English market or borough town. Its situation is agreeable, surrounded by high and cultivated lands. It is said to belong to the King of Bavaria at present ; at least the public-house at which I put up for the night belonged to his Majesty. Mayence, I believe, belongs to the Duke of Hesse Cassel. Frankfort is a free city, and Prussia is within a stone's throw, so that, in fact, it was difficult to know under whose colours I was wandering. So much for the acts of the great Vienna Congress, which have placed seven flags within the compass of two leagues.

Bidding adieu, however, to Kaisers Lautern and politics, I passed the fertile and picturesque plain on which it stands, and, ascending a long and steep hill, entered on a close country, covered with thick and impenetrable forests ; dined at Kirchin Boland, and reached Alzey late in the evening. The inhabitants were not remarkable for civility ; for the landlord of the inn I first stopped at, actually turned me out, because I was no more than a foot-traveller. I judged it better to pocket the affront ; and, having purchased a small loaf of bread, I pushed on, fatigued, cold, and mortified, till I reached a cottage, whose adjoining barn furnished my night's shelter, and I reposed with perfect content upon clean hay. Next morning I quitted my humble dwelling, and, accompanied by innumerable carts, carriages, and Jews, proceeded towards Frankfort. I arrived at Mayence, stopping at the Imperial hotel, near the cathedral, and obtained my first view of that city, which holds so high a rank in Germany. The privileges formerly appertaining to it and its archbishop, are gone on the same errand as many others, in consequence of the recent arrangements of the Congress of Sovereigns.

The Rhine here assumes a magnificent appearance, about the same width as the Thames at Westminster, and is crossed by a bridge formed of fifty-two boats, six hundred and thirty paces in length. Passing through a small fortified place opposite to the city, I pursued the road to Frankfort; and, after walking over an elevated and romantic country, (whose general scenery reminded me of the Sierras of Placentia, viewed from the high road between Badajos and Madrid, heightened as the comparison is by the striking similarity of the productions,) I was at length gratified with entering the free and independent city of Frankfort.

The approach is very pleasing, amidst orchards, gardens, and vineyards; and one of those small but beautiful towns, belonging to the opulent merchants, is contiguous to the city. The houses are all on an extensive scale; the architecture is good, and the material generally free-stone. Another range of stately edifices, now converted into manufactories, and buildings of every imaginable size and decoration, from the stately mansion to the comfortable residence, down even to the neat cottage and the miserable cabin, all are here seen promiscuously thrown together, and liberty seems to wave her triumphant banner over them.

I put up at the Wine Bush, a stately hotel, of which a Mr Mohr was landlord, and whose brother had kept a tavern in England for twenty-eight years; which, in consequence of some information lodged against him at the Alien Office, he had been compelled to quit, with an English wife and six children, to seek an asylum in his brother's hotel.

Frankfort, as a city, is too well known, and its fair too celebrated, to need description here. It was formerly a fortified place, but the walls have

been entirely demolished, and indeed their ruins are the best protection it can have. A young Livonian baron, whom I met at the ordinary, gave me letters of recommendation to the frontiers of Siberia, and I departed.

The month of March brought with it much snow, and made my walk to Hanau a dreary one. Next day, passing over a low, flat, and uninteresting country, I reached Schlucten. The road was in a dreadful state, and my feet equally so. I took temporary refuge in a small inn, whence I was soon driven by the rudeness of a sot. This fellow had even the audacity to follow me to another; but here his character was well known, and the opportune appearance of his wife, and her very free and dexterous use of a good cudgel, together with the remonstrances of the landlord, for a time rid me of his impertinence. Finding, however, a strong backer in his faithful dog, who would not permit any interference between man and wife, he again seated himself, and I set out once more in quest of a night's quarters.

Fuld, a beautiful little city, with a handsome cathedral, some colleges, two squares, many fine public and private buildings, and well-regulated promenades, was, after Nancy, the pleasantest place I had seen on my journey. I arrived very late, and much fatigued, having been induced to go so far by my companions, a wandering tailor, a regenerator of kettles, and an Italian cage-maker. Our community of fare enabled me to reduce my expenses one half, a measure not wholly unnecessary from the state of my purse. A miserable barn was our only shelter, which, it may be supposed, I quitted as soon as possible for Berka, ascending a steep hill, knee-deep in snow. The task was

difficult, nor did I arrive till noon. The view from the top of the hills which overhang Berka, was extensive but desolate ; hill, dale, and valley covered with snow, and nothing but the steeples of churches and the smoking chimneys to relieve the scene, till, late in the evening, I reached Saxe Gotha. It appeared a handsome city, with many fine edifices.

Erfurth, where I arrived at noon next day, lies in a deep valley, and is well fortified. The country round it is tolerably cultivated, and better peopled. It is remarkable as the place where the allied sovereigns met upon a raft to adjust measures for their relative aggrandizements. Here I saw, for the first time, bad black bread ; and here, also, a sight that richly compensated the other, viz. the first ray of the sun since I had left Paris. At Weimar I first met with sledges. Hence, in disobedience to the injunctions of the police at Erfurth, to wait upon the Russian minister plenipotentiary, I set forward to Naumburg. The road was as wretched as the scenery delightful ; lying through fertile valleys, studded with villages in all the varieties of picturesque situation ; the dark lofty oaks, shadowing the pure surface of the snow, contrasting with the beauty of the close green fir. I could gain no reception into any house at Naumburg, but that of a poor shoemaker, which I did at the price of a glass of schnaps ; for a second glass he mended my shoes and gaiters, and provided me with a truss of straw, on which I slept soundly.

Next day, accompanied by a Jew, I reached Leipsic, passing through Lutzen. The misery and barrenness of the scene fairly vie with the celebrity of its name. Four trees were pointed out to me as the spot at which the Ex-Emperor commenced his flight. Lutzen formerly belonged to Saxony,

but is now attached to Prussia ; a sad change for the poor inhabitants, who complain bitterly of the exactions enforced by their new master. Nothing in the scene of Lutzen denotes the proximity of so celebrated a capital and court as Leipsic ; which, in my judgment, will bear no comparison with Frankfort, except in size. I walked round this city the following day ; but as I have nothing good to say of it, I will at least abstain from depreciating it.

Travelling over a low country, and by a bad road, I reached the large, dirty, and scattered town of Dueben, the first in Prussia Proper, and standing on the banks of the Salle. My reception was uncivil, if not inhuman. My passport demanded, myself interrogated by a set of whiskered ruffians, obliged to move from one guard to another, the object of sarcasm and official tyranny, I wanted no inducement, fatigued as I was, to proceed on my journey ; but even this was not permitted me. A large public room, full of military rubbish, and two long benches, serving as chairs to an equally long table, were the place and furniture allotted me. I asked the landlord for supper ; he laughed at me ; and, to my demand of a bed, grinningly pointed to the floor, and refused me even a portion of the straw which had been brought in for the soldiers. Of all the demons that have ever existed or been imagined in human shape, I thought the landlord of the inn the blackest. The figure of Gil Perez occurred to me, but it sunk in the comparison with the wretch then before me, for ill-nature and personal hideousness. His face half covered with a black beard and large bristly whiskers ; his stature below the common ; his head sunk between the shoulders, to make room for the protuberance of his back ; his eyes buried in the ragged locks of his

lank grisly hair ;—add to this a club-foot, and a voice which, on every attempt of speech, was like the shrieking of a screech-owl, and you have some faint idea of this mockery of a man. For some time he strutted about, wrapped up with furs, which ill concealed the ragged testimonials of his wretched poverty, and taking immense quantities of snuff. The oaf at length deliberately opened a large box, and placing in it a pillow and some straw, wrapped a blanket round him, and committed his person to this rude but novel species of bed, shutting the lid half way down with a piece of wood apparently kept for that purpose. I confess my indignation was so strongly excited, that, had materials been at hand, I had the strongest inclination to nail the monster down in his den. My feelings resolved into a determination to run all risks for an escape ; and accordingly, getting out at the window in the middle of the night, I took the road to Wittenberg, where I arrived at eight o'clock in the morning, after travelling over fifteen miles of sandy common, having previously crossed the Elbe by a large wooden bridge. The river is formidable, and the city fortified. Every step of the latter part of this journey stamps on my mind the recollection of the mild character of the Saxon, compared with that of the ruffian Prussian. From Wittenberg to Treuenbrizen is a good road, but a few villages and a forest of firs constitute all that is visible, except a large dirty market-town, which, however, provided me with clean straw, and, consequently, with a good bed.

Being now arrived in the land of turnpikes, where good roads and post-houses never fail, I started for Potsdam, distant thirty miles, and arrived in the early part of the evening. A flat

country, sterile and almost deserted, save by the sandy pine, presents little to denote the approach to this *royal retreat*. With infinite difficulty I obtained admittance to a house, content to purchase black bread for my supper, and the use of a bench for my bed. Of Potsdam I can only say, that the appearance is handsome, the royal edifices extensive, and many private ones magnificent; but so great an air of melancholy pervades the place, that it seems a fitter residence for the dead than the living;—I had the less regret at bidding it adieu.

A fine avenue of trees and a good road conducted me to Berlin; nor could the fertile imagination of a Humboldt discover aught else to denote the approach to the capital of his own country. For myself, I perambulated the streets nearly the whole of the night in search of a lodging, and was at last compelled to sleep on a bench in the Promenade. Next morning I waited upon his Excellency Mr Rose, the British Minister, whom I found fully aware of the character of Berlin and its inhabitants. He was so good as to send one of his coachmen with me, and through so powerful an interference, I did at length get a *comfortable unfurnished room in the capital of Prussia*. It should, however, be observed, that the minister had offered me a room in his hotel, which my own independent plan, joined to a fear of incommoding his excellency, induced me to decline.

During my stay in Berlin, I had the honour of an invitation to a grand dinner given to the minister of Prussia and the foreign ambassadors, at which princes, counts, and dignitaries, down even to the pedestrian traveller, were present. The dinner and wines were considered the best and choicest; but I would have preferred a plain joint

and vegetables, to all their unmeaning nothings of made dishes, puffed cakes, &c. His excellency asked me why I did not eat; I replied, I had seen nothing to partake of, at least nothing to satisfy a hungry traveller. His excellency pardoned my honest boldness, and sent down a cold roast turkey and ham. Of these I had no difficulty in making a good dinner, and felt sensibly his excellency's kind consideration. His excellency the Russian ambassador had the goodness to present me with blank passports for whatever route I might prefer; an attention on his part, becoming the representative of his illustrious master. The young prince Labanoff was also of the party, whom I gratefully particularize as the kind facilitator of my journey to St Petersburg.

Berlin is seated on the Spree, which runs through various angles of the city. Many parts of it are handsomely built, especially what may be termed the court end; but every building, from the palace to the meanest hut, is built of brick, plastered over. In short, Berlin is all show—a forced place, having little commerce, and less content; no smiling faces—no mediocrity, that happiest of all conditions. Berlin contains nothing but the most hardened military despots, and is, in short, a mere court, though it contains two hundred thousand inhabitants. I saw no modes of gaining a livelihood, or even of passing time honestly. Billiards, cards, and dice, succeed to the spectacle of the parade, and the streets present nothing but sentinels on guard.

Though a pedestrian, I was the first bearer of the information of the Duke de Berri's death, a full month's post being due at Berlin, owing to the immense quantity of snow.

CHAPTER II.

Angermunde—Stettin—Corben—Cosben—Romini—Zanow—Schlavs—Lauenburg—Neustadt—Dantzic—Königsberg—Curisch Haff—Memel—Prolangen—Mittau—Riga—Dorpat—Narva—Yamberg—Kipene—St Petersburg.

THE road from Berlin to Stettin is over a bleak and uncultivated country, where neither wood nor water, and but few people, are to be met with. The first night I put up at an old town called Bernau, which threatens every day to fall on the heads of its inhabitants. Next day I reached Angermunde, having previously passed through Neustadt, where I had the comfort of dining upon pork, pease-pudding, and good beer. On the road are many small villages, inhabited by wood-cutters, which afforded strong proof of the high state of perfection to which the training of dogs may be brought, each of these animals drawing a considerable load of billet-wood.

In Angermunde, which is a considerable town, with a large inn, I found no improvement in the Prussian character. I had stopped in the forenoon for refreshment at a little public-house, where a carriage had previously halted; and, entering the tap, demanded some beer, bread, and cheese. The owner of the carriage was partaking of the same fare—good white bread and a bottle of ale. While

I was enjoying, in hope, my companionship in these delicacies, the landlord set down before me certainly the worst bread and dirtiest beer I had ever seen. On my requesting to be placed on the same footing, he simply replied that those already before me were far too good, and that if I did not eat them I might go without; and, suiting the word to the sentiment, he immediately carried them away. Nor could any thing induce the brute either to return these or sell me better, until my considerate fellow-traveller called, as for himself, for a fresh loaf and a bottle of ale, and, presenting them to me, expressed his regret that I should have been so insulted in the necessitous condition in which I appeared. I accepted his kind offer, and then discovered that he was not a Prussian but a Pole.

I departed with the intention of reaching Stettin that night. The road was lined with horse-patrol, ostensibly to prevent smuggling; but, in reality, to examine travellers and their papers. At five in the evening I came in sight of the ocean, and, in the midst of much fatigue, felt refreshed by the reflection that I was nearing a seaport. I passed the drawbridge at half past eight, just in time to prevent being locked out—a circumstance of near concernment to me, after forty miles of heavy and dreary walking.

Stettin played me the same trick as Berlin. I in vain demanded a night's lodging at three different houses, though I had previously ordered and eaten of as many suppers for that express inducement. I then retreated to the wharf, cold and snowy as it was, when chance threw me in the way of a brother tar; with generous humanity he roused me from the ground, on which I was lying,

nor did he leave me until, at-past midnight, he had succeeded in inducing the landlord of the Copenhagen Inn to receive me, on condition that my passport should be deposited in his hands as a security. A bed was provided me, and I soon drowned in sleep the memory of the country I was in, and the cares and fatigues I had undergone in reaching it.

Next morning I arose refreshed, and, in company of an honest Swede, waited upon his Excellency Mr Lutzen, the British consul, to whom I presented a recommendatory note from Mr Rose, who had given that very Mr L. his situation. The reception I met with was barely decent at the time, and, on the following day, an invitation was transmitted to "the English gentleman," to dine at his country seat. I confess I could not but regret that no Englishman should be found better qualified to do justice to my countrymen.

Stettin, on the left bank of the Oder, is a strong and commanding position. Many opulent and respectable merchants reside in it, who carry on an advantageous trade during the early part of the summer. No vessel of considerable burden can reach the city ; they are loaded thirty miles to the northward, at a place called Swinnerman, between which and Stettin is a large lake, at this season an entire sheet of ice. The town is said to contain twenty-two thousand inhabitants. It is the residence, or rather the lunatic asylum, of the dowager Princess, mother of the late Duchess of York. Her Highness is well treated, having also the use of a country residence.

Having refused Mr Lutzen's hospitality, I took the road to Dantzic, over pasture land, and reached Golnow, a large scattered town with a good

inn and civil landlord. A fair had been held for the last three days, and much bustle still prevailed; after a comfortable refreshment I set forward, and reached Newgard and Pinnow the following day, amid snow, wind, and rain. Corben and Cosben, two miserable places, in a swampy situation, next brought me up, having several times missed my road, and sometimes with but little hope of recovering it. One of these instances occurred in an attempt to cross a frozen lake. Fortunately the water was not so deep as to prevent my reaching the opposite shore. I then determined to steer one course till I made a land fall, which I was enabled to do by keeping right before the wind. It was now three o'clock, when a person whom I met informed me I had come but sixteen miles instead of thirty;—took a fresh departure, with good advice, and at last did well. Thus much for quitting the high road to make a short cut, which a pedestrian should never do, except under a certainty of being right.

A post-house called Romini, with a good civil landlord, better wife, and seven well-behaved children, made me welcome, dried my clothes, and gave me a glass of schnaps to keep me warm, while a good supper of beef and potatoes was preparing for me. Cold, wet, weary, and half-famished, I had entered the benevolent post-house; but one short hour restored me to life and good humour, and ultimately to the enjoyment of a clean bed, made on the spot for my accommodation, by filling a tick with hay, and sewing it up again. Happy, contented, though impoverished family, would to Heaven that benevolence like yours had more numerous followers among mankind! The whole property of this family could not have been

worth ten pounds. I had arrived in a most miserable plight, the heavy and frequent rains having dilapidated my apparel, which, even in good weather, was not calculated to last long. My cap I had lost in the icy swamp, and, in default, my head was bound up with a piece of red flannel. My trowsers were literally torn to tatters; my shoes tied to my feet, to prevent their falling off; my shirt, except a flannel one, and waistcoat, both superseded by my outer jacket. All I had retained was sound health and a contented mind, and I wanted no more; for this generous family had, during the night, put my entire wardrobe to rights; and I departed the following morning with sound clothing, and reflections of heartfelt gratitude to have met with the beneficial exercise of such qualities, in a quarter of the world where I had so little reason to expect them.

Over an execrable road, sandy heath, and in cheerless wintry weather, I resumed my route, and reached Zanow, on the banks of the little river Coslin. Here again I found a lodging in a cobbler's stall—it could scarcely be termed a room, being about nine feet square. An old bedstead and straw mattress served for him and his grandson in one corner; in the second was a fire place, but no fire; in the third, a cupboard with an empty glass and two or three broken plates; and, in the fourth, a board for his journeymen to work upon when he has business to employ them, which now served for my bed-place. In this state I passed the night, charmed with the contentment of old Crispin, whose whole happiness seemed wrapped up in the future welfare of his grandson. I was provided with some straw and a horse rug, which, however they might assimilate me to the inhabitants of a stable, were

truly acceptable ; for the night was cold, and the windows, which transmitted the light only through oiled paper, could not prevent the sensible intrusion of the cold air.

Next morning, in spite of the obstacle of a sprained ankle, I pushed on towards Schlaws, where I was taken before the magistrates, to answer the offence of smoking in the streets. My ignorance of the law, and my very palpable poverty, alone saved me from a fine. In the evening I reached Skolpe, over thirty-five miles of bad road. The police supplied me with quarters at the guard-house ; a circumstance rendered almost necessary to me, from the unaccountable, but manifest ill-will of the women towards me. The ill-fated Ledyard, had he been situated as I have often been, would have allowed exceptions to his beautiful encomium upon the benevolence of the fair sex. But Ledyard's fortune in this respect was better, and he was justified, by his own experience, in espousing the cause of the whole sex.

At the guard-house I entertained the people with the history of my travels, past, present, and to come, and so greatly were they interested by the recital, that they actually strove to lay me under a promise of not going beyond St Petersburg. They urged upon me their own habits and feelings so strongly indicative of contentment, and even proposed to me to take a farm among them ; but, from many reasons, I felt little disposed to adopt the suggestion.

Lauenburg next day became my halting-place, after twenty-seven miles' march ; the country becoming better cultivated and more peopled than of late. I endured much from the bad condition of my shoes, which the variations of weather made

alternately like sponge and horn. I repaired the mischief as well as possible with spirits and tallow, the only resource I had, for my finances were not in a condition to allow me a new pair. I reached Neustadt (eighteen miles,) almost sinking under pain and fatigue. From hence the country assumes a very picturesque appearance ; it bears, however, a desperately bad name, from the bands of robbers that infest it. For myself, I was so far from apprehension on this point, that I laid my account with having my necessities mitigated by their means. The people, however, were civil and obliging.

I now started for Dantzic, distant about thirty-three miles ; at about the tenth I was overtaken by the post-coach, and bargained for a conveyance for three francs. This wretched vehicle, which does not merit the name even of a waggon, professes to accommodate nine passengers. It has three benches—the two back ones looking toward the front, the centre bench without a back ; beyond the hindermost seat is the depository of the baggage, amounting to about one-third of the whole machine. It goes upon four wheels, each moving on a strong axle-tree, and is without any sort of spring whatever. The *tout ensemble* is probably more like a show-cart than any thing else.

Of its mortal contents, two were well-dressed young men, connected with the commerce of Dantzic ; a young nobleman about to join his regiment, to perform his regulated quota of a year's service ; two dashing females, setting their caps at the two merchants—(these were bound to Dantzic or Konigsberg, to open the season as the ice breaks up and ships arrive, then to return to Berlin, under the auspices of Madame B.) ; a sergeant of the

royal guard, having the charge of a priest, either banished or under arrest, for what offence I could not learn; they both appeared decent, well-behaved men. The eighth was a young Saxon Jew, from Leipsic, bound to Riga and St Petersburg. His person was rendered remarkable by his long white soft flaxen hair, and white eyelashes and eyebrows. He seemed about twenty, not deficient in common sense, although the company were much inclined to make him their butt. In this vehicle and this society I reached Dantzic, to my no small satisfaction; for surely no pretence of a conveyance ever yet put forth by man, can be compared with a Prussian post-coach. Just fifteen hours were consumed in going thirty-two miles.

The following morning I paid my respects to Mr Gibson, the British consul, who received me with his well-known cordiality and friendship. I dined with him; the intervening time being employed in walking about the city as much as the afflicted state of my feet would allow.

Dantzic is so well-known a place that I shall not enter on any description of it here. It was formerly a free city. Its immense fortifications, which require an army of thirty thousand men to defend them, and the numerous sieges it has undergone, have given it a high and deserved reputation. Its present population is forty-five thousand, all now in allegiance to the King of Prussia.

Though several inducements were held out to me to remain here, I stayed only long enough to view a painting in the Exchange, which is deserving of notice, and another, with a fine piece of sculpture, in the Cathedral. In the first, a boat is represented in the act of crossing the river Styx; and several persons, at that time residents of Dant-

zic, are pourtrayed as the passengers, the burgo-master and his daughter being particularly conspicuous. The story, however, says, that the natural anger of the parties thus libelled was appeased by the painter's consenting to add his own portrait to those already in the boat. The picture was then hung up in the Exchange; but the crafty artist contriving to gain admittance during the night, added to the figures that of an angel with a boat-hook stopping the boat, presumably in consequence of the painter's being in it. The burgomaster could not disguise his vexation, though the offence was thus neutralized; but the picture was suffered to remain.

The other painting, for which the Emperor Alexander is said to have offered twenty-five thousand guineas (query, roubles?) is a representation of the Last Day. It is said to be one of the most ancient, as well as finest specimens extant, and is the property of the city, who cannot alienate it. The sculpture, by Michael Angelo, of the Crucifixion, is said to have been done from the observations of real suffering, the artist having crucified and stabbed a boy expressly for that purpose.

With a strong pair of English shoes, the present of my friend, Mr Marshal, I departed, passing the range of fortified hills on the right, and the port of Dantzic with its shipping on the left. I now entered a well-cultivated country, passed the neat little town of Dnishaw, crossing the Vistula by a well-managed ferry. Thence to Marienberg, so celebrated for its castle, which I had no opportunity of seeing, as it was at that time undergoing repair. The following day I reached Elbing, over twenty miles, of low, cultivated country. It appeared a pretty town, having a good export trade by ves-

sels, which, though at fifty miles' distance, from the sea, come up even to the city walls. The third day I reached Konigsberg (thirty-five miles), extremely tired. Although a walled, it is not a fortified city; but contains sixty thousand inhabitants, and is certainly the second city in Prussia. The trade is considerable, though checked by the shallowness of the navigation, which obliges vessels of burden to load and unload their cargoes at Pillau. The privileges granted it by the present sovereign have, however, in some considerable degree, lightened the inconvenience.

My journey to Memel was over a cultivated country, until I got to the Curisch Haff, which I reached with some difficulty, having several times lost my way, and generally by misdirections. After a direct progress of only ten miles, an old woman (now, Ledyard, thou art right!) took pity upon me, and I passed the night comfortably under her roof. A good hot supper, with a drop of my landlady's cordial, so exhilarated me as to induce me to join a group of dancers, who were thus commemorating Good Friday, as well as celebrating a marriage, which had taken place that day between a young fisherman and the "maid of the inn." I had the honour of waltzing with the bride, a fine buxom girl of nineteen.

I hesitated a little, next morning, upon the advice of an old sailor, to stop at the village till the Haff broke up, when I might get a passage to Memel by water, free. The old tar had offered to find me in provisions for the consideration of my assistance, in the meantime, in hauling the net. Perhaps, under circumstances, I might have acceded, if I could have relied on the security; but fearing this, I resolved to attempt the crossing of

the Haff towards Krantz. I was, however, at the risk of my life, compelled to return, and only late at night reached a large fishing-village, called Jackaw. From thence, next day, along a sandy beach, with a sun which, even in this season and climate, enabled me to light my pipe by my spectacles, I got to a neat post-house at Nidden, situated in the midst of sand-hills.

A young recruit bound to Memel had been my companion the previous day. In the evening a few fishermen also going to Memel, offered us a passage in their boat; my companion consented on the instant, and, late and cold as it was, we embarked. The wind was fair, and we had but thirty-five miles to go. The crew consisted of two men and a woman, all three of whom laboured at the oar until midnight, when, having passed the village of Swat-sash, the boat encountered the ice, at a narrow part of the Haff, and, in the severity of the frost and the extreme darkness, we became completely blocked up. In this exigency, to give more room, the young recruit and I were obliged to quit. He, poor fellow! had been enjoying a sound sleep, wrapped up in great-coats; to him, therefore, this reverse seemed severer than to me. For myself, I felt aware of the impropriety of resuming the journey at that hour, hungry and fatigued as we were. But what was to be done? Return I would not, although a village was within two miles of us; yet to proceed was impossible, from our ignorance of the way, and the darkness of the night. We were also quite destitute of bread, tobacco, or schnaps, and my knapsack was in charge of the young Saxon, who had agreed to take it to Memel for me. I felt as if completely undone. Putting, however, a good face upon it, I took off my shoes, hat,

and jacket ; and taking a spare flannel waistcoat and drawers, which I had fortunately retained in a bundle, with a dry pair of worsted stockings, with this I made myself a bed, putting my feet into my hat, and pointing them towards the wind, and my shoes under my head for a pillow ; then lying down and drawing my jacket over my shoulders, I slept very soundly ; although, upon awaking next morning, I was both wet and stiff, yet after taking some strong exercise backwards and forwards, I recovered the use of my limbs and my health.

The recruit had not slept at all, but lay bemoaning his hard fate, which, indeed, was sufficiently severe ; his tight pantaloons, military boots, and tighter coat, exposing him much more than myself to the inclemency of the weather. As he was too obstinate to take my advice, or follow my example, all I could do was to pity him, and rouse him to take some violent exercise. This in some degree recovered him, and we moved on towards Memel, crossing the isthmus, and following the northern path. By seven in the morning we reached a tavern on the summit of a hill, which overlooks the city, and here I was obliged to leave him, in a state of fever. Upon my gaining the beach, it appeared doubtful whether the ferry-boat could attempt the passage or not, there being a heavy gale, and the ice driving with great velocity ; I, however, persevered, and was safely landed in Memel, in time to partake of a good dinner at the Sun Inn.

Memel is a highly respectable, convenient, commercial town. The harbour is small and secure. A good theatre, large church, public hospital, and a palace, are its principal buildings. Its trade would be much more considerable, were it not for

the monopolies and privileges granted to its rival Königsberg. Its exports and imports (the same commodities as in other Prussian towns) are mostly in the hands of Polish Jews, the merchants having little cordiality with each other. The contraband trade with Russia was formerly considerable, but heavy losses and heavier punishments seem to have subdued this spirit of speculation. I received great marks of kindness from its inhabitants, who even expostulated with me on my seemingly unhappy mode of life. If happiness, however, be the one pursuit in this world, it may admit of question whether a traveller does not attain a greater portion of it than most others; certainly more than those who languish on the lap of ease, and who, in one shape or other, feel the tortures of anxiety, though surrounded by all the luxuries which affluence can procure.

The Saxon having arrived with my knapsack, I departed, in company with a real friend, in the person of Mr Robson, who kindly gave me a seat in his carriage, as far as our road lay together. At thirteen versts we reached the frontier, at a small Russian town called Polangen. A police office, guard-house, and custom-house are established here. Our passports were backed for a silver rouble, and the same sum saved our baggage from a rude and useless search. The manifest advantage to the traveller in the regulations on the frontier, no less than the presence of Cossacks, served to remind me that I had entered the Russian empire.

The road to Liebau is generally through a sandy forest of pines, the trees of which were torn up by the roots, or bent double, by the effects of late gales, rendering the road difficult to pass. From Liebau we continued our route with post-horses,

harnessed in a teelega, a vehicle peculiar to Russia, and which certainly may remain so, being constructed on a model from which no other nation would desire to copy. It is sufficiently easy of description, being, in short, just the shape of a baker's trough, with open railings for the sides. It is long enough to lounge or even lie down in, and filled, as it is generally, with hay, is really no very unpleasant vehicle: the absence of springs being in some measure counterbalanced by the breadth of the axletrees and the smallness of the wheels; which, while it lessens the chance of overturning, renders the danger, in such an event, less imminent. Our route to Mittau was performed agreeably, and my friend did the honours as became one in his situation in life. The scenery was not devoid of interest, the country being well cultivated and tolerably wooded, though stragglingly inhabited.

Mittau, the ancient capital of Courland, has not much appearance of a city, though it seems to have been well built. The royal, or rather imperial, palaces, are extensive ranges of building converted to one use, all still in an unfinished state. We were detained some time by the ice in the river Aa, and nothing but an extra rouble could have passed us across. We had then to walk three miles to reach the post-house; here my friend, whose weight did not admit of his moving with the same velocity or ease as myself, was knocked up, and we halted for the night, receiving every civility and attention.

The banks of the Dwina and the city of Riga hove in sight the next day, and we reached the latter at noon. The history and description of this ancient city are well known. The emperor ap-

pears much attached to it, and has honoured the British consul, a gentleman and merchant, esteemed and respected by all classes, with particular marks of his consideration; having even condescended to accept apartments in his beautiful mansion. During the late invasion by Napoleon, the suburbs were burnt by order of the governor, on what authority I know not; but he preferred suicide to the survival of his honour, or the result of a court-martial. New edifices are now erecting on the site of the old suburbs, which bid fair to become the most beautiful part of the city. A magnificent view of the city, with the surrounding country highly cultivated, is commanded from the top of the Livonian steeple, three hundred feet high. Quitting Riga, still in company with Mr Robson, I continued in the same easy carriage, and over the same execrable sandy road, to Woolmar; the country thinly peopled and less cultivated. Here, to my extreme regret, and with a deep impression of his kindness, my friend and I parted, our routes lying at right angles. I was now, for the first time, alone in Russia, and my reflections on the circumstance were rather of a melancholy cast. At Stackeln I overtook the St Petersburg waggon, but its pace was too slow to induce my joining company; otherwise I would gladly have availed myself of it both for guidance and protection. I therefore pushed on, and soon reached the considerable village of Gulben; and next day, at Udin, I first trode Russian snow, proving that I had travelled faster than the seasons, as, though winter had passed me in the middle, I found it still lingering in the northern boundary of Europe.

The inhabitants hitherto appeared civil, and less

phlegmatic than the Germans; although an exception to this character had the knavery to make off with a pipe, a pound of tobacco, and the pair of shoes which I had received from Mr Marshall. Such things once lost, there is but little hope of their recovery; I therefore made no complaint. Reached Dorpat considerably fatigued, having walked forty miles from Teylitz. Upon my arrival it began to rain hard. I procured with difficulty a lodging in the entrance of a tallow-chandler's shop; at least such I judged it from the nature of its effluvia.

Dorpat is a beautiful little city, with an university; and bids fair, for its regularity and cleanliness, to vie with Nancy in France. It stands upon the right bank of the Ember. Handsome edifices, with an imperial palace; wide, clean, and regular streets; a beautiful stone bridge, in a picturesque and fertile country, with its local situation between two lakes, bespeak its important rank, independently of its antiquity.

On the following day I reached Nennal. I observed on my route none but ugly women and long-bearded men; a sterile country, and yet to me a costly one, for I was obliged to pay a silver rouble for a coffee-breakfast, a charge I shall take care never to incur again, as not suiting the state of my finances. In spite of the approach of spring, the weather seemed to increase in coldness, and some snow fell; but my anxiety induced me to push for Narva, where I arrived in time to breakfast; the road relieved only with imperial post-houses.

Narva, a considerable town, and the first in the government of St Petersburg, possesses massive remains of an ancient fortress, built by Ivan Vasilich the Great, overhanging the perpendicular

banks of the Narova. It carries too much of a military air for me to particularize.

When on the point of resuming my journey, I was accosted by a black gentleman, who, as he informed me, was a resident and retired merchant of St Petersburg. Understanding that I was a foreigner, he entered into many inquiries with me, of my rank, country, the object of my travels, and my reason for pursuing them on foot. To these questions I replied; and to the last simply observed, that I was in the habit of travelling on foot, and that indeed I could not afford to see the world in any more convenient manner. He expressed his regret that a man of *my merit* had not been better rewarded by fortune, and his satisfaction, at the same time, that he had it in his power to offer me a lift, even to the capital of Russia, having two carriages empty; and though he was prevented by an affair of importance from resuming the journey that day, I accepted the offer, and agreed to wait his pleasure, rejoiced at the opportunity afforded me of entering the imperial capital in style, with less expense and still less fatigue. In the meantime we eat and drank freely at his charge; and, not to appear backward, I ordered for myself the luxury of a proper bedroom, where I slept well.

I learnt next morning that the important business which had detained my friend, was neither more nor less than an intrigue with a rosy-cheeked chambermaid. This being dispatched, we departed; he in the first and I in the second carriage, each drawn by four horses. I had a specific charge from him to use no ceremony in abusing the coachman, if he should slacken in his driving. I soon forgot this admonition in a sound

sleep, for which, by the by, I afterwards got a severe reprimand.

We passed through Yamberg, an imperial residence in a ruinous state; when the Gulf of Finland, opening to our view, presented to us an immense mass of ice, studded with little snowy hillocks, but without a single vessel over its whole surface.

We reached Kipene the next evening, where we halted for post-horses. The country had been a low overflowed desert. The weather was cold; and I was reminded by my feelings that we had reached about the latitude of 60°. My companion, having again treated me with supper and bed, left me for the night, evidently a little nettled at his ill success in engaging the affections of a little Russian girl, who had waited on us at table.

While at breakfast next morning, and just as the horses were announced, my companion asked me whether I was furnished with a passport. I replied in the affirmative. He requested to see it; and, observing my name, inquired if I was related to "Admiral *Kakran*, who was in de West Indies, at de capture of de Danish Islands in 1807?" Being informed I was the admiral's nephew, he asked, "Are you the son of Massa *Kakran Jahnstone*?"—"Yes, I am."—"You are, den," said he, "dat lilly Massa Jonny I know at de same time." It now turned out that this black gentleman, with the two carriages and four horses each, had been my father's and my uncle's servant thirteen years before. Having talked over old matters, he remarked that he could never have recognised me, from the alteration that time had made in my features; observing that I seemed to have verified the West Indian proverb, "Like the black man's

pig, *very lilly, but dam old.*" I acknowledged the justice of the remark, and proceeded to inquire his history; but as he did not seem inclined to be communicative on this head, I did not press him; and we proceeded—both in the same carriage, my friend no longer considering me as a *menial follower*.

At noon, on the 30th of April, I reached St Petersburg, having been eighty-three days from London in performing a distance of sixteen hundred miles, an average of nearly twenty miles a-day. My sable friend, at parting, declined to give me his address. I suppressed my chagrin; but felt an increased curiosity to learn the source of his wealth and his situation in life.

The following morning I was relating the adventure at a friend's house, where Doctor Ryan (the medical attendant of the young Prince Labanoff's family, with whom I had dined at the house of Mr Rose, in Berlin) was present. He was mentioning that the young prince, being on the road from Petersburg to Berlin, had been overtaken by winter in his summer carriage; and, as the latter season was near at hand, had sent his black servant to Narva, to bring his carriages to the capital. Fortune's frolic was now explained; my wealthy, dashing, overbearing, and intriguing companion, being no more than the very humble attendant of his highness.

Having once got settled in a comfortable lodging, my first duty was to call upon Sir Daniel Bailey, the British consul-general, then the only representative of the British court; Lord Cathcart having quitted St Petersburg, and Mr Casamajor deceased. In Sir Daniel I found, not only a sincere friend, but an able advocate for the plans I had in

view. Through his means I transmitted a memorial to Count Nesselrode, the foreign minister, who handed it to Count Kotchoubey for the approbation of his Imperial Majesty. The memorial contained a request that I might be permitted to pass through the Russian empire, on my way to America, either by Kamtchatka, or Behring's Straits. I also solicited a sealed mandate from the Emperor, with an order to all governors and persons in authority to assist me to the utmost of their power; besides an open order to the police, not to interfere with or molest me. I requested, in addition, an especial letter to the governor-general of Siberia.

I had been given to understand that his Imperial Majesty had no objections to my proceeding upon my journey, although he expressed a belief that, when I should be furnished with the required documents, I should flinch from my purpose. I soon, however, satisfied the minister upon this point, by declaring I would be ready to set out at half an hour's notice. In the meantime, the intendant-general of police gave me three audiences, examining me as to my rank and condition, my plan and its object, with the *et cetera* of interrogatories, administered by persons in official situations when desirous of extracting information beyond the avowed object.

His excellency at length promised me his assistance, and recommended me to Count Kotchoubey, into whose hands my business had entirely fallen. The count also gave me three audiences, repeating the same interrogatories as the intendant. Finding, however, that I adhered to one simple story—stating, as my object, a wish to employ, improve, and amuse myself, at the same time

rendering to society all the service of which I was capable—his excellency also dismissed me with favour; and through his interference, sanctioned by the generosity and noble-mindedness of the Emperor, I procured even more than I had expected or demanded. His Imperial Majesty had also the consideration to ask Colonel Cathcart, who had recently arrived as successor to Mr Casamajor, whether I wanted money, and how much, to enable me to start. I replied in the negative, expressing, very truly, my surprise and gratitude at the offer. I was, moreover, instructed, in case of such necessity, to apply to the respective governors at the places I should pass.

That this unsolicited munificence, on the part of the Emperor, could only have sprung from the generous feelings of his heart, and was not adopted as a *façon de parler*, is clear, from the fact that his Imperial majesty did afterwards request of Sir Charles Bagot to be informed whether I really needed money, accompanied with an intimation, that, in such case, I should be supplied from the imperial treasury. I think I do no wrong to any one, in believing that no other crowned head in Europe would have given itself any concern about me, or my affairs, or have taken any notice of a stranger presenting himself, without any recommendation of any weight, with the single exception of a private letter of introduction to Sir Robert Kerr Porter.

Among other intimations made to me, as from the Emperor, was one which, I believe, originated with the directors of the Russian American company: it was in the shape of a request that I should refrain from making any inquiries respecting the affairs of the said company. Coming through a

public channel, I of course considered it my duty to promise a compliance with the request, though it appeared to me singular that the Russian company should have for one moment suspected me of ill-will towards them, or of being employed as a spy on their affairs. It is, however, certain that they had some apprehension of this sort; as they not only threw obstructions in my way to the Emperor, but after offering and promising me letters of recommendation to their different settlements and chancellories, refused them, upon the plea that they were useless, from my ignorance of the Russian language. Whether Mr Crammer, their director, from whom this unlooked-for and unhand-some treatment emanated, believed that Russian civility should be limited to those who understood the language, I know not; if he did, every considerate person must perceive that the less I understood of the manners, language, and customs of any foreign country, the more I actually stood in need of assistance in it. Were the company conscious that their affairs required secrecy, their harsh conduct towards me was certainly the least likely mode of binding me to their interests, or of securing the fulfilment of any promise they might oblige me to make, beyond those confined to ocular demonstration and strict neutrality of speech.

During my three weeks stay in St Petersburg, I was most hospitably received by several respectable British merchants. I employed the spare time in walking about the capital and viewing its wonders; and although I abandon the description of them, as a task beyond my power, I cannot help saying, that no city I have seen can equal it in external magnificence. Large, straight, and parallel streets, noble public buildings in every

style of architecture, numerous imperial and private palaces, handsome pavements for carriages and foot passengers, several beautiful canals running round and through the city, and carrying away every offensive matter, the perfect cleanliness in every part, its immense number of churches, and lastly, its magnificent river washing the finest quays in Europe;—these are only the more striking features of St Petersburg. The bustle in most of the principal streets, and the number of vehicles of various descriptions, add to its importance. It is, however, a little too stiffened with a military air, being everywhere crowded with soldiers and police officers, and the daily parades are better attended than the workshops and manufactories. Nor is this tendency surprising, when it is considered that, in one short war, Russia has arisen from comparative insignificance, to rank as the third, if not the second military power in Europe. It may indeed be objected that her advances are too rapid for her age; but this point I leave for discussion to those who have not before them a journey of eight or ten thousand miles, for which I have not a single hour to make preparation.

CHAPTER III.

St Petersburg—Tzarsko Selo—Tosna—Novgorod—Zaitzova—Yedrova—Vishney-Volotchok—Torjock—Tver—Davidova—Moscow—Vladimir—Dra'chevo—Pogost—Pavlovo—Nishney Novgorod.

I WAS now furnished with all the documents which I had deemed necessary. They consisted of the following: The customary passport, with the substitution of the minister's for the governor-general's signature; a secret letter to the governor-general of Siberia; and two official documents which I shall give at length.

The first of these (addressed—"To all civil governors," and signed by the minister of the interior) states, that "The bearer hereof, Captain John Cochrane, of the British royal navy, purposing to travel through Russia on foot, is now on his departure for Kamtchatka, with the intention of penetrating from thence to America.

"Having, by the command of his Imperial Majesty, provided this traveller with open instructions to the police of all the towns and provinces lying in his track from St Petersburg to Kamtchatka, this is also to desire all the chiefs of the different governments through which he may travel, to aid Captain Cochrane, as far as possible,

to proceed on his journey without interruption, as well as to afford him lawful defence and protection, in case it should be desired."

The other was an "open order of his Imperial Majesty Alexander the First, Autocrat of all the Russias," &c. &c. &c. signed by the same minister, and stating, that "The bearer hereof, Captain John Cochrane, of his Britannic Majesty's royal navy, having undertaken to travel on foot through the Russian empire, is now on his way to Kamtchatka, intending from thence to pass over to America. The police of the towns and provinces lying in his track from St Petersburg to Kamtchatka, are, in consequence hereof, not only forbidden to obstruct Captain Cochrane in his journey, but are moreover commanded, in case of necessity, to afford him every possible assistance."

I quitted the hospitable habitation of Sir Robert Kerr Porter, on the 24th of May; and, having had a lift in the carriage with four horses of Sir Robert, I, with my knapsack on my back, set out, and trotted over a partially cultivated country. A pretty avenue of birch trees lined the road, as if to accompany me as far as possible on my departure from the precincts of civilized man. Nature here got the better of a tolerably stout heart; and, as I turned round to catch a last glimpse of the capital I had left, and of the friends to whom I had bade, perhaps, a last adieu, I could not suppress my grief, and, had not my honour been committed, should certainly have returned. A sigh escaped me as I ejaculated a last farewell, till, startling at the expression of my weakness, I resumed my journey with slow and melancholy steps.

It was ten o'clock, (for I had now a watch),

and I had reached six miles. The night was beautifully clear, though rather cold from the effects of a northern breeze ; while the moon was near her full. I looked at the beautiful luminary, and actually asked myself whether I were, as had been asserted, under the baneful influence of that planet. Smiling that I received no reply, I then considered my projects and intentions, and the conduct I ought to follow ; and, sitting down at a fountain on the Poulkousky hill, I read to myself a few lessons, which the time and the occasion seemed to inspire. “ Go,” said I, “ and wander with the illiterate and almost brutal savage !—go and be the companion of the ferocious beast !—go and contemplate the human being in every element and climate, whether civilized or savage—of whatever tribe, nation, or religion. Make due allowance for the rusticity of their manners ; nor be tempted to cope with them in those taunts, insults, and rudeness, to which the nature of thy enterprise will subject thee. Contemn those incidental circumstances which but too often surprise mankind from their good intentions, and deprive the world of much useful and interesting information. Avoid all political and military topics, and remember, that

The proper study of mankind is man.

Should robbers attack thee, do not, by a foolish resistance, endanger thy life. Man may become hardened by crimes, and persist in the practice of them, till, meeting with resistance, he will be urged to murder ; but man is still a humane being, even while seeking his subsistence by rapine and plunder ; and seldom, from mere wantonness, will he spill the blood of his fellow-creature. It is

only by patience, perseverance, and humility, by reducing thyself to the lowest level of mankind, that thou canst expect to pass through the ordeal with either safety or satisfaction." Something like these were my self-dictated precepts, and I pledged their performance in a draught from the cool and limpid fountain.

In company with some carters I resumed my journey; and depositing my knapsack in one of their vehicles, entered into conversation as well as my scanty knowledge of German would allow me.

As we proceeded, there suddenly rose to the south-east a tremendous blaze, the cause of which it seemed difficult to conjecture. At first I imagined it might be, as I had often seen in England, a blazing bonfire, with a group of mirthful rustics revelling round it. But the scene grew soon too terrific to allow of so simple a solution, the flame rising to a prodigious height, and the smoke rolling into a beautiful dark arch on the clear sky. Immense masses of fire, and sparks at intervals, exploded and separated like a rocket.

We continued to gaze as we advanced, till, on reaching the beautiful town of Tzarsko Selo, the source was indeed but too apparent; it was the Emperor's favourite palace wrapped in an extinguishable flame. I had looked forward with hope to enjoy the survey of so celebrated an edifice, and had actually taken a letter of recommendation to Prince Theodore Galitzin, one of its principal inhabitants, that I might with the more facility have my desire gratified. It was midnight; parties of men surrounded the wasting pile. All, however, was order and regularity; not a voice was heard amid the thousands of people employed.

The Emperor was present, evidently impressed with extreme regret, and all appeared powerfully to partake the sentiment. His Majesty, however, continued to give frequent directions with perfect coolness.

Tzarsko Selo was the palace in which the Emperor and his brother Constantine had been brought up, and passed their earlier years; it was hither also that the Emperor was accustomed to retire, when the cares of state permitted him, to lose among its beauties the anxieties of a throne and the toils of so great a government. It had been greatly embellished by his Majesty, and was considered one of the most beautiful retreats in Europe. Years of time, and millions of money, I thought, must be expended, to make it what it was but yesterday morning.

Being excessively fatigued, and finding my individual exertions perfectly useless towards checking the progress of the flames, I retired to the gardens, where I passed a couple of restless hours on a bed of moss, amid herbs and flowers, whose sweet perfumes were as yet unvanquished by the fire or smoke. Some demon seemed to hover over me, and my dreams presented the probable incidents of my journey, in all the horrors which imagination could shadow forth. I arose, and returned to the scene of devastation, now evidently increasing, and appearing to defy the numerous engines pouring upon it from all sides.

The dome of the church fell with a tremendous crash; and such was the immense mass of fire that fell with it, and so great the force of the rebound, that in its second descent, and assisted by the wind, it set fire to two other parts of the palace, until then considered safe. At this critical

moment his Imperial Majesty gave a strong proof of steady collectedness. While the fire was raging from apartment to apartment, apparently mocking the resistance of man, the Emperor gave direction that the doors should be walled up with bricks. This was instantly done, and by such an expedient alone could the amber, the most valuable chamber, have been wrested from the general destruction.

Having taken breakfast with Prince Theodore, and amused myself with the infantine prattle of his children, whether in the French, English, or German languages, for they seemed anxious to show off the proficiency they had made, I proceeded towards Tosna, where I arrived at seven in the evening. Young firs and birch border the road, which is good; though the country presents but little of interest, and seems to support but a slender population, considering its proximity to the capital.

I passed the night in the cottage of a farmer, resigning myself to the attacks and annoyance of such vermin as generally haunt impoverished dwellings, and was therefore proportionably pleased in the morning to resume my journey. My route was towards Liubane, at about the ninth milestone from which I sat down, to smoke a cigar or pipe, as fancy might dictate; I was suddenly seized from behind by two ruffians, whose visages were as much concealed as the oddness of their dress would permit. One of them, who held an iron bar in his hand, dragged me by the collar towards the forest, while the other, with a bayoneted musket, pushed me on in such a manner as to make me move with more than ordinary celerity; a boy, auxiliary to these vagabonds, was stationed on the road-side to keep a look-out.

We had got some sixty or eighty paces into the thickest part of the forest, when I was desired to undress, and having stripped off my trowsers and jacket, then my shirt, and, finally, my shoes and stockings, they proceeded to tie me to a tree. From this ceremony, and from the manner of it, I fully concluded that they intended to try the effect of a musket upon me, by firing at me as they would at a mark. I was, however, reserved for fresh scenes; the villains, with much *sang froid*, seated themselves at my feet, and rifled my knapsack and pockets, even cutting out the linings of the clothes in search of bank bills or some other valuable articles. They then compelled me to take at least a pound of black bread, and a glass of rum, poured from a small flask which had been suspended from my neck. Having appropriated my trowsers, shirts, stockings, and English shooting shoes, (the last of which I regretted most of all, as they were a present from Sir D. Bailey,) as also my spectacles, watch, compass, thermometer, and small pocket-sextant, with one hundred and sixty roubles, (about seven pounds,) they at length released me from the tree, and, at the point of a stiletto, made me swear that I would not inform against them—such, at least, I conjectured to be their meaning, though of their language I understood not a word.

Having received my promise, I was again treated to bread and rum, and once more fastened to the tree, in which condition they finally abandoned me. Not long after a boy who was passing heard my cries, and set me at liberty. I did not doubt he was sent by my late companions upon so considerate an errand, and felt so far grateful; though it might require something more than common

charity to forgive their depriving me of my shirt and trowsers, and leaving me almost as naked as I came into the world.

To pursue my route, or return to Tzarsko Selo, would indeed be alike indecent and ridiculous, but there being no remedy, I made therefore "forward" the order of the day; and having first, with the remnant of my apparel, rigged myself *à l'Écossoise*, I resumed my route. I had still left me a blue jacket, a flannel waistcoat, and a spare one, which I tied round my waist in such a manner that it reached down to the knees; my empty knapsack was restored to its old place, and I trotted on with even a merry heart.

Within a few miles I passed betwixt files of soldiers employed in making a new road, under the orders of General Woronoff, upon whom I waited to report the situation in which I was placed. The servant, perhaps naturally enough, refused to let me pass without first acquainting his excellency with my business; I, however, steadily persisted in my determination; and at length, hearing the noise and scuffle of turning me out, the general appeared, and listened to my mournful tale. The good heart of his excellency suggested the necessity of first administering me food; some clothes were then offered to me, which I declined, considering my then dress as peculiarly, as well as nationally, becoming. The general then sent an officer with two men back to the village, to make inquiries concerning the robbery. These were, however, fruitless, and I quitted, with many thanks to his excellency, in his own carriage, which was directed to take me the first station. I soon discovered that carriage-riding was too cold, and therefore preferred walking, barefooted as I was;

and on the following morning I reached Tschduvo, a low and uncultivated waste, a hundred miles from St Petersburg. Thence to Podberezie, and thence to Novgorod. I had passed on the road many populous and neat villages, and numerous tents belonging to the military workmen, which gave additional interest to a fertile and picturesque scenery. To the left was the river Volkhoff, on which Novgorod stands. The approach is grand, and the numerous spires and steeples of the churches and convents, with their gilded and silvered casements glittering in the sun, recalled for a moment the memory of its ancient splendour. Crossing the bridge, I entered at two o'clock, and immediately waited on the governor. He would have provided me with clothing on the instant; I was, however, hungry, and requested food. The governor smiled, but assented, and I then accepted a shirt and trowsers.

I was recommended by his excellency to stop at Novgorod a few days, under the promise that he would apprehend the robbers. I told him I felt no doubt they would be discovered; but before that time I should have reached the heart of Siberia. Good quarters were, meantime, provided me in the habitation of a Russian merchant, to whom I had a letter of recommendation from St Petersburg. He had also the kind consideration to provide me a complete refit; and though this must have been at an expense of thirty or forty roubles, he positively refused my offer of reimbursement—an offer I was enabled to make through the delicate kindness of his excellency the Governor Gerebzoſf.

This ancient and celebrated city, which in former days was characterised by the proverb, “ Who

can resist the Gods and the great Novgorod?" is now only the capital of a province of its own name. In its former glory it was the metropolis of a great republic, with four hundred thousand souls within its walls. The population is now reduced to a fortieth part. Its immense trade had been gradually declining since the cruelties of Ivan Vassilich II., and was completely annihilated by the removal of the seat of government, by Peter the Great, from Moscow to the Gulf of Finland. Many handsome edifices, now in ruins, are lamentable proofs of its former grandeur and present decay. Its archiepiscopal cathedral, small, but very ancient, is filled with superstitious relics, and the ashes of several Russian Grand Dukes.

The steeples of Novgorod present a monument of considerable pride in the estimation of its inhabitants. Their distinction is in the cross at the top standing alone, unaccompanied by the crescent; and this is an emblem, intimating that the Tartars, in all their invasions, never succeeded so far as to enter this city. A distinction which universally holds in Russia; the reconquered cities bearing the crescent, but surmounted by the cross.

The following day, being that of Pentecost, I attended the service in the cathedral; and though I understood nothing of the language, yet was I forcibly struck with the primitive appearance of the clergy in their long beards, longer tresses, and still longer robes. They certainly carried all the appearance of devout ministers of religion.

I had intended, from Novgorod, a visit to Mr Glenny, at his establishment, eight miles distant, on the banks of the Veshora. Not finding him, however, I put up at a farm-house for the night, having previously drunk kuass at a convent, paid

a rouble for charity, and received a blessing upon entering Muscovy—not without a hope that I should find better treatment here than in Esthonia. Next day, passing over a wild dreary waste to Zaitzova, a pleasant town, of fifteen hundred inhabitants, I put up at a civil house, if the admission of both sexes, and of all ranks and dispositions, may deserve such a term ; the variety was indeed ludicrous enough, but the conduct and conversation were not of such a nature as to merit description.

The women of Muscovy hitherto appear civil and cleanly dressed, though disfigured by the abominable custom of tying their breasts as low, flat, and tight as possible ; they are not, however, quite so ludicrous as some of the creoles and slaves in the West Indies, who often suckle their children behind their backs. The men appear equally civil, obliging, and hospitable, but almost equally disguised by their swaddling coat of cloth or sheepskin, coloured trowsers, and immense boots, sash round the body, a wide-rimmed hat, and long beard ; a mode of dress which certainly gives them something of a ferocious appearance.

On the road to Yedrova I received two roubles as charity from the master of a post-house, from whom also I had received refreshment gratis. Knowing, as I did, that assistance was at hand, I declined the money, although my then distressed state might have warranted my open acceptance of it. I continued my route ; and, upon my arrival at the next station, I found the money in my cap. This is, indeed, real benevolence.

The canals are observable to the east, and present a beautiful appearance from the neat town of Yedrova. Reached Vishney-Volotchok late at night, a large scattered but flourishing town, for-

merly an imperial village, but enfranchised by Catherine, with canals uniting the trades of the Caspian and Baltic seas. I had previously crossed the Valday hills, which are the only elevations between the two capitals. They are in the government of Novgorod, as is also the Valday lake, nine miles in circumference. It has an island in its centre, on which stands a handsome monastery, which, with its steeples glittering through the dark foliage of its intervening woods, forms a beautiful and interesting object. There is also a little town of the same name on its banks. The land here rises into gentle eminences, with a good deal of cultivation.

Torjock was the next flourishing town which I reached, amid rain and thunder. This slight impediment, which broke up my travelling for the day, richly compensated the delay, by introducing me, first, to an excellent supper, gratis ; and, secondly, to a beautiful and kind-hearted young widow, sister of the unfortunate Captain Golovnin, who was so inhumanly exposed in a cage at Japan. The master of the public house had civilly received me, and I was enjoying my own meditations, when Mrs Golovnin entered my room, accosting me in German, French, Russian, and lastly in my native tongue. After the manner of her sex, she got all my secrets out of me—but one—and in return sent me some tea, proffering, at the same time, the assistance of her purse. Had she offered me her hand and heart, I certainly should have replied otherwise than I did, for I felt very affectionately and gratefully towards so kind and lovely a woman, and who, although a widow, had yet scarcely passed her teens. Upon getting up in the morning, I discovered that my knapsack had been

searched, and my small stock of linen had been taken out and washed ; but of course not the smallest article was missing.

I refreshed myself at the fount, (which is always at hand in a Russian cottage, with a tea-kettle or other spouted vessel hanging over it,) breakfasted, and, making my *congé* to the household gods in the near corner of the room, departed from Torjock. I had not proceeded far when I met a carriage, and immediately heard myself addressed in the English language—"How do you do, Captain Cochrane?" On my acknowledging the name, the carriage stopped, and the owner, who proved to be a Mr Hippus, and had for some time been on the look-out for me, treated me very heartily to a biscuit and glass of wine. I then wished him a pleasant journey, and resumed mine, light as a lark at the unexpected pleasure of seeing English faces, and hearing my own tongue. Those who have been similarly situated, can readily conceive how happy I was to have met with a countryman in such a manner.

My way lay over a country where the Tver is a wandering stream, and where numerous handsome seats and neat villages made their appearance. These, however, but too strongly reminded me of the effects of absenteeism in Ireland, being evidently in a rapid state of decay. I have no hesitation, however, in saying, that the condition of the peasantry here is far superior to that class in Ireland. In Russia provisions are plentiful, good, and cheap ; while in Ireland they are scanty, poor, and dear, the best part being exported from the latter country, whilst the local impediments in the other render them not worth that expense. Good comfortable log-houses are here found in

every village ; immense droves of cattle are scattered over an unlimited pasture, and whole forests of fuel may be obtained for a trifle. With ordinary industry and economy the Russian peasant may become rich, especially those of the villages situated between the capitals, both of which might be supplied by them with butter and cheese ; whereas at present not a dairy exists, the peasantry contenting themselves with the culture of as much land, and the breeding of as many cattle, as may be sufficient for their immediate wants. The women I have always found engaged in some employment ; they make very good coarse woollen cloths and linens, as well as knit stockings and spin thread. The whole work of the house is thrown upon them, while they also partake the labours of the field. I will not certainly recommend, for the adoption of any civilized countries, the treatment they receive from their lordly masters ; although I have no doubt the like was the custom of England half a century ago, and may be still in the hard-working counties. Having mentioned Ireland in comparison with Russia, I may remark, that both countries may fairly vie with one another in the ancient savage virtue of hospitality.

Reached Tver the following day, and put up at the habitation of a long-bearded merchant ; where, after enjoying a good supper and sound sleep, I employed myself in perambulating the city. It is said to contain fifteen thousand inhabitants, being considerably larger, or at least more populous than Novgorod. Tver is situated at the junction of two small rivers, which empty themselves into the noble Volga ; the latter hence taking an easterly course towards Nishney Novgorod, and fertilizing, in its

course to the Caspian, some of the finest provinces in the Russian empire.

The first circumstance which attracted my notice upon reaching Tver, was at the gate, where an impost of three large stones is levied upon every horse that passes. These are converted to the paving of the city; nor will the tax appear either slight or useless in a country where stones are not very abundant.

Crossing the river over a fine bridge of boats, of 550 feet in length, I entered the principal part of the city. The public edifices on the banks of the Volga are handsome, and kept in good order, though the archbishop's palace resembles one of our workhouses. There is also a theatre, good barracks, and a beautiful building called the Prince's Palace, rebuilt by Catherine. The cathedral is of plain stone; there are, besides, thirty-four churches and three convents, (one of which is said to contain the ashes of a page, whose prince deprived him of his mistress at the moment of their marriage, and afterwards, when too late, repenting of it, and wishing to expiate his crime, had this convent built,)—two of them are for men and one for women; three hospitals are also established upon a liberal plan, and a bazar, with handsome piazzas, forms the city lounge. The public gardens and walks are certainly susceptible of improvement; but, upon the whole, it has a clean and regular appearance, and bids fair, from its trade and situation, to become an important city. The government exports immense quantities of grain from hence to St Petersburg, and two hundred barges were now lying off the city loaded with that article, and with several millions of eggs.

A young Frenchman, who had been five times

wounded in the battle of Borodino!!! accompanied me in my rambles. He prefers, it seems, to remain here, teaching his native language, rather than return to his native country. He murmured a little at the facility with which his scholars acquired the tongue; remarking also, what I believe is now generally acknowledged, the general aptitude of the Russian, whether in learning or teaching. I visited among other things a canal, which the last of the independent princes projected and began, to shorten a communication, as well as to form a winter haven for the barges and other small craft, which were, and indeed are still, exposed to considerable danger from the ice in the Volga. A mile only is wanting to complete this great and useful undertaking, in the junction of the Tmak and Volga. Of the earth thrown out during the excavation, has been formed at once a good road and a strong rampart to the city.

It was at Tver that I first began to comprehend any thing of the Russian hierarchy. It appears that the Greek church admits of two distinct classes and degrees, which may be called monastic and lay orders; to the first of which belong metropolitans, archbishops, bishops, archimandrites, and egoumens or abbots; to the second, protopopes or deans, priests, archdeacons, deacons, clerks, and readers. Each provincial capital has an institution to which all the sons of the clergy are admissible, to study the principles of their theology, and moral philosophy, and are afterwards turned over to the general college to complete their education, either for a military or an ecclesiastical life. If the former be adopted, they enter the army with the rank and pay of an officer; if the latter, they are ordained deacons. The obligation of marriage

is imposed upon all those who are below the degree of an egoumen or abbot; and should the wives die before their ordination as priests, they are for ever precluded from that order. But if the wife of a *priest* dies, he may nevertheless become a dean: and if he afterwards enters a monastery, he may arrive at the highest degree. Should, however, the theological disciple be determined upon a state of celibacy, he may at once enter the monastic order, and become possessed of the power of a priest, as well as of the highest degree; but he can never afterwards become a disciple of Hymen. The revenue of a metropolitan does not exceed eight hundred pounds a-year, that of an archbishop six hundred, and of a bishop five hundred—sums apparently as small as persons of their rank can possibly subsist upon, even in Russia. They are, however, allowed a considerable sum, which is paid to them annually, for the purposes of charity.

Early on Monday, the 5th June, I quitted Tver for Moscow, passing sometimes along the banks of the Volga, at others over a rich grain country, amusing my mind alternately with the contemplation of the promising crops, and the thousands of loaded barges destined to bear them. Reached Davidova (thirty-two miles) at two o'clock, where I stopped to refresh, passing on my way a great number of pedestrian labourers, who, like the Gallegos of Spain, were travelling to the southward to assist the less populous districts in getting in the harvest. An amazing quantity of timber was felled and felling on the road-side, merely for the purpose of keeping the road in repair; nearly the whole distance from Novgorod to Moscow being a wooden causeway. At eight in the evening I continued my route, reaching Klinn at midnight,

and Peski at four in the morning. The country had a pleasing appearance, immense herds of cattle and flocks of sheep, with well-peopled villages, greeting the eye in every direction. I was supplied with plenty of black bread, milk, salt, and kuass, which I found very excellent fare. Passing through Tschornaya Graz, I entered Moscow at eight in the morning, the last stage being distressingly fatiguing. Much rain fell, and I was not a little happy to reach the hospitable abode of Mr Rowan in time to breakfast. The last thirty-two hours I warrant as bearing witness to one of my greatest pedestrian trips—the distance is 168 versts, or about 96 miles : I have, however, done the same in Portugal.

The landscape on the approach to Moscow, from the Petersburg side, gives no promise of so great a metropolis, it being over a dreary and desolate waste. Nor does the immense and ancient capital itself make its appearance until the traveller is within two miles of it, when, upon rounding a small low copse, sprinkled with a few genteel dwellings, hundreds of spires and steeples, domes and towers, flash upon the eye—one vast assemblage of buildings rising in the fore-ground, and only the uncultivated Sparrow-hills upon the right.

After breakfast I waited upon his excellency the governor-general, and arranged my papers so as to allow the resumption of my journey at leisure, and then perambulated the city. Among other things, the great gun, in whose muzzle I sat upright, as well as the greater bell, bespoke my attention.

I shall not enter upon the discussion of the many and strange stories of which this bell has been the subject ; but on the assertion of the learned Dr

Clarke, that the Russian nation might as well attempt to suspend a three-decker, with all her apparel, tackling, &c. I would only observe, that no nation possesses better means for performing such a feat, nor has any nation made a better use of such means than Russia; they are, I should think, qualified to remove as large or as weighty a body as any other nation in Europe. The Russians, forty years ago, transported, from the frontiers of Europe to the north-east of Asia, cannon, anchors, and other heavy articles, belonging to an expedition about to explore the Icy Sea, and all went over land for a distance of about *seven thousand* miles. I have seen similar exertions in Canada, but by no means superior; and it must not be forgotten, that any thing can and will be done in Russia, when the order is accompanied with those almighty words, "kacknee boud," which truly means "any how," but is generally used in the sense of "it must be done."

It will not be supposed that I should omit to visit the Kremlin, which is still an extraordinary place. Although much of its singular appearance has been obviated in the restored buildings, yet it is still far from regular. The view from the tower of St John is still preserved, that building having withstood the fury of the general conflagration. The new imperial palace is wholly undeserving the name; and only that a building is wanted for the use of the imperial family, and that there was a vacancy upon the site on which it stands, it would call loudly for another firebrand. Of course I conformed to the general custom in taking off my hat as I passed under the holy gate, and again on visiting the little chapel of Peter the Great. In every other respect than that of population, I found

Moscow the same as in Clarke's time, beautiful and rich, grotesque and absurd, magnificent and mean. But besides these general features, there is at present one arising from latter circumstances, the city being only half built and the streets half finished ; brick and mortar everywhere incommoding the passenger. Such is the appearance of Moscow, which is yet very surprising, considering how recently it has risen from its ashes.

The former number of churches, chapels, and mosques (the forty-forties) is now reduced to less than half the number. Of public and private hospitals there are several. The most remarkable is the Foundling, which escaped the fire ; a noble and well-endowed edifice. The average number of infants received, one year with another, is estimated at five or six thousand. Not more than two-thirds of these are understood to be reared. What, besides the ordinary dangers attendant on exposure, principally of course in the night, and in such a climate, may be the cause of this mortality, I know not, and it would be evidently foreign to my object to inquire.

The hospitals of Count Sheremetioff and Prince Galitzin are monuments of private beneficence and public humanity. The former has two hundred and fifty patients within its walls, independent of out-door pensioners. Persons of all nations, and of both sexes, and with whatever disorders they may be afflicted, are admissible for cure ; and the old and infirm remain for life. A physician, surgeon, inspector, apothecary, and proper attendants, are settled on the establishments, with handsome salaries and apartments. The buildings are spacious and elegantly modern. The wards are small, containing but eight patients, a novel, though per-

haps an improving feature in a medical establishment, as evidently tending to the diminution of contagion. The rooms are well ventilated. The revenue is 150,000 roubles, derived from the property of 8000 peasants, besides lands and villages. The late count is said to have founded the hospital in consideration of the Emperor's permission to marry one of his own female slaves. The present young count deserves much credit, for having improved the rents and extended the privileges of the hospital. That belonging to Prince Galitzin is on a similar plan, although not quite so extensive.

Moscow is said to stand upon more ground than any city in Europe; which may very well be true, as almost every palace or nobleman's house has a garden, and all wooden houses are detached, from the fear of fire. There are many public edifices well worthy the attention of the traveller, as well from the novelty of their architecture as from their destination; the magnificence of some is indeed surprising, containing as they do six or seven hundred body servants during the winter season. The present population is reckoned at three hundred and fifty thousand souls; a population which it is supposed fluctuates sixty or seventy thousand—the present, the winter season, being the period when the gaieties are at their height. On the 30th of May I quitted Moscow, in a drosky, accompanied by Mr Rowan, to dine with a Scotch gentleman, a Mr Rogers, who manages the agricultural part of Count Romansoff's property in the English style, which has been introduced with great success. We afterwards visited the beautiful botanical garden of Count Razumofsky, called Gorinkay, which does infinite credit to the superintendence

of Dr Fischer. The number of its plants, thirteen thousand, would alone recommend it to the botanist, as will the buildings and pleasure-grounds to that of the inferior savans. Two more patriotic noblemen than these two do not exist.

From my highland companion I received a pair of leather trowsers, no small present on such a journey; and, parting with my amiable and universally beloved friend Mr Rowan, commenced my journey on foot. Passed, at two miles, the magnificent chateau of a Prince Galitzin—(the great number of these princes must excuse my specification of them); after which, amid heavy rain and thunder, I passed through several small villages to Bouncova, lying in a well-cultivated and picturesque country. I was greatly fatigued with twenty-five miles of heavy walk, and felt indeed a little melancholy. After a night's rest, however, I resumed with revived spirits, and reached Vospuche. The country is interesting, and adorned with many residences belonging to the lords of the village, but which are going to ruin as fast as time and neglect can push them. To Uchekittinah is hill and dale, wood and water, all the way. I arrived at Vladimir in time to breakfast, travelling during the night to escape the heat of the sun. My way of life had evidently excited an interest in the peasantry among whom I passed, several of them dividing their meals, and sharing their fire and dwellings with me, with the most cordial good will; nor did the perusal of my passports, and other Russian documents, afford them the less *surprise*—such a favour they justly considered had never before been granted, and therefore I was of course more than ordinarily favoured.

I might nevertheless have considered myself

fortunate, if I could have reached Vladimir with only a sound drubbing instead of a broken head, merely because I could not ask in the Russian language for some kuass, and fire to light my pipe. To prevent the recurrence of this evil, on the next occasion I entered a house, *sans ceremonie*, and helped myself. My hostess instantly dashed the cup into the street, and, with the assistance of others of her sex, drove me after it at the end of broomsticks, which were besides not spared upon my back. The odds were fearful against me ; I was, therefore, content to bear my punishment without resistance. At the next place, a decent chop-house in Vladimir, I inquired, of a servant who spoke French, the character of my persecutors, and learned that most of those villages are inhabited by Raskolnicks or Schismatics, who have in a manner withdrawn or separated from the Greek church, and admit of even less toleration than the church of Rome. They are bound by the rules of their religion to deny food, fire, and water, and every assistance, to all who are not of their own persuasion ; and are even forbidden to hold any intercourse with them. Notwithstanding the repulsiveness of these tenets, they are said to gain many thousands of proselytes every year. They are considered good agriculturists, and of the most sober and industrious habits, never drinking ardent spirits, nor using tobacco. Among themselves they are a kind friendly people, and excellent fathers and husbands ; but towards the rest of the world are—what I too certainly experienced.

Vladimir is a fine city on the banks of the Kliasma, the capital of a small province only, although formerly of all Ducal Russia. Its situation is beautiful, standing on a considerable eminence

which overhangs the river, and commanding a fine view of the surrounding country. There are still remaining many traces of its former greatness, such as the royal palace and gardens, a range of public offices, and several handsome churches. The day was hot, and I took advantage of it to wash and dry my linen—no unusual thing with me on board of a man of war, where I have often been obliged not only to do this, but have been prevented from wearing shoes or stockings on the score of economy;—alas! how times are changed. My washing being finished, I lay down under the bridge, and enjoyed a sound sleep. In the evening I resumed my route towards Nishney Novgorod.

The road was a heavy one, and when I had passed seven versts, all signs of cultivation ceased. By midnight I reached Soudogda, and at two the next day, Morshok, over a low, *sandy*, and dreary country, covered with *brush*-wood, furnishing nothing but materials for *crack* ships. In the evening, at Dratchevo, my passports were demanded by two young men, whom I somewhat hastily set down as troublesome fellows, because no entreaties could induce them to allow my proceeding without my passport being inspected by the general of brigade. I was, however, more than a little ashamed of my pertinacity, on being sent to a comfortable lodging, followed by a hot and substantial supper. In the morning I received a message to attend the general, with whom I breakfasted; and in consideration of having been detained all the night, which was my time of travelling, I was favoured with a vehicle as far as Mourom. This is the principal rendezvous of the Mordva Tartars, bearing the name of a city, but undeserving of that of village, being a vast assemblage of unsociable huts, with

six or seven churches. Its situation on the Oka is somewhat in its favour; but, except that, and tracing the origin of its eccentric inhabitants, I believe there is nothing of interest for the scientific—much less for the ordinary—traveller.

Having hired a canoe, I paddled across the river, and, following a dreary and marshy country, reached Manacovo. At a pretty little village on the banks of a lake, at midnight, I was greatly charmed with the singing of some boys and girls, accompanied by a simple instrument, called, in Russian, baalaalaika, and which is in fact only a two-stringed guitar. The effect of this rude harmony, softened by its passage across the water, was peculiarly sweet.

The beauty of the night prompted me to continue my route, and I left the happy villagers for Pogost, twenty-four miles, where I arrived half famished and quite fatigued, not having tasted food during twenty-four hours, and a march of forty miles. I had, however, drank abundantly, perhaps incautiously, of water. The country was level and fertile, well wooded, and somewhat pretty, in its scenery. Nor is the town of Pogost by any means an ill-built one; its annual fair had just terminated, and I could not help smiling at the remnant of saleable articles, consisting of horses, carts, wheels, saddlery, and, in short, every constituent and requisite for ordinary vehicles, besides an abundance of common earthenware, rope, with kuass and bread to refresh the sober, and barrels of spirit to stupify the drunkard—of which, indeed, there was no scarcity, either of men or women.

Being too jaded to proceed farther, I thought myself fortunate in being able to pass the night in a *cask*; nor did I think this mode of passing the

night a novel one ; often, very often, have I, in the fastnesses of Spain and Portugal, passed the night in a similar style. Here I usurp the place of crockery, there I usurped that of wine ; here in the land of liberality, there in that of nonentity. Arrived at Pavlovo, distant fourteen miles, over a cross road, and a beautiful as well as fertile valley, studded with villages, in the midst of which the Oka makes its course.

Pavlovo is placed in a bay on the left bank of the Oka, which is crowded with small vessels. It is said to contain eight thousand workmen, and is the private property of General Sheremetioff, the head of which family, a minor, is possessed of one hundred and sixty thousand peasants. The general's property is, however, a vile dirty place ; but the surrounding country, and the view of it from the palace, is very fine.

I had not an opportunity of viewing the immense iron-works here carried on, being anxious to get on towards Nishney Novgorod, which I entered on the evening of the next day. I had previously passed through Selo-Bogorodskoye, where I underwent a second lecture for smoking in the village. The elder of the village spared me, doubtless, however, on the same grounds as had excused me on a previous occasion. The country appeared extremely populous, and I felt highly pleased with my walk on the elevated banks of the Oka, and in witnessing its numerous establishments of tanners and dyers, with such extensive iron-works, that the neighbourhood of Pavlovo has been justly termed the Birmingham of Russia.

The entrance to Nishney Novgorod is execrable, from the extreme filthiness of the suburbs ; but descending a steep hill, I found myself in a busy and

crowded market, where I procured a drosky, and proceeded to the dwelling of Baron Bode, to whom I carried a recommendatory letter. He received me kindly, placing me for board in his own house; while for lodging I preferred the open air of his garden; there, with my knapsack for a pillow, I passed the night more pleasantly than I should have done on a bed of down, which the baron most sincerely pressed me to accept. The city is large, scattered, and somewhat ill built, but evidently improving. This is evinced by the number of new buildings which have been erected, in consequence of the celebrated fair called Makarieff being transplanted hither. The upper part of the city, in which the governor, chief officers, and military, reside, is of course the best. Its situation is peculiarly pleasant and airy, though surrounded by the stubborn remains of the old citadel and Tartar wall. The lower town which may be termed the St Giles's of the city, is occupied principally by persons engaged in merchandise.

Nishney Novgorod, in contradistinction to Great Novgorod, owes its existence to the Great Duke Vassil, who thus named it when he caused its inhabitants to be transplanted therē from the great city before named. Its inhabitants, Russians and Tartars, amount to fifteen or sixteen thousand, though its visitors during the fair probably make its population at that time from one hundred and twenty to one hundred and fifty thousand. Among them may be seen Chinese, Persians, Circassians, Armenians, Tartars, Bucharrians, Jews (of course), and a specimen besides of almost every European nation. The fair, in point of value, is considered as second to none in Europe; the business done being estimated at nearly two hundred millions of

roubles. This computation may probably allow a deduction of about one half, but in any case the government derives from it a very considerable revenue. The buildings on the site for the fair are in a forward state, but will still require many years, and several millions of money, to complete. The situation is considered highly eligible, and the plan is by General Betancourt, an eminent Spanish engineer.

The eligibility of the new site is, notwithstanding, fairly questionable, as it is not entirely removed from the danger of an inundation by the Oka, from the river giving indications, at no distant period, of shifting its channel; in which case the consequences must be fatal. A canal has recently been cut so as to make this part an island, instead of a peninsula as before; a measure which, in my opinion, contributes to weaken the foundation, because the canal lies streamward of the fair, and, consequently, at the rises or freshes of the river, it is liable to be completely overflowed. When it is recollected that the last overflowing of the Volga formed a new bank of seven feet high above the common bed of the river, between the city and the fair, it is not too much to fear that it may serve to change the course of the river, whose extra rise was last year thirty-five feet; and should the new-formed bank prove a solid foundation, and resist for some years the impetuosity of the stream, there will then be no other outlet but the very site of the fair, as it stands nearly opposite to the place where the Oka discharges its waters into the Volga. Many people think, and, it appears to me, reasonably, that lower down the Volga, as at Kazan or Bokorotsk, were more eligible places for the fair, when its removal became indispensable.

Nishney Novgorod is, also, too near St Petersburg, and too far from Persia, Astrakan, Bucharia, and China, to be conveniently reached in one season, because the latter journeys are against, while the former is with, the stream. Had Kazan or Bokorotsk been selected, the voyage would have been more nearly equalized both in time and expense.

I was shown over the fair by a Spanish gentleman, now an officer of engineers of Russia, and with whose family, in Granada in Spain, I had lately resided. He is married to the daughter of General Betancourt, chief of his department. I dined with him and two other Spanish colonels, as well as a young Moscovy Englishman, the whole party even here, in the very heart of Russia, talking only the Spanish language.

His excellency the governor received me with customary attention ; but I was not so fortunate as to meet his amiable lady, an Englishwoman. The truth was, her servant would not admit me, judging, no doubt, from the length of my beard and shabbiness of my dress, that I must be a Jew, or something worse. Thus denied, I embarked, in a freak of fancy, on board a lighter bound to Kazan, the better to enjoy the beautiful scenery of the Volga ; having previously, and only just in time, been supplied with provisions and a pair of English shooting-shoes (my constant Godsend), through the kindness of my excellent host Baron Bode.

CHAPTER IV.

The Volga—Makarieff—Kusmodemiansk—Tchebacksar—Vutchi—Kazan—Perm—Koungour—Souksoum, Demidoff's Zavod—Achitskaya Krepost—Krasnoufinsk—Belimbaiefsky Zavod—Ekatherinebourg—Berezofsky--Kamishloff—Tumen—Tobolsk.

I AM now on the magnificent Volga. The lighter on board which I had embarked did not depart for thirty-six hours, and I felt too much of the sailor in me to quit her; in short, I considered myself as one of the crew, working my passage, and as such employed myself. Nothing was demanded of me but to row the boat ashore for the captain, and now and then a glass of vodkey. This I was content to submit to, till I found that some grog and more tobacco was followed by the demand of still more grog, which my purse could very ill bear. I was therefore very well pleased when the anchor was weighed, and we descended the stream; but so slow was our progress, that we kept the heights of Novgorod in sight for two days, being frequently obliged to anchor, with the ever-dunning sound of "Vodkey, batiushka," or, Gin, master. The vessel I was in measured about two hundred and fifty tons, perfectly flat-bottomed, and drawing but

five feet water. At length, losing sight of Nishney Novgorod, we passed many islands and villages, the latter always on the right bank, and on the left an uninterrupted low moorish heath. The strength of the current I calculated at two knots and a half.

The variety and singular appearance of the different craft on the Volga, not a little surprised and amused me, as well as the innumerable different ways in which they were propelled. The present season of the year, that immediately preceding the fair, is the best for the navigation of the Volga, when barks from one thousand tons to the size of a canoe, all promiscuously float together. They are generally provided with one mast, which, in the largest, may equal a frigate's main-mast. The weight of the mat-sail must be prodigious, having no fewer than an hundred and sixty breadths in it; and yet the facility with which it is managed will bear comparison with that of the Yankies, with their boom main-sail in the fore and aft clippers. They are generally worked by from fifteen to forty people. The rudder is a ponderous machine, in many cases suspended from the stern-post, and yet towing astern twelve and fifteen feet; the tillers of which I have ascertained from measurement to be from thirty to forty feet long, and all worked by the hand.

The soil on either side is clay and chalk, and the wood fir and birch. The inhabitants of the villages are the inoffensive and ignorant Fins, a race of people more approximating to the character of the Gallegos in Lisbon than any other class of people I have seen. Their great content and small possessions are in both a prominent feature. We reached Makarieff after a tedious and vexatious

voyage, vexatious from the annoyance of the horse-flies and mosquitoes. I was fairly put to the alternative whether, during my sleep, I would be suffocated or devoured. I preferred the former as smacking more of humanity, wrapping myself up close in a spare sail, with three others of the crew.

Makarieff is the first inhabited spot from Nishney Novgorod, on the left bank of the Volga; a straggling and ill-built place, although a large monastery, at one extremity, appears to strive hard to acquire for it an appearance of respectability. The great fair, which is now held at Nishney Novgorod, was formerly held here; but was removed on the destruction of its site by fire, wilfully, as is supposed. Many vessels, loaded with tallow, hides, and iron, were then lying off it, wind-bound, rather than work up between the numerous islands, shoals, and sand-banks, between this place and Novgorod. I remarked, with pleasure, the knowledge these otherwise ignorant fellows have of the power of the rudder, performing all the close shades like a fleet of colliers in the Thames.

At Makarieff I noticed the utmost height to which the Volga had risen last season, being eighteen feet perpendicular height, at one hundred and fifty feet distance from the nearest edge of the river, which is still going down. Having remained at anchor two days, and paid toll at a place called Vasilisomski, which is a sort of sound, where loaded vessels pay one and a half, and those in ballast one rouble (no slight sinecure), we departed with a fresh and favourable gale, passing fleets of vessels, at anchor and under sail. If the trade of the place were to be computed from the number of vessels, without respect to their value, the Volga would indeed be a second Thames.

We soon reached Kusmodemiansk, a large and populous town, on the right bank of the river, with four neat churches, pleasantly situated at the base and extremity of that chain of lofty hills which rise in succession from Nishney Novgorod, and here abruptly terminate. The left bank of the river still preserved its desolate and unhealthy appearance. The next halting-place was Tchebacksar, where the river is very shallow, and encumbered with shifting banks; and here we were again detained by foul winds, as well as the negligence or laziness of the crew, till I began to feel tired of my aquatic excursion, the river offering so very little worthy of notice. I would fain have pursued my route by land, but was prevented by my bag of copper money, which, although its value was not a guinea, was, at least, sixty pounds weight. Leaving it was, of course, totally out of the question; I had, therefore, no remedy but patience.

At Tchebacksar I again laid in a stock of provisions, conformably to agreement. It consisted of barley, rye, flour, with oil and black bread. I had hitherto messed with the crew, whose diet was wholesome, although rather new to me, consisting of the above flour boiled, and stewed down with water and oil. He who likes burgoo, must relish casha; and it was with extreme pleasure that I received the spoon into my hand, in my proper turn, to partake of this humble fare. This we did three times a-day, and I had the happy consciousness of its perfect cleanliness, as I myself stood cook. Provisions, in general, may be here considered cheap; bread, a halfpenny per pound; beer, a halfpenny per bottle; eggs, threepence per dozen; and milk, a farthing per bottle. Animal food I know nothing about, not having bought any.

Passed the village of Vutchi, placed between two elevated table-hills. A monastery, with four churches, flanked with a thick forest of evergreens, gave it a pleasing appearance. A boat came alongside from the monastery, with a poor-box, into which I put twopence, no small sum in this part of the world. Upon reaching the little hamlet of Kushuga, our crew quitted us, with bag and baggage, two long-bearded gentlemen taking charge of the craft to Kazan ; a trifling incident, but which powerfully reminded me of the necessity of impressment. We were now anxiously looking out for Kazan, and the distant countries became more elevated, and well wooded with lofty oaks. Si-viatski, with its remnant of an old stone castle, was the last interesting spot I observed before I reached Kazan. The left bank of the river, except at the single town of Makarieff, is one universal waste. From the Volga to the city is about three miles of a low flat ; and this I walked on Tuesday, the 22d of June, and the twelfth day from Novgorod, being about the same time that I should have taken in going by land.

This celebrated city, on nearing it from the westward, greatly resembles Badajos on its approach from Elvas ;—the extended view, the river in front, the fortress on the left, and the distant elevated lands to the southward. The dirty suburbs, situated on a marshy swamp, the principal residence of the Tartar inhabitants, is the next indication of Kazan ; the last was after crossing the Kazanka, when the noblest part of this noble city fronts you in full view. I passed on to the hospitable abode of the learned Professor Fuchs.

The extensive province of Kazan is watered by the noble Volga and beautiful Kama. Its popu-

lation is reckoned at nine hundred thousand, composed of Tartars, Fins, Votiaki, Tchuvoshi, and Russians, and a few Mordvas. Near five hundred thousand of these inhabitants are peasants or slaves, four-fifths of whom belong to the crown, and the rest to the different nobility of Kazan. The trade of the province is said to be great, exporting vast quantities of tanned and untanned leather, besides about two hundred and fifty thousand poods (36lbs. English) of soap, made from the fat of the Astrakan seals. Potash is also a thriving concern. The gold and silver embroidery of boots, shoes, slippers, bonnets, &c. employs a great number of people. The province is low and wet, and to its acknowledged unhealthiness the impurity of the water greatly contributes. The greatest heat is 29° , and the greatest cold 33° , of Reaumur's scale. The Volga is navigable about two hundred days in the year. The province is in general well cultivated, and exports prodigious quantities of corn to the capitals. The revenue is estimated at sixteen millions of roubles (or about L.700,000, a rouble being 10d. of our money); and of these spirits alone furnish four millions, the consumption of which, in the city only, on a feast day, is said to amount to the value of five thousand roubles, and on ordinary days to about fifteen hundred.

The city of Kazan is considered as second only to the capitals, containing nearly forty thousand inhabitants, of which twelve thousand are Tartars. On the present state of the city it is hardly fair to give an opinion, rising as it is from the ashes of a fire scarcely five years extinguished. It had formerly a cathedral on the site of the ancient mosque, as also a palace; both were destroyed by an explosion in the citadel. The destruction of the

city was indeed nearly complete, and it is difficult to conceive how any vestige could remain, a high wind driving a mass of flame over houses built, and streets absolutely paved, with wood. These wooden buildings and pavements have been discountenanced by the Emperor, who has held out many inducements to build with brick. The city is archiepiscopal, and the seat of an university. It has several handsome churches, four of which belong to the Raskolnicks, besides many Tartar mosques, and some convents. The church of St Peter and St Paul is a handsome stone edifice, erected at the expense of a private gentleman in honour of Peter the Great, in consideration of that monarch's having made his residence a halting-place during one of his journeys. In Kazan also is a church, which gave rise to that beautiful building, the Kazan Church at St Petersburg, though its architecture would seem to denote a theatre. I dined with her eminence the abbess, for so she is styled. She had the benevolence to present me with an image of their saint, which was to act as a charm against otherwise inevitable mischief. I accepted it, of course, with due reverence, without any strong faith in its boasted virtues—an estimate which it will be seen by experience was fully vindicated. The lady, the original of this image, lives twelve miles from Kazan, to which, however, she makes an annual visit, and collects from the bounty of her believers sufficient to support her the ensuing year.

I visited the Hotel des Nobles, a club formed of the nobility, fifteen or twenty of whom daily dine there, independent of casual travellers, who have free access upon moderate terms. A friendly sort of intercourse is thus kept up, and the news of the

day emanates from the club in a manner which the servile press dares not attempt. Billiards and cards are the set amusements of the club, it being a custom of Russian idlers to play boston before and after dinner. They then retire to business or to sleep, meeting again in the evening to repeat the entertainment over a cup of tea. Speaking of the word boston, it is rather a curious circumstance that such an Anglo-amusement should have become exclusively the adoption of the empire of Russia ;—under the wings of the eagle it was brought forth, and there it is still fostered. Among the numerous individuals here from whom I received marked attention, I should specially notice the governor and vice-governor; the Prince Davidoff, director of the post; and Prince Tenisheff, general in the army, and head of a military commission, not forgetting my friend the professor. Both the princes are of Tartar origin, though their character and conduct would do honour to the proudest rank of polished society. I attended a fête given by the latter prince at his villa, seventeen versts from the city. If the learned Dr Clarke had been living and present, he would have found, in the delicacy and decorum everywhere prevalent, a strong proof that a Russian country-house *is not now*, at least, such as he has described it.

A Russian prince, count, or baron, descended from a Russian family, is always a nobleman, without any military, civil, or honorary distinction. But no person of those ranks, whose origin has been Tartar, Asiatic, or foreign, has any claim whatever to nobility beyond the other free individuals of the empire; the title is indeed hereditary, and descends in the same wholesale manner as in Germany, but it gives no rank or privilege whatever. Without

the addition of military or civil rank, title is rather a disadvantage to the possessor, as the empire expects from every man of respectability a three years' service in the army, navy, or civil departments. After this he may retire with credit; yet, so salutary is the effect of this custom, that the retirement of an officer is of extremely rare occurrence. In case, however, of any change of inclination, they are permitted, within certain limitations, to vary the nature of their service; thus, an officer of the navy may change to the army or civil department; an officer of the army to the civil department, but not to the navy; but an officer of the civil service cannot exchange into either army or navy;—thus forming a strong inducement to them to commence at least with the profession of arms.

A prince is not, from that circumstance, a nobleman, though an officer of whatever rank is; and by his becoming a major in the army, or captain in the navy, he entails upon his children, without limit, the rank of nobility. The rank of women in Russia is fixed, like their condition, for better or worse, according to that of their husbands. If a woman not noble marries a slave, she degrades herself to his condition; while a woman slave, becoming united to a freeman, becomes free. But in Russia every thing is at the disposal of the Emperor; titles, privileges, rank, and fortune, are regulated by his will. And formerly, when it was no uncommon thing for an Emperor to give the benefit of a Siberian air to ministers, counts, and other dignitaries of the empire, it was not unusual to accompany the seclusion with the loss of honours, hereditary rank, of fortune, and even of the very name. The latter circumstance never, indeed, took place but when the person was charged with a crime.

But this arbitrary exercise of power has certainly not occurred during the present Emperor's reign, nor would the exercise of such a prerogative be tolerated for any length of time.

The governor of Kazan was good enough to make up a part of my lost time, by giving me a lift towards Perm; and on the 25th of June I departed in a kibitka, taking a last view of the city from Tzaritzino. Crossed the Kama, which enters the Volga, at forty miles below Kazan. The road had been very fine, and the country fertile in corn and flax, the principal productions. The appearance of the crops was good, and the preparations for the harvest cast a lively and agreeable feature upon the journey. I overtook great numbers of men and boys returning to their homes, having carried vessels down the Kama, and thence into the Volga. The country on the east side of the Kama becomes wild and dreary, through forests of fir, birch, and poplars. The weather was sultry, and the mosquitoes troublesome; and there was nothing to delight the eye, or interest the feelings, except the numerous Tartar villages, which lie scattered at every five or six miles' distance. Many of the Viatka race, a handsome people, are in the neighbourhood. Although I had ceased for the present to be a pedestrian, I did not, from whatever cause, receive so great civility as I had been accustomed to. The conduct of the postilion to the poor peasantry, was not such as to induce my forming a favourable opinion of the Permian executives. I could not help regretting that the present mode of forwarding the post affords no security against fraud, cruelty, and abuse. The moment these postilions arrive at a station, they fly to the kabak, or gin-shop, where they loiter away half an

hour in drinking, &c. When the postilion is ready to start, he holds out his hand with the same avidity and mechanical appearance as a lawyer or physician would do ; generally a rouble, or a couple, according to the length of the station or number of horses, is given, to prevent—what ? Why, to prevent the free exercise of their high powers in driving the horses at so furious a rate, as to endanger not only the lives of the poor animals, but of the driver and other persons going with him. The forwarding of the post being by contract between the government and the individual, is thus liable to a most intolerable abuse ; of course the owner of the horses will sooner part with a couple of shillings, than run the risk of losing one of his horses by being overdriven, a circumstance which not unfrequently happens. At present there is but one favourable consideration in the post-office department ; that is, its extraordinary speed, which I shall have occasion hereafter to notice.

On the fourth day I entered Perm, thoroughly fatigued with the jolting of the kibitka, although the road was very fine, lying invariably through thick woods, with but two towns, and most unprepossessing villages, all the way from Kazan.

Having delivered a letter to the director of the post, who understood no language but the Russian, he recommended me to the care and attention of a Mr Berg, formerly a lieutenant in the Russian navy, now an author and a rich man—advantages which seldom accompany each other. His knowledge of the English language, as well as his hospitality and urbanity, made his company highly valuable. He had made the tour of the world with Commodore Kruzenstern, and was consequently able to give me a great deal of useful information.

Perm is the capital of a province, and a considerable city, built by the Empress Catherine at the time that great princess increased the number of governments from fourteen to forty-seven; convinced that a due administration of justice could not take place where the governments are so extensive. The city stands on the right bank of the Kama, covered on three sides by a thick forest, whose trees reach to the very gates of the city. It is regularly and handsomely built, and contains about eight thousand inhabitants; the whole province numbers eight hundred thousand, consisting of Russians, Bashkires, Tcheremiss, Teptery, and Vaugoles. The Bashkires, a numerous race, are said to be descendants of the Tartars who inhabited the district between the Don, the Volga, and the Ural mountains, and are probably of the same family with the Tartars of Kazan. They were originally wanderers, but, since their subjection to Russia, have applied themselves to agriculture and the breeding of cattle, especially of horses. These they have learned to manage with facility, and even with grace; and yet, even this has not destroyed that perhaps most savage of their original habits, the feeding upon their carcasses. Their character is worse than indifferent, being lazy, and tyrannical towards their wives, to whose care, nevertheless, they owe every thing. They are handsome both in form and features, and are fond of medals and fanciful ornaments, or dresses. Both sexes dress nearly alike, in large trowsers, and a loose gown fastened round the waist with a silk sash. Their heads are usually shaved, and covered with a cap decorated with embroidery; as are likewise their boots.

There is but one public school in Perm, and

that of small repute, and the state of society and of education in general is at a low ebb; yet Perm is a thriving place, being rich in its provincial exports, which, from the local situation, must all go through the capital. The export of iron is said to equal five millions of poods, which, with six millions of poods of salt, seventy thousand poods of copper, seventeen of gold, and two millions and a half of coined roubles from Ekatherinebourg, form no bad criterion for estimating the riches of the government. Perm yields a gross revenue of ten millions of roubles, which, on a deduction of seven for its expenses, leaves a net revenue of three millions, exactly equalling the copper money and gold collected from the sands of Ekatherinebourg. The soil is in general good; corn is both cheap and abundant, being exported in great quantities. The face of the country is generally level, till nearing the Siberian frontiers at the base of the Ural mountains, which separate Europe from Asia. The importance of these mountains seems to be little felt or understood by the Russian government, though there can be no doubt of their containing sources of wealth all but inexhaustible.

I left Perm on the 8th of July, on one of the finest roads in the world. At three miles I passed an exceedingly fertile spot, beautifully reflected from the dark woods, which skirt it even to the horizon. Before reaching the first station, I had passed five villages, in a delightful walk, the beauty of which did not afterwards diminish, while the Kama seemed to travel by my side. The road is good as far as Koungour, and the country fertile, with hills traversing it in all directions. The valleys are filled with villages, nursed in the bosom of peace, and fed with the abundance of plenty, of

which blessings they are not, from their local situation, likely to be soon deprived.

Koungour, formerly the capital of several provinces, has now little or nothing to boast of besides the beauty of its situation. After dinner I reached Sabarsk, a village, eighteen miles, where I put up for the night. It lies in a well-wooded country, and whose lands are economized and attended to in a manner worthy of the disciples of Englishmen. Koungour appears to me to be an elevated level; for I consider that the grand base of the Ural mountains commences from Perm.

From Koungour, I reached Souksoum, Demidoff's Zavod, viz. iron works, a large, long, and busy place, on the borders of a lake, where is a considerable iron manufactory as well as distillery. The situation is in a deep hollow, surrounded by thickly clad hills of fir. Unlike the people of Kazan, I found the inhabitants a churlish race; but, being in good health and spirits, I took little heed, simply showing my passport and open order to the police, as a hint for proper treatment. The elders of the villages and I were, however, sure to be good friends, so long as milk, black bread, and kuass, with sometimes soup, were to be purchased. To these were added a glass of cordial at the kabak or gin-shop, procured gratis by an order from the farmer-general, and which latter I divided with my friends.

As I approached the frontiers of Siberia I began to give way to groundless, though perhaps natural apprehensions; and indeed as I neared such a supposed scene of cruelty and misery, I became completely agitated. Hitherto Providence had protected me, but although I felt thankful for the past, I could not but be concerned for the future,

reasonably doubting how, where, and when, my pilgrimage would end.

Pursuing my route, I reached the sixth station, charmed with the beauty of the surrounding scenery. And if I might judge of the number of its inhabitants by the quantity of cultivated land, I should say it was one of the most populous, as well as finest, spots I had ever seen. Achitskaya Krepost was the next large village, with a good post-house. Hence the road turns off to the south, to the summit of a range of hills, which commanded an extensive prospect of a lovely scene, to which a slight fall of rain had given increased freshness, brilliancy and beauty. I passed a large unemployed distillery, the property of the government, as indeed are all others on this side of the Ural mountains, the government having monopolized the sale of spirits throughout the European dominions. If the mere increase of the public revenue may warrant such a measure, there can be no more said; but whatever may be the direct benefit to the treasury, of carrying on business to the amount of thirty millions of roubles per annum, its mischievous tendency, in enriching a few individuals at the expense of as many thousands, is incalculable. By farming the distilleries, a system of plunder is practically encouraged, while the losers in the long run are the poor peasantry, who receive a trash of spirit far below the proof, it being to my knowledge doubly and trebly watered; nor can the retailers of such stuff get back their money in any other manner.

The situation of vice-governor thus becomes one of the greatest value, receiving, in some instances, half a million of roubles, or upwards of twenty thousand pounds sterling, a-year. Two direct

means of a vice-governor's enriching himself are, the per centage upon every vedro or anker of spirits sold in the province, and a certain sum paid by the retailers for their licenses. By these alone, a vice-governor may annually put into his own pocket not less than four hundred thousand roubles. It is the duty of a vice-governor to visit the different distilleries and kabaks, or gin-shops, to ascertain whether the spirits be adulterated: having already received his bribe from the farmer-general of the province, he of course finds no fault. The latter of these gentlemen then makes his own visit, to examine whether the retailers have not still more adulterated it than was allowed in the first instance; the affirmative is a matter of course, but, on a division of the spoils, no fault is found. Lastly, comes the secretary or clerk of the farmer-general, who finds the spirit still further adulterated, and who, having in his hands the power of punishment, even to the withdrawing of the license, becomes a participator of the last spoils. To make up these immense subductions, another and another portion of water is added to the spirit, all of which is valued to the poor peasant as genuine. The oppression, before heavy enough, is thus doubled upon him, as the weaker the spirit the more he finds it necessary to consume. This system of robbery is mainly owing to the palpably inefficient provision made by the government for officers of all ranks, who are thus tempted to seek by indirect means a compensation for their services.

Krasnoufinsk, which I reached next, is situated in a fertile valley, at the foot of two peaked mountains. It is a scattered and ill-built place, but in a fine productive country, and from the top of the mountains commands an extensive view of the

river Ufa, meandering from one side of the horizon to the other, but generally immersed in one continuous fog. The town is frequently overflowed, and thence, doubtless, is considered unhealthy. The establishment is new, for the old ostrog, or advanced fortress, is still kept up, to oppose any possible incursion of their southern neighbours.

A deputation of the inhabitants waited upon me, to request I would remain a couple of days, to be present at a dinner to be given in honour of the first Englishman who had visited the place. I felt the compliment nationally, but thought best to decline it, as perfectly unmerited by the individual, independently of my anxiety to get forward; and therefore returned to Achitskaya Krepost; thence to Bisserskaya Krepost, over eighteen miles of uncultivated country, after which I gently ascended a considerable elevation into the bosom of the Ural mountains, where not a vestige of cultivation exists besides young firs and birch. The air was exceedingly cold on the summit. At noon I stopped at the last European station, called Kirgishantsky Krepost, and at the last European residence, where I dined. The good people had resolved I should not leave this paramount quarter of the globe with any trace of dissatisfaction, as young children continually presented me with wild strawberries and cream; the strawberries were of an excellent flavour, and it is the custom of these poor people to present the traveller with such fruit during the season. I received the present, standing with one foot in Asia and the other in Europe, surrounded on all sides by lofty mountains, covered, however, with nothing but brushwood.

In the evening I reached the first station in Asia, called Groborskoy, a post-town; and next day, with a stout heart, descended the Siberian part of the Ural chain to Belimbaiefsky Zavod, or iron-foundery, on the banks of the Tschusova, where there are many handsome buildings. Early the ensuing morning I reached Ekatherinebourg, having passed in safety the mighty barriers which divide Europe from Asia. The ascent and descent are so nearly imperceptible, that, were it not for the precipitous banks everywhere to be seen, the traveller would hardly suppose he had crossed a range of hills. As far as this frontier town of Siberia, I had travelled through one continued forest of pine-trees, and for twenty miles nothing met the eye but fire-wood, grown for the use of the imperial fabrics.

On reaching the Asiatic side of the Ural chain, I could not help remarking that the inhabitants of all the villages were much more civil, more hospitable, and more cleanly dressed; and in no one instance would they accept of money for the food I had occasion to procure. I never entered a cottage but shtshee (a cabbage soup), with meat, milk, and bread, were immediately placed before me unasked; nor could any entreaty of mine induce them to receive a higher reward than a pipe of tobacco or a glass of vodka (whisky). In short, to prevent uselessly troubling the inhabitants, I was obliged to consign my nearly exhausted purse to the care of my knapsack, renouncing the hackneyed and unsocial custom of paying for food. Another remark which attends the traveller on quitting Europe, is the fact of his leaving the land of oak, not a vestige of that tree being visible, I believe, in Asia. The sable is, however, met with, an ani-

mal which is never found to the westward of the Ural chain of mountains. It is also confidently asserted, that mice taken from one side to the other will not survive ; thus, nightingales in Devonshire, sables in America, or martins in Asia, are, I believe, looked for as snow in Equatorial Africa.

Among other proofs of their civility, or rather of the interest which Russians take in foreigners, as well as the means they have of making themselves understood, one very strong one occurred to me in a small village. I had learned so much of the language as to know that *kchorosho* is the Russian word for *well*, but not that *kchudo* was the translation for *bad*. My host being a good sort of a blunt fellow, was discoursing upon the impropriety of travelling as I did. As I could not comprehend him, I was impatient to go ; but he persisted in detaining me till he had made me understand the meaning of *kchudo*. My extreme stupidity offered a powerful barrier to his design ; but a smart slap on one cheek and a kiss on the other, followed by the words *kchudo* and *kchorosho*, soon cured my dulness, and I laughed heartily in spite of this mode of instruction.

Ekatherinebourg is the key of Siberia, and hence a post at which passports are most rigorously examined. Yet, on making known my intention to stop at the house of a Mr Major, an Englishman, and an officer in the College of Mines, I was not only permitted to pass, but, in Mr Major's absence, another lodging was procured me. This was in the dwelling of a Mr Mohr, a low plodding German, of whom there are too many in Ekatherinebourg. It is a well-built city, founded by Catherine, near the source of the Izet, containing

fifteen thousand inhabitants. There is a large fabric, belonging to the Emperor, for polishing and preparing vases, urns, slabs, and the like, as well as to deposit selections of mineralogy and precious stones for the formation of cabinets. There are also numerous large iron and copper founderies in the neighbourhood of Ekatherinebourg, the latter of which supply the mint of the city with metal for coining three millions of copper roubles annually. The coin is badly executed, being chipped and cracked the first moment it is issued, nor is the metal better; and no care is taken to select or recoin any of this wretched money. The copper mines are near three hundred miles distant from the city; yet here the metal is worked up into ingots, heated, barred, cut, rounded, cleaned, and stamped; and, lastly, they may be said to barely pay the salaries of the officers and peasants.

Near the city the river is dammed up, so as to form a sort of lake for the washing of the sand which produces the gold; and close to it is the department for smelting that costly metal. This is produced from the gold mines of Berezofsky, distant twelve miles; the quantity produced is, however, small. The moment a fine specimen of pure gold is discovered, it makes its way into the cabinet of some private individual, and such specimens are neither few in number, nor their intrinsic value small. It is justified on the usual ground of the insufficient remuneration of the officers, and at present may be considered as a fair and natural means of the support of government; for the salaries of officers and men, so far from having been increased since the days of Peter the Great and Catherine, have in reality been reduced

three fourths. Then the government paid in *silver* roubles (3s. 4d. sterling); but now in *paper*, the current value of which is 9½d. When the increased value of provisions, and of all other articles, is considered in proportion with what they were fifty and one hundred years ago, it is only fair to put such pilfering to the account of necessity, rather than to that of depravity. Lest in this part of my narrative I may be misinterpreted, I think it but candid and just to tell my readers, that, whatever bribery and corruption exist in the Russian empire, I do not think they exceed that of more civilized (as they are termed) countries. Kissing goes by favour in every quarter of the globe, but I do not think extortion in Russia proceeds so much from avarice as from necessity; the latter has no law nor rule to curb it, and, when backed by an unfeigned and unlimited hospitality, surely the *crime* is sunk in the *necessity* of the case. In the midst of an abundance of natural wealth, it is true the peasant gets but very little reward for very hard work; but as all compulsive labour is reluctantly and badly performed, so that in cold and dreary mines might be expected to be of all others performed the worst, and the least rewarded. Six thousand fine young men are employed in this occupation from morn till night through all seasons; and to sustain, certainly not to reward this, receive a daily allowance of two pounds of black bread, with a suit of clothes and a sum amounting to 13s. 6d. sterling yearly: whatever they acquire beyond this must be by dishonest means. These six thousand individuals produce annually from the mines and sands about seventeen poods of gold, and ten of silver, the united value of which is certainly under L.30,000

sterling ; so that the clear annual profit to the government of each of these able-bodied men, after even these insufficient means of livelihood, cannot exceed 20s. a-head. But for the imperious necessity of procuring a continued coinage, in order to support the immense circulating medium, it may be supposed that the Russian government could not hesitate for a moment to enfranchise these peasant slaves ; as their contribution to the revenue, in the way of direct taxation, would infinitely exceed the paltry profit accruing from their coercive labour ;—to say nothing of the large proportion which must be deducted for the expenses of an establishment requiring so great a number of officers, and probably of costly implements.

At Ekatherinebourg, at the table of the amiable chief, I met a Mr Roper, an Englishman, employed in the mines. After dinner we visited the beds of gold sand. They seemed about six feet deep. The governor appeared to me too sanguine of the results, which can never authorize the employment of such fine young lads in the everlasting washing of the sands, with their feet constantly in water.

From the gold beds I visited the mines of Berezofsky, the principal working one of which, a hundred and sixty feet of perpendicular depth, I descended. My access was, as in other mines, by the staircase, preferring that mode of descent to the more usual one in this place, of being let down by the basket. I saw nothing to remark in the nature or plan of the employment, though I could not but regret that the operators were not, as in South America, criminals, but peasants belonging to the imperial crown. The produce of the mines is in the proportion of one guinea's worth of pure gold for every four thousand pounds weight of

earth. Ninety-six zolotniks are equal to a pound, and three zolotniks of gold are produced from each hundred poods of earth ; so that, even allowing forty pounds sterling for every pound of gold, the utmost value of every one hundred poods of earth cannot exceed twenty-five shillings. The sum of the matter is, that his Imperial Majesty gets five thousand pounds sterling annually from the employment of six thousand men, deducting only the payment of his officers, a diminution which, it will be allowed, is not great. So small indeed is the return from the establishment of Ekatherinebourg, that I did not think it inappropriate to say to one of the chief officers, who had asked my opinion, that, were it not for the three millions of copper roubles which the government gained, the whole establishment deserved the air of farther Siberia ; instead of copper, it should produce silver, roubles, so inexhaustible are the riches of the place.

The magnificent iron establishment belonging to the Yakovleff family, is much better deserving of attention. Six thousand peasants are attached to it, and at present employed in making bar iron for the fair of Nishney Novgorod, iron plates for covering houses, cast-iron utensils of various kinds, steam-engines, and immense quantities of cutlery, not forgetting the iron images for worship, all finished in a neat and solid manner. The buildings appertaining to this establishment are equally extensive and substantial ; and the situation of the overseer, who is a peasant, is worth two thousand pounds per annum ! The villages of the peasantry are well built, and much liberality is evident in every part of the concern, which is as profitable as creditable to the proprietor, whose character stands

very high; affording no small counter proof how much the imperial works are neglected, while those of the individual are protected, encouraged, and industriously persevered in.

I have already said that Ekatherinebourg is a well-built city. It indeed abounds in public edifices, bazars, and churches, and is regularly laid out in streets; but the inhabitants generally, even those who may be styled opulent, are *bondsmen*, either to the government, or to private individuals. The greatest proportion of these are Raskolnicks, who some time ago sent one of their own body to purchase permission to build a church for the free exercise of their own abominable tenets. The zealous *missionary* was also charged with four hundred thousand roubles to make good his way; but neither missionary, nor license, nor money, have been since heard of. This conduct, I should think, might be expected from such *zealous and intolerant unitarians of faith*; for whether Greek, Catholic, Protestant, or Methodist, it is one and the same thing—he who *attempts* to interfere with an established religion is no tolerant but a bigot, and what are the most civilized part of the community about?

Quitting Ekatherinebourg, I directed my steps towards Tobolsk, gratified that I had already entered Siberia. After ten miles of pleasant walking I reached the hospitable habitation of Mr Major, where I passed a couple of days in an agreeable manner, with his wife and three daughters, fine young women, and either of them sufficiently beautiful to arrest the progress of a Siberian traveller. Having no time to fall in love, I took, at parting with the ladies, advantage of the Russian custom, which permitted my kissing their hands,

while they at the same time honoured me by saluting my cheek.

I reached the second station late in the evening, and next day, remarking with pleasure the cleanliness and good-nature of the inhabitants, reached Kamishloff. Kaminsky, a useless cannon-foundery, lay in my way. The road is everywhere excellent, over low, swampy, yet well-wooded ground. Kamishloff is a pretty little town on the banks of the Pyshma, a river but little used, by reason of some falls. There are two thousand inhabitants, enjoying a somewhat flourishing carrying trade. I received the kindest attentions from the town-major (a young militaire, who had been severely wounded in the Russian or Napoleon campaigns), and from the inspector-general, who was then going his rounds. Kamishloff is the last station in the government of Perm; a government I felt as little regret at quitting, as I had fear of entering upon my return; it is a place most unfortunately situated—between Europe and Asia, civilization and semi-barbarism—in short, between vice and virtue. To Tumen, the first station, are thirty-six, and to the second twenty-six, versts—thirty-five miles in all. The country appeared well cultivated, upon a soil of black mould. The third station of twenty-five, and the fourth of twenty-eight, versts—another thirty-five miles, I cleared in good time; but with a somewhat awkward indication of ulcers on my feet; a malady, according to my system, very easily and cheaply to be remedied in Siberia. At the last station, a small Tartar village, I was regaled with pork, bread, and eggs, at free cost, no purse being necessary among these Tartars. I partook of the wholesome fare *à la Tartare*, shaking hands first with the host, and re-

ceiving his blessing of "Peace be with you!" then squatting on my hams like the rest of the company. On the third day I reached Tumen, after near forty miles' walking. The town-major kindly received and lodged me in his house.

Tumen is a city of some consideration, and, from its local situation, enjoys a considerable trade with the fair of Irbit, as well as to the south-west and south-east of it. Its population is said to consist of eight thousand, occupied mostly in the preparation and export of timber, tallow, hides, and embroidery. It is situated on the banks of the Toura. It owes its celebrity to Yermak, who discovered and conquered the greater part of Siberia. The environs of the city are fine pastures and corn lands. With this advantage of soil, added to that of its being a depôt, or chancellery, as it is called, of the Russian American Company, for the receipt and transportation of their goods, as well as to enlist volunteers, it may be said Tumen is a place of considerable promise. The banks of the Toura are steep, and the current rapid. The country round is populous, and more than ordinary industry is everywhere observable.

Having crossed a miserable bridge, I reached the first station from Tumen, fifteen miles, where I put up for the night. It was, indeed, a wretched place; but I shall remember it, as affording a specimen of the proficiency I had made in the Russian language. Upon my arrival I demanded the name of the place, and was answered, as I had often been, *Malaya Derevenya*, which I interpreted *little revenue*. In the present case such a name seemed, indeed, peculiarly appropriate, for certainly the place appeared too poor to contribute any very efficient support to the resources of the em-

pire. The frequency of the reply, however, induced me here to make inquiry, and I discovered my error, the nature of which, however it abashed me at the time, places me in very respectable company—no less than that of the *justly celebrated* and learned Dr Clarke, who was eternally crossing the river Protok, apparently ignorant that the Protok means neither more nor less than the *branch* of a river.

The second and third stations lay on the banks of the Toura, running through a highly cultivated and pleasant country, with immense herds of cattle scattered in every direction, and the inhabitants civil, polite, and hospitable in proportion to their wealth. During the latter part of this walk, I had followed the custom of the place, the same as that in Spain, where I have often wandered with the muleteers, viz. that of sleeping in the open air. They are, indeed, a set of merry, happy fellows—hail fellow well met, this way or that, rain or shine, hot or cold, nothing comes cross while the beasts can get good fodder, and the moon does not shine in their eyes. A good fire serves at once to cook the provisions, drive away the mosquitoes, or keep off cold.

The following day I reached the fifth station, thirty-five miles. Here are a few dirty huts in a low marshy country. I had crossed the Toura by a miserable ferry; the breadth of the river two hundred yards, and the rate three or three and a-half knots per hour. To the eighth station is still a low country, almost inundated from the late heavy rains, which have done so much damage, that the village of Lepofsky has been completely washed away. With the river Toura constantly at my side, and the rain almost incessant, I reach-

ed the tenth station ; and thence to Tobolsk, where I arrived, half drowned and famished, at three in the afternoon. I had encountered considerable difficulty in crossing the Irtish, in consequence of the rapidity of the fresh. The view of the city and ancient fortress, on arriving from the westward, is very fine, standing on a considerable eminence which overhangs the river and lower city.

Upon my arrival, I searched out the abode of Mr Rosing, son-in-law to the governor, and brother-in-law to my late kind host, Mr Berg, of Perm. The family were all at the governor's, but receiving a note from me, they kindly invited me to dinner ; my situation, however, rendered this impossible, as I was all but naked. My second apology brought the host himself, who ordered me every accommodation I needed. In the evening, the whole party visited me from the governor's, observing with much kindness on the delay of my visit, and adding the proverb of Mahomet and the mountain. I gave myself up to the enjoyment of this delightful company, and of my pipe and a glass of punch, and could have fancied myself anywhere rather than at Tobolsk.

Formerly this was the capital of all Siberia, afterwards of a province, but now of western Siberia ; a governor-general residing in it, whose jurisdiction comprises that of Tomsk and Omsk, while Irkutsk has also a governor-general, who rules Irkutsk, Yenisseisk, Yakutsk, Okhotsk, and Kamtchatka. Tobolsk is a large and ancient city, at the junction of the Tobol and Irtish, two noble streams, which, falling into the Ob, assume its name, and are, with it, ultimately lost in the Frozen Ocean. The inhabitants are estimated at twenty thousand, composed of Russians, Tartars, and Bu-

charians. A considerable trade is still carried on with China, and Tobolsk may be said to supply all Central and Western Siberia. It has, however, lost much by the change of route, which formerly led through the city; by which change the caravans have disused it as a halting-place on their way to farther Siberia, and on their return, the straight road being from Tumen to Tara.

Tobolsk is the see of an archbishop, who has jurisdiction over all Siberia. It has many handsome churches, but (fortunately) no convents; the streets are paved with wood, and in general the buildings are of the same material. The markets and bazars are well regulated, and the town in general is very clean. The residences of the archbishop, governor-general, and principal officers, as well as the barracks, arsenal, and all public offices, are in the upper part of the city. The position is a most commanding one, a matter of no slight consideration in those times, when convicts were kept in the lower town. Numerous large flocks of cattle are seen in the neighbourhood of Tobolsk: provisions are cheap and abundant; bread thirty-six pounds for a shilling, and the same quantity of meat for three; and hospitality eminently proverbial. But what is, perhaps, more remarkable, very good society is to be enjoyed here, and the strongest features of content are displayed in this hitherto supposed metropolis of barbarism and cruelty.

The truth is, that Tobolsk is not a place where convicts or malefactors are allowed to remain, but people who are exiled from political causes only; the principal part of whom are officers, who have still the privilege of appearing in public, without the loss of either rank, fortune, or even character.

The governor has it in his power to befriend any individual, himself becoming responsible for his appearance when necessary ; and as no government transports or banishes *fools*, Tobolsk may very well be, from this circumstance, a highly civilized and eligible place of residence. Malefactors and bad subjects are sent to Tomsk and Nertchinsk.

I visited the celebrated fortress built by Yermak, the discoverer and conqueror of Siberia. Several old swords, muskets, and the like, are deposited here, which for size and weight might vie with the more famous sword in Dumbarton Castle. I also attended an examination at the public military and the provincial schools on the Lancasterian system. The children seemed to have made considerable proficiency in the first rudiments ; the schools, however, are yet in their infancy, though nearly one thousand boys attend. It was, indeed, gratifying to a patriotic heart, to see the institutions of Old England adopted in the heart of Siberia—an adoption equally honourable to us and creditable to Alexander.

The view of the surrounding country from the residence of the governor is really sublime, preserving still its ancient wild magnificence. In front are the noble Irtish and Tobol, joining their waters from the east and south, and continuing their united course through the black and impenetrable forests, till lost on the verge of the horizon. The numerous pasture lands on the opposite bank of the river, with here and there a smoking chimney, enliven the scene, and render the place, with all its surrounding but distant deserts, a really enviable retreat. Immediately under the eye is the river and lower town, with its regularly intersecting streets ; all these afford ocular demonstration

that Tobolsk is far from being a dull place ; yet, even in summer, the situation is very cold and bleak, being in the latitude of near 59° , and the thermometer, during winter, at times falling as low as 40° and 42° of Reaumur ; while, on the other hand, it is not always free from the opposite unpleasantness of extreme heat.

The climate of the province, generally speaking, is inhospitable, no part but the southern producing grain. The soil is chiefly marl and chalk, except to the north, which is covered with immense tracts of sand. The wood is for the most part stunted in its growth, and such is the poverty of this province, which contains more than a million of souls, that the government receives from it but three millions of roubles net revenue, or one hundred and fifty thousand pounds sterling. Its extent is immense, being from the latitude of 50° to the Frozen Sea, and near one thousand miles in width. The northern districts are inhabited by Samoiedes and Ostiaks, a wild, barbarous race, who live by fishing and hunting, enduring all the rigours of winter, sometimes even without fuel. Fishing is also an active pursuit at Tobolsk, near two thousand people being employed upon the Irtish and Tobol. The practice is to ascend the streams before the winter commences, catching and drying the fish as they go, and returning to the city with the breaking up of the ice. This employment, besides providing for the maintenance of those engaged in it, yields a very remunerating profit. The embroidery of muslins is also brought to considerable perfection at Tobolsk, introduced originally by the daughters of exiled officers, who had felt the deprivation of their former means of subsistence ; and it is now the prevailing fashion among

the ladies. The poorer classes, however, are indolent, and will seldom work beyond what is immediately necessary for the procurement of food; and this may in part account for their suffering some of the richest and most beautiful lands in the world, on the banks of the Irtish; and towards the Chinese frontiers, to lie waste, while they prefer the deserts and forests of the north. To this inducement, however, must be added that of obstinacy and false pride, and, perhaps, some portion of laudable attachment to their native city, which is termed the grand and ancient capital of all Siberia, and which has been the scene of achievements, equal, if not superior, to those of Cortez.

CHAPTER V.

Brief History of Western Siberia and of its conqueror Yermak—Imalak—Ingeary—Kaminski—Kamisart—Ishim—Tusnabolova—Toukalinsk—Omsk—The Kirguise—Calmucks—Jeliezinskaya—Yamishersk—Poyanoyarsk—Ubinsk—Uvarova—Alexandrofsk—Bouktourma—Krasnojarsk—Maloi Narymsk—Chinese Frontier—The Irtish—Ustkamenegorsk—Ismayelova—Neighbourhood of the Kolyvan—Kalmanka—Barnaoule—Tomsk—Kioff—Krasnochinsky—Bagota—Atchinsk—Krasnojaisk—Kansko—Ingashe—Nishney Udinsk—Irkutsk.

THE early history of this part of the world is involved in much obscurity, little being known of it prior to the beginning of the sixteenth century, when the celebrated Yermak became at once the discoverer and conqueror of Western Siberia. He had originally been the leader of a numerous and well-organized banditti, who committed great and distressful ravages on the rivers Don and Volga, but which were put an end to after the victories of Ivan Basilovitch over the Tartars of Kazan and Astrakan, when he devoted his attention to the peaceable establishment of his dominions. Yermak was thus compelled to fly, and sought refuge in the north, on the banks of the Kama, where the family of Strogonoff had a factory for the purpose

of barter with the Siberians. The conduct of our hero proved so unlike that of a freebooter, that Strogonoff, during the winter of 1577, provided him with necessaries to subsist his men, and with arms and ammunition to make an incursion upon the Siberians.

The first campaign was in the summer of 1578. Yermak had from six to seven thousand men with him; but, through his ignorance of the route and want of guides, winter closed in upon him almost before the commencement of the campaign. His route lay along the Kama to the entrance of the river Silvar, where he passed the winter in a small town still named after him.

In the spring of 1579, Yermak returned to Strogonoff's establishment, where he received a fresh supply of arms, including a set of colours ornamented with images after the Russian custom. In the summer he resumed his operations, availing himself of the little rivers Tchsusovaya and Serebranka; the latter of which brought him to the point whence it was necessary to proceed by land. He was soon, however, again obliged to winter in what is termed a krepost, or wooden fortress; his forces, meantime, were fast diminishing by sickness and constant skirmishes.

In 1580 he continued his progress along the little rivers Barancha and Jouraslik, where his forces were reduced to one thousand six hundred and fifty men. With these he sailed down the Tagili, and reached the town now called Tourinsk, and there defeated the Tartar prince Epantchy. On the 1st of August he reached Tsaugy, now Tumen, on the banks of the Toura, of which he took possession, and fixed his winter quarters, with only one thousand five hundred fol-

lowers, but inured to hardships, accustomed to victory, and putting implicit faith in their leader.

The spring of 1581 was marked by two victories over the Tartar prince Mahomed Koul. Yermak then marched along the Tobol till he reached the Irtish, the centre of Koutchom Khan's dominions. His forces were now reduced to five hundred men; yet with these he resolved to conquer or to die. On the 23d October a bloody conflict took place between the armies, when Koutchom Khan and the Prince Meneik Koul were entirely defeated, and narrowly escaped being made prisoners. The scene of action was at the junction of the Tobol and the Irtish, the site of the present city of Tobolsk. Yermak instantly directed his march against Sibir, the capital of the Tartars, distant twelve miles; and on the 26th October entered it in triumph, received the oath of allegiance of his new subjects, and, from the head of a banditti, became a sovereign prince. The situation of Yermak was, however, by no means enviable. He resolved, therefore, to make a tender of his conquests and further services to the Tzar. Accordingly, on the 22d December, he dispatched his confident, the Ataman Klotsoff, to Moscow, with the news and message. Klotsoff was received with every demonstration of joy; and special marks of royal favour were conferred upon the hero and his companions, together with a general pardon for past offences. Yermak himself was honoured with two rich coats of armour, a silver cup, and a fur cloak which the Tzar himself had worn; the last being then considered the greatest mark of distinction in Russia.

Yermak, meanwhile, was not idle. Leaving a part of his small force to garrison and protect Sibir,

which seems to have given name to all the Asiatic part of the Russian empire, he, with the assistance of his favourite, Briazga, extended his conquests to the countries of the Ostiaks and Vogouls, near to Samaroff and Tabarinsk.

In the sequel, Yermak undertook an expedition for the purpose of subjugating the surrounding territories, and annihilating the remainder of the Khan's followers. Attended by three hundred Cossacks of the Don, he reached the settlement called Ambashou; but here he received information which induced him to retrace his steps towards the new capital. He reached in safety a canal which had been cut by his directions as a species of defence, as well as for the shortening of the communication; and here he passed the last night of his extraordinary career.

The inclemency of the weather, the fatigues they had undergone, and the apparent security of the situation, all operated to plunge the party in profound sleep; even the guard was overcome: when Koutchom Khan, who had, cautiously and unobserved, followed and watched his enemy, fell upon them sword in hand. Never was a scene of greater tumult, or a night victory more complete than that gained by the Tartars; and Yermak's whole party, with the exception of himself and one man, were cut to pieces. Finding all lost, Yermak fled to the river, and, in attempting to jump into a boat, fell into the water and was drowned; the weight of his armour preventing his swimming. Thus perished, after seven years of constant warfare, this enterprising and valuable leader, in the night between the 5th and 6th of August, 1584. According to tradition, his body was afterwards found and buried near the promontory of Bagieshefsk, under

a large fir-tree, not far from the Irtish, near which a cross is erected.

For a while the Russian empire in Siberia was at an end, as the remains of a small band, which had been left as a garrison at Sibir, together with the single individual who had survived the late conflict, and told the mournful tale, evacuated the fortress, and returned to Russia. The court of Muscovy were not long, however, before they renewed their designs upon the conquest of Siberia. The intestine commotions and divisions of the Tartar princes, who were asserting their relative independence, offered the best prospects of success; and many of the Tartars were pleased with the conduct of the Russians, and perfectly disposed to join them against Koutchom Khan, who was disliked for his intolerant zeal in propagating the Mahomedan faith. A body of three hundred Russians accordingly penetrated to the Toura without opposition, built the fort of the Tumen, and there waited for reinforcements. The subjugation of Tobolsk and Tara followed; and fortresses were there also established. In the short space of a century, the whole of Siberia, from Europe to the Eastern Ocean, and from the Frozen Sea to the Chinese frontiers, was annexed to the Russian empire. New towns were built, colonies were planted, and settlements established in the most distant parts. Those tribes of Tartars who were not readily reducible to obedience, were at once exterminated; and something like the same merciless cruelty which characterised the Spaniards in South America, was practised in Siberia. Much more would have been done, and the Russians would no doubt have had possession of all Mongolia, had not the jealousy of the Chinese interfered.

The Russians had extended their thirst for dominion along the banks of the Amour, and were continuing their subjugation of the Tungousian tribes, when they encountered the Chinese, who were drawn thither by the same object. From jealousy of each other's conquests, these two great powers became involved in a war about the year 1680, and the fortresses on the Amour became alternately the property of each, as the chances of war dictated. At length, however, the Chinese power prevailed, and, at a peace in 1689, the Russians ceded a considerable territory, together with the navigation of the Amour. The value of this river, at that time unknown, has been fully seen since the discovery of Kamtchatka and its adjacent islands, as well as the proximity of continental America, and the archipelago of islands between. This ceded territory, and other valuable points, Russia has never since been able to regain; as, with little exception, the two countries have remained at peace; and thus closes the history of Siberia, till the discovery and conquest of the peninsula of Kamtchatka, which took place in the early part of the eighteenth century.

The above history is in the main a translation of a biographical notice, attached to the profile of Yermak, on a large map, which was presented to me by my excellent friend the governor of Tobolsk. A part of it is also to be found in Coxe's account of Russian Discoveries.

To return to my journey, for which I had been preparing during the three days I was in Tobolsk, by getting a new leathern water-proof knapsack, and deliberating the route to be pursued. I felt anxious to get on as fast as possible, but yet so as not to miss meeting the governor-general, who, I

was informed, was on his way to Tobolsk, but not by the direct road, his excellency taking Kolyvan and Omsk in his way. It was therefore determined that I should go first to Omsk, and follow the Irtish as far as the Chinese frontiers; and thence, to return by the same river, and proceed to the mines of Kolyvan, where it was to be hoped I might arrive in time to meet Mr Speranski, the governor-general. In furtherance of my design, the governor supplied me with a Cossack, and an order for horses, if I should deem them necessary, as well as an open order for all assistance to be rendered me, not only in his government, but as far as the capital of the next; his power being understood to extend from capital to capital.

I bade adieu to Tobolsk, with a grateful remembrance of the kindness I had experienced; and, in company with my young Cossack, pursued the road to Omsk. It is not a good one. The country residences of the governor and archbishop were on the right, as also a large monastery, which I had visited three days before on the occasion of a fete; but the country generally possesses very little of interest. At twelve miles I passed a second monastery, romantically situated, and upon the road to it, many hundreds of people coming from their annual visit to the Virgin, to whom it is dedicated; her ladyship having, during the week, presented herself at Tobolsk to receive her rents. At sixteen miles I reached the village of Imalak, overhanging the Irtish, which, dividing, forms an island, and in such a manner as to present a double serpentine view. The extent of territory seen from the elevated banks is astonishing and beautiful.

I descended the mountain by a steep and dan-

gerous road, then ferried over the Irtysh, passing through a large Tartar village, situated in a fine pasture, with some rye corn, and reached the second station on the lofty bank of the Irtysh. I found the cottages neat and clean, and the inhabitants comfortable, hospitable, and contented; without hope or expectation of reward for their hospitality to me. Thence to Berezofska the country appears more cultivated and pleasing, with a good deal of fine wood in the valleys. Thence to the Tartar village of Ingeary, on the banks of the Vagay, when I entered a considerable tract of their lands, near seventy miles in extent, but without a single Russian inhabitant. These Tartars are of the Bashkire race. I could not help observing the perfect cleanliness of their houses, the civility of the people, and the good economy of their lands. I slept most contentedly in these dwellings; feeding upon milk and cakes, but seldom tasted animal food.

The dress of the Tartar women is light, if not neat; being merely a plain white shift, with a sash round the waist to support the bosom; besides this they have not a vestige of apparel, except the handkerchief on the head. The young girls had the hair plaited and hanging down like the Biscay girls, or brought up under the left arm, and fastened to the fore part of the shift by a riband. Such is the simple summer dress; the winter, or gala one, is, however, more tawdry. Their features appear delicate, but their limbs are strong, and their complexion very dark.

At Kamenski I quitted the great Siberian road, not far from Tara, passing several neat Tartar villages, whose white plastered chimneys and ovens reminded me a little of those in my own country.

The furniture consists of a few earthenware utensils, and a set of tea-things; one half of the room is elevated above the other about fourteen inches, and that half serves them alike for sitting, sleeping, and store-room. They are particular in having clean bedding, and many pillows; the latter of which are always presented to a stranger to raise and soften his seat, as they have neither chairs nor stools. A Tartar dwelling has always, if possible, attached to it the convenience of a vegetable garden. The women, I observed, never presume to eat or drink till their better or worse half has finished, and then but seldom while in their presence.

Reached Aramashansky, near the Vagay, which winds its waters through many fertile spots. At Kamisart I met much incivility, not being permitted to pass the night in it without having recourse to severe measures; to avoid which I preferred continuing my journey in the rain. This part of the country appears well cultivated, and better peopled; nor is it void of interest,—for the account of its scenery, described in the well-known tale of “Elizabeth, or the Exiles of Siberia,” is, on this point, very correct. Crossed the little river Carasal to Besroucouva, a fine level pasture plain, feeding immense quantities of cattle; thence to Ishim, which I reached, at four in the evening, in a torrent of rain, much fatigued, and my Cossack more so; he was, in fact, perfectly useless.

Ishim, so celebrated in the tale before alluded to, is a miserable town, on the stream of its own name, deserving remark here only for the incivility of the inhabitants, who, with the commissary and the doctor, were all noisily intoxicated. Of course, I could get no attention paid me, either as to lodging or food; and, though the rain fell in tor-

rents, I and my Cossack were obliged to pass the night in the market-place.

Next morning we reached a neat village called Borovaya, where I was hospitably entertained by the elder of the village, who also furnished me with horses to Tusnobolova (twenty miles), where the long-bearded guard searched my baggage; alas! it contained little; and for once I felt ashamed at the examination. They did their duty in a civil manner, but I was much puzzled to think what they could be in expectation of finding. The country is open, and laboriously cultivated, and the neighbourhood populous. Much fine wood, and some fishless lakes, are also to be seen. I overtook a party of unfortunates exiled for misdemeanours, and compelled to live in this district, which is hence the general rendezvous of pick-pockets, &c. At the next village I happened to be quartered at the house of a newly-married couple; and I confess I regretted the law which compelled them to quit their bed and room for me. To this sacrifice, however, they submitted in the most cheerful manner, treating me with bread, milk, and eggs, and indeed whatever the house could furnish. Through a succession of happy villages I reached Toukalinsk, over an uninteresting level of pasture land. The wretched external appearance of the cottages is more than counterbalanced by the neatness within; and if half a dozen healthy and beautiful children be any indication of content, then are the inhabitants of this district most happy. The price of bread is one shilling, and of meat three, for forty pounds. The road is, in general, very good.

At Toukalinsk I had the misfortune to lose what was to me my all—my passport, papers, and

every protection in Siberia. In vain I addressed the commissary; in vain I offered a guinea for their recovery; in vain I pointed out the rogue who had taken them in the tin case from the seat while I was at dinner. I begged, entreated, insisted, threatened, abused; all was to no purpose; and I was finally constrained to go without them. By this terrible disaster I was entirely deprived of all testimony of myself, my connexions, or the object of my journey, and lay at the mercy of any one who might choose to provide me with large but cheap lodgings.

My now melancholy route towards Omsk was over a similar pasture plain as far as the eye could reach, with scarcely the appearance of a shrub. At Soukofski the drunken postmaster would have made me like himself, but in such rainy and dreary weather I preferred tea. I next crossed over to a little village called Krasnoyarsk, on a stream which unites with the Irtysh, now again visible, after an absence of two hundred miles. I at last got view of the fortress of Omsk, and, having reached the Irtysh, passed from a most dreary into a highly fertile corn country, and, finally, in a ferry over the Om, I entered the city by a neat bridge, at five in the evening.

On my arrival, I of course presented myself to the ispravnick, or head commissary, and made known my loss in as good language as I could. I failed in making him understand me, but he humanely gave me good lodgings until he could procure the presence of one of the military officers to act as interpreter. This was done the next day. In the meantime, I addressed a letter to the governor-general and governor of Tobolsk, requesting an attested copy of the documents I had

lost, and which I had taken the precaution to have made there. The police-master invited me to dine with him, though he confessed he could not understand either my object or character. He was, however, soon satisfied by the arrival of an express with my passports, &c. all complete. Thus was I, from a state of suspicion and surveillance, again restored to society. I should be very ungrateful, were I not to do justice here to the conduct of the commissary, who kindly went eighty miles, upon my account, to enforce the return of the papers, which, being in a tin case, induced the party to suspect money was there. All that I had was, however, in my knapsack, and that did not amount to five pounds. I dined the second day with the chiefs of the district, when a committee of the merchants attended to request my acceptance of a commercial commission to the Kirguise and Calmuck's country, being given to understand I could speak those languages, from having formerly traded with them. Here, then, was a captain of the British navy, in the heart of Siberia, converted into a Tartar trader. I humoured the joke, and demanded the per-centage. They made their offer, and my demand exceeding it by from twenty to thirty per cent, I was of course not employed. In the evening, I received a polite invitation from Baron Klotte, the general then commanding the military corps of Siberia. It is proper to observe, that the worthy baron honoured me with this compliment before I had recovered my papers, and solely with the view of benefiting and protecting a stranger. Peace to his manes! he is numbered with the dead, leaving a wife and very large family, with slender means to maintain existence. I passed in the garrison three pleasant days,

conversing in the French language, which I found both ladies and gentlemen understood well. Feasts and fêtes were given to me by the first individuals, all of whom vied in exemplifying to me the boundless hospitality and friendship of their nation.

Omsk is placed at the junction of the Irtysh and Om. Previous to the invention of cannon, it was, no doubt, a strong place, and even at present, considering the means of those by whom alone it can be attacked, may be deemed impregnable. It has a garrison of four thousand men, with a flying artillery of forty pieces. It may be divided into fortress, town, and suburbs. The first is the most considerable, and is in fact a neat place; the buildings, barracks, &c. being constructed generally of brick, and surrounded by a good ditch and mud wall, which will ere long have cannon mounted upon it. The military college is a noble foundation upon the Lancasterian system, and was established immediately on his Imperial Majesty's return from his visit to England. Wonderful proficiency has been attained by several of its pupils, now young men, and the general improvement reflects credit on all concerned in its management. The youth are instructed, besides reading, writing, and arithmetic, in drawing, mathematics, fortification, and algebra, and in some of the Oriental languages. The barracks for the boys, their food, clothing, bedding, &c., are in excellent order; and every praise is due to the attention and benevolence of the commandant, Colonel Ivanoff, who is considered by them as a father. They are composed of the children of the military forming the army of Siberia. The school for the children of the Cossacks is on a similarly benevolent plan, although not quite so forward, from the want of

good masters. The town and suburbs have some neat buildings, but are not otherwise remarkable. The united population is seven thousand five hundred.

Omsk was one of the strong places of the Tartars, and successfully withstood the attacks of the great Yermak. The country round is fertile as to its soil, though not extensively cultivated; it is one vast plain, as level as a floor. The fortress is north, and the town south, of the Om, but both are east of the Irtysh. Opposite is the territory of the wandering Kirguise, presenting no appearance of cultivation or dwellings. A considerable trade is carried on with them, as also with the Calmucks to the south, which consists in the barter of cattle, &c. for tobacco and spirits. Several children of each of these tribes are to be seen in Omsk, who are slaves, having been sold by their parents for a pound of tobacco or a glass of spirits. They are, however, in this degraded condition, better off than when wandering the inhospitable deserts.

The Kirguise are divided into three hordes, all more or less tributary to Russia, although they have khans of their own. They are all wanderers over the countries between Omsk and the Caspian Sea. Their occupation consists in hunting, fishing, and breeding cattle, and of the latter they have immense droves in this vicinity. They are not considered nice in the mode of acquiring them, and have even been accused of kidnapping and selling Christians; an accusation not improbable from the example set them. They continue only so long in a place as there is forage for their beasts, getting, in winter, as near the woods as possible for the advantage of fuel, though, in most parts, the dried dung of their cattle provides a ready and efficient.

substitute. I saw one of their chiefs, a good-looking fellow, but very filthy; and indeed they are in general the most miserable and filthy race I ever beheld, scarcely, during the warm weather, affording themselves a pair of trowsers for mere decency. One large iron kettle, with wooden spoons, constitutes the furniture of their more wretched tent. They are, however, excellent horsemen, and are supposed to be descended from the Mongoles and Tartars. Their language is peculiar to themselves.

The Calmucks, who, like them, make no scruple to dispose of their children upon any momentary distress or want of spirits, are yet a different race, both with respect to features and origin. They are, however, their equals in idleness and filth, and follow the same vagabond way of life. The Calmucks are, notwithstanding, the direct descendants of the Mongoles, who emigrated hither after the destruction of their empire. Very few are subject to Russia, a great part of them living in Chinese Mongolia, while the rest of them, under the protection of Russia, roam about the countries situated between the Don and Volga and the Ural mountains. Their features will for ever mark them in whatever part of the world; the flat face, small and elongated eyes, broad nose, high cheek bones, thick lips, and brownish-yellow complexion, are sure signs of their Mongolian descent. They are obliging, but inquisitive and dishonest; yet, with a little Russian education and discipline, they make good servants. I ate and drank with them, as also with the Kirguise, upon roasted meat, without bread, or any thing else, save a glass of spirits and a pipe of tobacco.

Thus much of the two people whom I shall meet upon my next journey along the Irtish. I depart-

ed with a military Cossack, and a protection from Baron Klotte, addressed to all the general, field, and subaltern officers of the army of Siberia, accompanied with a discretionary power to call out horses. I reached the second station, twenty miles, and halted for the night; the third station, Achinskaye, is a large village, with a ditch and redoubt, for defence against bows and arrows. The neighbourhood of the fourth station abounds in horses, bullocks, sheep, and camels. I reached the twelfth, one hundred and fifty miles from Omsk, without any thing of interest. It is called Jeliezinskaya fortress, having a commandant, and garrison of two hundred and fifty men, and twelve pieces of flying artillery, to defend it. It is a neat little town, surrounded by a mud wall and ditch, with a ponderous gateway, which gives it a martial appearance; nor is the situation void of interest, although placed upon a desolate tract,

Where wilds, immeasurably spread,
Seem lengthening as I go.

The distant parts of the Kirguise lands boast some eminences, and a considerable quantity of wood; the road is good, and living cheap, fish particularly being very abundant. The road still lies along the right bank of the Irtysh, and the several villages are purely military, to keep up the communication between the frontier fortresses and Omsk; a non-commissioned officer and twelve or twenty men residing in each. Their dwellings are good, and excellent vegetables are produced in the gardens; a great advantage over the fort of Omsk, where the soldiers have either too much work, or are too idle, to attend to the production of veget-

ables, notwithstanding they are greatly needed as an anti-scorbutic, great ravages being made by that disorder among the soldiers, who at present subsist entirely on dried meat, bread, and brandy.

I dined with the commandant, a German, and resumed my journey, amongst a number of Kirguise tents, and immense herds of cattle. One of these wanderers I induced to sing; but, though the air was musical enough, its words, as I understood, and the accompanying actions, as I could perceive, were much too obscene. At the fourth station, I was favoured with a drive by a young lass of seventeen; and, if she manages her husband as well as she did the horses and the whip, I should scarcely envy him his fortune; though, indeed, she was a personable girl, and had secured my gratitude by officiating as postilion. The fifth station is marked by much corn-land. I dined with two of the Kirguise chiefs, who had come to take account of their property. Their appearance was handsome and manly; a long robe of blue cloth, beautifully embroidered, and fastened round the waist by a highly-polished silver belt, from which was suspended a dagger, a knife, a pipe, and what in England might be termed a tinder-box; a shirt of coloured cotton, large Tartar trowsers, and boots to correspond; a handsome fur cap, with a small black one under it to cover the clean-shaved head; a long beard, and bare neck. Their horses were well accoutred, and managed by a long whip, which serves also in the driving of the cattle. They were altogether superior-looking young men, of about twenty-five.

At the eighth station, the eye is somewhat relieved from the sameness of the scene, a good deal of wood and pasture land, with many of the Kir-

guise yourtes and fires, appearing on the opposite side of the river; an abundance of corn upon this. At the twelfth station several islands in the river, and many fishing-boats, are added to the scene. The youth of both sexes are extremely beautiful, and present the liveliest picture of health; both go unclothed till the age of twelve, with the exception only of a clean white shift, fastened tight round under the breast.

I reached Yamhishersk, one hundred and sixty miles from the last fortress, which it greatly resembles, although its garrison is larger, being seven hundred and fifty strong. The barracks and officers' quarters, as well as the storehouses, &c., are well built, and kept in good order. The present commandant, a sensible and civil German, supplied me with a bottle of rum, a pound of tobacco, and some bread. I met here also a young Prussian, who was a resident of Moscow when that city was burnt by the French. From that disaster a ruined man, he entered the army, and now presented himself to me as interpreter of various languages, though, of the six he professed, I believe he understood no other than Russ. His good-nature, however, and general obligingness to me, made him an acceptable companion.

To the next fortress is a distance of one hundred and eighty miles, which I commenced next morning, alternately walking and riding as circumstances offered. At fifty miles there are many long, but not very high, hills, and the country is sufficiently picturesque to employ the genius of a painter. The distant horizon to the north showed the Irtysh flowing in a direct course. Nearer hand it meanders beautifully, serpentizing through the pasture grounds, to which some natural hedges

gave the most interesting appearance. A solitary Kirguise village of movable tents stood on the centre, the river winding almost round it, and forming somewhat of a peninsula, as in the annexed cut,

the Δ being the site of the dwellings. Vast herds of cattle were grazing beyond the village; the sun was setting as it were in clouds of fire; while the moon, standing in the south, added a peculiar feature to the silence and solitude of the scene.

To the tenth station I trudged over bad roads, in worse weather, and through a dreary and unproductive country. On reaching the thirteenth station, however, high lands to the south began to revive me with their appearance, and break the sameness of the scene.

I stopped at Gloukhof, a little unwell, from having been wet twenty-four hours; a small cabin received me, whose civil landlord and his handsome daughter readily furnished me with bread, rice, and milk, and a comfortable bed. Next day, started for Semipalatinsk, which I reached at noon, having crossed some sand-hills.

Semipalatinsk is also a fortress, with nearly one thousand soldiers and a commandant. It is a neat town, and has a military school upon the Lancasterian system, instructing four hundred boys; a circumstance of pleasing reflection to an English mind, to find the benevolent ideas of his own country adopt-

ed even here, in a tract of country removed by its situation from almost every access to civilization. The establishment is in its infancy, and from this, and a great want of capable masters, exhibits no great proficiency beyond reading and writing. The town, independent of the military, numbers about two thousand inhabitants, who carry on an inconsiderable trade with their southern neighbours. It stands on a pleasant eminence, commanding a fine view of the lofty mountains to the south. I was hospitably entertained by the commandant, who lives in a respectable style. The surrounding country is void of cultivation, and infested with robbers, who commit serious depredations, an instance of which occurred while I was at dinner; a poor pedlar being robbed of two thousand roubles, or one hundred pounds, and his horse, neither of which there is any chance of his recovering. There is evidently something incorrect, but which I could not fathom, in the administration of justice as it respects the punishment of robbers; but there is no doubt that a due per-centage on the lost property, applied in a certain manner, will procure its restoration. This, indeed, appears as open a countenance of the crime as can well be imagined; yet such is the fact. If no fee is given, little exertion is made, and the numerous complaints on this subject have hitherto been of no effect.

I quitted Semipalatinsk late in the evening, and directed my steps for Ubinsk, along the banks of a little stream which gives name to the fortress, and which unites with the Irtysh. I had entered a kibitka which was passing the same way, and at some distance observed the postilion turn off suddenly to the right. My mind misgave me, because in no instance before had I deviated from the high

road. I recollected, also, that the Cossack and postilion were both half drunk, and had been in earnest and secret conversation ; I therefore determined to quit by a short movement. It was ten at night, and we were in a low thick brushwood, when, taking my knapsack, I suddenly quitted the vehicle, informing them, as well as I could by signs, and an obstinate persistence not to go their way, that if they were bound as they had pretended they would follow me. I continued alone, and regained the main road ; the vehicle also tacked and came after me, but I refused to re-enter it, and marched on to the next station, keeping them at a respectful distance all the way. On my arrival I discharged the Cossack, without, however, reporting his conduct to the German commandant, as I perhaps ought to have done. My hostess for the night was in a most unamiable temper, seeming to partake of the disappointment of the two fellows ; for which her husband, a corporal, gave her a sound drubbing, with a stick " bigger than his thumb."

In the afternoon of the next day I crossed the Irtish, after a hard walk of thirty miles. The country low, and wet from smart showers. In the evening I reached Poyanoyarsk, and here first saw melons in this country. These, which are of a prodigious size, form, with cucumbers and bread, the general summer diet of the inhabitants. They sell at one copec each, that is ten for a penny ; a price which certainly does not render to the grower any thing beyond the barest subsistence ; for five guineas I might have loaded a ship with them. I received a great many as presents, but left them as useless to one in my situation. The cucumbers are also very fine, and equally cheap, being one hundred for a penny ; and good wholesome brown

bread at five pence for forty pounds. Whether from perfect hospitality or abundance I know not, I suppose from both, but I certainly never was better entertained.

Next day I reached Ubinsk, a vile dirty place, called here a town. I had before passed some distant elevated lands on the Kirguise side, and here, I think, may be said to commence that chain of lofty mountains which divides the empires of Russia and China. Having procured another Cossack, I continued along the Irtish for Ustkamenogorsk, the country on the west presenting some fine hill and dale, with mountainous breaks in the back ground, while the Russian side is still a level steppe. Cornfields lie at intervals along the road to the river Uba, which unites with the Irtish opposite to a bluff projecting point, and hence occasions a strong cross current and rapid. It was late when I reached it, yet, being anxious to get on, I determined to cross the stream, against the remonstrances of the natives. The ferry, or horse-boat, being out of repair, I was advised to wait at the village; but, seeing a canoe, I determined on trying how far it would assist me. My knapsack and various parts of saddlery I skulled over in safety, with my Cossack, the inhabitants sending their horses at the same time, and actually tying two to the canoe, which had nearly proved fatal to the whole. I, however, reached in safety, and a traveller on the opposite bank gave me the use of his *téléga* to proceed upon my journey, not being himself able to take it across the river.

The night was dull and rainy, but the moon being near her full, we got on tolerably well, and at eight in the morning I reached Uvarova, whence I again began to enjoy my travels; for that unpro-

ductive and almost endless flat which extends from Ubinsk to Tobolsk and the Frozen Sea, and from the Ural chain far eastward of Tomsk, is now succeeded by a beautiful variety of hilly country, much cultivation, and some forest spots. Many bold and picturesque bluffs run into the river, rushing as it were through the valleys, and forming strong eddies as they pass the islands with which the river is interspersed. I reached Ustkamenogorsk in the early part of the second evening, having crossed a sort of broken chain of hills. The scenery in general was, however, very beautiful and wild; to the right, one of the peaks lifts its snow-clad head, and is visible at the distance of one hundred miles. Ustkamenogorsk is placed in a vast level valley, bounded east and west by lofty distant mountains, and the whole forms a rich and striking panorama. The fortress is, like others hereabouts, a bare mud wall, yet keeps a commandant and three hundred soldiers in snug but useless quarters, occupied in cutting hay, and feeding upon the poor peasantry.

Very fine timber is brought here from a distance of twenty miles, but the country is otherwise sterile. I quitted it for Boukhtarma next morning. The first station was over a mountainous road, offering the most abundant treasures to the botanist and mineralogist; thence to Feklistouska twelve miles, and to Severnoy ten, over one of the most romantic countries in the world; sometimes along the banks of the rapid Ulba, then across deep and dangerous ravines, tremendous precipices, and fertile valleys, where a few Tartar peasants, tending their flocks and herds, were the only signs of any thing beside the immediate works of the Creator. Some slender birch and green fir trees arrest the

attention on the almost trackless path. The scene was too fine to sleep in, and I continued to Alexandrofskoy, twelve miles farther, to witness a repetition of the magnificence I had left behind. It was indeed a scene to be enjoyed; at the close of the evening, in the middle of the month of August, and when both the great luminaries of heaven were just seen peeping above the distant hills, one rising from the east, the other setting in the west, and not a sound was to be heard save the murmur of the Ulba winding towards the east. The night was cold but beautiful, and a heavy dew falling on the most elevated parts, seemed to cast a melancholy shade over the valleys below. All nature seemed to smile upon me as I trotted over the ground, meditating upon the perfect beauty of so deserted and unfrequented a spot. My reverie continued till midnight, when I reached the village. Thence on horseback to Boukhtarma, fifteen miles, arriving early in the morning. The way was still exceedingly beautiful, being over a mountainous tract, now on the summit and then in a close valley, everywhere overhung by birch trees. A few corn-fields also appeared in the last stage before I reached the fortress.

Boukhtarma stands on the right bank of the Ir-tish, in one of the most romantic spots in the universe. It is environed by the noblest mountains, which yet appear to have no other connexion with each other than that of standing together on the same globe; they are in fact so many beautiful hills placed on a perfectly level plain, so that a traveller may go round them without an ascent or descent of ten perpendicular feet. From this may be imagined the romantic beauty of the valleys which intervene; not a tree, nor a shrub, nor

a habitation, is to be seen, save only in the fortress—nothing but grass. The valley is one continued carpet of herbage, forming, in contrast with the sterile mountains, a picturesque solitude, undisturbed, except during the night, by the barking of the wolves and other wild animals.

I drank tea with the commandant, and called on the administrator of the customs, to whom I had a commendatory letter. I found him civil, obliging, and tolerably educated—consequently a rare plant in such a place. I accompanied him to view what is deemed an object of curiosity in this part of the world; it is a large sand-stone near the bank of the river, on which are imprinted the marks of the feet of a man and of a horse; they are in a perfect state, and to all appearance have been formed by nature. The heels are towards the river, the feet of the man in advance of those of the horse about thirty inches, very well representing the situation of the feet of a man holding the horse. I could gather nothing of its origin beyond the silly tradition of the place. It is evident, however, from the situation of this stone, that the river has changed its course.

The fortress, though it maintains a commandant, with a garrison of three hundred men, is a miserable place, the worst along the whole frontier line; nor is the village better. The Kirguise commit great havoc among the cattle, stealing great numbers, of which not more than one half are, in any circumstances, restored. A considerable trade might be established at this point between the Russian and Chinese empires, but for the obstinacy, ignorance, and policy of the latter nation, who will not change the route by which their forefathers travelled. The advantage of the alteration

would be sufficiently apparent from the mere fact of the lesser distance from Pekin to Boukhtarminsk, than from that city to Kiatka and Tobolsk. But the main circumstance is, that, by adopting Boukhtarminsk as the entrepôt of the national commodities, no less than three thousand miles of land-carriage would be saved, as on both sides the produce might go the whole distance betwixt St Petersburg and Boukhtarminsk by water; the effect of both would evidently be a very considerable saving, principally indeed to the Russians, on which account the Chinese would rather waive their own advantage than consent to the arrangement.

Against this measure it is argued, that the government of Irkutsk would be materially injured. This is by no means clear: and, even if true, the benefit of the public should not be put in competition with that of half a dozen rich merchants, who might still maintain a trade to supply all Farther and Central Siberia. The Russian American Company must be rather benefited than injured by the measure; and, in short, all the difference to Russia would be, that its European dominions would be supplied with the productions of China at twenty per cent less than at present. The Russian government appear to have had this project in contemplation, though they have not persevered; a few silks, bricks of tea, and tobacco, being the only articles entered since the erection of a custom-house. No doubt can exist of the advantages arising from so local and beautiful a situation; it would have the effect of making the banks of the Irtysh, from its source to Tobolsk, one of the most valuable, fertile, and beautiful districts in the universe. Settlers would come from all parts of the

world to establish themselves on its boundless tracts of corn and pasture land. Switzerland has been called free, but will scarcely bear comparison with a country which has no human inhabitant. Nor is the climate bad; 18° of Reaumur's being the extreme; and winter, which begins in November, ending in April.

Having procured a guide, I left Boukhtarminsk for the line of demarcation on the Chinese and Russian frontiers. I first crossed the stream which gives name to the fortress, and then, over a good path, entered upon a most romantic country, near the village of Veronia. It is impossible, without a poetical imagination, to conceive the beauties of such a country; the magnificent and bold sterile precipices, which are seen rising from the great level pasture base, are, I should think, quite unparalleled; and the noble Irtish, forcing its way amongst the numerous islands near this part of the river, adds to the majesty of the scene. At the village, among other similar luxuries, I was treated with wild currants, melons, cassia, "milk, and honey." Surely this is the natural place for the habitation of man. The banks of the river are indented with numerous well-formed artificial caves, used as ice-cellars. Fifteen miles farther I reached the picturesque village of Cheremshanka, remarkable as a great breeding place for cattle; thence along the banks of the Irtish, on a good path, over a well-cultivated corn country, I passed Krasniyarki, and at eight in the evening reached Makaria, on the banks of the Narym, a small stream uniting with the Irtish, in an abundant and fertile valley.

The night was so beautiful, the moon just ascending above the hills, that, in spite of a good

supper which was ready and inviting my attack, I resumed my journey on horseback, in company with the landlord, to Malaya-Narymka, the last Russian spot on the frontier. An officer and a few men, placed here, are all that are left to mark the boundaries of two such mighty empires as Russia and China. I forded the little stream which forms the actual limit, and, seating myself on a stone on the left bank, was soon lost in a reverie. It was about midnight; the moon, apparently full, was near her meridian, and seemed to encourage a pensive inclination. What can surpass that scene I know not. Some of the loftiest granite mountains spreading in various directions, enclosing some of the most luxuriant valleys in the world; yet all deserted!—all this fair and fertile tract abandoned to wild beasts, merely to constitute a neutral territory!

To the first Chinese settlement it is eighty miles; I would fain have visited it, but durst not, without previous notice; and for this ceremony could ill spare the time. Formerly their advanced post was where I am writing this account, and I felt something like pleasure to find myself within the *Celestial* Empire. Their guard was, it seems, removed by the court of Peking, from jealousy of her subjects holding any converse with foreigners. The commanding officer is a banished mandarin, who is compelled to live like the soldiers, being denied both money and assistance from his friends; but as the post is generally occupied by a person who has been condemned to death for some great crime, he is fain to accept his pardon on condition of serving ten years as chief of the guard. They have, I was informed, a neat village, with abundance of meat and vegetables, besides wild fruits.

At peep of dawn I re-crossed the Narym, and, getting a canoe, floated down to my deserted supper at Makaria, which the hostess had been desired by my companion to keep hot. I reached it at four in the morning, having been carried along by the stream with dangerous velocity. After some refreshment, I again entered the canoe, receiving a brick of tea and a pound of tobacco from my obliging host. He is a voluntary settler, with twenty men under his command, who are all accumulating property. The velocity of the Irtish soon carried me past Krasniyarki, and I reached Boukhtarminsk at three in the morning of the following day, if possible still more delighted with the prospect; the ever-changing variety of the banks is as rich as the beauty of the inland scenery. The left bank consists generally of bold and lofty precipices crowned with wood, while the right presents a low but beautiful plain, studded with rocky hills, and abounding in corn and hay.

The re-crossing of the Boukhtarma was certainly a hazardous adventure. The passage is hardly ever attempted but in the day-time, as there are many shifting sand-banks, and a tremendous cross current, or rapid, to avoid. This is occasioned by four currents meeting at the same point of the Irtish, near to the fortress; and so rapid is the collected stream, that nothing but poling the canoe can cross it; and if once the boat be brought within the vortex of the centre, nothing can save it from being swamped.

It was with great difficulty that I prevailed on any of the Cossacks, who, at the best, are but indifferent boatmen, to take me across. After great toil and risk we reached in safety:—the fault was clearly mine had any accident occurred, but I was

too impatient at the moment either to weigh the matter or to listen to remonstrance.

Arriving early, I roused up my old friend the collector of the customs, with whom I breakfasted and dined. The place is considered unhealthy, owing to the foulness of the water of the Boukhtarma; a mischief, one would think, easily remedied by the proximity of the Irtish, which is only two miles distant; but here Russian indolence supersedes most conveniences. I was informed that rein-deer abound in the mountains, which also contain some sheep. The horns of the former are considered valuable, fetching two and three guineas a-pair; when very young the Chinese purchase them, and extract a favourite medicine; the younger the animal that has shed the horns, the greater the value. All sorts of diet were too cheap to be named, enough to hold out reasonable inducements to emigrate thither.

After dinner I embarked for Ustkamenogorsk, upon the Boukhtarma, descending which I rapidly entered the Irtish, a noble river. The crew of the boat offered up thanks for their safe arrival; we had come through a close and mountainous bluff valley, and certainly there was something terrific in the passage. I need not observe that I was myself thankful, as really the mixing with military sailors was far from pleasant. At midnight, when we had reached fifty miles, several fishing-boats joined company; we left them, however, with courier haste, and I reached the fortress at six in the morning, having been about ten hours descending a distance of ninety miles. The scenery from Narym to Boukhtarminsk and Ustkamenogorsk, a distance of one hundred and sixty miles, is upon the whole truly beautiful, though not a

habitation is to be seen along the banks, which are lofty eminences, divided by tremendous and perpendicular ravines: there are, however, many delightful and romantic situations, but no means of holding a communication along the banks of the river except by boats. Wild-fowl and fish are in the utmost abundance, as observed before when speaking of Tobolsk.

Of the value of the Irtish I need say nothing; it speaks for itself. Holding an almost uninterrupted communication from the frontiers of China to the Frozen Sea, a steam-boat might go from Boukhtarminsk to Tobolsk in a few days, and return in twice the time. Wood for fire is plentiful, and many establishments might be formed for the preparing and felling of it; while a water communication is ready formed with the Caspian, Baltic, and White seas, and thence down even to Tobolsk. The soil, which is a black mould, is exceedingly rich. It is to the banks of the Boukhtarma that colonies of Scotch should be sent, and indeed such was the intention of the Emperor Paul; but it was set aside upon the breaking out of a war, and has not since been resumed, though there is no doubt that, at this moment, such settlers would be both protected and encouraged. No part of the world can offer greater or more certain advantages to the agriculturist than the right bank of the Irtish; nor rent, nor tax, nor war, will for ages disturb such a speculator.

At Ustkamenogorsk I again partook of the hospitality of the commandant, a Frenchman; his name is Delancourt, and he has been thirty-five years in Siberia, doing any thing or nothing; being one of those feeble but respectable individuals, of which there are several, that are supported by

the liberality of the Russian government. In him I saw the first instance of a Frenchman's forgetting his own country; he seemed entirely divested of the patriotic affection which that fickle nation are supposed to possess, but which, perhaps, generally exists more in appearance than in reality, as wherever a Frenchman can do best, there he will settle.

I asked him if he ever intended to return to France? His reply was, that "France was nothing to him." I asked him why? He looked at his wife and large family of marriageable daughters, shrugged up his shoulders, and said, "*Que voulez vous que j'y fasse?*" and, heaving a sigh, left the room. Yet, in spite of his teeth, he was still a Frenchman, for the first words upon his return were, "*Ma pauvre France!*" I had touched a tender string, and, although he is now resigned to his fate, he says that he has been a "*bête*" for marrying, and begetting an entail which he cannot quit. His society, during the few hours that I enjoyed it, was very agreeable.

In the early part of the evening I again embarked on the Irtysh for Ubinsk, the distance being eighty miles,—yet I arrived there early in the morning. The view of the country is various, the prospect more pleasant and open than higher up, and some prettily scattered hills on the plain, which attended me for thirty miles, when the banks of the river became low and flat; and except some hills, very distant to the west, every thing reminded me that I had again entered upon the steppe desert. I enjoyed an hospitable and wholesome breakfast, even at such a dirty place as Ubinsk; indeed it presented nothing of interest but the good and modest looks of its female inha-

bitants. I procured a Cossack to attend me to Baruaoule, distance two hundred and twenty miles; the first station towards which was to Chamanai, twenty-five miles, over cornfields and along the right bank of the Ulba, which I was now more fortunate in crossing than before, the large ferry-boat having been repaired. Passed a large silver mining village, called Michailofsky;—the country becoming hilly and barren, except on the banks of the river. One occurrence in this district powerfully recalled me to Europe, for I dined at a public-house, and was expected to pay for my dinner, the first time since my arrival in Siberia. The place is, however, so great a thoroughfare, that it is here a considerable business to prepare provisions for the thousands of carters who are employed in transporting the ore to Kolyvan and Zmeyerova; yet still these inns boast so economical a charge, that in no instance had I to pay more than ten copecs (one penny) for as hearty a meal as I could desire,—a meal which was made of bread, meat, vegetables, and beer, or kuass. I have no hesitation in asserting, that one penny of Siberia is equal to one shilling of England.

To the next station is a good road of twenty miles over a well-cultivated country. On the second day I reached Zmeyerova, twenty miles farther, through heavy rains, and over a hilly country. It is an uncivil and inhospitable place. I arrived at near ten o'clock, exceedingly wet and fatigued, and, presenting myself to the police-master, was sent to three lodgings, all of which refused me from my distressed appearance. I again returned to the police, and seating myself down on the doorsteps, raining as it was, made my supper of melons and bread, with a glass of spirit from the kabak;

in this condition I was found by the police-master, who had heard of my being refused entrance. He accompanied me to the master of the house, whom he reprimanded, and actually turned the owners out of the best room to make accommodation for me. I felt averse to such conduct, yet knowing the custom of the country, and feeling what a night it was, I would not interfere, and, therefore, after partaking of tea, which in this country is soon provided, lay down with my Cossack,—a mere useless fellow.

Next morning I found the master and mistress of the house as civil as they had been the reverse, providing me with all I wanted, and even begging me not to be angry at their unintentional error. Zmeyeva is a large but scattered place, next in rank to Barnaoule, in the government of Kolyvan. It numbers from five to six thousand inhabitants, all in thriving circumstances. It has many valuable silver and copper mines in its neighbourhood, and a considerable government establishment is kept up for their use, and for reducing the ore to silver, which is said to be found here purer than in any other part of the government; but I did not wait to view the works, being anxious to reach Barnaoule. Arrived at Saukas, I discharged the Cossack, as a saucy and useless fellow, who had flattered himself I could not do without him. In general they are more plague than profit; though I am willing to make allowance for the unpleasantness of travelling with a capricious stranger, and this too in rainy weather and over bad roads, without being permitted to ride but at his pleasure. In the evening I reached the river Kolyvan, beyond which is a romantic-looking country, inhabited by a wild Raskolnick race, who seemed inclined to try

how long I could travel without food. They are descendants of a people banished by the Empress Catherine from Poland, about the time of the second dismemberment in 1789. I was, however, fortunate in getting a lodging at the abode of an old soldier who had lost both his legs, although the rest of the society consisted of fifteen ironed convicts, bound to the mines of Nertchinsk as deserters from those of Kolyvan. I was too glad to get anywhere from the inclemency of the weather, and Raskolnicks, to feel much care about my present company.

I reached the fifth station over a flat pasture plain, passing and meeting the greatest variety of vehicles which I have ever seen converted to one use, all of which are employed between the mines and Barnaoule in carrying the earth and ores. The common *téléga*, canoes, coffins, covered carts, and waggons, are alike occupied; the covered carts have locks attached to them, and belong to the government, and are used expressly for conveying the more valuable specimens. I inquired into the condition of the people, but could only learn that he who had most horses and carts was best off. Having crossed the little river Aley, I was hospitably entertained at the sixth station by the elder of the village, whose mother is a German; we contrived to be intelligible to one another, and he was so good as to send me with his horses the next morning to the eighth station, near forty miles of abominable and slippery roads. I got to the river Katounya, at the ninth station, and, crossing by a decent wooden bridge, entered a fine open country, the Obe flowing majestically in the fore-ground. Cultivation was conspicuous in every direction; and immense forests bounded the distant horizon.

At Kalmanka I was almost knocked up and tortured with an insufferable headach; my very eyes seemed a plague to me; I was, in short, so ill as to refuse all nourishment. Fortune threw me into the habitation of an old, civil, and humane man, who, seeing my condition, kindly put me into his own bed, giving me also some warm tea, and a couple of fox blankets. I slept well, and arose next morn in every respect, except weakness, as if nothing had ailed me.

With my knapsack on my shoulders I bade adieu to my kind host, and reached Barnaoule in the afternoon, eighteen miles; the neighbouring country one vast pasture, enlivened by some fine wood, and villages enclosed within cultivated lands. Upon nearing the city, the soil becomes changed from a black mould to heavy sand, and the face of the country is converted from uninterrupted and picturesque cultivation to a thick forest of pine and fir. Descending the hill to the southwest, Barnaoule has a neat and remarkably regular appearance, being situated on the Obe, just at the point where the little river Barnaoule enters it. I waited upon the police-master, procured comfortable lodgings, passed the night well, and then paid my respects to his excellency the governor (Froloff), who, with his amiable lady, showed me every attention during my stay, and insisted upon my making their house my home.

The governor was good enough to accompany me to the different public works, all of which I found in the best state, and was highly gratified at the inspection. Indeed the order and proper feeling of the government of Barnaoule might be made a proverb; the work in the mines, and all the departments, being carried on day and night. The

silver metal is wrought into ingots, and in that state forwarded to St Petersburg; but the copper ore is coined to pay the salaries of the officers and workmen. The money of Barnaoule is far superior in workmanship to that of Ekatherinebourg. There are thirty-two mines belonging to the Emperor, and more are continually discovered, so that the whole district may be said to be silver. They yield, upon an average, twelve hundred poods of metal, which, in consideration of some gold mixed with it, is equal to four millions and a half of roubles, or two hundred thousand pounds,—no trifling return to Russia from so small a province. The expense of the establishment, including the maintenance of the officers, &c. is about one million and a half of roubles; which is nearly defrayed by the taxes, duties, and tributes paid by the Calmucks and Kirguise from the southward. The establishment, therefore, certainly produces a clear revenue of four millions.

Of eighty-two thousand inhabitants which the government contains, independent of thirteen thousand belonging entirely to the works, fifty-five thousand, or two-thirds, are obliged to be constantly at work, that is, during twelve hours out of the twenty-four; the first week during the night, and the second during the day, and so on. The third week is a period allotted for the working of their lands, and this they owe to the goodness and humanity of the present chief, who has in many respects ameliorated the condition of the unfortunates under him, and who, it will be recollected, are, like those at Ekatherinebourg, not criminals, but peasants belonging to the Emperor.

The wages and profits derived from this very hard work, carried on day and night, are almost

too trifling to name; but a little reflection will show that their condition is far from wretched. Their direct profits depend upon their actual labour, as he who has most horses, or carries most loads from the mines to Barnaoule, receives most money. They have also ample time to work their lands, and reap abundance of corn and vegetables. Scarcely any full-grown man can be found who has not two or three horses and as many horned cattle, employed during the season in carrying the ore, for which they receive at the rate of thirteen copecs the pood—one penny farthing for thirty-six pounds. Many of them prefer this employment, and are actually able to save considerable sums of money in it, especially those who have many horses. The plan is this:—

The journey from Zmeyaeva to Barnaoule occupies nine days, and allowing the same time for rest and returning, eighteen days are consumed in lodging twenty poods of earth, which is the average of each horse; and as each pood pays thirteen and a half copecs, he receives two hundred and sixty-five copecs, or about two shillings; a sum here sufficient to maintain one person in bread and meat for thirty days, at the rate of one pound and a half of meat and three pounds of bread a-day. This calculation is on the supposition that each driver manages but one cart, when, in fact, they sometimes have the charge of ten and fifteen, the profits of ONE HALF of which are equal to a rouble a-day, a sum sufficient to maintain at least ten people in bread and meat—to say nothing of their other means in the produce of two days' extra work in each week. But this is not all; many of the carters, who do the work of others, receive one hundred and fifty roubles a-year for that service;

no question can therefore possibly arise of the flourishing state of the government of Kolyvan.

The quantity of earth brought to the works of Barnaoule in the course of the year, is four millions of poods. Each pood producing one rouble of clear profit gives the revenue already stated; two per cent is added for the quantity of gold, and seven for the value of copper, two hundred and fifty thousand roubles of which are coined. The carriage of so immense a quantity of earth is about half a million of roubles, or twenty-five thousand pounds, about one-third of the whole expense of the government of Kolyvan. Twelve thousand horses and oxen are employed, and about fifteen hundred labourers—an average of eight horses to each.

The quantity of cultivated land is two hundred and fifty thousand English acres, from which one million and a quarter of poods of flour are produced, belonging entirely to the peasantry. The produce of vegetables is also wonderful, and the immense herds of cattle keep down meat at a very low price. That of provisions was as follows:—white bread, seldom used, sixty copecs, or sixpence for forty pounds; ordinary bread, that used by all classes, threepence for forty pounds; excellent beef, fifteenpence for forty pounds, or two pounds for three farthings; and vegetables, eggs, milk, butter, &c. for the merest trifle. House rent is very cheap, and society is good. The town is well and regularly built, having many handsome edifices of brick as well as of wood, and upon the whole it is a most desirable place for residence. The city contains about eight thousand inhabitants; and although the situation is not particularly beautiful, it has still many advantages, being placed in

a noble forest, which serves at once for building and firing. There is a neat promenade in its only square, which is likely to be much frequented. The governor depends solely on the cabinet, to whom, as at Ekatherinebourg and Nertchinsk, the reports are made; not even the governor-general can interfere. It may be compared in rank with a vice-governorship.

Upon my arrival, I found great preparations making to receive his excellency Mr Speranski, the governor-general, who was making the circuit of all the governments to inquire into abuses, he being possessed of unlimited powers. His excellency arrived in the course of the second day, and was received with the respect due to his rank, integrity, and virtues. Two sumptuous dinners were given by the chief of the district; the gardens were illuminated, balls were assembled, and every one was happy. I, of course, shone a conspicuous object; indeed, I was honoured with the friendship and confidence of both those gentlemen. Of General Speranski I will only say, that I have never seen more true greatness of soul or goodness of heart. There is in him a certain condescension and affability, and at the same time a certain air of nobility, that strikes all who approach him with awe and respect. Of his personal attentions to me I shall ever feel proud and grateful. He had at first taken me for a Raskolnick, from my long beard and longer golden locks; notwithstanding I wore at the same time a long swaddling grey nankeen coat, and a silken sash round my waist; but indeed so great a buck had I become of late, that I hardly knew myself. As to my shoes, they were better than new, although seven years had elapsed from the time that Baron Bode had first used them.

To return, however, to the governor-general. He told me that there was an expedition on the river Kolyma, fitted out purposely to solve the question regarding the north-east cape of Asia; and his excellency kindly offered me his permission to proceed with it. Too glad to accept a favour of the kind, I instantly closed with the offer, and determined not to wait a moment in Irkutsk and Yakutsk beyond the necessary time, but to proceed immediately to the Frozen Sea, either to share the fortune, good or bad, of the expedition, or, in case of any impediment from jealousy, to withdraw and follow some other plan. The governor-general supplied me with various orders and recommendations for whatever places I should visit, as also an open order "To the judges of towns and provinces, to the members of the provincial courts of justice, and to all commissaries in the government of all Siberia," recommending "that the bearer, Captain John Cochrane, of the British Royal Navy, now travelling through Siberia, should obtain every lawful protection, defence, and hospitality, and that every aid within the power of the towns and provinces should be afforded him, in case he should stand in need of them."

With the above valuable recommendation, almost amounting to a command, and a Cossack, I departed, from a town which I still think the happiest, the best governed, and neatest in Siberia, for Tomsk, taking the road towards Gumba, through ten miles of sandy and thickly-wooded country, along the left bank of the Obe. I crossed that river the next day, on my way to Osokiena. There are in the neighbourhood some silver pits, and some lakes, but no cultivation whatever. I

reached the fifth station on the second day, constantly in a thick forest of noble pines, passing many lakes, as well as small rivers, all uniting with the Obe. On arriving at Wasiugan, my Cossack gave me a proof of his utility by getting drunk, and losing his pipe and his cap as well as his senses, in which state, therefore, I left him to shift for himself.

Upon reaching Bazillofka, the country improves, and the villages are pleasantly distributed. The inhabitants were all shivering with the cold, though wrapped up in furs; while I, in my nankeen, experienced no inconvenience. The view of the country did not change until I reached Prosokova, where some well cultivated hills make their appearance. My Cossack overtook me, and, after many professions of contrition, obtained his pardon, and got drunk immediately upon the strength of it. At Verushina I got sight of the Tom, winding over a well-cleared country, but sadly bare of inhabitants. I was again overhauled for contraband goods. From thence to Tomsk are thirty miles, where I arrived early the following morning. In the latter part, the country bore the appearance of a desert; wood had disappeared, and cultivation had ceased, although the road was fine.

I presented myself to the vice-governor, brother-in-law to Mr Berg of Perm and Mr Rosing of Tobolsk, my former hosts. Here also I got well lodged; after which I called on his excellency the governor Illichefsky, with whom, and his amiable family, I passed my time pleasantly. The governor presented me with fifty roubles, a watch, a pair of spectacles, and some few articles of wearing apparel, making part of the effects of which I had been robbed near St Petersburg—thus

verifying my observation to the governor of Novgorod, that the robbers would be found, but not before I had reached the heart of Siberia, where I now was.

Tomsk is a city, and capital of a province of the same name, containing five hundred thousand inhabitants, while there are about nine or ten thousand in the city, which, in spite of several churches and many handsome edifices, public and private, is a most miserable place, yet showing every hospitality and kindness to travellers and strangers. The society also is, I am afraid, far from good, owing to the bad example from those whose rank and situation should produce other effects on their inferiors. The town is on the right bank of the Tom, near its mouth, at the foot of a hill which protects it from the north-east and south-east winds. During May and June it is greatly subject to inundation from the river.

Tomsk has a military school, with four hundred students, backward enough in their education, as also a provincial college without masters or scholars, though a considerable revenue is attached to it. Indeed, the only praiseworthy object is a very neat public garden, in which is a building for balls, dinners, and the like; and on this day, 30th August, both were to be held in honour of the Emperor's name-day. I declined the invitation to this fête, from anxiety to get to my ulterior destination. Of the five hundred thousand inhabitants, about eighty thousand pay taxes. The gross revenue is, I believe, about three millions of roubles, nearly the whole of which is necessary to support the government, thus yielding little or no return to the Emperor. It appears useless as a government, its

best service being to keep the roads in repair, and to mark the half way between Tobolsk and Irkutsk.

While the province of Kolyvan, at present independent, was attached to the government, it made indeed some returns ; but that branch being lopped off, the parties in office, high and low, appear to have given up all idea of being of service, and have since done less than nothing.

Except in point of locality, Tomsk does not appear an eligible place as the seat of a government, which it would certainly be preferable to remove to Yakutsk, dividing the intervening space between Tobolsk and Irkutsk, deducting from the latter all beyond Kirenga on the Lena, and from the former all west of the Irtysh and Tobol, and only south to Ishim ; creating Ekatherinebourg and Barnaoule into distinct governments, so that the boundaries of the latter should be all the country south of the great road. Yakutsk would then be the most extensive government in point of territory, holding the command even of Kamtchatka, instead of Irkutsk, as at present. The duty of a governor of Irkutsk, and that of a vice-governor, are much too great to be united, and no possibility exists of completing any year's accounts within the year.

I witnessed at Tomsk the sale of thirty tolerable sized bullocks for four hundred and eighty roubles, or about eighteen pounds sterling ; excepting only at Mexico, I have never seen another such instance of cheapness and plenty. The province, however, does not produce much bread, being too cold and exposed ; that commodity may therefore be deemed dear at its present price of a rouble (or tenpence) for forty pounds. I departed for Irkutsk in company with a Cossack, and furnished with a discretionary authority to procure horses, as also

an open order for every attention to be shown to me. I passed over a dreary and woodless flat waste, until I reached Kolionskaya, eighty miles. The villages had been numerous, but miserable in the extreme, excepting those inhabited by Tartars. They are Mahomedans, and, like those of Tobolsk and Tara, of the Kazan race. From Kolionskaya the country appears to rise a little, but the road was most execrable, nay, almost impassable, either by man or horse. The wood is now of tolerable size; birch, fir, larch, pine, and poplar; but there is little or no cultivation, and no appearance of industry, the inhabitants being a lazy set of exiled Russians. The care of cattle, and the raising a few vegetables, together with the transport of merchandise for the merchants, almost exclusively engage their attention, when they are not employed in drinking; and the women have quite enough to do to find their lazy husbands in provisions and clothes.

Such was my route the next day to Krasno-retchinsky, one hundred miles. Almost each village is favoured with a small river, many of them with considerable ones; yet the road has little or no interest, and the villages are composed of half-finished huts. From Batoya my journey was rendered unpleasant, through a misunderstanding with my Cossack, who, meeting with an old crony, had requested to stay supper. I consented, being hungry, under the expectation of being asked to partake; but finding myself disappointed, I hurried away. He followed, grumbling, and giving me at intervals a good deal of impertinence,—a thing, I must confess, very rarely tolerated in Russia. Next day I reached Atchinsk, pleasantly situated on the banks of the Tchulym, in a hilly country, with its

two costly churches, some good houses, and two thousand five hundred inhabitants. It can yet barely be called a town; it is at least a very miserable one.

I proceeded through it, and many villages, till I reached Krasnojarsk, distant eighty miles, over a road, with little exception, almost impassable; that part which lies between Chornaretsk to Mallo Kemtchoutska is so bad, that I know of no better punishment to call the faculties of the director-general of the roads into exertion, than making him ride the distance of fifty miles every day in a *téléga*; if that did not recall him to his duty, I think nothing could,—at all events, it would be no sinecure. For my own part, my bones were so shaken that I preferred walking. The stages are also too long; a fault, however, in the course of remedy, as new villages are springing up at every eight and ten miles.

At Bolchei Kemtchoutska I met the caravan with teas, silks, and nankeens, from the Chinese frontiers, bound to Moscow, consisting of some hundreds of carts. The hilly country continues as far as Zeledeyeva, to which place it is a dreary wild; but thence a fine open country begins, the hills to the north-east exhibiting a laborious cultivation even to their summits.

It was five in the evening when I entered Krasnojarsk, veiled like a nun—no bad remedy against the effects of the mosquitoes; and although the appearance seemed strange to me, I persisted in following this custom of the natives. The last stage upon approaching this city is richly luxuriant on both sides, with the Yenissey rolling its picturesque course over a soil rich and well cultivated, and the vicinity may boast situations for the dwell-

ings of a prince, peasant, or philosopher. The little river Katcha winds at the foot of the north-western hills, and, uniting with the Yenissey, forms an interesting object. The town stands at their junction, on a low, flat, sandy peninsula, and from the course which the river is now taking, threatens in time to completely inundate it; the principal church, which formerly stood in the centre of the town, being now actually in water.

The Emperor Paul had it in contemplation to plant here also a Scotch colony, but the project, like that before mentioned, and for the same reason, was set aside. His successor, Alexander, has attempted in vain to follow up a plan every way so desirable: first, to the individual emigrants, who would enjoy fine lands, with few taxes, and a free exercise of their religion; and, secondly, to the Russian government, as they would have thereby become possessed of individuals skilled in the process of agriculture in general, and who would have furnished the most valuable examples of industry and economy. The town is said to contain three thousand males; but the site is considered unwholesome, owing to the vapours which rise from the Yenissey. The extremes of heat and cold are from thirty-two degrees of heat to forty of frost; fevers are prevalent in the town, but in the neighbouring valleys the air is mild and wholesome. These valleys abound in fine timber, and are highly productive of the necessaries and comforts of life; excellent beer is also an article of great consumption, while corn brandy may literally be termed dirt cheap. So abundant and cheap are all kinds of provisions, that they find their way even to Kamtchatka. Bread I saw sold at 16

copecs, equal to $1\frac{1}{2}$ d., for 40lbs., while meat was but 2s. 6d. the same quantity.

I was hospitably entertained by the police-master, who supplied me with bread, rum, tobacco, tea, and sugar, sufficient to last me to Irkutsk. Crossing the Yenissey, which is a quarter of a mile broad, I reached Kanskoy, about one hundred and thirty miles, over a tolerable road, and in many parts well cultivated country; the villages are scattered at every ten and fifteen miles, but there are few dwellings off the great road. At Kliutchy, my Cossack exercised his high powers in giving the elder of the village a sound flogging, for his dilatoriness in providing him with a horse. This power is vested in the Cossacks by a custom of long standing, but which calls loudly for redress. In the end, I arranged the matter by giving the old man a glass at the kabak.

At Kanskoy I dined with the commissary, late a schoolmaster, who spoke the French language. He presented me with a considerable curiosity, being part of the jaw-bone of a mammoth. I drank tea with the chief of the farmers, a genteel young man, twice a widower, who has a good house and better furniture. Continuing my route, I soon arrived at the frontiers of the province of Irkutsk, which is divided from that of Tomsk by the river Kan, which might with some propriety be denominated *Styx*, as the convicts who cross it generally remain for life. Should they desert and be brought back again, their punishment is indeed severe,—being liable to all the penalties which by the laws of England might be inflicted upon an outlaw. The peasants are naturally on the lookout for them, and by force of cudgelling, attended with the application of the epithet “varnack,” or

“base fellow,” compel them to return. The term has been said, not improbably, to be used in allusion to Yermak the conqueror, but I shall not attempt to decide the point.

Upon entering the government of Irkutsk, the weather became cold and windy, or what is here called a Bourea, being, on the authority of the schoolmaster, derived from the Greek word of the same import,—to an explanation of which I was obliged in courtesy to listen before I could be allowed to move. Having got clear, I continued my route to Ingashe, the largest, neatest, and most regular village I have ever seen. The improvement upon entering the government of Irkutsk is, indeed, wonderful. The attention, regularity, and order, as well as cleanliness, every where to be seen, reflect the highest credit on the police and late governor of Irkutsk. This gentleman has, however, been superseded and arrested by the governor-general Speranski, and is now under trial at St Petersburg upon very serious charges. I saw many instances of the excellent state of the police even in the villages on the high road; neither dog, nor horse, nor cart, nor any species of manure, being allowed to remain in the streets, scarcely even for a moment. The inhabitants of these villages are mostly exiles for minor offences, and are settled in villages on the high-road, and compelled to pay yasack, or the Siberian poll-tax.

As I proceeded, the road improved, and the country appeared more fertile and picturesque; much fine timber is every where to be seen, the ground still continuing on a gentle ascent, and I reached Nishney, viz. Lower, Udinsk, receiving every hospitality possible. It is a small but rather a neat town, of three thousand inhabitants, plea-

santly situated on the Uda, at the foot of a considerable range of elevated table lands. A complete forest of fir, birch, pine, larch, poplar, and all such wild productions. Passing through Kingui, a Tartar village, I continued my route in rather a melancholy mood,

For the thoughts we cannot bridle,
Force their way without the will.

Amid beautiful scenery and much cultivation, a well frequented but dangerous road, broken with villages at every eight or ten miles, carried me to an imperial village, where there is a celebrated manufactory of cloth; being night, I had not an opportunity of visiting it, but the cleanliness and beauty of all the buildings form a strong presumption in its favour.

Bilbetie is a large village at the conflux of three rivers, where an excellent ferry is established, previous to the passage of which I had occasion to demand horses. There were at the port station only enough for one kubitka, and they had in part been promised to a junior rank, *i. e.* to a subaltern officer. The postmaster, observing that neither of us were much incommoded with luggage, very properly proposed that we should go in the same vehicle; the officer refusing to come into these terms, the horses were put at my disposition, and I continued on for the last stage towards Irkutsk, in high satisfaction with every thing I had seen, so superior to the governments of Tobolsk or Tomsk. The country, however, has latterly appeared less picturesque, being a sandy soil. On my approach to the capital early in the morning, a thick fog hovering on the Angara precluded the view of it, till I reached the monastery near the river; coast-

ing which, I suddenly observed, over the dense atmosphere, the churches beautifully reflecting the sun's rays from their tin or copper casings. I crossed the ferry, and at eight in the morning entered the hospitable habitation of the chief of the navy in the city of Irkutsk.

CHAPTER VI.

Irkutsk—Vercholensk—Kirenga—Vittim—Jerbat—The Tongousians—Olekminsk—Bistack—Yakutsk—The Lena—Mieza—Aldan—The Toukoslar—Baralass—The Sartar—The Bouroulak—Tabalak—The Tostak and Dogdoa—Kabbregah, &c. rivers—The Rasoka—The Biekhall and Bludenayah—The Chouboukalah, Galanimah, and Indigirka—Zashiversk—Brousniekah—Sordak—The Alazea—Middle Kolyma—Malone—Nishney Kolymsk.

THE commandant of the navy received me in a flattering manner; I had the offer of several other residences, but he being a single man, with a large government house, I was induced by these circumstances to stick to the profession, and take up my abode with him.

Having made myself as decent as my limited wardrobe would allow, I called on the vice-governor, there being no governor, who made great promises, and exceeded them in performance. Upon quitting his excellency I made some visits, and delivered my letters of recommendation, made inquiries as to my future movements, and then returned to an elegant dinner with my host, who had invited a party of twenty persons to meet me; indeed, the hospitality and attentions which were

showered upon me in this stage of my journey, were such as, I may fairly say, I could have experienced in few, if any, parts of what is called the civilized world, especially when the humbleness both of my appearance and pretensions is considered; even the ladies condescended to visit the abode of my host—a single man—doubtless out of respect to me. The company consisted of the same individuals whom I afterwards met at almost every party, with hardly any variation; namely, the commandant, his lady and sister; the colonels of artillery and infantry, with their wives; Captain Koutigin; a rich merchant, who farms the sale of spirits, and his wife; the head of the Russian American Company, with his wife and two daughters; and a Mr Gedenstrom and wife, who had travelled on discovery across the Frozen Sea, in 1809, 10, and 11. Besides these, the parties were enlivened by the company of doctors, secretaries, and half-a-dozen young civil officers, being in the highest rank of society. I retired from the first day's fête at an early hour, thankful for the many favours so liberally heaped upon me.

Next morning, in company with Captain Koutigin, I left the Admiralty House, which is two miles from the city, to view whatever is notable in Irkutsk. The number of them is small, and they are widely scattered. Fifteen thousand inhabitants, including three thousand of the military, are said to compose the population. Irkutsk indeed scarcely deserves the name of city, except for its public buildings, which are good; yet though I confess it is upon the whole a fine town, I could not but feel disappointment from its total want of original plan, as well as its present want of regularity, which must retard its advancement for a long time

to come. Tobolsk is certainly its superior in every thing except its situation, and the singularly fine appearance of a few buildings, public and private. The streets are wide, and run at right angles, but there are in some of them gaps of two and three hundred yards, without a building. There are, however, many fine points of view ; and when it is considered that Irkutsk has been raised into a government and city only within these forty years, its progress towards improvement must be acknowledged. The houses are for the greater part of wood, though many are of brick, and constructed in a superior style of architecture.

Of the churches there are at least a dozen, which not a little contribute to the splendour of its appearance ; and though they boast of but very few relics, I feel certain that their bishop fulfils his functions as creditably as any other man of his profession. His eminence did me the pleasure to invite me to a public breakfast, given in honour of the emperor's coronation, which I attended, and was highly satisfied with his conduct in every respect.

With my friend, Mr Gedenstrom, I conversed about my plans. He appears to be one of the ablest men in Siberia, and, although rather under a cloud at the present moment, is highly worthy of respect and consideration. He had formerly served as private secretary to Count Romanzoff, when that nobleman was chancellor of the empire ; but either some misunderstanding, or some misadventure, occasioned his removal by the imperial government, to another scene of action. He was lately commissary of the most lucrative quarter, as a reward for his perseverance and diligence when employed upon the Icy Sea discoveries. I am not aware that any account of his services has been

made known to the public, but I am fully sure they deserve to have been. It is only mentioning a part of them to say, that he has surveyed all the islands bearing the name of New Siberia, as far north as the latitude of 76° , and has been longer and farther on the ice than any other traveller. Few men in Siberia have more general talent of any description, and, through his kindness, I was favoured with a fund of the most interesting and important information.

During the short period of my stay in Irkutsk, I was variously employed, either visiting such places as seemed most worthy of notice, or fixing and arranging these ill-assorted recollections. I visited a military school, like the others, upon the Lancasterian system, with seven hundred boys; it is doing well, which is more than can be said for the institution belonging to the city; indeed, it is a matter of serious regret, that in Russia so little prospers that is not backed by military influence; where the fault lies it might be difficult to discover on so short an acquaintance. There is a mineralogical cabinet appertaining to the city institution, in which are deposited many magnificent specimens of the Nertchinsk mines.

I visited the prison, which I found in a state that would have commanded the approbation of the humane and philanthropic Howard. It is spacious and well ventilated, and the prisoners are allowed plenty of wholesome provisions. They are only chained when employed out of the prison, either upon public works or in the removal of any nuisance. In connexion with the prison I may also notice a species of public manufactory, or working bazar, for every sort of trade; the inmates, or workmen, are in general such as have been exiled for

misdemeanours, and are detained for their own and the public benefit ; many of them contrive to earn a considerable fortune, and all are secure of the benefit of full employment. The building is of wood, and belongs to the city, who hire out apartments at fixed prices, retaining also a proportion of the gainings, which are appropriated to charitable purposes ; their capital is already very considerable, and it is one of those public-spirited and well-digested schemes which is worthy of imitation in every civilized state, where there are either criminals to punish, or unfortunates to relieve.

The exchange and public bazars are a fine range of buildings, with a superb saloon in the centre, where public balls and masquerades are held at least as often as once a-fortnight during the long winters, besides numerous private balls.

Of society there is but little, but that little is good, and mostly German. I must, however, except my venerable and respectable countryman, Mr Bentham, as also his homely Cockney wife. Of all the methodical people, preserving their originality of manners, customs, and opinions, this couple are certainly the most extraordinary I have ever seen moving on their own axis or in their own orbit ; they appear to exist between light and darkness, unconscious and careless of what passes around them. Mr Bentham has been forty years in Siberia, in the full enjoyment of the same proverbial reputation that his honesty would have entitled him to had he for ever remained a citizen of London. He has filled a ludicrous variety of situations : horse-dealer to the celebrated Count Orloff ; secretary to the Governor-general Jacobi ; a respectable merchant ; and, lastly, a Siberian commissary. A grant of land has been given to

him by the emperor, and the rank of nobility enables him to hold a few peasants, which inhabit his small village in the circle of Irkutsk. As to Mrs Bentham, she has just been long enough (fourteen years) in Siberia to forget her own native language, but not long enough to learn that of her adopted country: with all their nationalities I found them a worthy couple; their only child, a spoiled boy, is in the hands of the *missionaries* at Selinginsk. At a public ball given in honour of the coronation, I counted seventy ladies; yet this was considered as a very small number for Irkutsk, as they sometimes muster on such occasions from two to three hundred. The truth is, with the exception of the ladies I have before named, most of the fair sex belong to the merchants, who may with propriety be termed Jew pedlars, for they deny themselves and their wives almost every comfort, save that of a public and ostentatious dress, from a spirit of opposition and vindictive feeling towards the military, who also, on their side, but too generally treat them in the same ungenerous, if not slighting and contemptuous, manner that we do the Jews in England. A Jew in England, and a merchant in Russia, except in the capitals, or principal seaport cities, stand on the same level; and I may venture to say, that, with very few exceptions, it is not consistent with etiquette, much less with custom, for a person of rank to dine with a merchant, unless he be mayor or farmer-general, or unless on his saint's day, when it certainly is common to honour him with an acceptance.

The merchants, on the other hand, have as strong a feeling against the receiving of the military in private, as the latter can have against recognising them in public.

It is a serious evil that the sons and daughters of the merchants have received no better education. Many of them can scarcely read or write, yet they are, in point of opportunity, on a par with those who move in the same sphere in European Russia, owing to the assistance rendered by the Swedes and French, and other exiles, many of whom possess first-rate talents. These expatriated instructors have tended to improve and civilize Siberia, in a ratio surpassing that of central Russia. But many years must elapse before that happy union of society, so conspicuous in England, can be brought about in this part; before the swaddling cloak, and long beard, will be laid aside with the same avidity with which they are now guarded. Yet I do not think it a matter of speculation, nay, I do not think it a difficult task, to instil a spirit of literary emulation into the minds of even the lower orders of the Russian community. With them, more can be done by fair than by foul play; coercive or compulsive measures will do nothing with the Russian, when brought in contact with his national prejudices. Having adverted to the want of a proper understanding between the noble and the merchant—a want which I impute as much to pride on the one, as ignorance on the other part, I would fain propose what appears to me no difficult plan:—Were the colleges and academies more open to the middling class of the community, I feel certain that incalculable advantages would result therefrom. I feel even certain, that the present system of taxing the commercial part of the community might be turned to a great moral advantage; increase of education, consequently of morality, civilization, and harmony among all classes, would be the direct result of my plan.

A first-rate merchant in Russia is allowed by law to trade upon a capital of 100,000 roubles, or more ; for this privilege he pays a direct tax of five or ten per cent per annum. Now, supposing each merchant so situated to be possessed of a family of children, and that he were to put them to the college of nobles, and to receive from the crown 500 roubles per annum for each, (in other words, that for each male child put to the college for education, 500 roubles should be deducted from his direct tax as a first-rate merchant,) a sum quite sufficient to maintain them in a respectable manner, I am certain the consequences would be favourable to education, and to good feeling between the high and middling classes of Russia. When a boy had been five or seven years at college, from the age of twelve, and had passed a certain examination, I would have him allowed to trade as a first-rate merchant for half the tax that other merchants paid, whether five or ten per cent ; and when such young man, who had passed such examination, should become the father of a family, and followed up the maxim of putting his children to a public college, they should be allowed to trade free of any tax. This is holding out an incitement to, not compelling education : nor should it stop here ;—when a boy had won two or three of the academic prizes, he ought to be entitled to the rank of nobility, a circumstance which would have great weight in Russia.

Every class of the mercantile community of the Russian empire might be so placed as to induce them to educate their children in a becoming and useful manner ; a want of this education is the only barrier between them and the nobility. Boys when at school, whether plebeian or patrician, form

a friendship for one another ; and where is there more sacred friendship ? With them, all little considerations are laid aside for more solid enjoyments. The noble would find his level as a man, while the man would reach to be noble ; nor beard, nor cloak, nor pride, nor compulsive measures, would be resorted to ; on the contrary, the *onus* would rest with the people, than whom none have a greater desire, or a greater capacity, to learn any thing and every thing ; for all classes of Russians, so far from being above being taught, offer every advantage to the more enlightened foreigner, be he Jew, Turk, or Christian.

My stay in Irkutsk was but a week, when, being furnished with a fresh Cossack, and with every assistance I desired to enable me to reach the river Lena, I set out, a little melancholy at parting with such kind friends ; at seven miles I had a last view of the city. The country became very elevated, and the road lay over hill and dale as far as the fifth station. With the exception of some little corn, the land is one uninterrupted pasture. The inhabitants, Russians, are pretty numerous, and their villages, though small, occur at frequent intervals. The post-houses are good and convenient halting places.

Having crossed the river Lena, I soon reached Vercholensk, a large and populous town on its right bank, distant 150 miles from Irkutsk. The road is by a dangerous precipice, which is descended by horses at a prodigious rate ; and on the ascent both driver and traveller must dismount and put their shoulders to the wheel ; yet accidents are of rare occurrence. The opposite bank of the river is highly cultivated and picturesque. The communication by land ceases here, a circumstance at

which I was not a little rejoiced, longing to be again upon my own element. I soon procured a canoe and a couple of hands, who, with the Cossack and myself, paddled down the stream for eighty miles, to the village of Ustillga. The banks of the river are lofty and well wooded, and present some agreeable scenery. Numerous villages with their rye fields are scattered among the valleys, each invariably attended by its own little stream.

Proceeding day and night in my open canoe, I soon reached Kirenga. The weather was cold, the scenery, though ever changing, was always mountainous; numerous islands were scattered about the river, whose streams ran at about one and a half or two knots per hour; I generally made 100 to 120 miles during each day's progress, and, wherever I went, fared well from the hospitality of the Russian colonists, as well as from that of my friends at Irkutsk, who had provided me, according to the Russian proverb, with plenty of *bread and salt*. This simple-sounding provision included also some fine partridges, a hare, a large piece of roast beef, and a quantity of meat pies; not omitting wine and rum. A traveller in Russia, whether native or foreigner, on taking leave of his friends previous to his departure, uniformly finds at his lodgings all the provisions requisite for his journey, with another lodging pointed out at some friend's upon his next route, for as long as he pleases. Indeed, I have no doubt, as the sequel will justify the assertion, that a man may travel through the Russian empire, as long as his conduct is becoming, without wanting any thing—not even horses and money; excepting only the *civilized* parts between the capitals.

The villages leading to Kirensk are from fifteen

to eighteen miles apart. It has the name of a city, containing near one hundred dwellings, and five hundred inhabitants, with three churches and a monastery; the situation is pleasant, but not otherwise noticeable. I staid in it only a few hours, to enjoy the hospitality of the town-major, who felt inclined to try the effect of rye brandy upon me. From it I gained about five or six miles towards the first Tongousian village, when the canoe filled, and we were obliged to pursue the journey by land, creeping round the bluffs, which jet out into them.

Over these poor Tongousians the Cossack exercised his authority in such a manner, that I really felt as much pain as if the same chastisement had been inflicted upon me. The spirit of despotism which characterises the Cossacks is infamous; it is infinitely greater, and infinitely more dreaded by the poor aborigines, than the power of the governor-general; they seem to have imbibed their power more from habit than from right. At present there is a law against the exercise of this atrocious abuse; but I doubt very much whether the government, in this distant part of the empire, can carry it into execution. The Cossacks cannot be dispensed with; they are a necessary evil; no officer, whatever may be his rank, not even a governor-general, can do any thing without their aid—no horses, provisions, or assistance can be procured, no orders can be given, no punishment can be inflicted, no courier dispatched; in short, a Cossack is every thing, and therefore in Siberia he is feared. Whatever may be their general character, and I admit that the terms Russian Cossack and Spanish Don are synonymous, I fear upon the high-roads it is much sullied, and still more so here,

because they have to do with the ignorant, obstinate, and criminal.

Pursuing my voyage I reached Vittim, which is half way to Yakutsk, upon the eighth day; the banks of the river are, within the last twenty-five years, increased in population in the proportion of from three to five, according to a comparison with Mr Sauer's journal, which I had with me. Prodigious forests of wood are on each side of the river, consisting of pine, fir, larch, alder, and poplar; but from Kirensk all cultivation had ceased, except that of vegetables, and they are but scantily raised; cattle are, however, very plentiful, and of a fine sort; bread is of the same price as at Irkutsk, namely, forty pounds for two shillings. This is owing to the consideration of government in forwarding flour at their expense for the benefit and maintenance of the poor.

At Vittim I was first overtaken by the ice floating down the river, yet not so as to incommode me, and I had enjoyed the luxury of fine autumnal, though cold, weather. From Vittim to Djerbinsky or Jerbat are three hundred miles, which I reached in four days. The stages are very long, and ought to be reduced, being a very heavy pull when going against the stream; but indeed there is nothing that these hardy people will not do without murmuring. Sometimes the boat was so much entangled in the ice, that the poor fellows were compelled to strip and track her, up to their waists in water, while the atmosphere was at 5° of cold; I could perceive that they suffered a good deal in consequence, for, upon their return to the boat, they could not tell which part of their body to restore first to proper animation. Their great resort, I invariably found, was to take a mouthful of smoke

from their pipe,—not, however, of tobacco; the greater part at least being birch-wood dust, or fine shavings, mixed with a very scanty portion of tobacco, the latter article being extremely dear; if to this luxury can be added, however small, a drop of brandy, they will cheerfully, and even thankfully, undergo the repetition of the suffering. At one of these villages, I was requested by the inhabitants to proceed by land instead of by water, they agreeing to supply me with horses; of course I complied with their request, as it would save the labour and attendance of one man, at a season of the year when they require all the spare time possible, viz. the winter fishery. Upon my arrival at the next station, nor horses nor a boat could be procured, except at the habitation of a Yakuti knez, whither we proceeded with a request to be supplied. The old gentleman pertinaciously refused me, malgre the presence of a Cossack, who had full powers to call out any and every assistance in my behalf; the knez excused his non-compliance with the order, by observing, that it was in behalf of a captain of the navy, of which rank he could not deem me, with only a nankeen coat and long beard—the emblems of a Russian pedlar. The Cossack was willing and anxious, by the force of his baton, to have brought the prince to an unconditional compliance, until I determined upon again having recourse to my own independent mode of travelling, at least till I could meet with some more willing friend to forward me on.

My knapsack again restored to its deserted abode, I coasted the river to Jerbat, where there is a cave on the left bank of the river, much venerated by the Yakuti. I ascended with great difficulty the rugged steep leading to it. The roof certainly pre-

sented a beautiful appearance, being illuminated by what may figuratively be termed chandeliers ; formed, no doubt, by the water, which, making its way through the apertures above, there freezes, and hangs in icicles from the top of the roof. The scene is very brilliant, but the effect is marred by a projecting crag of rock which overhangs the mouth of the cave, and prevents the eye from taking any other than a horizontal view of it. The air emitted from it was the chilliest I had ever felt. At Jerbat is the line which divides the Tongousian villages from those of the Yakuti.

The Tongousians inhabit divers parts of Siberia equally distant and distinct ; from the shores of the Yenissey, Lena, and Amour, to those of the Ochota and Omekon, and the mountains about Idgiga. They are nearly all wanderers, and rarely to be seen in any mechanical or subservient employment. They are classed into Forest and Desert Tongousi. The former occupy themselves in fishing and the chase, having but few rein-deer ; the latter subsist entirely by the breeding of those animals, and wander from pasture to pasture with their flocks, tents, &c. A very few of them have received baptism ; the rest are idolaters. Their language is said to be Mantshur, from whom they all, no doubt, descended, as may be inferred by the peculiarity of their eyes, being elongated and far apart. They are characteristically honest and friendly, robbery being considered by them as unpardonable. I was myself a witness of their hospitality or improvidence, for they seem to have no thought of the future, and therefore readily share what they have killed ; yet it is strange that nothing will induce them to kill a rein-deer for their own consumption, unless the party is rich, till they

have been eight days without food ; the act is then considered justifiable. They bear fatigue, cold, and privations, to an extraordinary degree. They are sensible of, and thankful for, kind treatment, but will permit no one to abuse them. To strike a Tongousian, is, indeed, a great crime, and often leads to fatal consequences, as, in that case, they do not consider their word as sacred, but justifiably to be broken. They are exceedingly irascible, and can be done nothing with but by good words ; and this I had frequent occasions of proving, through, generally, my own fault.

Their persons are small, and rather delicate in appearance ; their features regular, and somewhat pleasing. With these fair traits of character they are filthy to an extreme, eating and drinking any thing, however loathsome ; and the effluvia of their persons is putridity itself. They are considered good soldiers, and are excellent marksmen, either with the bow or rifle. The dress of either sex is nearly the same as that of the other Tartar nations, differing chiefly in their mode of ornamenting it, and consists of trowsers of the rein-deer skin, with the hair inside, and stockings and boots of the same animal ; the latter made from the legs. A waist-coat or jacket also of leather, sometimes lined with white foxes' or with hares' skins, supplies the place of a thick sort of short surtout-coat of double leather without the hair ; and lastly, for the severity of winter, of a single or double frock with hair in and outside, the two leather sides being together. A warm cap and large gloves, with sometimes a guard for the breast, of white fox, called nagrood-nick, viz. breast-cover, and a comforter round the neck, formed of the tails of the squirrel ; such is their costume, which is almost wholly furnished

from the skins of rein-deer. Foxes' skins serve for caps and linings, and a wolf's is considered valuable, as the warmest of all outside garments. They have also a guard for the forehead, ears, nose, and chin. Their beds are made of a bear's skin, or of the large rein-deer's, with a blanket from the same animal, lined with the warmest fur, and in shape like a bag, as the feet are completely enclosed; an axe, a knife, wooden spoon, and kettle, constitute their only utensils; the first is a *sine quâ non*, and a pipe of tobacco, with a glass of spirits, their highest luxury. Their modes of dress, and general mode of living, &c. they have in common, more or less, with all other Siberian nations, whether the Tchuktchi, Yukagires, Koriaks, Yakuti, or Kamtchatdales. There is no other difference amongst them than in the embroidery of their clothes, or the richness or poverty of the wearers; and these I shall take occasion to notice in treating of a different tribe.

Having parted with the Tongousians, for a long time I was delivered over to the Yakuti. In three days I reached Olekminsk, the last thirty miles on horseback, my Cossack being quite knocked up from cold and want of exercise. I reached the place early in the evening, and went to the abode of the commissary, who was absent upon his annual excursion for the collecting of the yasack or tribute. His house was, however, made my home, and there I passed the following day very agreeably, his pretty, interesting, and modest daughter of fifteen doing the honours of the house. I received visits from the postmaster, secretary, priests, and merchants; among the latter was a young Frenchman, who had been banished for some heavy crime, but, by his subsequent good conduct, had

been admitted to the rights of a citizen, and is now carrying on trade at Olekminsk.

From Olekminsk to Yakutsk is about four hundred miles, which, except the two last stages, I completed in the canoe. It was on the 1st October that I left, and the 6th when I arrived. The weather proved very cold, and snow fell heavily; the atmosphere dark, and having every appearance of winter; yet, upon the whole, the season is considered backward, as on the 1st of October the Lena is generally frozen over, and in three weeks more admits of travellers with sledges; but at this time I was enabled to reach within fifty or sixty miles by water, although with some risk and difficulty. A noble chain of hills extend along the right bank of the river, with bold, precipitous bluffs running into the stream, and with their dark-green firs enlivening the otherwise dreary aspect at the present time. The left bank assumed, from Olekminsk, a low swampy, but rich pasture appearance, the hills taking a new direction. Upon approaching Yakutsk, the villages become less frequent, and the stations all longer, extending even to thirty-five and forty miles, yet the natives do every thing with cheerfulness. Nothing of any considerable attraction occurred to me, yet I felt as if existing upon the beautiful prospects and river scenery, which cannot fail of creating a most lively interest. I reached Bistack, and was here surrounded by the ice, and the boat frozen in. Thus situated, I prosecuted the remaining part of the journey on land; not, however, before I had encountered some peril and much difficulty in making good a landing; for although the boat was surrounded with ice, still there were several fissures between us and the shore, and which could only be passed by

wading through the water, no pleasant circumstance with 12° and 15° of Reaumur's frost. I, however, bore them cheerfully, conscious that a warm yourte, and a hearty welcome, were always awaiting my arrival. The same kindness of heart which had provided me with a boat to descend the stream, procured me also a horse to ride, and, in the evening of the 6th of October, I found myself in the hospitable and comfortable residence of his excellency, the governor of Yakutsk, Captain Minitsky of the Russian navy, who had passed many years in the English service, and three of them with my cousin, Captain N. D. Cochrane. In him I found a most worthy, upright, and liberal friend, and warmly interested for my success, to ensure which, every thing I desired was provided for me; although it will hereafter appear that what I now considered as a most provident dress, having been put on in a warm room, turned out to be indeed a poor fit-out for such a journey.

Yakutsk, although a considerable place of trade, and a great pass for the American Company, is ill built, and more scattered even than Irkutsk, in the most exposed of all bleak situations, on the left bank of the Lena, which is in summer, four miles, and winter, two miles and a half wide, appearing, as it really is, one of the finest streams in the world, running a course of more than three thousand miles from its source, near Irkutsk, to the Frozen Sea, which it enters by several mouths. The stream is by no means a rapid one, but rather may be called lazy, as its name appears to import. There are seven thousand inhabitants in the city, of whom the greater part are Russians, and the rest Yakuti. Half-a-dozen churches, the remains of an old fortress, a monastery, and some tolerable buildings,

give it some decency of appearance ; yet I could not help thinking it one of the most dreary looking places I had seen, though I was in the enjoyment of every comfort, and therefore the less disposed to complain.

Yakutsk is not an independent government, but belongs to that of Irkutsk. It has, however, a vice-governor, and an independent chancery of its own, who regulate all its affairs, making a mere formal report. It contains, scattered over a wonderful extent of territory, about one hundred and eighty-five thousand inhabitants, composed of Russians, Yakuti, a few Tongousi, and fewer Yuka-gires. Fifty thousand of the whole pay tribute, which is in furs, mostly sables. Those of Vittim and Olekma are considered the finest, blackest, and smallest to be met with, a pair reaching as high as three and four hundred roubles, or from fifteen to twenty pounds sterling. Each taxable individual pays one quarter of a sable, or, in general cases, each family one sable, which, if it cannot be procured, is compromised by the payment of thirty shillings, reducing the tribute per head to seven shillings and sixpence, as that of a Russian is ten shillings. Thus the Russian pays nominally more, but actually less, than the aborigines ; the former pay *padoushnie*, the latter yasack—the former always money, the latter furs. The greatest part of the population subjected to the government of Yakutsk live on the banks of the Lena, and small streams running into it. No less than twenty thousand families certainly reside on them. The clear revenue derived is half a million of roubles, or twenty-five thousand pounds. The trade carried on by its numerous pedlars is very considerable, from the immense quantity of the skins of all sorts.

Tobacco, tea, sugar, spirits, nankeens, cottons, kettles, knives, and the like, constitute the cargoes of the traders; for which they receive the skins of bears, wolves, sables, river otters, martins, foxes, lynxes, squirrels, and ermines, at very unfair prices. At Yakutsk, however, the value of them is well known. Bear skins, twenty and twenty-five shillings; sables, from thirty to one hundred and fifty shillings; a sea otter, from ten to thirty pounds; river ditto, thirty and forty shillings; a black fox, from five to twenty and even thirty pounds; red and grey fox, two and three pounds; fiery red, fifteen shillings; the white or arctic fox, five or six shillings, and the blue fox, eight or ten shillings; squirrels and ermines, sixpence to one shilling; wolves, ten shillings to a guinea, while I have myself given seven guineas for a black wolf at Omsk; the martins which come from the coast of America are worth five or six shillings. These are the prices at Yakutsk, but they are purchased of the natives by the pedlars for goods enhanced one hundred and fifty per cent, and for one-half the price for which they sell at Yakutsk; returning, in most cases, a clear profit of two and three hundred per cent, besides that the traders live upon the poor aborigines during the traffic.

I remained in Yakutsk three weeks, making the needful preparations for my journey during so severe a season of the year. In particular, I looked to the nature of my dress, for the accounts of the cold which I should have to encounter were such, that I considered myself exposed to death, without even the satisfaction of expecting to be buried, from the eternal frost that prevails here. Could, however, this feeling be gratified, the satisfaction would be materially increased, by the knowledge

that the body itself would enter the next world in the same state that it left this ; for every where to the north of Yakutsk, the earth, two feet and a half below the surface, is perpetually frozen, consequently a carcase buried in it at that depth must remain perpetually the same.

I determined, however, to start the day that the Lena should become passable on the ice. In the meantime, I was engaged in such society as Yakutsk could boast ; but if I could say little in this respect in favour of Irkutsk, I should almost be silent regarding Yakutsk, where, except the chief's wife, and those of one or two of the merchants, there is no society, and indeed scarcely any one of those can be spoken to by a traveller, especially by one whose long beard and haggard looks might well frighten them from me ; they were, however, safe on another account, namely, my extreme ignorance of the Russian language.

The way I passed my time at Mr Minitzky's was sufficiently regular : I rose early, and always went early to bed ; occupied, while daylight lasted, with bringing up my journal ; then at a game at billiards ; afterwards at dinner, always on the most excellent fare, with wine, rum, and other delicacies. In the evening, with a party of the natives, male and female, at the house of the chief ; the ladies, to all appearance, dumb, not daring to utter a word, and solely employed in cracking their nuts,—a very small species of the cedar nut, which abounds in such quantities as to be made an article of trade to Okotsk and Kamtchatka. I am not exaggerating, when I say that half-a-dozen of females will sit down and consume each many hundreds of these nuts, and quit the house without having spoken a word—unless a stolen one, in fear it should

be heard. Should tea and cakes be offered, they will sip two, three, or four cups, as long as the samavar (a sort of copper tea-urn) has water in it. The manner of their using sugar-candy with tea, though perhaps not entirely singular, for the Chinese have the same fashion, is remarkably ridiculous; each individual takes a small lump, which he grates between his teeth in such a manner as only to consume a very small part of it; and thus, although the person has drunk three or more cups, the greater portion of sugar remains, and, being placed upon the inverted cup, finds its way back to the sugar-dish when the party has broke up; so that, probably, at the feast on the following day, a lady or gentleman may happen to get his old friend back again. Nor is it with sugar-candy alone that this system of economy is adopted. Biscuits, cakes, &c. on being presented, are received and placed behind them, on the chair, to keep warm, and their fragments also are ultimately restored to the basket. Thus luxuries of these kinds are rendered cheap, for the custom is general, and I have often witnessed the fact, not indeed at Mr Minitsky's, but at other respectable houses, the inmates of which knew no better, and were ignorant of the chief's disliking it.

While the ladies are thus cracking their nuts, staring, and listening, and speechless, the gentlemen are employed in drinking rum or rye-brandy punch, as their tastes may dictate. Nor is even good rum a scarce article here, coming as it does by way of Kamtchatka. I was one feast-day on a visit to a respectable old gentleman, one of the council; there were no chairs, but a long table was spread, with fish pies, a piece of roast beef, boiled deer's tongues, and some wild berries in a tart.

The first thing presented is a glass of brandy, which I refused, knowing the chief to have sent some good wine ; this I was offered, and accepted, when I was told by my friend the chief, that it was not the custom to accept any thing of that kind the first time, but to await the third. Relying upon the chief's better knowledge of the Siberian world, I refused the next glass of wine, which was offered me twice, and I need not say I ultimately lost it, probably from the practice of economising good wine in a place where it can seldom be procured.

Great parade is kept up in this part of the world with respect to rank, and no lady visits the wife of the chief or vice-governor without kissing her hand ; while the latter sits motionless upon the sofa, without making the least acknowledgment of such a condescension. The same custom was also established at Irkutsk with Governor Treskin's wife, who, being the mother of Mrs. Minitsky, of course initiated her daughter into the mysteries of her importance : she probably finds a sad falling off when at St Petersburg. This absurd custom is carried so far, that the priests are compelled to offer thanks and prayers for them, individually, every Sunday at church. Mr Minitsky is, however, a good man, and an exceedingly clever governor, equalled by few in Siberia ; his situation is, of course, a good one, and could have been made equal to his utmost desires by fraud, trade, extortion, and corruption, had he felt so inclined. But, latterly, the conduct of the governor-general Sperski has put all the people in office, in Siberia, upon the *qui vive*.

That bribery is still carried on to great excess there can be no doubt, nor is it possible for any man or men to prevent it ; it is the practice, and

carries here an appearance of right or law. It is the custom of Siberia, that the chiefs are allowed to receive presents on their names', or their saints', day. As an instance of this, a new governor of a province, who could not reach in time to be present at the feast of the commissary, was willing to make a good beginning. He accordingly sent an express to the commissary regretting the absence, at the same time forwarding to him a pair of elegantly mounted pistols, and reminding him that the governor's name-day would take place that week, at which his attendance, &c. The old miserly commissary, who had hitherto resisted the custom of paying such compliments, could not resist such a challenge, and attended the feast at the cost of ten thousand roubles. Here is an instance of a governor openly offering a bribe, as well as of openly demanding one. They are but the representatives of much worse, as I shall hereafter have an opportunity of observing.

My dresses completed, and the river having, according to custom, been passed and declared closed, I packed up my knapsack and other baggage, and I was provided also with a couple of bags of black biscuit through the kindness of my host, with a piece of roast beef, a few dried fish, half-a-dozen pounds of tea, and twenty pounds of sugar-candy, besides fifty pounds of tobacco, and a keg of vodka (corn-brandy), a most indispensable article on such a journey, whether for my own or others' consumption. I had besides a pipe, flint, steel, and axe, and, what was of most importance, a Cossack companion, who indeed proved invaluable to me. My destination was Nishney Kolymsk, distant about one thousand eight hundred miles, which were to be travelled over in the coldest season of

the year, and in what is esteemed the coldest part of the north-east of Asia. All this I heeded nothing, and provided, *as I thought*, with warm clothing, considered myself as proof against at least 50° of Reaumur's frost. The spirit thermometer at Yakutsk, measured at Mr Minitzky's house, was 27° of cold of Reaumur, or nearly the same number of degrees below the zero of Fahrenheit, yet I walked about the streets of Yakutsk with only my nankeen surtout, trowsers of the same material, shoes, and worsted stockings; a flannel waistcoat which had lost its principal virtue, was the only warm clothing; yet I can truly say I was not at all incommoded. This fact, which can be testified by Governor Minitzky, now in St Petersburg, alike surprised him as well as every other person; nor was my conduct upon my return the less careless of the effects to be apprehended from exposure to such very severe weather. At Irkutsk, in the month of January, with 40° of Reaumur, I have gone about, late and early, either for exercise or amusement, to balls or dinners, yet did I never use any other kind of clothing than I do now in the streets of London. Thus my readers must not suppose my situation to have been so desperate. It is true the natives felt surprised, and pitied my apparently forlorn and hopeless situation, not seeming to consider that when the mind and body are in constant motion, the elements can have little effect upon the person. I feel confident that most of the miseries of human life are brought on by want of a solid education—of firm reliance on a bountiful and ever-attendant Providence—of a spirit of perseverance—of patience under fatigue and privations, and a resolute determination to hold to the point of duty, never to shrink while life retains

a spark, or while "a shot is in the locker," as sailors say. Often indeed have I felt myself in difficult and trying circumstances, from cold, or hunger, or fatigue; although, thank God, not to the degree which my unfortunate brother officer Captain Franklin experienced, yet still to a degree beyond what would, in England, be considered sufficient to cure me of my wandering propensities; and I may affirm, with gratitude, that I have never felt happier than even in the encountering of these difficulties. Thus, in the present case, I had no second parka, or frock; no knee-preservers, blanket, or bed; an indifferent pair of gloves, and a cold cap; no guard for my chin, ears, or nose; in short, I was not properly provided, which I found out too late, and attribute the preservation of my life solely to the strength of my constitution, which I have never seen equalled to this hour.

It was on the last day of October that I departed from Yakutsk with my Cossack, the thermometer being at 27° of frost. I had, through the kindness of my friend, Mr Minitzky, been provided with a couple of sledges, and every recommendation within his power. It is impossible for me to describe the different emotions which agitated my breast as I quitted the last limit of civilization, of the friends I had made, and of all that could attach me to society; for although I felt a confidence of meeting with hospitality and every assistance I could desire, still, to a sensible mind, the enterprise was formidable, going as I did alone, and ignorant even of the Russian language, much more that of the Tartar tribes. For the means of meeting the latter difficulty, I was indebted to the numerous people who spoke English, French, and German, one of whom I met at almost every halting-place,

when the dulness of a Cossack interpreter could hardly afford me the means of amusement, much less of information.

The cold I suffered in the sledge, and the jolting movement attending the passage of the ice on the Lena, now crumbled by the stream into hillocks, soon roused me, and I jumped out, preferring to walk ; and though I had my feet almost frozen while in the sledge, the exercise, and weight of my clothes, soon brought me to a state of perspiration by the time I had reached fifteen miles, when I halted for the night in a pleasant yourte.

The next, a cold and windy day, I resumed my journey, alternately walking and riding on horseback, to escape at once from fatigue and cold, and measured forty miles over a level but well wooded country. I felt much pleased with the attentions of the Yakuti, who provided me, as I arrived, with milk, meat, and not seldom with clotted cream, at times also with wild raspberries, called here *maliena*, immersed in it. Such were my delicacies until I reached the banks of the river Aldan, a noble stream running into the Lena. I had passed a small place called Miera, where are two churches, for the performance of divine worship in the Yakut dialect, at which, although I understood nothing of it, I attended. A more dreary looking place I have never seen. It overhangs the banks of a considerable lake. The situation in summer may be better ; but what can be otherwise than dreary in Siberia during the winter ? The latter part of the journey to Aldan was through romantic valleys, whose numerous streams and lakes supply a great abundance of fish. They are also studded with numerous traps, of various descriptions, for foxes, bears, sables, and wolves ; and the quantity of ani-

mals of the chase is equal to the demand. There appeared a considerable population, and many wealthy knezes or princes, who, wherever I met them, were kind and hospitable. I reached Aldan the fourth day, the distance being about one hundred and fifty miles; the last day's journey sixty. My face was suffering greatly from the effects of a cold wind.

At Aldan I staid two days, while horses were procuring for the post which I was accompanying; but finding them still tardy, I made the prince understand, that unless I had them next morning, we must return to Yakutsk; and the better to persuade him of my intention, I availed myself of a letter in English to Mr Minitsky, the contents of which really were to thank him for his kindness and hospitality to me, but which I represented as a letter of complaint against the Yakut prince. The latter took it, though apparently in the greatest apprehension of its consequences, and actually delivered it himself, at Yakutsk, by way of atonement. Mr Minitsky repeated the circumstance upon my return. Poor fellow! however I might turn the matter for my own benefit, little intention had I of making a complaint, where indeed there was no fault. My letter, however, had the effect of procuring horses on the third day, and we departed in high glee, as the same beasts were to carry us to Baralass, distant one hundred and fifty miles, which will be the less wonder, when it is observed, that the horses go loaded with two hundred weight from Yakutsk to Kolyma, and back again, through roads and over a country deemed almost impassable. So tremendous a journey is it considered, and so difficult of accomplishment by one and the same horse, that the charge for each

animal to go to the Kolyma, is more than equivalent to the value of the horse at Yakutsk. Government pay by contract for each load to the Kolyma, ninety, while the merchants pay one hundred and twenty, roubles; for the return, government pay forty-five, and the merchants sixty, roubles. Upon the outward journey the horse carries from two hundred and forty to three hundred; while upon the return, not more than one hundred and fifty pounds weight. The common value of a horse at Yakutsk, *for this work*, is from seventy-five to ninety roubles; but there are horses whose owners have refused from six to ten thousand roubles;—a prodigious sum in this part of the world. I believe there are not many instances of a horse having taken two loads, and returned again to Yakutsk from the Kolyma, and no instance of three loads. This is no depreciation of the value of the Yakuti's horses, which are of a very fine though small breed; I consider their powers as inferior to none of their own size, and might adduce, as instances of it, that a Yakut will, for a considerable wager, ride his horse from two hundred to two hundred and fifty versts in twenty-four hours. I think in a late instance three hundred versts, equal to one hundred and seventy miles, have been performed by one horse within twenty-four hours, not by any violent exertion, but by regular trotting, which would astonish the sporters of Old England. Nor is a Yakut behind-hand with such sporter in betting; I never saw a people with more spirit of gambling than these, who are otherwise ignorant. The very contracts which the Yakuti make with the government to forward on their stores or provisions, are often lost at a game of cards; that is, the money to be paid for such contract is put in

opposition to the execution of it—a most serious difference.

On the 6th of November I crossed the Aldan, and breakfasted at a solitary yourte (at ten miles), completing in the evening thirty miles, where we halted in a cabin about ten feet square. Had it, however, been much worse or smaller, I must have felt thankful, for I had been severely pinched by the effects of the cold and the wind in my face. A good fire, a cup of tea, and a sound slumber, with pleasant dreams, perfectly refreshed me by the ensuing morning. The country had of late been level, but at twenty miles I became enveloped in a lofty chain of mountains, which I had been for some time gradually ascending, and which are called the Toukoulan chain, from the word Tonku, which, in the Yakut language, signifies “noisy;” as indeed the river of that name does roar down its precipitous banks. In the same chain also the Yana has its source. We halted for the night at the foot of a mountainous peak, sheltered from the cold north wind; and as this was the first night which I was to pass in the open air, I shall describe the manner of it, in order that it may be known how far (contrary to my calculations) our situation was susceptible even of comfort.

The first thing on my arrival was to unload the horses, loosen their saddles or pads, take the bridle out of their mouths, and tie them to a tree in such a manner that they could not eat. The Yakuti then with their axes proceeded to fell timber, while I and the Cossack, with our lopatkas, or wooden spades, cleared away the snow, which was generally a couple of feet deep. We then spread branches of the pine tree, to fortify us from the damp or cold earth beneath us; a good fire was now soon made,

and each bringing a leathern bag from the baggage, furnished himself with a seat. We then put the kettle on the fire, and soon forgot the sufferings of the day. At times the weather was so cold that we were almost obliged to creep into the fire; and as I was much worse off than the rest of the party for warm clothing, I had recourse to every stratagem I could devise to keep my blood in circulation. It was barely possible to keep one side of the body from freezing, while the other might be said to be roasting. Upon the whole, I passed the night tolerably well, although I was obliged to get up five or six times to take a walk, or run for the benefit of my feet. While thus employed, I discovered that the Yakuti had drawn the fire from our side to theirs, a trick which I determined to counteract the following night. I should here observe, that it is the custom of the Yakuti to get to leeward of the fire, and then, undressing themselves, put the whole of their clothes as a shelter for the outer side of their bodies, while the inner side receives a thorough roasting from exposure to the fire; this plan also gives them the benefit of the warmth of their own bodies. The thermometer during the day had ranged from 20° to 25° , according to the elevation of the sun.

The following day, at thirty miles, we again halted in the snow, when I made a horse-shoe fire, which I found had the effect I desired, of keeping every part of me alike warm, and I actually slept well without any other covering than my clothes thrown over me, whereas before I had only the consolation of knowing that if I was in a freezing state with one half of my body, the other was meanwhile roasting to make amends. On the third night I reached the foot of the mountainous

pass which may be said to lead to Northern Siberia. My route had hitherto lain generally on the banks of the Toukoulan, which runs along a picturesque valley on the western range of the mountains, and is well wooded with fir, larch, and alder. Upon reaching thus far, I looked up at what I had yet to perform, and, I confess, felt astonished, not at the height, but how it could be practicable to get up a slippery and almost trackless road. However we commenced, and mainly by preferring the deep snow, as I uniformly did, at last gained the summit, but not without great fatigue; a horse could not carry a person up under a considerable time, and it took me two hours at least. We sat down, my Cossack and I, to gain breath and wait for the Yakuti with the baggage, in the mean time smoking a pipe; but it was too cold to remain; we therefore prepared to descend. As to keeping my feet, however, that was impossible; I therefore lay down, and slid to the bottom of the most dangerous part, a feat for which I had nearly paid dear, by coming in contact with a horse which had taken the same expeditious mode of descending. The path was so narrow, that one error would have pitched me for ever into the abyss of snow beneath; and, although not deep, would have prevented a return, unless I had fortunately fallen with my feet downwards; the half-frozen surface of the snow serving in some manner to bring the person up; falling on one side I found very dangerous, unless somebody was near to render assistance. I soon reached what I may term a charity yourte, being erected by the community in general for the accommodation and preservation of travellers. It consists of a twelve feet square room, with a small anteroom which serves as an

entry, and may be properly termed a log-house, having no window, unless a large opening in the roof may be so termed. The centre is left to form a neat hearth or fire-place, on the same level as the sleeping places round it, which are six in number, and about eighteen inches off the ground, leaving a narrow passage between the hearth and bed places, which are formed of earth, boarded up and planked over; they were indeed very comfortable cells. Outside, the building is supported and banked up with snow, and the roof is covered with the same article, no fear being entertained of its ever melting during the travelling season; the only inconvenience is from the smoke not having a free outlet, unless the door is open, which makes it very cold, and otherwise unpleasant.

We passed a tolerable night, in company with some other travellers bound to Yakutsk, and next morning resumed our journey in fine weather; and in this way, at the expiration of six days, we reached Baralass, alternately sleeping in snow or in an uninhabited yourte, as our progress made it necessary.

These charity yourtes are placed at an inconvenient distance, being twenty-five miles asunder, too great in bad weather, and too little in fine; twelve miles would be preferable, as travellers would then always have a comfortable resting-place at one or the other, at least where wood is to be had. The country over which I had come may be deemed on the whole very picturesque, the road lying between two elevated ranges of mountains; the valleys exceedingly well wooded, gradually diminishing as the summit is approached, where nothing but the purest frozen snow is to be seen. There are also innumerable valleys,

emanating from the principal one, which produce a beautiful effect, besides furnishing fine timber ; but with all its beauty or grandeur of scenery, it is dreary and desolate, not an individual dwelling in the whole extent from Aldan to Baralass, a distance equal to half the length of England.

I was civilly and hospitably received by a Yakut prince, who gave me a supply of frozen milk, and we resumed our journey to Tabalak ; we made forty miles the first day, by a good road, the snow being hard frozen. The little river Sartan runs along the valley, and unites with the Yana. I met a few hunting Yakuti, armed with bows and arrows, some on horseback, and others on foot. They appear an extremely civil people. The following day, with great labour, walking and riding alternately, we reached forty miles ; the horses distressed, and the guides no better ; the weather, snow and wind. For myself, I was much disheartened, but I felt that I had no choice ; go I must, for return I would not had things been ten times worse. The third was the coldest day I had experienced, the thermometer at twenty-eight and thirty degrees below the freezing point of Reaumur, attended with some snow. We passed several habitations of the Yakuti, who invariably offered us a lodging and provision for the day ; and always appropriated to me the best berth, which is in that corner of the room under the image, and opposite to the fire. We now left the river and valley of Sartan, crossed a considerable range of hills to the eastward, and entered upon an open country, where we got over more easily, the path being very fair. Passing the banks of the Boroulak, we came in time to witness the result of one of their field-sports, in the death of a deer, which

had been levelled by a rifle-shot ; of course I had the most luxurious part presented to me, being the marrow of the fore-legs. I did not find it disagreeable, though eaten raw and warm from life ; in a frozen state I should consider it a great delicacy. The animal was the size of a good calf, weighing about 200 lbs. ; such a quantity of meat may serve four or five good Yakuti for a single meal, with whom it is ever famine or feast, gluttony or starvation.

We reached Tabalak on the sixth day from Baralass, the latter part of the road lying on the Boroulak, varying from excellent to execrable, as we changed from the river to the banks ; the distance is two hundred and thirty miles. It is not badly peopled, considering the access to it, as compared with the former part of my journey. Here we overtook an expedition bound to the river Kolyma, for the purpose of discovery, under the charge of the steersman. It consisted of one hundred and fifty loaded horses, apparently in a sad state from being too heavily laden. Independent of the expedition, there were on the road a great many pedlars bound to the same place, to be ready for the fair of the Tchuktchi. What will not avarice or ambition prompt man to ? But I am not the person to be astonished, who am voluntarily travelling the same road, without necessity or occasion. The journey is at present rendered increasingly laborious by numerous trees which have fallen ; whether from the effects of wind, the force of the waters, or natural decay. It is no uncommon thing, during the spring, for the trees which have been left by the winter's blasts or summer's deluge, to salute the traveller in passing, at least if he should happen to step upon the roots, which are almost

level with the surface of the earth ; so perfectly frozen is the whole country north of 60° of latitude.

At Tabalak I had a pretty good specimen of the appetite of a child, whose age (as I understood from the steersman, who spoke some English and less French) did not exceed five years. I had observed the child crawling on the floor, and scraping up with its thumb the tallow-grease which fell from a lighted candle, and I inquired in surprise whether it proceeded from hunger or liking of the fat. I was told from neither, but simply from the habit in both Yakuti and Tongousi of eating whenever there is food, and never permitting any thing that can be eaten to be lost. I gave the child a candle made of the most impure tallow, a second, and a third,—and all were devoured with avidity. The steersman then gave him several pounds of sour frozen butter ; this also he immediately consumed ; lastly a large piece of yellow soap ;—all went the same road ; but as I was convinced that the child would continue to gorge as long as it could receive any thing, I begged my companion to desist as I had done.

As to the statement of what a man can or will eat, either as to quality or quantity, I am afraid it would be quite incredible ; in fact, there is nothing in the way of fish or meat, from whatever animal, however putrid or unwholesome, but they will devour with impunity, and the quantity only varies from what they have, to what they can get. I have repeatedly seen a Yakut or a Tongouse devour forty pounds of meat in a day. The effect is very observable upon them, for, from thin and meagre-looking men, they will become perfectly pot-bellied. Their stomachs must be differently

formed from ours, or it would be impossible for them to drink off at a draught, as they really do, their tea and soup scalding hot, (so hot, at least, that an European would have difficulty in even sipping at it,) without the least inconvenience. I have seen three of these gluttons consume a rein-deer at one meal; nor are they nice as to the choice of parts; nothing being lost, not even the contents of the bowels, which, with the aid of fat and blood, are converted into black puddings.

For an instance, in confirmation of this, no doubt, extraordinary statement, I shall refer to the voyages of the Russian admiral, Saritcheff. "No sooner," he says, "had they stopped to rest or spend the night, than they had their kettle on the fire, which they never left until they pursued their journey, spending the intervals for rest in eating, and, in consequence of no sleep, were drowsy all the next day." The admiral also says, "That such extraordinary voracity was never attended with any ill effects, although they made a practice of devouring, at one meal, what would have killed any other person. The labourers," the admiral says, "had an allowance of four poods, or one hundred and forty-four English pounds, of fat, and seventy-two pounds of rye flour, yet in a fortnight they complained of having nothing to eat. Not crediting the fact, the Yakuti said that one of them was accustomed to consume at home, in the space of a day, or twenty-four hours, the hind quarter of a large ox, twenty pounds of fat, and a proportionate quantity of melted butter for his drink. The appearance of the man not justifying the assertion, the admiral had a mind to try his gormandizing powers, and for that purpose he had a thick porridge of rice boiled down with three pounds of butter, weighing

together twenty-eight pounds, and although the glutton had *already breakfasted*, yet did he sit down to it with the greatest eagerness, and consumed the whole without stirring from the spot; and, except that his stomach betrayed more than ordinary fullness, he showed no sign of inconvenience or injury, but would have been ready to renew his gluttony the following day." So much for the admiral, on the truth of whose account I place perfect reliance.

Tabalak is the residence of a corporal of the Cossacks, who has the charge of the post, and commands over the surrounding Yakuti. He is married, and appears to live here with tolerable comfort. The country round is studded with lakes, producing abundance of fine fish. I staid a couple of days to refresh myself, and, on the 22d of November, I resumed my journey. The weather was now very cold, and my knees became exceedingly painful, from sitting, as I thought, too much on horseback; consequently I walked more, in spite of the fatigue, going over fifteen and twenty miles a-day on foot, and always in those places where it was difficult for the horse to carry me. The first night we halted on the banks of a small lake, where some fishermen were hauling their nets, although the ice was twenty inches deep; of course I became entitled to a proportion of the fish caught,—to insure which, I invariably partook of the fatigue. Let who will make his appearance, of whatever tribe or religion in Siberia, he will certainly be entitled to food if he partakes in the labour of catching it—I do not know a more humane custom. The plan is indeed ingenious, and proves that "necessity is the mother of invention." Having fixed upon the spot, a large hole is made in the most

distant part opposite to the place to which the fish are to be hauled, and then holes are also made from it on each side circularly towards the point where the fish are to be caught : the distance from hole to hole about fifteen or twenty feet ; the whole of the net is then let down the first opening, as are the ropes attached to the hauling of it ; which ropes are fastened to a long pole, which, under the ice, conducts the ropes from hole to hole. Both ends are taken up at the last and largest opening, and the net is thus hauled, and a considerable quantity of fish are caught. The following figure will represent the plan, the size and distance of the apertures being proportioned to the size of the net and length of the ropes :—

A, representing the opening where the net is first sunk ; B, where it is hauled down ; the other openings, those made for communication ; and the space within the other circle, the lake.

We halted at a most magnificent range of mountains, running from east to west-north-west, with lofty projecting bluffs and terrific precipices, on lands gently rising from the thickly wooded basis into elevated peaks and long extents of table lands, in all the wild variety of nature. I regretted my inability to sketch this beautiful view.

The route lay along the river Tostak twenty-five miles ; then crossing the mountains into the valley, and on to the river Dogdoa, now deeply hid in snow, and occasioning great labour to man and horse. We were frequently obliged to halt and clear away the snow with our spades, to enable the animals to proceed, at other times to unload them, and drag the baggage for two or three hundred yards. In these cases all distinctions of rank are laid aside, every person assisting and taking charge of his own horse ; the only difference, a very slight one, being in favour of the hindmost, and even that was regulated, as the horses must take their turn to lead, though the riders did not. When free from this heavy work, we were almost as badly off, being then on the river, the state of which absolutely prevented the progress of the horses, without first chopping up the ice with hatchets, and then carefully leading the animals. In short, such was the nature of our road, that we had almost to carry the horses through the snow, and support them over ice so clear and slippery, that oil poured over it could not have made it worse. With all the assistance we could give, and even with that which we rendered them in tying cloths under their feet, as well as a rope above their fetlocks, of sufficient length only to enable them to make short steps forward, and preventing their sliding sideways, it was found impossible to save them dreadful falls and heavy strains ; they constantly fell groaning under their loads, and it was really painful even to witness their sufferings. Three days passed in this manner, and I felt that if ever I had earned my coarse fare, it was during that period. Two horses had been allotted to me, and my plan was, to conduct one of them over the worst part, tie him to a tree, and

then return for the other—and so on. The Yakuti felt grateful for the willingness with which I took my share of the labour.

The next part of our road lay along the little rivers Kabbregah, Koudouronkui, Rasoka, and Kamen-da-Maslo; after which, leaving the mountainous part, we got upon an extensive plain, and reached a charity yourte very late, having been obliged to abandon one of the horses. I was now suffering much in my feet, on which the frozen perspiration had formed blisters, in which state I had also to encounter water even upon the ice. This, as it appears to me, is occasioned by the intenseness of the frost contracting the ice, till, in the end, it divides about the centre; cold being of so peculiar a quality, as in the first place to expand, and ultimately to contract, all fluids it affects. The same observation applies to the ground, which cracks alike, whether from the effect of heat or cold; indeed, so powerful is the congelation of water, that it even splits mountains asunder—a fact which is here every where visible. Many of these mountains are of slate, and the rest appear but a common sort of rock and granite; but on the banks of the river Kamen-da-Maslo, there is produced a fossil or an earthy substance, called in Russian Kamennoye Maslo, or stone butter, which is eaten in various ways, as well by the Russians as Tongousi—it is of a yellowish cream-colour, and not unpleasant in taste; but it is forbidden, as pernicious in its effects, producing various disorders, as the gravel, &c.

This earthy matter is found to be a fossil or salt, oozing out of rocks in many parts of Siberia, but chiefly from those near the river Irtish and Yenisei. When it is exposed to the air in dry weather,

it hardens, but in wet weather it again becomes soft or liquid.

The horses requiring much rest from their fatigues, we did not depart until late. The intermediate time I consumed in various employments, chiefly by contrasting in my mind the populous cities and towns I had left, with the remote and widely distant villages I now meet, and "those vast and uncultivated tracts," as are observed by Talleyrand, when speaking upon society, "traversed rather than peopled by men who belong to no nation. It is a novel spectacle for a traveller who, taking his departure from a large town where society is perfected, watches every degree of civilization and industry becoming every moment weaker, till he arrives in a few days at the clumsy and coarse hut, constructed with the trunks of fallen trees. Such a journey is a practical analysis of the origin and progress of nations, where we have a complicated aggregate to arrive at the most simple elements: every day we lose sight of some one of those inventions which our unceasing wants have rendered necessary, and seem to travel backward in the history of the progress of the human mind. If such a spectacle invites the imagination, if we are delighted to find in space what alone belongs to time, we must be content to see very few social ties among those men who appear so little to belong to the same association, so little to possess an uniformity of character." These ideas, so congenial with my own, occupied me in a melancholy mood, till I rose, and, looking at the grandeur of the scenery, reflected, that wherever I was, the same Providence was there also.

The extensive chains of mountains viewed from the spot where I write this are truly fine; they run

from east-north-east to west-south-west ; the river Rasoka runs along the eastern range, and is visible for many miles within the two ranges, which appear to have been torn asunder by some convulsion of nature. I was, however, obliged to quit the scene, and pursue my journey over a country agreeably diversified with hill and dale,—the path lying first along the banks of the Biekhall and then of the Bludenaya, where I halted in a most beautiful and close valley, surrounded on all sides by lofty and well-clothed mountains.

On the ninth day I started for Zashiversk, distant forty miles, the first twenty of which was by a rising path, until I reached the greatest elevation of a lofty mountain, with some peril and more difficulty. The scene reminded me of my journey across the sandy hills at the back of Vera Cruz, with this difference only, that the gale, generally attending both, obscures in the one instance the atmosphere with sand, and in the other with snow ; in both no traces of a path can long exist if there be any wind. The snow lay from four to six feet deep, and our situation was at one time extremely dangerous, being completely ignorant which way to turn ; not the smallest vestige of verdure was to be seen, and except a few crosses (another resemblance to Vera Cruz), which were sure to receive the offering of the Yakuti, consisting of horse-hair drawn from the tail or mane of horses, in token of their gratitude for safe arrival at the summit, nothing was visible. By good fortune and perseverance, we at length got quit of this desert of snow, and rapidly descended the north-east side of the hills, enjoying the magnificent winter scene which gradually opens to view. I soon reached the banks of the Chouboukalah, and the more considerable Galanima, and

then, along a well-wooded valley, gained the rapid Indigirka, just at the point where the latter falls into it; not long after which I entered the town of Zashiversk.

Of all the places I have ever seen, bearing the name of a city or town, this is the most dreary and desolate; my blood froze within me as I beheld and approached the place. All that I have seen in passing rocky or snowy sierras or passes in Spain, in traversing the wastes of Canada, or in crossing the Cordilleras or Andes of North America, the Pyrenees or the Alps, cannot be compared with the desolation of the scene around me! The first considerable halting-place from Yakutsk, the half-way house, is nine hundred or one thousand miles removed from a civilized place. Such a spot gives name to a commissariat, and contains seven habitations of the most miserable kind, inhabited severally by two clergymen, each separate, a non-commissioned officer, and a second in command; a postmaster, a merchant, and an old widow. I have, during my service in the navy, and during a period when seamen were scarce, seen a merchant ship with sixteen guns, and only fifteen men, but I never before saw a town with only seven inhabitants.

The distance to Zashiversk from Tabalak is two hundred and fifty miles, throughout the whole of which there is not a single inhabited dwelling, and but eight charity yourtes. The weather had, generally speaking, been calm and mild, seldom exceeding 25° of frost of Reaumur. This miserable town is, however, at least an hospitable place. It is seated on the right bank of the Indigirka, which flows with great rapidity, and, during the summer, carries every thing before it. The mountains to the west are bold and bare, producing no-

thing besides a few dwarf pines ; these mountains confine the river for forty miles farther to the north, where it spreads, and forms a continuation of lakes until it enters the Icy Sea.

Fish is fine and most abundant, and constitutes almost the only support of the *numerous* inhabitants. There is not a blade of grass near the place, and no horses are kept nearer than thirty miles ; so that there is no little difficulty in bringing the hay which maintains a couple of cows. The planner or proposer of this site for a town might deserve punishment, but certainly less than that of being made its perpetual commander. I, however, remained three days, living in a state of luxury to which I had, of late, been a stranger. Hares, wolves, bears, wild rein-deer, and elks, which abound here, were my ordinary food ; foxes, which are also in great plenty, are also sometimes used. Bear and wolf meat I found good when very hungry ; rein-deer I found a delicate diet ; but elk, I think, surpasses every thing I have tasted, having all the nutriment of beef, with all the delicate flavour of the rein-deer.

On the 3d of December I quitted the *town* of Zashiversk, not ungrateful for the hospitality of its poor inhabitants, who had supplied me with plenty of fish, here eaten in a raw state, and which to this hour I remember as the greatest delicacy I have ever tasted. Spite of our prejudices, there is nothing to be compared to the melting of raw fish in the mouth ; oysters, clotted cream, or the finest jelly in the world is nothing to it ; nor is it only a small quantity that may be eaten of this precious commodity. I myself have finished a whole fish, which, in its frozen state, might have weighed two or three pounds, and, with black biscuit, and a

glass of rye-brandy, have defied either nature or art to prepare a better meal. It is cut up or shaved into slices with a sharp knife, from head to tail, and thence derives the name of stroganina; to complete the luxury only salt and pepper were wanting. Having charged myself with a leather bag of these, which are always of a white colour, and generally of the sturgeon kind, I resumed my route along the crystal surface of the Indigirka. My first day's journey brought me more acquainted with the power and use of dogs, although I have seen them in London drawing a poor sailor who had lost both his legs; here, however, water or ice, fish, fire-wood, travellers and their goods, and every thing that convenience can demand, are drawn by those domestic animals.

At forty miles the mountains diverge from the course of the river to the east-north-east and west-south-west, the former chain going towards the Kolyma, and the latter embanking the Yana; the country between them a vast desert. The twentieth day we had passed thirty miles, still on the shallow, transparent, and slippery Indigirka, which gave us another lesson of our hard work. Many islands lay in the river, which, during the summer, present a scene of desolation almost incredible, from the effects of the wonderful overflowing of the rivers. In journeying along the river, my horse twice fell under me upon his broadside, yet without injury to me, as I used no stirrups, my feet hanging at liberty for the purpose of kicking the horse's sides to keep them warm. My route lying north, the mountains gradually disappeared as I entered on the seemingly boundless plain. We tarried at a comfortable *cleau yourte*, where I was regaled with excellent cream and wild

berries, somewhat similar to black currants, called here broosnicka, *vaccinium vitis idæa*. I continued over a flat country, and lakes communicating with one another by small streams, suffering much at times from the cold, especially in the knees, which, although not sensibly cold, had a feeling of deadness and painful fatigue, which I could not account for, till a pedlar explained to me, by signs and words, that if I did not alter my plan, I should certainly lose both my legs above the knees. They appeared indeed a little inflamed, owing, as he said, to the inadequate protection of the knee-joints, which, on horseback, are more than ordinarily exposed, all the defence they had being a single leather, in sometimes 30° of frost of Reaumur. I considered that I was still bound to the northward, and that the extreme of winter had not yet come upon me, and therefore thought it better to accept a pair of souturee (knee-preservers, made of the skins of rein-deer's legs), which he very kindly offered. The service they did me is astonishing; from that moment I had less pain and more heat, and became fully satisfied that the extremities alone are to be taken care of. The golden rule, which I have never found to err, is, always to follow the example and custom of the natives; whether in a hot, cold, or temperate clime, *they ought* to know what is most necessary or proper.

On the third day after my departure from Zashiversk, my liquor was at an end from the effects of a very common sort of leak; it had been tapped too often. I could do nothing but bull the barrel, that is, put a little water into it, and thus preserve at least the appearance of vodkey. The nights were particularly beautiful, and the moon was visible during the whole twenty-four hours. My

eyes had now become painful from the effects of the snow on the eye-lashes, but I was still content, and moved forward cheerfully to the scene of my destination. On the sixth day, over a miserable road, the fatigues of which it is useless to repeat, I reached a miserable abode, whose inhabitants were in a state of actual starvation, completely resigned to their fate, and only wishing to die. Remonstrance had some effect in rousing them, and warm tea had more, for they determined to accompany us to the next post station, whose inhabitants, at our instigation, gave them a part of their own fish, "although their supply of the wants of nature, frugal as they were, but scarce supported their own lives." Over lakes, and through low forests, I at length reached the summit of the chain of hills which separate the commissariats of Zashiversk and Kolyma; then, descending rapidly, entered a charity yourte twenty miles further. I found a fire already lighted, owing to the considerable attention and orders of Baron Wrangel, who keeps a man employed here until the whole expedition has passed. The eighth day I reached Sordak, three hundred and twenty miles from Zashiversk. This stage was accomplished with great difficulty, owing to the unusual depth of the snow, and the wretched condition of the horses; mine had failed. The late high winds had also obliterated every trace of the path, and we were frequently obliged to return and start afresh, sounding the depth of the snow as we went. At length, however, we arrived, and in good health, although the weather was now become very severe.

At Sordak there is a post-house and a corporal of the Cossacks, with a few other yourtes for the Yakuti, who cut and bring hay and fire-wood, and

fish and hunt ; in short, they maintain the establishment upon the terms of paying no yasack. They also accompany the post and other travellers, and return with the government horses. This may serve, therefore, as a description of the other stations, of which there are but eight in the whole route from Yakutsk to the Kolyma, a distance of eighteen hundred miles. The country round Sordak is low and marshy, with numerous lakes and much fine wood, and is indeed far superior to that on the southern side of the hills. The under officer who keeps the station, is grandson of the celebrated Vladimir Atlassof, who discovered, and in part conquered, Kamtchatka. He entered into a history of his adventures, very little of which I understood. He is marked by a vermilion spot on his cheek, and subject to a complaint called imerachism, which will be hereafter mentioned. His present occupation appears to consist in forwarding a quantity of youkola and frozen fish for the assistance of the expedition at the Kolyma ; he is at the same time actually making a complaint to Baron Wrangel, of the people under his command being in a state of starvation ; in spite of which, he is willing to sell their provisions. Alas ! what will not man do, even in the most remote wilds, for the sake of lucre !

Among the guests at Sordak was the priest of Sredne Kolymsk, or Middle Kolymsk, who had arrived to christen some infants, as well as, perhaps, to drink an extra allowance of spirits ; for his reverence informed me, that the glass was at 43° of frost of Reaumur, (although, I suppose, he understood as little of a thermometer as I did of the Greek mass,) in spite of the fineness of the day. The sun, in fact, was visible, although I was a lit-

the north of the arctic circle, the date being 10th (22d) December; one more convincing proof how ill we hitherto understood the reflective or refractive power of the sun in arctic latitudes. This circumstance I hope will have some weight in establishing the character of the late Mr Hearne, who can hardly, in his dark age, be supposed to have understood the very nice calculations which appear so to occupy the exertions of the present expeditions: Mr Kenzie may be found equally incorrect, in not having made an allowance for a modern improvement.

Having well refreshed ourselves with the flesh of a wolf and a horse, which had, the day before, fought each other to death, we departed on the 14th towards the Kolyma. The first night we put up at a yourte, forty miles, encompassed by squalling children, growling and howling dogs, and a scolding and tyrannical hostess. There wanted only a smoky chimney to render it complete. Having procured wood for the night, on the morrow we departed, but not before I had got into a scrape, for hanging my cap and gloves upon the pins which bear the images of worship. The infuriated woman complained to the Cossack of the insult. The Cossack told her I was an English pope, or priest, and that I was privileged; the length of my locks, as well as beard, was proof positive, and thenceforward I was called the English priest.

The second day we reached a large and neat yourte, inhabited by two aged brothers who had become Christians. The eldest had discarded two of his wives as a proof of his faith, although the younger had buried three, and was enjoying happiness with a fourth,—no great sign of his faith, or strict attention to the orders of the Greek church,

which only permits three marriages. Next day I crossed the Alazea, a considerable river, running into the Frozen Ocean. This part of the world is most abundantly rich in fish, game, and cattle; and the few inhabitants upon its banks live exceedingly well. They supplied me with a couple of geese, with ducks and frozen fish, which is of the first quality. From the Alazea I kept company with a pedlar, half Yakut and half Russian. I have seen several of this mixed breed; and, although their parents are ordinary in appearance, I have hardly ever seen the children, whether male or female, otherwise than with the most beautiful skins, and pleasingly formed features. They have also a delicate appearance, which adds much to the general interest.

On the 19th December I reached Sredne Kolymsk, being one hundred and fifty miles from Sor-dak. The day was very cold, but the weather was calm. The country has been very low, but I am now getting into the vicinity of elevated lands. Crossing the magnificent stream, I shortly reached the town, or commissariat, where an empty house was soon provided for me; and being supplied with firing, attendants, and provisions, I regaled myself, through the kindness of the commissary; and, in short, remained nearly five days, owing to their inability to supply me with a fresh Cossack. The interval was employed in walking about, making observations, and compiling this narrative.

The priest having, with the commissary and principal people of the place, paid me a visit, the former entered my habitation, crossing himself, as is customary; then advancing to me, who stood offering him my hand in the English style, I was honoured with his blessing, which I acknowledged

by an exchange of the compliment. The old gentleman retreated in astonishment, and, demanding who and what I was, my Cossack answered I was an English priest; upon which the reverend gentleman observed he was in error, as one priest could not give a benediction to another. He then shook hands, and expressed his friendship for me. Another instance of the effects of my beard, and of more value to me, though less to the priests of Siberia, arose from the circumstance of the Yakuti coming to me frequently with the right hand open, and supported by the left, which I interpreted into an asking of alms, and accordingly gave them something to eat. This, however, they evidently declined, and still continued their supplicating posture. My Cossack afterwards gave me to understand that I was mistaken, for that they were begging a blessing. I therefore determined to satisfy the next Yakut who appeared during one of my rambles along the river; and when a well-dressed Yakut knez, or prince, demanded my blessing in passing, I gave it to him in the Russian style, as well as to his family. When I left them, the prince began to unload a souma, or leathern bag, and following me, kissed my hand, and insisted upon my accepting a couple of sables; nor could all my entreaties induce him to take them back, that being considered the greatest insult; nor, indeed, will any return be received for a religious offering on the spot; afterwards a little tobacco, a knife, or flint and steel, is considered an acceptable present.

Sredne Kolymsk stands upon the left bank of the Kolyma, and is the residence of the commissary, his secretary, and a few attending Cossacks. There are also about twelve or fifteen inhabited dwellings, containing about one hundred people;

though with its outhouses, baths, &c. it has the appearance of a large village. Its central position is the principal reason of its adoption as the residence of the commissary; producing immense quantities of superior fish, serving equally for their own consumption and that of their dogs, which are numerous, it is also eligible.

With a poor hobbydehoy fellow, in lieu of my faithful and affectionate Cossack Peter Trechekoff, I departed on Christmas day, in spite of the remonstrances and invitation of the commissary to pass the holidays with him, and, directing my route along the river Kolyma, could not repress an inclination to melancholy, and a feeling of the loneliness of my situation. I felt that all my sorrows were yet to come, and that my difficulties had hardly begun. Yet my determination was firm, had appearances been ten times worse.

At twenty miles I visited an old Yakut prince, upwards of ninety years old, in the perfect enjoyment of all his faculties. He was a companion and acquaintance of the unfortunate Shallaoureff in the year 1764, then fifty-six years ago, when that adventurous person completed two expeditions to the Frozen Sea, and is supposed to have perished in the third. I inquired of the old man respecting Billings and his party; he said that was as yesterday. He has a comfortable dwelling, and is in good circumstances, though he told me a subsistence by the chase seems very precarious now-a-days, as most of the animals, especially the reindeer and elks, have been driven to the north and east.

Here I quitted the river, and then over a flat country, abounding in lakes and low brush-wood, completed forty miles; the weather was exceed-

ingly cold, the thermometer never being above 35° of Reaumur. The hills to the east had gradually disappeared, and the following day we reached fifty miles by a good path, and comparatively little fatigue.

The third day I made thirty, and the fourth day forty miles, mostly along the river, and through and over broken ice, which made the journey very tedious, starting early and arriving late. The habitations in this district, whether peopled or not, are much more comfortable than in the others, and it is but justice to the people also to say, that they are cleaner and better clothed. On the fifth day I started at one in the morning, and reached sixty miles, the greatest journey I had made in one day, in 35° or 36° of frost. I was obliged from the cold to dismount at least twenty or thirty times, to take a run for mere self-preservation. At forty miles, at three in the afternoon, we drank tea in a bush, and at eight or nine in the evening reached the station called Malone, exceedingly fatigued. I soon recovered, however, through the kindness of a venerable Russian merchant who happened also to be travelling and trading that way, though nearly eighty years of age, sixty of which he had passed in Siberia, and twenty in Archangel. His present voyage, in his latter days, appears to have been a losing one, arising from the circumstance that the paper currency has been recently changed at the capitals, with only a short warning to this distant point, where the new issue has not yet arrived. The pedlars of this place are thus thrown out of every means of earning a profit with money for another year, while the chances to the commissaries and other civil official traders are proportionably increased—unless at the sacrifice of

20 and 25 per cent to those persons whose functions ought to restrain such a proceeding. The old merchant was, however, still able to give me tea and a glass of corn spirits, my own having been long since consumed, with every other species of provision. I contrived, however, through the kindness of the people, always to have plenty of fish, which was generally my principal food, in preference to the game which was offered to me, but which I much disliked.

At Malone the track for horses is in general finished, though they do sometimes go as far as Nishney Kolymsk, and even to the Frozen Sea, in search of sea-horse and mammoth's tusks. I was now provided with thirteen dogs and a driver, and a vehicle covered over with a sort of frame and oil-cloth, to keep out the cold, as it was thought too great for me to withstand. A bear skin and warm blanket and pillow were also placed in it, in such a manner that I might lie down, be warm, and sleep at my pleasure. I got in, and it was closed after me; not a breath of air could enter; so that, notwithstanding the intense cold prevailing on the outside, I was obliged to make my escape from the suffocation within, by taking out my knife, and cutting a way through to gain fresh air. I have seldom been so sick or so angry; and baring my head, neck, and breast to the cold, and pitching the covering into the snow, in this exposed state I resumed the journey. The dogs ran well; but, from the effects of the severe cold, they were compelled to rest a few minutes at every four miles, besides at other times, as often as was necessary to let me have my run. Indeed, the want of exercise cruelly afflicted me. I never was so distressed from the cold; the half-hour stages betwixt

every three or four miles were sufficient to freeze and fret my face desperately ; and it then required no little self-command to be able to resume the exercise so necessary to counteract it. Sometimes I found myself so drowsy, that the driver deemed it necessary to use all his exertions to rouse me. He behaved with great kindness, and has secured my grateful recollection.

We reached fifty-five miles with the same dogs, and put up for the night at a Yukagir hut. Resumed next morning, with increased cold, though calm weather, and reached Nishney Kolymusk at noon, amid 42° of frost, according to many spirit thermometers of Baron Wrangel's, on the last day of December, 1820, after a most tedious, laborious, and to me perilous, journey of sixty-one days, twenty of which were passed in the snow, without even the comfort of a blanket—a great oversight, I will not call it fault, of my worthy friend Mr Minitsky ; nor had I even a second coat, or parka, nor even a second pair of boots, and less clothing than even the guides and attendants of the poorest class. I could not therefore but feel grateful for my safe arrival at such a season of the year, in such intense cold, and with only the upper part of my nose between the eyes at all injured. Had I not received the knee-preservers, I believe I never should have arrived safe, unless by walking the whole distance ; for when once the knees are frost-bitten (mine only complained) in a serious manner, adieu alike to them and life !

I met, at Nishney Kolymusk, the Baron Wrangel, and his companion, Mr Matiushkin, a midshipman. It was the last day of the old year, and in the present enjoyment of a moderate meal, a hearty welcome, and excellent friends, I soon forgot the

past, and felt little concern for the future. Quarters were appropriated me in the baron's own house ; and with him, on the shores of the Frozen Sea, I enjoyed health and every comfort I could desire.

CHAPTER VII.

Nishney Kolymsk—Ostrovnya Fortress—Description of the Fair held there with the Tchuktchi tribe—Observations on that People, and on Baron Wrangel's Expedition.

ON the morning after my arrival at Nishney Kolymsk, and while at breakfast, I received, as a new year's gift, a couple of large fish in a frozen state, weighing each five or six poods, or about two hundred pounds weight. I inquired for what they were intended, and learned, that I could not be supposed to have brought fish with me for subsistence; and that, as the season had already passed for laying in a stock, the inhabitants of course knew that I must be in want. During the forenoon I also received a parka, or leather frock, to be worn during my stay in the Kolyma. It was a handsome one, mounted with sables and martins. To these were added trowsers, cap, boots, and leather hose; in short, every article of dress that could be desired, and sufficient to have served me at least a twelvemonth. Besides these articles, I was also provided with a bear's skin for a bed, and a leather covering for a blanket, lined with hares' skins. Gloves were supplied me through the care of the ladies; and Baron Wrangel, at whose house I lodged, crowned these benevolences, besides his

general kindness, in making my situation absolutely enviable, by fitting me with a complete suit of the dress of the country, to be used if necessary, or retained as a sample of the costume in those northern parts. By these kind and considerate supplies, both of provisions and dress, I was enabled to take my daily exercise with impunity, and could not help recalling to mind the words of Prior, which were fully realized in my case:—

If any nation pass their destin'd days
 Beneath the neighb'ring sun's directer rays ;
 If any suffer, on the Polish coast,
 The rage of Arctos and eternal frost ;
 May not the pleasure of Omnipotence
 To each of these some secret good dispense ?

Baron Wrangel's expedition I found in a state of much forwardness, great exertions having been used in collecting dogs and drivers, and provisions, as well as in making new nartes, or sledges. I learned that it would depart from the Kolyma in the month of March, in two divisions,—one having for its object the solution of the question regarding the latitude and longitude of the north-east cape of Asia ; and the other, a journey due north from the mouth of the Kolyma, in search of a real or supposed continent, or rather the continuation of Asia to where it was imagined by some to join the continent of America. I did not hesitate to volunteer my services ; but in consequence of my being a foreigner, I found my offer could not be accepted without special permission from the government. I therefore made up my mind to set out for the fair of the Tchuktchi, and to try my fortune in getting a passage through their coun-

try, and so to cross over Behring's Straits for America.

During the months of January and February we were variously employed, as the nature of the weather would allow, passing the time agreeably and happily enough. Among other things, I brought up my journal, and worked some observations for the latitudes and longitudes of Nishney Kolymsk. I had also placed at my disposal some interesting volumes, which Baron Wrangel had brought with him. Sometimes we joined in the amusements of the natives, and visited them in their feasts, which are very numerous, and at which there is a great consumption of liquor. The ice mountain was of course one of our amusements, and our time was far from hanging heavy. I descended it daily during the *fêtes* with one and sometimes two young girls on my knees, who expressed no fear in trusting themselves with a novice. Our conversation was chiefly relative to the expedition; each person had something to recommend, either for immediate benefit or as a future precaution; among others, I was so fortunate as to propose some things which appeared and proved of service to the expedition, and which were either adopted or improved upon by the Baron. I have seldom seen a young man better qualified for the task imposed upon him, or one who possessed a more versatile genius. For his kindness to me I must ever feel grateful, and our short acquaintance has, I trust, been productive of a mutual friendship.

The weather proved exceedingly cold in January and February, but never so severe as to prevent our walks, except during those times when the wind was high; it then became insupportable out of doors, and we were obliged to remain at home.

Forty degrees of frost of Reaumur never appeared to affect us in calm weather so much as ten or fifteen during the time of a breeze! yet, to witness the aurora borealis, I have repeatedly quitted my bed in those extremes of cold, without shoes or stockings, and with no dress on but a parka, or frock.

To prove that I do not magnify the extremes of cold in that part of the world, I beg to refer to Mr Sauer's account of Billings's expedition, and the present Admiral Saritcheff's account of the same, when 43° of Reaumur, or 74° of Fahrenheit, were repeatedly known. I will, also, add my testimony from experience, to the extent of 42° . I have also seen the minute-book of a gentleman at Yakutsk, where 47° of Reaumur were registered, equal to 84° of Fahrenheit. There can, indeed, be but little doubt that the local situation of the Kolyma, bordering on the latitude of 70° , and almost the most easterly part of the continent of Asia, is a colder one than Melville Island, or the centre of the American Polar coast. Okotsk, Idgiga, Yakutsk, Tomsk, and Tobolsk, are considered equally cold and exposed as the mouths of the Lena, Yana, or Kolyma. Even Irkutsk, about the latitude of London, has yearly a frost of 40° of Reaumur, or 58° below the zero of Fahrenheit; yet the utmost degree of cold that I have observed, I have never known attended by that crackling noise of the breath which has been related, nor with those other strange sensations which some have described; though I have seen axes split to pieces, and witnessed the ill effects of touching iron, glass, or crockery, with the naked skin, which will infallibly adhere to it. However, I soon had reason to consider the coldest day as the finest, because it was

then sure to be calm, and offered every excitement to exercise and cheerfulness.

Nishney Kolymsk may be termed a large town in this part of the world, containing, as it does, near fifty dwellings, and about four hundred people, (or eighty families,) which is three times the number of any place betwixt it and Yakutsk. It stands on the east side of an island in the Kolyma, about twenty five miles long, and opposite to the junction of the river Aniuy. Formerly the town was eight miles lower down, but the bleakness of the situation, and its consequent exposure to the northern blasts, induced its removal to the present site, where it is protected from them by a range of hills. The island is covered only with low brushwood, but receives fine timber, which is floated down the river. No cultivation can of course be expected in a climate wherein scarcely a blade of grass is to be seen; the horses, which do sometimes tarry in its vicinity for a few days, feeding upon the tops, stumps, and bark of the bushes, or upon the moss. The inhabitants manage, notwithstanding, with great labour, to feed a couple of cows; though to do this they are obliged to bring the hay eighty miles. They are mostly Cossacks, with half-a-dozen pedlars, and three priests, the whole of whom carry on some traffic. These reverend traders seem to have adopted the practice of our young boys, who will say their prayers several times on those nights when they cannot sleep, as a sort of atonement for those nights when sleep and fatigue, or the like, have superseded them. In like manner the clergymen, as I was told, have actually said masses three times on a certain Sunday, and were then absent till the fourth; and being three brothers, of course they were not in fear of

being reported by one another. Baron Wrangel, however acceptable he deemed the extra masses, insisted upon the observance of religious worship every Sunday.

The occupation of people in this part of the world naturally depends upon the season. Laying in wood for fire, hunting, and trading, are the winter occupations; while fishing and fowling are almost the exclusive employment in spring and autumn: summer is generally the building time, the wood for which is floated down the Kolyma from Sredne Kolymsk. The women embroider gloves, caps, boots, shoes, and various things in a neat manner. Farther on, to the southward, they also attend to the breeding of cattle. Fishing may, however, be termed the grand concern, employing, as it does, alike men, women, children, and dogs.

The quantity of fish caught is prodigious, as will be inferred from the following account. From Nishney Kolymsk to Malone is a distance of eighty miles; the number of inhabitants in the two places may be six hundred, and these consume nearly two million pounds of fish. Now, allowing one hundred and twenty families to represent the six hundred individuals, it follows that each family receives a portion of about fifteen thousand pounds of fish annually, or forty pounds a-day. Nor is such a quantity by any means too large, considering the number of dogs, which are generally allowed each ten herrings a-day, at least during the period of work. In the distance above alluded to, there may be about eight hundred dogs, which consume above four thousand pounds of fish daily, during half the year: the other half they prowl about on the banks of the river and lakes, and by their sagacity provide their own subsistence. Indeed, were it not

for them, there would inevitably be a plague in the town of Nishney Kolymsk, for there is no filth whatever which is not consumed by them. With respect to their howling at stated periods, no cock ever crew, nor goose ever cackled, more regularly than these domestic animals : it would also appear that one of them is constantly on the alert, and, giving the alarm, he is instantly followed by the rest during a space of four or five minutes.

The fish caught in the river Kolyma are of various kinds, but most of them I can only denote by their native names, as the nailma, moksou, osioter, and sturgeon : the salmon is fine and plentiful, and the sterlett delicious ; from the roe of the last is made the black caviar ; but herrings are the most abundant of all. The sturgeon is converted into youkola, or dried fish, for the inhabitants, while moksou is similarly prepared for the dogs ; the other kinds are generally boiled or eaten raw by men and dogs ; the former is deemed a most expensive plan. The species of fish allotted to the dogs, are only in cases of great necessity consumed by the men ; such for instance was the case between the years 1812 and 1819, when a famine prevailed to so alarming a degree, that the poor were obliged to eat the dogs as they died, although, to their credit be it recorded, they never, even in these circumstances, killed them. Indeed, these faithful animals constitute the greatest part of their riches. Yet nature appears in part to have provided against such emergencies, as it is a general remark, that, in those seasons when fish are scarce, elks, wild sheep, and rein-deer are most numerous, and *vice versâ*. But many of the inhabitants will not be harassed with the trouble of hunting, and depend entirely upon fish for their food.

Formerly, this part of the world was highly productive in furs, the Emperor receiving a tenth of each sort, which has at times amounted to as many as five thousand sables ; but now-a-days less than so many hundreds, a quantity barely sufficient to pay the yasack. The shores of the Icy Sea are still much frequented by the white, blue, and red fox, and near the woods valuable sables are still to be met with. In the rivers the vidra, or river otter, is in much estimation. Upon the whole, however, it appears that the inhabitants look to the Tchuktchi for their winter clothing and most valuable fur trade. The animals of the chase seem to have been forced from the central to the extreme parts of Siberia, and thus the elks, rein-deer, and argali, or wild sheep, are but rarely met with in the commissariat ; they are now more within the reach of the few Yukagire descendants who line the banks of the two Aniuys, and chase those animals beyond the frontiers. Game of the feathered kind is, nevertheless, highly abundant, such as swans, geese, ducks, woodcocks, bustards, and partridges ; but, as in the case of the wild animals, the inhabitants have neither the time nor the means to look after them. Could they be supplied with salt, or could salt works be established here, no spot in the world would be better supplied with food than the Kolyma ;—whereas, at present, should they be so fortunate as to take two or three years' fish during one season, it must all be converted to youkola ; and in the second summer it turns sour and becomes maggoty, so as scarcely to be fit even for the dogs to eat.

With respect to the salubrity of the town and district of Kolyma, I fear it cannot be highly extolled, being subject to the ravages of many dis-

eases, among which the leprosy, apoplexy, venereal, and scurvy are the most dangerous. The latter alone appears, by the inhabitants, to be susceptible of cure, which is by the consumption of raw fish during the winter: in the summer the disease never fails to abate with the arrival of fresh fish. I always ate of raw fish, as well from choice, as from a wish to conform to the manners and customs of the natives, confident that time and experience must have initiated them into a knowledge of what is best for their climate. The two other diseases before named, especially the venereal, appear incurable, becoming as it were the inheritance of the children. The complaints called *diable au corps*, and imerachism, must also be specified; the former is a most extraordinary one, and consists in an idea that the body of the patient is possessed with one or more devils, attended with incessant hiccoughs. The parties afflicted with it are generally most delicate and interesting in their appearance; and it is seldom indeed that any individual is cured. In females it prevails to such an extent as utterly to prevent pregnancy. I have seen them hiccough to so great an extent, as to induce me to strike them on the upper part of the spine, in the hope of relieving them from the pain by a surprise of the moment. They persist in believing that a devil is in the body of the person afflicted, and that, until he be removed, the person will never regain health. The complaint, whatever it may be, the natives consider as an inheritance from their fathers. Imerachism, to which not only the people of the Kolyma, but those also of more southern countries, are subject, is equally unaccountable. Instead of exciting serious fits, like the last-mentioned disorder, it carries with it an air of merriment, as it by no means

affects the health of the person, though it subjects him to the most violent paroxysms of rage, fear, and mortification. Whatever is said or done in the presence of an imerach, will be repeated by him at the moment, however indecorous, improper, or violent the act may be. I have seen the dog-master of Baron Wrangel's expedition commit acts sufficient to frighten the person in company with him. While in an adjoining room conversing on points of duty, a slight knock at the bulk-head was sufficient to set him pummelling the person with him, merely from a principle of self-defence. Of this same dog-master, by the way, a highly amusing anecdote is related, and which was confirmed to me, not only by himself personally, but also by Mr Gedenstrom, of Irkutsk, who commanded the expedition. The theatre was the Frozen Ocean, and the imerach's dogs and narte were the headmost. One forenoon they encountered a large white bear; the dogs immediately started towards the animal, and the driver, being the dog-master of whom I am speaking, steadfastly kept his place, prudently remaining by those who only could assist him. In the eagerness of the dogs, sharpened probably by hunger, they became entangled with one another, and were almost rendered useless. The driver seeing the state to which he was reduced, resolved to attack the bear with his ostol (a stout ironed stick with small bells, which serves to stop the narte), and accordingly presented himself to the enraged bear, who immediately raised himself upon the hind legs, and began to cry and roar most bitterly; the imerach followed the example. The bear then began to dance, and the driver did the same, till at length, the other nartes coming up, the bear received a blow upon the nose, and was secured. It

appears that the nose is the only part vulnerable without fire-arms, and even then they can be secured only on being shot through the head. The white bear is, however, by no means a dangerous animal, avoiding the chase as much as it is avoided. Another instance of imerachism, which occurred in a distant part of the general government of Siberia, may be related in this place, to prevent again adverting to those ludicrous scenes which hourly attend it. Two old ladies in Kamtchatka, one the mother of a Mr Tallman, an American, who had married a Russian girl, the other, the wife of a Russian, who were both afflicted with the disease, were sitting at tea opposite one another, when Mr Tallman, in a gentle manner, put his hands behind their backs, propelling the old ladies towards each other, upon which they instantly exchanged tea-cups and saucers, while the really offending party stood enjoying the mischief. There can be no doubt that the complaint is rendered worse by the constant annoyance and irritation to which they are subjected for the amusement of others ; to say nothing about my belief that it is in many cases brought on by an habitual folly of young boys, who imitate the mad acts of the really afflicted.

Nishney Kolymusk has formerly been celebrated by the rank of the people banished thither. The famous Count Golofkin, one of the ministers of Catherine II., was for many years a resident, and ultimately died there. He was considered as a great intrigant, but of an eccentric character, a proof of which is afforded by his constant habit of putting himself, servants, and even his house, into mourning, on Catherine's birth, name, or coronation day. This open and determined opposition utterly precluded his pardon, and Nishney Kolymusk

contains his tomb. The conduct of a Livonian baron, at one time high in the esteem of the same princess, merited and obtained more favourable consideration. The baron successfully applied himself to the breeding of cattle in the vicinity of Sredne Kolymsk, but his pardon arrived so late, that his age and infirmities prevented his acceptance of the proffered boon, and he, his wife, and two children, lie buried in the church at Kolymsk; his eldest son returned to St Petersburg, and became repossessed of the honours and wealth of his father. To such men an expatriation to this, the most distant part of Russian Siberia, must have been severe beyond measure; cut off for ever from fortune, friends, rank, society, and every enjoyment that could render life desirable.

The only meteorological phenomenon which occurred during my stay at the Kolyma, was the aurora borealis. The scene fell far short of my expectations. I understood, however, that the months of October and November are the most proper to view it in its greatest splendour. Those which appeared during my stay, were generally from the north, and consisted of columns of fire moving in a horizontal direction, and generally disappearing in the south-west; the height of the columns being from 50° to 60° . At times an immense illuminated space from north to east would advance very close to us, and throwing up rays, or rockets of fire, and forming into concave arches, approached us so near, as apparently to endanger our situation, exhibiting at the same time every colour of the rainbow. The most beautiful aurora which I saw was at midnight of the first of March; the wind was from the north-north-west, and the glass at 36° of cold. The aurora occupied the whole circle of the heavens, at an

elevation of 28° or 30° , and, gradually rising, disappeared in the zenith. The figure was as an illuminated tent, with festoons, or fringes, at the lower part, and which had an appearance as if constantly receiving accessions of fire, which were equally distributed to it from every part of the foundation of the tent. The illuminated part gradually diminished in splendour as it approached the zenith. It lasted about two hours, and did a little affect the electrometer. The view of it was rendered exceedingly fine and interesting, from the fact of our situation being, as it were, in the inside of the tent.

Among the books in our library was Captain Burney's Chronological History of the North-eastern Discoveries, and of the Early Navigation of the Russians. It appeared to me so extraordinary a production, and so deserving reply, that I addressed a memorial or letter to that effect to the Royal Society. Whether that learned body has received it or not, I am unacquainted, at least in an official manner. As connected with this journey, I had certainly considered it becoming the attention of the Royal Society, because the memorial was professedly addressed to that body, and was only not received from a want of form. Mine was also equally faulty, and consequently could expect no better reception, being addressed, not to the *President and Secretary*, but to the *Secretary and President*, of the Society. Although Captain Burney has paid the debt of nature, still, contrary to the opinion I entertained in the first edition of this work, I consider it highly proper to annex a copy of the said memorial, together with a map. To prevent interfering with this narrative, and to leave it for

the consideration of the scientific, I have introduced it as a sort of appendix.

Baron Wrangel and his party leaving us on the 27th of February, I attended him ten miles down the river, when, with three cheers, we wished him every success, and returned. The baron was escorted by twenty nartes and two hundred dogs; each narte carried about one thousand two hundred pounds weight; but in consequence of the early part of the winter having been employed in transporting provisions, &c. to the Great Baranov Cape, to the east of the mouth of the Kolyma, they will be enabled to proceed fully laden from that spot, as well round the north-east cape of Asia as to the northward, in search of strange lands; they will also return to Cape Baranov, to be again supplied with food to enable them to regain this place, Nishney Kolymsk.

On the 4th of March I left the Kolyma, in company with Mr Matiushkin, midshipman, and a few merchants, whose nartes were loaded with tobacco and iron utensils. The weather was fine, there being but 25° Reaumur of frost; yet we had not got more than fifty miles, before we were obliged to halt, on the banks of a lake, being unable to make out the path, from the depth and drift of the snow caused by the wind. Our route lay on the Aniu, having left to the north the high lands which defend the town of Nishney Kolymsk. I passed the night very tolerably in the snow; but it was otherwise with my friend, who as yet had not experienced the inconveniences of these nocturnal sojournings, and of course was not initiated into the mysteries of the comforts to be secured by precautionary measures; he was therefore repeatedly obliged to exercise himself during the night, for we

were so unfortunately situated, that no fire could have been kept in, even had there been fuel. The following day we passed through a thick forest of pines, in the greatest danger of broken heads, going with a velocity almost incredible, and at every descent of a hill dashing up against the trees. Thirteen dogs were provided for me. We made thirty-five miles in this manner, and reached the little Aniuy, a considerable, rapid, and dangerous river. A charity yourte received us for the night, and we fared very well. The low lands, which extend from the Kolyma to the eastward, being now passed, we entered on a more elevated country, and were cheered with meeting and overtaking a great number of sledges, whose owners exhibited the same smiling faces, the result, no doubt, of as sanguine hopes, as those of the great merchants of London or Amsterdam, on the eve or expectation of a great fair. The right bank of the little Aniuy is formed of slate mountains, the left a vast uninteresting flat. The river, which has many islands in it, winds a good deal, and exhibits some good scenery.

The descendants of the Yukagiri inhabit the banks of the two rivers Aniuy, and serve as a sort of neutral nation between the Russians and Tchuktchi. They were formerly a formidable and warlike people; and it cost the Russians much trouble to subjugate them. Indeed, in such fear were they held, that the Empress Catherine absolutely forbade their language to be spoken. They are now all but extinct, as a pure race, but one old woman existing whose parents were both Yukagires, and who really understands the language. The remainder are in fact descendants of Russians, who have intermarried with them. They are certainly the finest race of people I have seen in Siberia; the men well pro-

portioned, and with open and manly countenances; the women are extremely beautiful. What their origin was, it is now difficult to say; although they were doubtless of Asiatic origin, their features partaking of the Tartar aspect,—to say nothing of their enmity to the Tchuktchi, while they have a great friendship for the Yakuti or Tongousi.

The third day we reached an inhabited yourte, where many of the merchants awaited us, as they could not go to the fair before a certain time. The river was also in some degree an impediment to their proceeding, as the velocity of the stream prevents firm ice being ever formed. Two of the merchants, in attempting the passage, got a severe ducking, and narrowly escaped with their lives; the breadth of the path being but five or six feet, and so slippery in some places, that, unless the driver be very well qualified and accustomed to the place, it is difficult to prevent accidents. The wood on the Aniuy is of considerable growth for so northern a situation; but the root has seldom more than twenty inches depth.

I witnessed, for the second time, the first being at Sordak, the mock suns and moons, and columns on each side of them, at equal distances; but these parhelia were by no means brilliant, owing, as it appeared to me, to the rather warm weather. I shall therefore await more favourable appearances, before I attempt their description.

On the 8th of March we reached the Fortress, the river bordered with the same elevated slate lands on the right, and low flat on the left, bank. At seven miles on this side the fortress, the scenery begins to improve; and the fortress itself may be said to be a most romantic spot. It is distant from the Kolyma one hundred and fifty miles, and du-

ring summer the place must be very pleasant. There are twenty yourtes, about two hundred people, and a large wooden building, fit for any thing except defence. The whole stands upon an island, surrounded by elevated and well-wooded hills. There is very little grass, but much moss. The view of the river is exceedingly picturesque; and the fortress is decidedly the most favourable place to reside in I have seen from Yakutsk, a distance of at least two thousand miles.

The inhabitants on the banks of the river are not numerous, and subsist very scantily by hunting, there being few fish in the river. Famines are therefore of frequent occurrence, bread not being supplied by the government. Elks, rein-deer, and argali, are what the people most depend upon; formerly they were abundant, but are now much reduced, owing to the peopling of the country by the Russians, who hunt rather to exterminate the breed than to procure subsistence. During the fair, the inhabitants make the best of their time in trading, and becoming after that a sort of storekeepers to the other traders.

Having settled ourselves in a small Yukagir yourte, Mr Matiushkin and I received a visit from one of the Tchuktchi, a most empty countenanced and wild looking savage. He entered the room where we were, tumbled himself down upon a stool, smoked his pipe, and then quitted the room, without once looking at, or taking the least notice, either of us or any thing about us. The commissary having made his appearance, it was determined to commence the fair, by first installing two of the chiefs with medals and swords, baptizing them, and receiving a nominal tribute. The morning was ushered in by the arrival of these persons in state,

dressed in their gayest apparel, and seated in a beautiful narte drawn by two rein-deer, the whole forming a cavalcade of twenty-five or thirty pairs. Having reached a large storehouse, to which the altar and images were carried, the priest proceeded to baptize the two men, their wives, and three children; but instead of being merely sprinkled with water, they, men and women, were obliged one and all to strip, and to be three times plunged in a large iron cauldron of ice-water, with the thermometer on the spot at 35° of Reaumur, with no part of their dress on except their trowsers; and were afterwards directed to bathe their feet in the same cold water. I could not help pitying the women and children, the former of whom, having long hair, became, as it were, enveloped in icicles. A small cross suspended round the neck, with many difficult and almost useless injunctions how to pronounce their newly acquired names, completed the ceremony. A quantity of tobacco was then given as a present to each of the new converts, by way of inducing others to follow the example. Instances having, however, occurred of late of Tchuktchi being twice baptized, and even of presenting themselves a third time, for the privilege of the presents, the good people of Irkutsk begin to be tired of sending either their missionaries or tobacco to such a people; nor do I think such a determination, with regard to other equally devout, but more unsuccessful missionaries, would cause much regret in the minds of the more tolerant, but less fanatical, part of the good people of England.

The ceremony finished, the same cavalcade, joined by the other chiefs, or toions, of the Tchuktchi, proceeded to the abode of the commissary, whither Mr Matiushkin and I followed. The commissary

then made the usual declaration, that the fair could not begin until he had received a tribute for the Emperor Alexander; on which the principal traders advanced, and laid each a red fox skin at the feet of the commissary. The names of the donors, and the value of the skins, were then regularly entered in the official records, and the commissary proceeded to invest two of the chiefs with a medal and small sabre, reading to them publicly a letter, which he is supposed to receive from the chief of Yakutsk, declaring it to be the Emperor's order so to invest the chief, or toion; the clergyman then advanced to give his benediction to them, and the poor ignorants became quite happy, quite proud, and ultimately quite drunk.

The next topic started was that of my desire to accompany the Tchuktchi through their country; and this seemed to require more generalship than all the others. The commissary, through an interpreter, commenced by informing the Tchuktchi people, that the "Emperor, understanding two strange ships had appeared upon their coast, was willing to know who they were, and had accordingly sent with them, agreeably to their request, two interpreters, one of whom understood their own language as well as the Russian, while the other, (meaning myself,) understood the languages of most maritime nations. The commissary desired, as from the Emperor, that all due care should be taken of, and all due respect paid to us, especially to myself, who was one of the chief interpreters of the empire." After this opening harangue was completed, the turn of which inspired me with some degree of hope, one of the most respectable of the Tchuktchi got up, and said, that "he was in want of no interpreter, and therefore would not take one." This

laconic reply completely disconcerted us. The next, an old and cunning fellow, called Kacharga, said, "that boys and girls should not be attended to in a case of such importance; that he, a chief, had not demanded an interpreter, although a nephew of his had done so." He expatiated upon the impropriety of taking from those youths a communication of such importance, as should alone have come from a chief. I could not but approve the justice of the remark, and began to suspect the whole was a hoax, and that they had not made any demand of an interpreter. It was therefore told them, that "two nartes would be of no great consequence to them, and that as the Emperor had so sent, they ought to take us, for that we dared not return to merit his displeasure." A fresh consultation was hereupon held by the savages, and they came to a determination, "that as the great Emperor *himself* wished to send two interpreters to Behring's Straits, of course he could have no objection to pay for the transport of such people." Upon inquiring what demand they would make, they said "fifty bags of tobacco," a quantity equalling one hundred and twenty poods, or near five thousand pounds weight. To make such a present in advance was madness in me to think of, and the project appeared, as indeed it proved, to be wholly lost; for they added, that he "could be no great Emperor who could not make so small a present, seeing that he could command the riches of all his people." They also observed, that "I must be a poor interpreter if I could not satisfy the demand myself!" Alas! they might as well have demanded five millions as five thousand pounds of me. One of the knowing ones observed, and I mention it as evincing the sagacity of those people, that "he doubted whether I was an inter-

preter of the great Emperor's," saying, "that I could not even speak the Russian language, for that he noticed the Russian Cossack interpreted from the Tchukskoi language to Mr Matiushkin, and Mr M. again in a different dialect to me." All this was too true to be denied. They then asked, "of what use I could possibly be to them, when I neither understood the Russian nor Tchukskoi languages?" This last truism quite appalled the whole of us, and from that moment the point was given up. It was not a little singular that these rude people should all along have known that a third toion, or chief, for I was considered as one, was in the fair, and demanded who and what he was. I have, however, no idea that their refusal arose either from fear or ill-will, but simply from avarice.

I next day visited their camp, distant about two miles and a half. It consisted of three large and three small tents. The former contained the bulk of the Tchukskoi people, and the latter were appropriated to the chiefs and more considerable people. The large tents were disgustingly dirty and offensive, exhibiting every species of grossness and indelicacy. But the smaller were, on the contrary, very neat, clean, and warm, although without a fire, in 35° of frost. Indeed they were to me almost suffocating, being only eight feet long, five broad, and about three feet high; and containing three or four people huddled together in one bed, which is made of rein-deer skins, and the coverings lined with white foxes'. The small tents are made also of the old and hard skins doubled, so that the hair is both on the inside and out; a large lamp, with whale oil or fat, which serves them for a light, communicates also considerable warmth. On entering one of these small dwellings, I found the chief and

his wife perfectly naked, as was also a little girl, their daughter, of about nine years old,—nor did they seem to regard our presence, (Mr Matiushkin was with me,) but ordered the daughter to proceed and prepare some rein-deer's meat for us ; which she did, in that state of nudity, by a fire close to the tent. Having lolled upon the bed about a quarter of an hour, we were treated with the rein-deer meat half boiled, of which we of course partook out of compliment. I was, however, obliged to cut short my visit, from want of air, and the most offensive smell I had ever endured for so long a time. The toion, or chief, was a little angry with me for quitting him, and imputed it to his having the previous day opposed my design of going through his country. Their furniture consists of a large kettle, knife, wooden bowls, platters, spoons or ladles, and an axe, with flint and steel. Having thus informed myself of the savage state in which they live, I returned to the fortress, driven by one of the chiefs in a neat narte, drawn by a couple of rein-deer in a pretty style. They use regular reins, made of leather thongs, and a long springing cane, with an ivory knob to it of the tooth of a sea-horse ; the latter is exercised occasionally upon the rump of the animal, on which it is capable of inflicting a pretty severe blow. I must, however, do justice to the Tchuktchi for their very kind treatment and conduct to their brutes, whether dogs or rein-deer—appearing quite to consider them as pets. Nay, to so great a degree is this feeling carried, that among this savage nation it is considered unmanly even to ride ; in all ordinary cases they prefer to walk, and in every other way appear solicitous to lessen the labour of the animal, permitting only the women and children to sit in the nartes when upon a journey.

On our return to the fortress, the fair was formally commenced by an harangue of the commissary's, declaring the terms, the tax, and the penalties. The Tchuktchi had in the mean time ascertained the quantity of tobacco in the market by means of their emissaries, who are exceedingly inquisitive and cunning upon that point, their rudeness and apparent equality giving them free access to every dwelling which contains any of that commodity. They have their own mode of calculating, and, before the fair is commenced, they fix the price of their goods, to which price they adhere more strictly than the Russians. The fair is held upon the river Aniu, opposite to the fortress. Early in the morning the Tchuktchi arrive at the place of barter, and forming a semicircle towards the fortress, the extremes of which reach to the edge of the ice, dispose their furs upon their nartes, the owners constantly remaining by them. In the mean time the Russians place their large bags or bales of tobacco in the centre of the semicircle, and then begin to parade and visit the Tchuktchi, inquiring the prices, &c. by means of an interpreter. The work entirely falls upon the Russian, who drags behind him, for many hours, two hundred-weight of tobacco, before he can induce the Tchuktchi to barter. The tobacco, on the first or second day, cannot be exchanged below the terms of an agreement made between the merchants, as three or four people are so posted as to ascertain and judge of the conditions and their validity. Still, however, they do manage to cheat; but on discovery the goods are forfeited, and the parties declared incompetent to trade any more. They are particularly guarded by the law, as to the wetting

of tobacco, or placing stones or other heavy things with it, to increase the weight.

It is ludicrous enough to stand upon the banks of the river, and wait the appointed signal for commencing barter each morning. While the Tchuktchi are quietly sitting on their nartes, with their sleeves drawn back, and their arms thrust into their bosoms to keep them warm, the Russians, on the contrary, start pell-mell; pots, pans, kettles, knives, swords, hatchets, scissors, needles, &c. are rattling in every direction, like so many chimney-sweepers on May-day; priests, officers, Cossacks, and merchants, men, women, and children, alike fantastically dressed, with articles of traffic, of which tobacco constituted the chief. A few bells, pipes, and corals, also served to grace the dresses of the more wealthy and whimsical pedlars. For all the small articles the Russians readily enough received fresh meat, which was much wanted. The heavier skins and sea-horse teeth also were ready for sale by the Tchuktchi at a reduced price; but the same inducement which the Tchuktchi have to sell bears', wolves', and rein-deers' skins, namely, their weight, and the expense of transporting them, operates to prevent the Russians from buying them. Sea-horse teeth were particularly flush on the first day; but nothing would do, the tax and penalty were feared, and little business was done. No instance occurred of the Tchuktchi selling below the rule; but two Russians, brothers, were detected in it, and committed to prison until the close of the fair. The price or rate which the Russians had set, was a martin park, somewhat like a carter's frock, of twenty skins, and fifteen red foxes, for a hundred-weight of tobacco; while the Tchuktchi held it at a park and ten red foxes. The se-

cond day was brisker, and more business was done; from fifteen red foxes and a park of martins, the Russians descended, by general consent, to twelve and eleven foxes. Still the Tchuktchi generally held on, compelling the Russians, meantime, to walk about making offers. What, however, with cunning, and breaking off the agreement, a good deal of business was done. But the third and last day's fair was the best and most lucrative for the savages, when neither tax, nor penalty, nor perjury were feared; each individual, from the commissary to his secretary and priest, and from the Cossacks to the merchants, all busily employed in undermining his neighbour. I could scarcely believe that in so small a number of individuals there could exist so great and general a jealousy; but so it was, and many quarrels ensued. That my readers may the better form an opinion of what materials the people of this part of the world are composed, I will briefly say, that there is scarcely an act or circumstance, either of a public or private nature, which takes place at Irkutsk, Yakutsk, or Okotsk, which is not immediately and indirectly made known to, and commented upon by, these worthy critics of the north-east of Asia; nor is it more than an act of justice or truth, to say, that I believe them to be more generally and better educated than any other equally numerous settlement in Siberia, being of the same class of Cossacks. I hardly know of an instance of the young lads not reading and writing tolerably well.

I never saw better judges of tobacco, nor of weight, than the Tchuktchi. I can confidently assert, that they do not err one pound in the hundred-weight; and the detection of the slightest fraud on the part of the Russians, is sufficient to the Tchuktchi to

cut the party short, and deal no more with him. Their mode of trying the strength of tobacco is this : a leaf of it is taken and squeezed in the hand as hard as possible, and if any appearance of moisture be left in the palm, it is well known that the tobacco has been watered ; if the leaf preserves the compressed shape which the force of the hand has given it, it is weak, but if it recovers and expands quickly to its original size and shape, the tobacco is deemed strong. And such is their nicety of judgment in ascertaining this point, that an allowance of goods is given or received on the celerity with which the leaf returns, after compression, to its natural shape.

The last day's sale, although of course the best, was held back a little by the Tchuktchi wishing to make the Russians believe that they had no want of tobacco, as they could get it much cheaper in the bay of St Lawrence, from the ships which casually call there. Whatever trade they may carry on with those vessels, the Tchuktchi appear to know the value of a more direct and first-hand trade ; nor can this be doubtful, when the toils and dangers of their journey, and the small profits, are considered—at least small when compared with the profits they sometimes receive from the few vessels which now and then visit their coast. The fair lasted seven days, which is three more than usual ; the two first and the two last, may, however, be considered as nothing, being occupied in the lowest species of *retail*, in which deliveries are made so low as for sixpence or ninepence. Upon the last day of the real fair, or fifth from the commencement, the vodka (spirit) began to make its appearance, and its effects were successful in inducing the Tchuktchi to bring forward, for

sale, a few of the black and brown foxes. They sold, however, very dear, and were nearly all taken back with them to their country.

The trade of the commissary, secretary, their friends and Cossacks, was done to so great an extent, and with so little principle, that the licensed trader could do nothing, except at considerable loss. The former have a wonderful advantage, also, in bringing their goods into the market, from being able to make padvodies, or public levies of dogs, &c. as if for the public service. This, however, cannot rank among those abuses laid to the charge of the emperor; for, if the offenders' salaries were increased tenfold, the same practice would be continued: they would still trade, and still act, in the same unfeeling way. "A want of education, or avarice, begets a want of morality."* Baron Wrangel has done all he can to remedy this evil, but the moment he retires from the scene, the same conduct will be resorted to, forming, as it does, a considerable revenue to those holding the command. All extra services of the crown, as those for the post, expresses, forwarding of the bread, spirits, and public stores, are thrown upon the poor; while priests, nobility, all officers of the crown, and Cossacks, who possess the best means of carrying such services into execution, are exempt. The poor, having no dogs, are obliged to hire them at exorbitant rates from the rich. Every narte taken for the use of the public during the fair, is a loss to the poor of sixty roubles, or near three pounds. The number of nartes which have been thus at certain times required, may be conjectured from the fact,

* *Auri sacra fames! quæ non mortalia cogis
Pectora!*—

that, while I was there, the commissary demanded one for himself, others for his secretary, servant, Cossack, and chancellery ; and a sixth for his provisions. The chief priest also demanded severally for himself, assistant, Cossack, altar, baggage, and provisions. The object of the former was to register the receipt of twenty-three red foxes, being the yasack paid by the Tchuktchi ; that of the latter, the christening and registering of seven savages, and all the provisions they carried could not have exceeded forty pounds weight ; consequently there could have been no necessity for such padvodies ; —a demand which, by the by, Baron Wrangel did not permit being complied with, he being vested with civil and military powers over the Kolyma district. I am one of the last persons to discountenance, in the least degree, the general design of *converting* to Christianity the savage tribes dispersed over various parts of the world, but I think it must be regretted that such projects should ever have the effect of straitening or burdening those who are *born* Christians. As to the present case, it is to be hoped the liberality of the government will extend to this distant and impoverished place, by paying the inhabitants for all services performed for the crown. This would possibly prevent much abuse, and at least have the effect of disbur-sing a sum of money, of little consideration to a government, though highly acceptable to the governed.

The fair at length finished, I prepared to depart for Nishney Kolymask, with many thanks to my venerable Yukagir host for his kindness. I passed the time very agreeably at his house ; he was a very good chess-player, and was fond of the game. His manner of play added another instance

to many I have witnessed, that there is, in various parts of the world, little or no difference anywhere in the moving of the pieces. I have played the game with Yakuti, Tongousi, and Yukagiri ; but the Tchuktchi laughed at me for such a childish employment of my time. While upon this subject, I may remark, as a circumstance relative to the game of chess, and which has repeatedly surprised me, that wherever a people recognise and play it, they are infallibly Asiatics. Neither the Tchuktchi nor the Koriaks understand any thing of it, but all the Kamtchatdales, and other Asiatics, are familiar with it.

The features of the Yukagiri lead me to suppose them Tartars, and not a race very distinct from the Yakuti. They are, however, almost Russified by intermarriages, and the question of their origin is become difficult. There were at the fair two or three of the Chuanse, or Chodynse, a tributary nation, inhabiting the country between the two Aniys and the Anadyr : their features are also Asiatic.

The information I received from the Tchuktchi by means of the interpreter Kobeleff, son to the Kobeleff who attended the expedition under Captain Billings, I will give in the same laconic style in which I communicated it to the governor-general of Siberia from Nishney Kolymsk. My letter, in the first part, described what articles were sold by the Russians ; as tobacco, kettles, knives, spears, needles, bells, scissors, pipes, axes, spoons, coral beads, and other small ornaments, a few pieces of red and blue nankeen, and white cotton. For these the Tchuktchi brought four or five hundred sea-horse teeth, a few bears' skins, rein-deer dresses, and white foxes' ; and these, with some frozen rein-

deer meat, make the whole productions of their own country. The other articles of fur come from a nation on the American continent, called the Kargauls ; two of whom were at the fair. They bear more nearly the features of the Tchuktchi than those of the hideous-mouthed inhabitants of the islands in Behring's Straits, although with a browner or more dirty colour. The furs brought and sent by them, consist of many thousands of black, brown, blue, red, and white foxes, martins, and martin parks, some beavers, river otters, bears, wolves, sea-dogs, and sea-horse skins ; a few articles of warm clothing, and some ornaments carved out of sea-horse teeth, representing the animals common among them.

The value of the exports on the spot, taking them at four hundred bags, or forty thousand pounds weight, of tobacco, at three roubles a pound, is one hundred and twenty thousand roubles ; to this add sixty thousand for the value of the other articles, and we shall make the exports amount to about one hundred and eighty thousand roubles, or seven thousand guineas. The value of those articles at Yakutsk, as purchased by the traders, is not *one-third*, leaving, after the deducting of carriage expenses, which are considerable, a clear profit of about one hundred, or one hundred and twenty per cent, and would be much more, but that so many people trade against each other, and that the traders are altogether too numerous. The market is overstocked with tobacco, not one-half being disposed of. The value of the imports may be known by reference to the tax, recollecting that the furs bear almost the same price at Yakutsk as at the Kolymsk, although distant nearly two thousand miles by land ;

the return of the horses, however, enables the merchants to go back cheap.

A bag of tobacco of one hundred pounds weight, worth three hundred roubles, and iron work of fifty or sixty roubles value, is exchanged for a martin park, worth ninety and one hundred roubles; fifteen red foxes, two hundred and fifty to three hundred roubles; and a pair of boots and park of rein-deer skin, worth about forty or fifty roubles: making altogether about four hundred roubles, which brings the exchange on the spot, as nearly as can be, equal, for the tax is not adhered to. Now, if one bag of tobacco produce four hundred, four hundred bags will be equal to one hundred and sixty thousand roubles, which constitute the imports, being the same value as at Yakutsk. The merchants have also the benefit of a great trade, on their journey along the rivers, with the Yakuti; and this is really the most advantageous branch of it, for they will extort even three and four hundred per cent.

The Tchuktchi parted with less than a third of their most valuable furs, taking the rest back. I inferred hence, that they have not the means of conveyance for more than four hundred bags of tobacco, and the other articles sold with these; otherwise, from their love of that article, and the demand for it by the American savages, they would no doubt purchase it for the small and valuable furs. Nor is this idea of mine rendered less weighty, when I inform my readers that so tenacious are the Tchuktchi of surcharging their rein-deer, and so great is their love of tobacco, that every male adult, on quitting the fair, carries upon his own back from forty to fifty pounds weight; until the consumption of provisions enables him fearlessly to put it up-

on the narte. Indeed, the demand for this commodity is so great, that at the Anadyrsk and Idgiginsk fairs the Russians do not give in barter with the Tchuktchi one-half of the quantity which is given at Kolymsk; and consequently the Anadyr Tchuktchi are prohibited by the rest of their nation from trading to the Kolymsk, for fear of spoiling the market.

There were this year at the fair, which is termed a good one, two hundred and fifty nartes, and five hundred rein-deer, with sixty-eight men, sixty women, and fifty-six children. Each rein-deer can draw three or four poods, or one hundred and fifty pounds weight. Those which come to the fair return only to the river Tchaon, where they are exchanged for those which belong to, and which had come from, the Bay of St Lawrence. Seventy-five and ninety days are required for them to perform the journey, which is about eight hundred versts, or five hundred miles.

There were three chiefs at the fair; first, Ye-brashka, who commands the tribes inhabiting the banks of the Tchaon, Packla, and Kvata rivers, as well as the country towards Shelatskoi Noss. Second, Valetka, chief of the Belo Morsky Tchuktchi, which tribe inhabits the eastern sea-coast, from Cape North to the Bay of Klasheui. Third, Kacharga, who commands the Tchukskoi Noss, or East Cape tribe, who inhabit the Noss, and the country from thence to the Bay of St Lawrence. The first are wanderers, and live by their rein-deer, which are employed for burden between the river Tchaon and the fair, and in the trade of sea-horse teeth. The second subsist almost entirely by fishing and hunting, added to a small tribute or toll of tobacco, which is paid by their southern

neighbours for a free passage along their coast ; they have no rein-deer. The third tribe subsist by traffic and the breeding of rein-deer, of which they have considerable herds, and are employed from the Bay of St Lawrence to the banks of the Tchaon. There is also a fourth chief, who commands the Tchuktchi of Anadyr Noss, a tribe who inhabit the country and banks of the Anadyr, and also subsist by traffic and the breeding of rein-deer. These chiefs live equally distant from each other, about one hundred and fifty or two hundred miles, and carry on a sort of intercourse by means of the eastern-coast Tchuktchi, who are provided with baidares.

The Tchukskoi Noss race are the most numerous ; those of the eastern coast the most warlike and hardy ; the Tchaon, or Shelatskoi, are the most friendly ; and those on the Anadyr Noss are the richest. The whole are nominally independent, but actually tributary ; for the yasack, though small, is enforced, and conscientiously paid. Their existence as an independent tribe hangs on the will of Russia, for that independence will at any time be sacrificed to retain their trade. Their whole number cannot exceed four or five thousand. The Kargoules are represented by them as far more numerous, but the Tchuktchi cannot count past a hundred, or ten tens, that is, their fingers ten times over. Each tribe has a different dialect of the same language, and all understand one another, though the dialects are extremely difficult to articulate ; so much so, that the interpreters, after the three days of the fair, are generally laid up with a sore throat.

In the conversation I had with the toions, or chiefs, (the same word is used in America, and in

the same sense,) I understood them to have no knowledge or tradition of any land north of theirs; that the sea is for ten months so frozen that nothing but mountains of ice are visible; and that during the months of August and September the ice breaks up, but not in such a manner as to admit a passage for vessels. They told me also that large herds of rein-deer roam from cape to cape, but do not come from the north beyond the sea. To the west of Shelatskoi Noss, termed by them Errie, (a word also of the same import as in America, signifying a great sea or lake,) they say there is a large and very deep bay, into which the Packla and Tchaon discharge their waters; and in this bay two islands, the one called Ayon, small and near the Noss, abounding in sea-horse teeth; the other, Illerie, large, and producing fine moss for the rein-deer. The latter has some few residents both in winter and summer; in the former season catching and killing wild rein-deer for the fair, in the latter, feeding the tame rein-deer. I was also told, that half-way across the south side of the bay there is a high mountain of rock, named since, by Baron Wrangel, Cape Matiushkin. That from their habitations on the Tchaon and Packla rivers to Shelatskoi Noss it is only *one* day's journey with rein-deer, a pair of which are represented by them as capable, upon an emergency, and in hard frosty weather, of drawing a sledge with one person fifty or sixty miles. Shelatskoi Noss does not, by their report, run far into the sea, but is elevated, and has a narrow passage between it and their country; in truth, an isthmus, which forms a small bay, without islands, to the east of the Noss. I was also made to understand that the coast, from the bay on the east of the Noss, trends a little to the right

of the rising sun. The Noss is formed by the Tchaon and Packla rivers on the west, and the Kvata and Ekakta on the east; and the Tchaon bay by Shelatskoi Noss and the island of Illerie; which latter will, of course, be understood as the island of Sabedei. The Pogitcha river is represented as not the same with the Anadyr, but a small yet rapid stream, which, from the east, enters the Tchaon. And, lastly, that the whole of their country is so mountainous, so barren, and so deep in snow, that laden rein-deer cannot come straight from the Bay of St Lawrence, but are obliged to coast along the valleys on the shore, until they reach the Packla, where their route changes from N.W. to S.W.

Fish is said to abound in the northern rivers on the eastern coast, as well as in the Bay of St Lawrence, which last is the only place where ships can anchor, and is formed by the Tchukskoi and Anadyrskoi Nosses. They have no knowledge nor tradition of any nation called the Shellages, but they recognise the word Kopai, as applicable to the name of a person in their language. They know nothing either of their origin or first settlement in the country, nor of the Tartar nations subject to Russia, nor do they understand any Tartar words. Their language bears no affinity to the Asiatic, though it is understood by the Koriaks. The features of the Tchuktchi, their manners and customs, pronounce them of American origin, of which the shaving of their heads, puncturing of their bodies, wearing large ear-rings, their independent and swaggering way of walking, their dress, and superstitious ideas, are also evident proofs; nor is it less than probable that the Esquimaux, and other tribes of Arctic Americans, may have

descended from them, for several words of their languages are alike, and their dress perfectly similar. That New Siberia has been inhabited, there is no doubt; many huts or yourtes still existing, and there are traditions in Siberia of tribes having been compelled, from persecution, the small-pox, as well as from disease, to quit their lands for those beyond the seas.

The persons of the Tchuktchi are not peculiarly large, though their dress, which is clean, but of enormous size, gives them almost a gigantic appearance. They have fair or clear skins, but ordinary though masculine features. In conduct they are wild and rude. They have no diseases, and live to a great age; two of the chiefs at the fair being past seventy, as calculated by the number of voyages they had made, ere they accompanied Captain Billings. I did not find them idolatrously fond of spirits, as they refused to change furs for that alone, although they would readily receive it, and in preference bargain with the donors. They appeared a bold, suspicious, and irascible people, and, though very avaricious, perfectly honest, and not inhospitable. They appear to trust to their nominal independence, by concealing their actual weakness, and magnifying their numerical strength. They *have* a respect for their chiefs, and do not live in that perfect state of equality which has been supposed, though they purposely affect that equality in the presence of the Russians; when the most common of their nation will enter a Russian dwelling, behave rude and churlish, keep his cap on, take what he wants without asking, and ultimately quit without the slightest thanks, acknowledgment, or appearance of feeling. The chiefs, on the contrary, are extremely correct in all that concerns their conduct with the Rus-

sians ; sitting with their caps off, asking for what they want, and making themselves by no means unacceptable guests.

The whole of them are ingenious, cunning, industrious, and excellent mechanics, which is proved by the symmetry, neatness, and quantity of their nartes, clothes, tents, arms, and ornaments. They have no religion, but a sort of regard to some sorcerers or people held by them in veneration. They are allowed to retain five wives, whom they may put to death upon discovery of any criminal intercourse ; holding also the power of compelling them to such criminal intercourse,—an act by no means unfrequent, when the husband is in want of an heir or son.

Upon the whole, the Tchuktchi appear to be approaching to Russian subjection ; and I am confident they would never object to a traveller or travellers exploring their inhospitable country, provided they received a remuneration ; and nothing prevented my being able to accompany them, save their avarice and my poverty. I felt, however, happy in establishing the fact of being permitted to go on some terms, because it will enable the Russian government to take the first opportunity of exploring their country. Yet I would advise such as are employed to be particular in their conduct ; they will have to do with a people jealous and suspicious, but who, although cautious in giving their word, are truly faithful in keeping it. He who shall feel inclined to accompany such a savage race through their inhospitable and uninteresting country, must doubtless be prepared to undergo very great fatigues and privations ; he should be inured to cold, as he will doubtless have to walk the whole distance, but on no day exceeding four or five miles.

He should also be tall, stout, and strong, for such, and such only, the Tchuktchi both fear, obey, and respect.

The manner of dressing their food is by boiling, when wood can be procured, which, however, is not frequently the case during the winter season. They then generally consume frozen meat or fish, which, with them, as with the others in rein-deer countries, is considered a necessary and extravagant luxury; warm and raw marrow is also their greatest delicacy. The flavour of their meat is most exquisite, free from that soft and flabby taste common to rein-deer and veal, with a flavour somewhat between beef and mutton, more tender than the one, and less so than the other. They drink tea, and are exceedingly fond of sugar. Tobacco is their great commodity, which they eat, chew, smoke, and snuff at the same time. I have seen boys and girls of nine or ten years of age, put a large leaf of tobacco into their mouths, without permitting any saliva to escape; nor will they put aside the tobacco should meat be offered to them, but continue consuming both together. They are said, no doubt correctly, to drink only snow water during the winter; to melt which, when no wood is to be had, very disgusting and dirty means are resorted to. Nothing is so acceptable to a rein-deer as human urine, and I have seen them even run to get it as occasion offered.

In closing the account of this strange people, I may mention two remarkable circumstances: a kettle or cooking utensil is in their language called cookie, but whether the word proceeds, as I conjecture, from the remembrance of the name of Captain Cook, who first supplied them with that utensil, or from the English word denoting the use it is ap-

plied to, I admit to be a question. To these vessels, which are of iron, they are much attached, and the stronger and stouter they are, the better; nor will any consideration induce them to take or purchase a copper vessel, although lined with tin, as they consider it poisonous. Plain raw iron are preferred, and these they will fearlessly, and with impunity, handle in a temperature of forty degrees of frost by Reaumur. The other circumstance to which I allude, is the occasional migration of large armies of mice, either from, or to, this continent and America. Of the annual movements of these small but numerous animals in the peninsula of Kamtchatka, I have little doubt; and contrasting or weighing that knowledge, with the circumstance that most of the clothing of the Tchuktchi is embroidered with the skins of mice, I consider the assertion of their annual migration as perfectly warranted.

My return to the Kolyma occupied me only two days, partly from lightness of carriage, and partly from the hunger of the dogs, there being little or none of their common food offering for sale on the banks of the Aniu. I was most happy to meet with the Baron Wrangel, who had returned from his expedition round Shelatskoi Noss. I received from him the following account. He was absent a month upon the whole, and followed the course laid down in the chart of reference at the end of the second volume, which proves that the information I had derived from the Tchuktchi was perfectly correct; as well as the contents of my memorial to the Royal Society, which the baron had previously read. A bay exists to the east of Shelatskoi Noss, which is in about $70^{\circ} 5'$ latitude; the longitude about 175° E., or 6° east of Baranov Kamene; which is exactly half way between Cape North and Baranov Kamene.

Tchaon Bay, with its two islands, and the dwellings between the island of Illere, or Sabedei of Shalouoff, and the main-land, were also recognised by the baron. They were doubtless inhabited, as the expedition was in their tracks for three days. The run of the coast from the Kolyma to Shelatskoi Noss, is about E.N.E. and that from the Noss to the east, very easterly from Cape Kuzmin.

No doubt whatever can now be entertained of Deshneff having gone round the N.E. cape, no other impediment but ice appearing to exist; as little, or less, need there be, of Shalouoff's having reached it, he having actually described the formation of Tchaon Bay, although he placed it too far to the northward, as he did also Shelatskoi Noss; while in fact the theory of Mr Coxe respecting this country is perfectly correct. Baron Wrangel and Cook may be said to have seen across the intervening space which has not actually been traversed by Europeans. I will, however, leave this scientific argument to the merits of the appendix, and change it for an introduction of some extracts from Baron Wrangel's letter to me, after his first journey across the Frozen Sea, and the track of which will appear upon the chart annexed. The baron observes, that, although I should otherwise hear all particulars about the expedition to the north from the Kolyma, still he feels disposed to give me some information on the subject. "I have," he continues, "used your suggestion with some alterations, and what has been done during the last voyage, is certainly done by this invention of yours; used in such a manner as I used it, it proved to be très-risquant. It was indeed a very happy accident, that the white bears, having *circumnavigated* the ice mountain, on the top of which I had made the storehouse, several

times, did not attempt to ascend it, as they, the bears, would have had no difficulty in destroying such fortifications, although I before thought to the contrary, especially as the dog-master said, that none of the dreadful white-bear regiment had either force or ability to rob us either of our own or the dogs' provisions, out of its strong concealment. Nevertheless I have seen, during the late voyage, such tricks of these white bears, that *the precautions I took* for the preservation of our provisions, I call a *happy accident*. Should I make the same voyage the next spring, I will take no *fire-wood* at all, but take wood prepared to build a stronger cellar within the ice, and dry moss, with fish oil, shall serve to boil the tea-kettle; a circumstance which will much relieve the dogs as to the point of weight, as well as serve us upon our return in respect of fire-wood."

Although I cannot but do justice to the baron's general and scientific knowledge, I confess I do not know precisely what he means by the term *happy accident*. The idea I suggested was to prevent an accident, and I suppose, therefore, the baron meant that it was a happy circumstance that the bears did not ascend the mountain, as in that case the precautions taken would have been useless. To enable the baron to go farther, with more ease to the dogs, two days' provisions for the homeward voyage were to be buried at every third day's outward voyage; the plan of securing such provisions of course, must be left entirely to the ingenuity of the party travelling, as well as to the means presented by the situation of the ice. But I think, with half-a-dozen people, I could secure provisions in such a manner as, not indeed to elude the sagacity of the bears, but to prove the inefficacy of their

strength when put in competition with the sagacity of man.

The baron next proceeds to point out the rather dangerous situation in which he was latterly placed, the last nine days of his journey being over a field of ice, in general but half a foot thick, although only in the latter part of April. During many parts of this journey, they came to open channels, five and seven feet wide, and each night brought with it strong north and north-west winds, which made the ice tremble beneath their cold pillows. At times, sounds like the roar of thunder would assail their ears, yet prove only to be the shattering of ice-hills, and the severing of the fields of ice. At one period, the baron and his friend, Mr Matiushkin, were gone in quest of a white bear to feed the dogs which had suffered much, when the ice broke under their feet with such a noise that Mr M. actually called out, "What will now become of us?" when the baron was so convinced of its being thunder, that he looked to the south, in expectation of seeing the lightning that must precede the second peal. The Cossacks, however, pointed out that the ice was breaking, which induced him to make the best of his way towards the close ice, then distant three or four miles. The dog-master and Cossacks expressed much regret at continuing the direct course, but, *fortunately*, they arrived safe, and reached the Kolyma in the beginning of May. I have used the term *fortunate*, as the subsequent spring and summer, or rather the continuation of winter, proved the most extraordinary ever known at the Kolyma; a severity attending them which might have permitted the commander of the expedition to risk much more in point of time than Baron Wrangel then thought

prudent. In one of the following seasons he was actually cast away so early as the month of March; which period, so far from being entertained or considered as a dangerous one, is usually that allotted to the commencement of a journey over the ice. In these high latitudes there is no actual criterion how to judge of the seasons.

The ice in the year 1821 did not break up until the 29th May O. S. The coldness of the summer was most extraordinary. On the 20th June, 2d July, and 3d August, there was much snow, *and one degree and a half of cold of REAUMUR*, without intermission, accompanied with constant N. W. gales. The month of May, although so cold, was the only agreeable weather during spring or summer; and the appearances of a bad season were very distressing. Neither the small rivers running into the Kolyma, nor the Kolyma itself, had, on the 15th of August, produced any fish, in consequence of the height of the waters. The only hope of the poor inhabitants, and of the expedition, rested on the interval betwixt the time of the river freezing and the month of December. On the 13th of August, the baron received information that the rein-deer chase on the Aniu and Omelon had entirely failed, and that the Yukagiri were in a state of starvation. The 22d of August it snowed hard, and continued to snow till the 25th, when the lakes were all frozen over. On the 30th August Baron Wrangel was frozen up in a boat in the Kolyma, and hoary winter was dated from that period, as the river thence became passable for dogs and nartes. I shall here conclude my observations respecting this indefatigable young officer, by saying, that for a combination of personal exertion and sacrifice, with the most undoubted scientific know-

ledge, especially that of practical and theoretical astronomy, so necessary to conduct an expedition of this nature, I believe Baron Wrangel has no equal in the Russian navy. Nor will the opinion I have thus candidly given, in the first edition of my work, have the less weight with the thinking part of the community, when I acquaint them with the hazardous, nay perilous, but fortunate result of his last enterprising attempt, in which he, by a HAPPY ACCIDENT, was enabled to trace the Asiatic coast from Shelatskoi Noss to Serdze Kamene. The account of it will also be found in the Appendix.

CHAPTER VIII.

Departure from the Kolyma—Lapteff—Sredne Kolymsk—Kosatchey Ostrog—Verchne Kolymsk—The Zyzanka—Hokusolbetie and Bochiera—Boulouktak—Kourouack—Terachtack, &c.—Kourdak—Andigezan—Intack—Omekon—Nera—Indigirka, Rivers—The Tongousi Tribe—The Koudousou and Kounounaksala Rivers—The Okota—Okotsk.

WINTER was still raging with all its severity, when I prepared to quit the Kolyma. I could now, indeed, have no inducement to remain longer; my desire of penetrating through the country of the Tchuktchi no longer existed, but for the purpose of getting across to the opposite continent: and as I had failed, through the avarice of the savages, I determined to proceed to Okotsk, by the direct route, in spite of the remonstrances of the commissary, Cossacks, and Yakuti, who were ordered to attend me wherever I might go. The proper mode was by that I had previously come; but I wished of course to avoid near two thousand miles of such sameness, independent of my desire to reach Okotsk by the first of June. The Yakuti were so fearful of a route of the kind, that they even attempted to bribe me with presents to take another; but I was resolutely fixed upon the new route, and the result will show that I had only myself to thank for the difficulties I encountered,

and the narrow escapes I had so often for my life. To me, however, the hardest day's work was followed by the happiest evening, and the soundest sleep as I lay down on my snow pillow.

With grateful recollections of the hospitality and kind treatment I had experienced from every individual in the commissariat of Kolyma, I departed on the 27th of March in a narte royal, that is, one drawn by thirteen dogs, who took me eighty miles in one day; a prodigious day's journey, as it is considered in this part of the world, for the same dogs to perform. The 1st of May is, however, the period usually calculated on for the Omekon and other rivers breaking up, and I was a long distance from them; I was therefore compelled to hasten, to prevent a detention on the banks of them for six weeks or more. I could not but feel melancholy and sick at heart at parting as it were from a brother, in the person of Baron Wrangel. However, I pushed forward, and in three days reached Lapteff, one hundred and eighty miles from Nishney Kolymsk. The weather was most variable; in the early part of the morning we had 15° of frost, at noon as many of heat, from the reflection of the sun, and in the evening again 10° of frost. The mornings, before the sun appeared, were the coldest I ever endured, being really more severe than 40° of frost, owing to the heavy fogs which prevail in the latter end of March and beginning of April, and which strike an indescribable cold to the whole frame.

At Lapteff I met my old friend, the venerable prince of ninety-one. He had just returned from a visit to another prince, twenty miles distant, and insisted upon accompanying me the following morning; and such was his health and capability

to bear the piercing morning air, that while I was compelled to walk, as it seemed, to save my life, the old Yakut prince was quietly walking his horse to a sort of humming tune, which may be said to constitute a Yakut's song. There is no regular meaning in what they sing, being made up of any incidental allusions to the weather, trees, rivers, fatigues, horses, and the like, according to the immediate impulse of the moment.

From Lapteff I continued my route to Sredne Kolymsk, where I arrived on the fifth day at noon, much fatigued. I was exceedingly gratified with the repetition of old kindnesses and remembrances on the part of the inhabitants as I came along. They were cheerfully looking forward to an early summer, in which, alas ! they were bitterly disappointed. They were constantly presenting me with the first partridges and hares, which the approaching sun had sent in advance ; and even other early delicacies were given me in aid of the long journey I had before me.

The day that I reached Sredne Kolymsk I started a large grey wolf, and, being on horseback, was nearly thrown into the snow, as I had repeatedly been before. A burnt child is said to dread the fire, so a bit horse dreads a wolf ; the one I rode had so suffered. The only pleasure I experienced in Sredne Kolymsk was being housed in the comfortable abode of my old attendant, Peter Trechekoff, who was, in the absence of the commissary, chief of the department. I renewed the protestations of my fidelity and good-will towards a person I felt so highly indebted to ; and the certificate which I gave him of his extraordinary good conduct and kindness towards me, was, I am happy to say, the occasion of his being made a serjeant ;

beyond which, though he does not at present aspire, he will necessarily attain, as any under officer, whose conduct is good in that rank for a certain number of years, may demand the rank of an officer as a recompense. Surely this is a regulation well worthy of imitation in every country. What can be a greater incentive to good conduct, in any department under a government, than the fact of knowing that both a pecuniary and honorary reward attends the exertions of every individual? Patience, Cossack, and you will be the Hetman! is an encouraging Russian proverb.

I remained with my old friend a couple of days, awaiting a fresh Cossack, who was ordered to attend me to Okotsk. I felt most happy in preparing once more to tread a new road, and throw aside the difficulties which were for ever thundered in my ears. The poor young love-sick Cossack destined to attend me I could not but pity; he had a positive fear of going to Okotsk, so far from his wife, a pretty young girl, and then again to Yakutsk, where he would be detained five or six months, and thus be kept from his home at least a twelvemonth. These, indeed, were no small complaints. Leaving his home at that time had this additional consequence, that his presence was then most wanted to assist in fishing. The case was not, however, so bad as my readers may imagine; for when a Cossack is absent from his home upon the public service, his family still receive the proportion of fish which would have accrued to him had he been present; on such friendly terms do the people live in this part of the world. And upon my promising him that he should return direct to the Kolyma, he was reconciled, and we prepared to depart. Nor was my promise rendered of

none effect by Vladimir Ushinsky, the chief of Okotsk ; on the contrary, more than I had promised, unminister like, was done for the benefit of this otherwise almost useless Cossack, whose sickness at heart had several times nearly proved his and my ruin.

Our first day's journey was to a place called Kasachey, sixty miles, by a good path, on the Kolyma, abounding with summer establishments for fishing, else a dreary low waste, producing nothing but stunted wood. I felt really happy in the evening in the comfortable residence of a rich Yakut, who had married a Cossack's daughter. She was dreadfully afflicted with the hiccoughs, and I again tried my *medical skill*, by giving her a slap on the back. It had no effect ; and her husband then told me that she had the dieavel ootra, or the devil in her belly. It was apparent there was something in the case ; but whether a devil or a child I do not pretend to know. Whatever it was, it effectually deprived me of sleep. The malady continued the whole night ; though it seems the parties afflicted with it can, during the fit, sleep soundly ; but on the instance I have this day seen of its effects upon a lovely young woman I will not dwell, for it is too melancholy.

The following day, over numerous large lakes and a rich pasture country, I resumed my journey. Many Yakuti live in the environs, employed in fishing, and in the chase of bears, rein-deer, sables, and squirrels ; the latter are here innumerable. In the afternoon we were thrown into a snow pit ; the fall and plunging of our horses threw us off our saddles ; and the horses, finding themselves disengaged from their burdens, scrambled up the pit, and left us and our baggage to shift as we

could. After ten miles walk we reached a yourte, whose owner saddled his own beasts, and sent them for the baggage; while our own Yakuti went in search of their own horses. I was, meantime, made perfectly comfortable, and amused myself with the tricks of a shamane, or sorcerer, some of which were indeed strange enough. He wore a sort of short surtout, covered over with a variety of small pieces of iron, about the size and shape of the pointed blade of a penknife; his boots were embroidered, as were also his cap and gloves. The performance of course began by smoking a pipe; then taking his tambourine and bolouyak, or tambourine-stick, he seated himself cross-legged near the person to be exorcised, and began to sing a doleful ditty, accompanied by more doleful music; the import of the song I could not gather. After this introduction he began to jump, hop, and fling about, roaring, screaming, and making the most hideous distortions of face and body, so that I actually believed him to be mad. I never felt more pain for any one than I felt for this shamane, certainly much more than for the sick person on whose behalf his incantations were made. After this violent exercise he drew his knife, and, to all appearance, plunged it into his belly. I really felt alarmed, believing that he had actually committed suicide; he, however, drew back the knife in my presence, without any effusion of blood, and, indeed, without any actual incision being made. He then formally announced that the evil spirit would not triumph, provided the customary sacrifice was made of a fat mare. The party was then dismissed, with an invitation to come to the next day's feast, when the mare was to be cooked. In all this conjuration there was indeed no slight of hand, but rather a

slight of the belly; and the case is, that the shamanees are, from habit, accustomed to draw in that part of the belly which the knife is supposed to penetrate, to a distance of five or six inches; they never, however, use other than their own knives, from fear, I presume, of their being too long. The power of these impostors over the ignorant multitude is very great, but they do not wander far from their principality, nor are they numerous. Their pretensions extend to the cure of diseases, changing the weather, affording successful chase, and finding stolen things.

In the early part of the evening, a ludicrous circumstance occurred betwixt the above shamane and myself. I had invited him to take tea with me; and when he came, I put a little tobacco in the palm of my Cossack's hand to give to the shamane. The Cossack, however, carelessly or ignorantly, put it into the tea-kettle, supposing it to be tea, and the mistake was not known until the kettle was brought boiling hot, and, pouring it out, we discovered by the flavour that it was tobacco-water. The shamane was highly indignant and enraged, the people of the house still more so, and the sick person must die, unless a second sacrifice was made. This I was extremely anxious to avoid; and the only remedy I had was to part with half of the spirits I possessed, which, although a loss of consequence to me, I readily endured, to prevent the impostor from procuring a second gormandizing feast at the expense, if not the ruin, of the poor people. As it was, the shamane got roaring drunk on the result of the mistake, and so I left him.

The horses did not return with the baggage till near midnight, when one bag of my clothing was missing, as well as my pipe: the last, a serious

loss, as it was my friend, companion, comforter, and almost sole enjoyment. I could have mourned for it, like Sancho after his Dapple; but it was fruitless, and I accordingly wished the possessor the enjoyment of it for my sake. Next day, over a stubby heath, affording a fine view of the mountains to the south-east, we gained sixty miles. I observed on the lakes numerous parties fishing through the ice, who gave me a supply whenever I desired it. On the fourth day I reached Verchne Kolymsk late in the evening, suffering much from the loss of skin, which left my nose and lips bare. The whole distance was two hundred and fifty miles.

Verchne Kolymsk is considered a *large* village, having fifteen dwellings, with near two hundred inhabitants. It stands in a most bleak and exposed situation, on the right bank of the Yasashna, at about a mile from its junction with the Kolyma. It was at this place that the vessels for Captain Billings's expedition were built, the country to the southward abounding in fine timber; and yet it is considered, although only so far north as the latitude $60^{\circ} 30'$, to be one of the coldest places in Eastern Siberia, the thermometer falling as low as 43° of Reaumur. Verchne Kolymsk has nothing remarkable to boast of but a large cross erected by Billings, on which are cut out the names of the European people who composed his expedition—an expedition which performed nothing. I remained one day to change my Cossack, preferring rather to beat up for a volunteer than to take on the old one, but to no purpose. Whether from fear of me or the journey it is unnecessary to inquire, but the old one must go!

My route from the Kolyma was towards the

Koussoul Bolouktak, a lake so named from a fish which inhabits it. The first part of the journey was attended with a little snow, but I felt consoled by the number of pigeons and hares which increased our sea stores, for thus I may name them, since I had really more to do with water than with land. At length I reached the Zyzanka, and, at twenty miles farther, the last habitation of the Kolyma district. We halted on a rocky hill, and encountered some difficulty in bringing fire-wood for the night, from a distance of at least half a mile. The second day, with infinite labour, through deep and soft snow, we reached twenty miles farther, encamping at the foot of the mountains which I had before seen stretching from the south-east. The guide who, though a Yakut, spoke Russian well, proved a choice and jovial fellow; while the Cossack, a dull and melancholy milk-sop, was throwing every possible obstacle in my way, to induce me to take the other road, or return. This, it appears from letters which I have since received, he was directed to do by a person holding an official situation; an act which, if known at the government of Yakutsk, Irkutsk, or St Petersburg, would, I am sure, have been visited with severe punishment; but commissaries in such places are generally both mean and worthless. Still along the banks of the Zyzanka we continued to the south-west, picking up at intervals partridges and hares which had fallen in the traps. The scenery at times somewhat interesting, and the hills composed of slate.

The road I was now upon was that formerly used by the post from Yakutsk to the river Kolyma, that is, by way of Okotsk, but discontinued in consequence of the difficulties which constantly

presented themselves, as well as by the discovery of the direct route I had before undertaken, and of which I have given a sketch. By this route a man can never be satisfied, as when there is much snow, there is more labour; and when little snow, much water; and when no snow, much ice and more danger, for the ice then becomes so slippery as to be almost impassable.

The reflection of the sun at first produced severe effects upon my eyes; but I met it with a good grace, as neither sun nor snow would give way to me. From the Zyzanka I entered a narrow defile formed by two lofty ranges of mountains, the valley betwixt which runs from east to west; the latter was my course. The southern range was bold and perpendicular, and consequently of bare rock. The northern branch, which was open to the south, rose into gentle and luxuriant eminences, affording a fine contrast to the desolation on the left. Our party continued to feed upon partridges and hares from the charity traps. The birds are beguiled by touching a small wooden fork, supporting a log or tree, which falls direct on the animal and causes instant death. These traps are so numerous, that I have in a day got three and four braces of hares and partridges. They are set by the wandering Yakuti and Tongousi, open to all the world, with an understanding only that the trap shall be again set—no hard condition to hungry people.

We at length entered upon the Hokusolbetie and Bochiera, two rivers, which, entering the Zyzanka at a narrow defile, form a sort of frozen torrent, over which the horses had great difficulty to pass, as piles of ice lay in every cross direction. The Cossack and guide now began also to suffer,

while I was gaining ground from habit and superior strength of constitution. The guide was almost blind, while the Cossack was afflicted with a severe diarrhoea arising from want of food, for our game had failed us, and he was too much a Greek to eat horse-meat. It was, however, his own fault, for he always ate voraciously whenever an occasion offered. With these two invalids I resumed the journey, prescribing for them, but without effect, and at noon was obliged again to halt, as they were unable to proceed. The heat of the sun by Fahrenheit was 80°, and the route was bad, ascending a perilous and laborious chain of elevated hills. The work which now devolved upon me was so much more than ordinary, that I could not but feel it severely; it was, however, my duty to assist those whom I had demanded to assist me, and I could make no complaint.

The snow was deep but soft; the noon-day heat melting the surface, and the night's frost again freezing it, just sufficiently to bear a man with snow shoes; so that, in addition to our other difficulties, the horses began to fail. We nevertheless continued our route, gaining the Zyzanka, and latterly crossing the mountains which confine it. We then entered the most dismal, dreary, and inhospitable valley I have ever seen; not a blade of grass, nor moss, not a shrub, tree, nor even a morsel of drift-wood, to be seen, but one tremendous slate mountain valley. We encamped on the banks of the stream, faring upon our frozen horse-flesh and a little biscuit; our stock of spirits was all consumed, and I longed to reach some habitation. My poor Cossack now grew worse, having been three days without food, and so weak, that it was necessary to lash him to the horse. The

guide was almost blind, being unable even to bring the horses in from the pasture. I was thus compelled to perform the functions of ostler, wood-cutter, guide, doctor, cook, and traveller; regretting only the necessity that compelled me so to act, for otherwise I took so little heed of it, that I slept the sounder.

Leaving this desolate valley, our route lay over a few rugged hills, by a path which seemed to point itself out as the proper route. We soon entered upon the river Koulgall, and the romantic valley of Boulouktak, named from the lake, stream, and fish produced from it, the second of which enters the narrow defile in the elevated southern ranges. The prospect is most beautiful; tolerable sized wood occupies the fore-ground, with a small hill, which I ascended, to obtain a better view of the magnificent panorama. To describe it would require a far more able pen or pencil than mine. The southern range appeared much indented, and seemed to cast a shade over their otherwise milky appearance. Two yourtes on the borders of a lake were on the left, while, from the right, the river winded over the plain. The whole view occupied from south-west to east, and from west to north-east, so that the valley runs from east-north-east to west-south-west. The breadth of it is about twenty miles. I remained at a miserable yourte five days, to see what I could do in restoring the Cossack, but in vain, and departed with a Yakut, six feet high, and stout in proportion, the largest I have ever seen. He was, however, a mere brute, not knowing a word of the Russian language, a great glutton, stupid, obstinate, and immovably lazy.

It was with great reluctance I commenced the

road with him, but there was no alternative, he being the only person who knew any thing of the route towards the Omekon. At about fifteen miles, having passed three small lakes, we reached the base of the southern range of hills. We ascended them against wind and snow, and night closed in upon us as we had reached thirty miles, in the bosom of the mountains. It was impossible to keep in a fire from the driving of the snow; I therefore managed as well as I could, while my half-savage gigantic companion comforted himself with at least twenty pounds of frozen horse-meat.

Next day I crossed with my companion the Kourouack mountains, at the base of which runs the little rapid river of this name, which we passed with difficulty, as it was giving way very fast to the warmth of the sun, the thermometer standing at 27° of Reaumur. The mountains now exhibit a constant and uniform succession of equilateral triangles, or pyramids, of stone slate, with layers of the same yellow earth, called stone-butter, which I have before noticed as being eaten by the aborigines. The next river was the Terachtack and Outachan-Taroun Oract, or large icy river, as it signifies in the Yakut dialect. Our route proved difficult, now over overflowed meadows and large rivers, or elevated mountains, well-wooded with larches, alder, and some pine. On the fifth day we ascended a stupendous path, which overlooks not only the surrounding country but also the other mountains; it is almost a bare rock, and was so slippery that the horses got very severe falls in the ascent, rolling back in one moment as much as it had taken ten minutes labour to achieve. I almost despaired of gaining the summit, but we at length succeeded, and then the horses actually slid down the opposite

precipice of one hundred feet high, the rock being covered with frozen snow. For myself I considered it, as it really was, an ice mountain, and, desiring the guide to follow, passed down without any accident. I was now indeed in a desperate dilemma ; but Providence, which ever watches the wants of all creatures, sent to my assistance the sick Cossack, who, having got better, and being without baggage, had followed our track with a couple of horses. He came in time also to tell us that we had mistaken the route. His duty pointing out the necessity of seeing me safe to Okotsk, I did not feel so thankful as I else should, because I suspected that most of his illness was pretended, and that conscience had told him he was acting wrong, or he might not have returned, having already received permission from me to proceed to the Kolyma.

We passed the night in a dreary situation, without any fire. My tea and bread were both consumed ; nothing in short remained but horse-flesh, which I found very good. The Cossack had brought a few birds, but as I knew that such dainties were all he could, or would, eat, of course I gave them up to him. Next day we considered how to ascend the mountain ; the snow was solid and slippery, and there appeared no other mode than the one which we adopted—creeping up the side, and chopping the surface with a hatchet, at frequent intervals, to obtain some sort of footing. In this manner I and the Cossack ascended, and making all the leather thongs fast together, we hauled up the baggage and let it down on the opposite side ; thus placing ourselves between it and the horses. To get up the latter required more management ; for, accustomed as the horses are to

the most laborious and dangerous journeys, and with all their sagacity and tameness, I found they could not ascend above half the mountain, the fatigue was too great; in short they were compelled to give it up, and recoil once more to the base in a state of perfect agony. Thus passed the day! Our situation now seemed desperate; the horses had received no food for two days, with more than ordinary hard work, during which we had enjoyed no fire; yet still "neboice avoce lebo" (fear not—perhaps) were the rallying words, and these alone served us for supper. Our monster of a guide was quite insensible to our situation, and sat grumbling that he had not more than twenty pounds of meat a-day, with such hard work.

This night was passed even more miserably than the last, as we had not even the benefit of our bedding or clothing, both of which had been hurled down the opposite valley, without respect to whom they belonged. We rose, the third morning, prepared for hard work; and our first attempt was to haul the horses up the precipice. We in part succeeded, as the strongest were actually received, and cast adrift on the opposite side to feed. This occupied us all day, and the third night was passed with the cheering hopes of resuming our journey the following day; but these were frustrated, as it was not until late in the evening that we succeeded in passing all the horses we designed to keep; one we were obliged to kill and carry with us as food. Our bully-headed Yakut too became wonderfully alert on this occasion, knowing he should receive an extra allowance of meat, were it for no other reason than to lighten the other brutes. I, however, determined to make some reserve, and accordingly taking a quantity of the slaughtered animal, suffi-

cient to serve the Yakut on his return, I buried it in the snow, which I thought would continue unmelted for ten or twelve days, and marked the place with a cross. This precaution I considered was more than ordinarily necessary with my gigantic companion, who had infinitely less concern towards the prevention of future starvation, than to the support of present gluttony.

The only mode of passing the last three horses was by making a regular staircase up the hill, by means of axes, and strewing it with earth; myself and the Cossack, who were on the hill, holding a rope attached to the horse's head, while the guide behind, whose task it was to flog the beast, had no sinecure, as, from his immoderate size, he was almost himself incapable of moving. The result of the last five days was that we had lost five days' travelling, five days of the best season, and five days which were worth fifty of those which followed; the fault was not mine! The weather was still very cold, and I felt some relief in getting close to a cheerful fire. Next day I directed my course by a compass, for the guide knew nothing, about west-south-west, intending, if possible, to gain the river Indigirka. We crossed many hills, deep in snow, and left two horses dead, a circumstance which seemed to please the guide, whom I was consequently obliged to declare under martial law; being confident that he cared not if I and the Cossack perished. I was now compelled to put the little baggage we had left upon the spare horses, and we all continued the journey on foot, encamping for the night on the banks of the Kourdak, which we traversed the next day with tolerable ease, being clear of snow, with a fresh breeze right-aft. In the evening it turned to rain, the first real shower

since September, as we halted on the banks of the same stream, having walked about fifteen miles. We passed the night in a sort of growling way, and renewed our journey towards the Terachtack over a pleasant, pasture, and well-wooded country.

All the rivers which I had lately passed run into the Indigirka, and, although small, are rapid streams. My guide was now so negligent and useless, that I was compelled to desire the Cossack to flog him with his own whip, in a manner which, in England, would justly have been considered severe; but I am satisfied the necessity and danger of our situation justified the measure, for the fellow was really deceiving us, to say nothing of the risk, which was very great, unprovided as we were with nets or fire-arms. Leaving another horse to abide his fate, we continued on, dividing the extra baggage between us. We crossed the Ambardach and Chousgindrach, adding another walk to the fatigue we had undergone; and, being still eighty miles from the nearest habitation, we rested at a rich pasture two days for the sake of the horses, and on the third reached the rivers Andigizan, Intach, and Omekon. The country had now become gradually very agreeable and open, and the weather was very fine. Great quantities of game, as geese, ducks, partridges, and woodcocks, hovered over our heads, and we saw numerous traces of quadrupeds; as bears, wolves, foxes, rein-deer, and hares, with sometimes that of an elk. The last day of this journey, through an extra effort, induced by the hope of success, we reached the first habitation of the Omekon district; walking and swimming that day near thirty miles: I say swimming, for we were frequently obliged to wade across the rivers, and to swim over many yards of rapid

stream, which I accomplished for myself by means of a rope fastened to a horse's neck. I reached, all well, the Bolouvanach, and then the more considerable Nera, all rivers which unite with the Indigirka. I was received at a yourte, the most pleasant and hospitable, as I then thought, I had ever seen, where I procured two fresh horses to carry the baggage, and continued the route on foot, leading all the other horses, now reduced to five.

My overgrown guide was of course discharged. I could not even remain a moment to refresh, as the rivers were breaking up, and threatening to insulate me for some months from the rest of the world. The Omekon river was still distant one hundred and fifty miles, and I had scanty means of reaching it under four days, even supposing assistance given; but I pressed on, gratified to catch now and then in the distant horizon the sight of smoke, which I had not seen during the last journey of more than three hundred miles. Not one individual, stationary or wandering, had I met from the lake Boulouktak; but now we were, as may be termed, risen from the dead, renewed with fresh courage, and my Cossack particularly inspirited with a regale of beef which had been given him at the first yourte. For myself, I preferred to partake of the old horse-meat I had still left; having a mind to shame the Cossack, and show him that he ought to eat any thing when necessity dictated. I had passed twelve days without any other food than the horse-meat we had brought, generally eaten in a raw state, and a small part of the animal we had killed; yet I was never in better health. In this state I reached the hospitable abode of the Prince Nicolai. Our journey had lain on the rivers Nera and Indigirka, the country sterile and dreary,

and as desolate as Zashiversk, lower down the latter river. The second day I again halted at the abode of a Yakut knez (prince), who presented me with half a rein-deer, and treated me with milk and tea, making me, as I thought, the happiest of men : such is the effect produced by present comforts and enjoyments upon past hardships.

Independent of the provisions given to me, I was obliged to receive two red foxes, as a tribute. They were presented to me by the hands of a tolerably good-looking Yakut girl, whose father, with two other princes, formed a part of my train to the abode of the prince of the Omekon, where we arrived the following day ; and I cannot help asserting, that I never saw a race of people more worthy of this honorary distinction ; *they* certainly combined in their own breasts humanity, justice, and *common* sense.

The latter part of the journey changed for the better ; from rugged and sterile hills and marshy swamps, to beautiful rising and well-wooded eminences and fertile meadow lands ; from perfect desolation to comparative populousness. The first sight of so many smoking chimneys gladdened my heart in an unusual degree. I felt the value of life, and never enjoyed it more than in the hospitable yourte of Peter Gotossop, the Yakut prince of the Omekon. He had come thirty miles, in consequence of an express, to meet me. I need not say how much I enjoyed a bed of rein-deer skins in his yourte, after lodging fifteen days, without intermission, in the snow ; at times actually immersed in water, which proceeded either from the melting of the snow, the fall of the dew, or the warmth of our own bodies upon a half-frozen surface of snow.

The valley of Omekon is indeed a romantic and

fertile spot. About five hundred individuals are reckoned within its principality, who are scattered about, wandering with the numerous droves of cattle, as the season and height of the river will permit or compel. The woods are very fine and large, consisting of birch, pine, larch, and cedar, the last producing a highly flavoured, though small, nut, which is exported to Okotsk and Kamtchatka.

The quantity of cattle in the valley is prodigious, no less than three thousand mares, and near two thousand cows, the property of the few rich Yakuti. The consumption of them is, however, not small, especially of horses, owing to the great demand made by the government, in forced levies, for Okotsk and the more northern districts. But so fond are the Yakuti of their horses, that, to avoid selling them, and sending them upon such a service, they drive a couple of young bullocks, as an exchange for a horse, to the first place, or will present another person with a young bullock for each horse that is supplied him to carry on the extra service. The duty thus performed by them is undertaken purely for gluttony. The substitute instantly makes a feast of the young bullock, and trusts to the strength of his horse to make good the duty imposed upon it; yet, strange to say, it is seldom that a respectable Yakut will either ride himself, or suffer others to ride, much less will he load, a good horse; indeed, they are kept rather for show, or for breed, than for use; thus the duty falls upon the poor ones. In the event of a horse falling on the road, the Yakut is of course obliged to buy or get another as he can. Sometimes he will exchange in time, by giving three for two, and five for two, according to the state they are in: generally, however, he will kill them, and employ other

people to perform the latter part of the journey, giving or promising a dead horse or two in payment, and himself returning on foot.

I remained three days at the Omekon, and was again obliged to leave my Cossack, from ill health and fatigue. Having procured in his stead a young lad, born in the valley of Omekon, with him, and four of the native princes in my train, I departed along the banks of the river, running along one of the most picturesque and finest valleys in the universe, yielding the best grass in the province, and abounding with animals of the chase. Having reached thirty miles, we put up at the yourte of a wealthy knez. In the passage of the river each horse was attended by four men, owing to the velocity of the stream; the men resisting it by means of stout poles thrust into the bed of the river on their leeward side. The passage was certainly dangerous, but necessary to be accomplished without delay, before the melting of the snow on the lofty and magnificent mountains all around rendered the river terrific and impassable. The Omekon uniting with the Indigirka not far from hence, constitutes the latter for a season a first-rate river in Siberia. Already the meadow lands on each side of the river represent innumerable lakes, which are swum over by the horses with much difficulty. At eighty miles we exchanged horses; here I had a difference with the Cossack and guide, as to which horse I should ride, both insisting on the one proposed to me being the most proper. As I did not like his appearance, I said I was not accustomed to take the best in their estimation, nor even in my own; therefore I would be content with that which was already saddled for the guide. The latter said it was a vicious one, that it stumbled,

startled, and, indeed, had all sorts of defects. I persisted, however; observing to the guide that I was accustomed to those matters, and therefore preferred giving him the best horse. My reason for persisting in this paradoxical argument is, that I know few people will ever recommend that which they consider as the best horse; they will rather retain it for themselves: certainly I have never been deceived when riding a horse which was intended for guide or Cossack.

Recourse was at length had to frighten me out of my determination to attempt the journey to Okotsk at such a season of the year. The princes proposed that I should remain with them three or four weeks, when the rivers would subside, and the journey would then be even agreeable. All, however, that they could get from me, was to go with horses one hundred miles farther, and then take rein-deer. Their excellent and clean yourtes, the hospitality of the people, the productions of the country, the quantity of partridges, ducks, geese, plovers, and fine beef, presented to me, the richness of the cream, and refreshing flavour of the wild berries; above all, the romantic scenery which abounds, and the happiness which reigns, in the valley of Omekon, might, indeed, have proved strong allurements with me to pass my life with them, but held not out sufficient charms to induce me to avoid a difficult journey. The weather was now very fine, but the nights and mornings were still cold. The princes continued to accompany me through their magnificent retirement, which is near five hundred miles from any other establishment, Okotsk and Boulouktak being the nearest. I had a long conversation with the prince about yasack, a tribute peculiar to Siberia. He said that

the quantity was nothing, but that the mode of collecting it was a serious evil. The tribute they would freely give to the Emperor, but it was what the commissaries took from them by force, and which they gave to avoid vexatious and litigious treatment, that was oppressive; and these commissaries have great power.

Whether yasack is or is not an impolitic tax, remains to be proved; and whether a direct tax upon certain articles consumed by the Yakuti, and all aborigines, would not yield a greater revenue, may be doubted: at all events, the present system is liable to the greatest injustice and robbery. I have no doubt that each commissary receives from the district he governs, more furs for himself than for the Emperor. The prince was not a little surprised when I told him that, comparatively, he paid little taxes, and that other countries paid more. Among many taxes, I told him that, in England, he could not shoot wild ducks without permission, and even if he did shoot them in his own garden, he must not take them up to eat. Finding him incredulous, I then told him that he could not have more than a certain number of windows to his house without paying a tax. These two samples sufficed to make him perfectly satisfied with his government, till I informed him, on the other hand, that no person in England could be compelled to carry government, or private goods, without being paid his own price. Every thing, however, which I told him to prove the evident superiority of England, as to the personal liberty of the subject, failed to weaken his natural preference of wandering over his native soil, to the visiting of strange lands. Thus we rode along the picturesque valley for twenty miles, when we crossed numerous lakes,

which, from their local situation, were not as yet melted. They are surrounded by opulent Yakuti establishments, during the summer season, for the fish which abounds in them.

We next crossed the mountains, and entered upon another fine pasture country, watered by the Torrourack; and halted at the last yourte in the government of Yakutsk. It was a miserable place, although the kindness of its inhabitants procured me a quantity of game. In its vicinity I passed through a herd of rein-deer, attended by the wandering Tongousi I was in search of. Their chief was, however, forty miles distant, whither I repaired the next day, along a wide expanding valley, opening to the south-east, and reached at sunset the encampment of Prince Shoumieloff. Having previously sent a herald in advance, I was received by him, with his sword by his side, his medals suspended from the neck, and dressed in a rich suit of black velveteen, and a cocked hat. I could not help laughing at the grotesque appearance of the prince, while I pitied him, and despised the means which had been used to divest so ignorant a man of his property, by the lure of honours of this kind. I do not by these words mean to intimate that the necessity for such distinctions does not exist; but I do say, that the purposes for which they are conferred on an ignorant savage are of the most despicable nature. This man, Prince Shoumieloff, was formerly a rich Tongousian; now he is a poor one; he had as many thousands of rein-deer as he has now hundreds. But his free presents, added to extortions and exactions, to prevent the chance of forced, although useless services, have so reduced his property, that he is obliged to eat fish, which is considered by the rein-deer Tongousi as a hardship, and to send out his people to

maintain themselves in the woods with their bows and arrows. Powder is too dear, or not to be had, but by a present to the chief of more than its equivalent ; he having the power to deny it altogether. Shoumieloff now dreads going to Okotsk, even in search of moss for his rein-deer, preferring, as he says, to live a real Tongousian wanderer, than a servile tributary to chiefs, commissaries, and other officers, although he glories in paying what is just.

I found him an obliging sort of man, although too free a use of liquor had made him at times a quarrelsome one. We took a pipe and a glass of vodka together, and, as he spoke the Russian language, we descanted upon the means he had of accommodating me with rein-deer as far as Okotsk. He said, what was true, that he had only just left the vicinity of that place in search of northern pastures, and that although he might possibly be able to reach Okotsk, he would still lose the benefit of the pasturage ; as, by the time he could return, winter would have commenced. I felt the force of his reasoning, but the service was his in point of law, as the season for employing or calling out of horses had not yet commenced ; and therefore, over a fresh glass of vodka, which had been given to me, on the Omekon, by a retired Cossack, he consented to take me.

In the neighbourhood there are eighty-seven of his tribe under his command, over whom he holds considerable power, as I have frequently witnessed ; but they are in general a hard-working people. I was amused with their manner of catching rein-deer, as it reminded me of the hunting of wild bullocks I had seen in Mexico ; with this difference only, that there the man rides a horse fully trained, and here a rein-deer. They use a long line, which

is coiled up in their hands, as sailors handle a log line, and galloping past the intended victim, they with much dexterity throw the noose, at the end of the line, over the horns. In America it is more dangerous, and the horseman is sometimes obliged to seek safety in flight, unless he can run the bullock into a thick enclosure, where he becomes entangled by the length of the line.

Next day I paid the prince a formal visit at his principal tent. He received me again in his gala dress, presented me with tea, tobacco, and toasted rein-deer meat, and lastly, with the raw marrow of the fore legs; the last I esteemed most, and, when eaten in a frozen state, is, in my opinion, superior to any other luxury of the kind, except raw fish. He had purposely killed a rein-deer for me, and sent me half; I, of course, presented him with some tobacco and powder, and, upon the demand of his wife, with a bottle of spirits, in return for which she gave me two red foxes.

On the third day we departed with fifty head of rein-deer; his whole herd consisting of about two thousand: fifteen were put at my disposal, while the rest were retained for his own consumption and emergencies. The prince said, that, as none of his people knew the summer mountain route, he would accompany me. I took this as a good omen of his kindness to me, and his desire to forward me on my way; the result will, however, prove how far I was mistaken. At ten miles we halted in a pleasant valley in a violent snow storm. The Tongousi were not long before they pitched their tent: but I preferred the open pure air, with all the annoyance of the snow, to the harbour of such a close place, and with such a filthy set; I will, however, do the prince the justice to say,

that he begged I would take refuge in his tent, enlarging upon its comforts, &c. We continued our route thirty miles the next day; the first half along the valley, and the other over the hills leading to the river Tourrouack, which we had crossed before. The third day the laden rein-deer began to lag and droop; the snow was very deep, and the nasten, or the melted and re-frozen snow, was not sufficient to bear the animals. A rein-deer cannot carry above one hundred pounds upon his back, but with that and good roads they may be able to go thirty or forty miles: otherwise six or seven miles a day, when heavily laden, is the average. We shot a few partridges, for the Tongousi in general have guns, and secured one wild rein-deer, which last was equally divided between his party and mine. The wild rein-deer are generally considered as of those who formerly belonged to them, but had strayed away. By some little trickery they are decoyed into their camps; otherwise wild and tame rein-deer have a natural aversion to one another.

The fourth and fifth days we made but little progress, the weather was bad, and the rein-deer dropping off, for we had already lost four by fatigue. The prince grew angry, and threatened either to leave me or carry me back; to which, as on the one hand I felt no way inclined to submit, I was careful, on the other, not to compel him by provoking or abusive conduct, well knowing the character of the Tongousi. We reached an elevated pass in the mountains, which leads to the vicinity of Idgiga, but were unable to cross it, owing to the state of the snow. The sixth day we renewed the attempt upon the passage, but were again compelled to give up, three laden rein-deer being dead,

and the rest so weak as to be unable to convey the carcasses or the baggage. The former was a sad loss to the poor man, but I could only pity him. We remained for three days to recruit the reindeer, and then determined again to make for the Omekon, and attempt the long passage with horses. The reasons which influenced us to turn back appeared to me sufficiently strong; and as the prince complained that he had not force sufficient to take my baggage, I was obliged to destroy the greater part. The moment Mr Shoumieloff saw what I was about, he remonstrated upon the crime; asking why I did not give the things to him, as he could take them away for himself, although he would not for me. I said, I would make him a present of nearly all the baggage I had, if he would show me the way to Okotsk by the 20th of May. He declined, and I persisted in burning my clothing and bedding, for I felt convinced he had been duping me, compelling me, as he thought, to forsake my baggage, that he might reap the benefit; nor was the destruction of my wardrobe of little import, rigged out as I had been by Baron Wrangel and the generous inhabitants of the Kolyma. Finding I was not to be outwitted nor dissuaded, he brought forward the image of the virgin and the saint he was named after, saying that I must be a heretic, and no priest of any country—he spit, swore, stamped, and crossed himself like a madman. I merely laughed at him, and although I should have had a laborious task to retrace my steps alone to the Omekon, I was determined to run the risk, and complete the desolation by burning every thing I had which he would not carry, and which was not actually necessary to the season of the year. At length he told me it had been previously ar-

ranged that I should return to the Omekon; and there in fact I re-arrived on the eighteenth day, re-crossing the Tourourack and Boulabot rivers with much difficulty. The country over which I had lately wandered was barren, but presented some fine scenery; numerous lakes are seen, and the wood is thick and tall. It is a favourite resort of the Tongousi, where they get fine moss for the deer, good fishing, and plenty of squirrels and foxes; the latter alone serving to pay the yasack, as well as to purchase the few articles of necessity and luxury which they require, at the annual fair, held at Okotsk, in the month of June or July, according to the season.

Upon leaving the Prince Shoumieloff, I purchased a fine rein-deer of him for the last of my tobacco which I had bought at the Omekon. The deer might weigh about one hundred and fifty pounds, which I thought a sufficient quantity of meat to enable me to reach Okotsk. The Tongousian again wished to steal a march upon me, insisting that he had not sold me the skin, but the meat. As I had no bed, I was not disposed to be so easily outwitted, and therefore replied, that I was not obliged to kill the rein-deer until I thought proper; but that when I did he should have the skin, provided he would accompany me for that purpose. Poor Shoumieloff felt much annoyed at being thus matched, especially as the knife was ready to sacrifice the poor animal, from which I, however, designed to secure myself a bed.

Fresh horses having been procured for me, I left for ever the Omekon; receiving from my old friend Gotossop a quarter of a young bullock, and a dead horse for the use of the Yakuti; besides a pood and a half, or sixty pounds, of rye flour, and at

least ten poods, or four hundred pounds, of butter and sour milk. The first day we halted at ten miles, on the banks of the Koudousou, at present a large and rapid river full of floating ice, which rendered the passage of it on the following day highly dangerous, though we had a small canoe, which served to tow a horse over each time; as it was, the poor animals suffered much. On reaching the other side, my medical skill was called into requisition. I had got the credit of curing asthma, palsy, sore eyes, and the like, and as this was done gratis I got many patients. Had I possessed a medical book I might probably have done some good.

From the Koudousou the country was quite overflowed for twenty miles, exhibiting numerous habitations perfectly insulated; indeed, many of the people do ply about in canoes, keeping them for this case of emergency. My next route was on the right bank of the Kourounaksouta, which, like the other rivers in this valley, unites with the Omekon. In the evening I had prepared for my supper what is termed *salamatt*, a mixture which I found very palatable. It is rye flour boiled in butter, and reduced in thickness, when boiling, to a substance like burgoo, or hasty pudding, not unlike what I had eaten when going down the Volga. The two following days we got on very well, making near sixty miles over low marshy swamps; a brace of ducks were shot, and we passed the evening comfortably.

Having re-crossed the Koudousou, we reached the Konkuy, also uniting with the Omekon, where a chain of mountains commence, running to the south-east and south-west. Our horses began now to suffer from want of food, as the pastures are

better suited for rein-deer. There are hence, from the Konkuy, two roads to Okotsk, one by the west, the other by the east, bank of the Okota; the former requires seven, the latter ten days to reach, without casualties. The former is over a level but continual swamp, the latter over high and rugged stony mountains. I preferred the former, though with the chance of being detained from the rapidity of the river or the quantity of loose ice, being willing to assist the horses of the poor Yakuti, as the mountain route affords but bad pasture and a worse road.

We made thirty miles along a valley, bounded by high peaked mountains. In a romantic spot, and near a rapid of the Koudousou, which makes much noise, I observed a neat tomb, with a cross over it, to the memory of a Lamut, or Tongousian prince, who had died here a few years ago, while wandering with his rein-deer.

We were now much annoyed with a considerable fall of rain, and passed a bad night in consequence. Next day there was every appearance of the rain continuing, and I reduced the allowance of meat one-half, not knowing how long we might be detained. A hurricane coming on, we were obliged to halt, and were most unpleasantly off in our wet leather clothes. As soon as possible, however, we resumed our journey along an elevated valley, where the snow was soft and dangerously deep, presenting nothing for a fire or for the support of the horses, nor a shrub of any description to be seen. I have scarcely ever seen a place where the horses could not, by scraping with their feet, reach the earth in search of food; here, however, the thing was impossible from the depth of the snow; and indeed the poor animals seemed to

know it, as they would not waste their strength in the attempt. The Yakuti put on long faces at the obstructions we met with, never having witnessed such deep and difficult roads, for, in ordinary times, good pasturage is to be had in this part of the valley.

The horses having to contend with such difficulties, our journey was continued on foot. My snowshoes I gave up to one of the guides, in consideration of his being very heavy, while, for myself, with a quick motion, my weight was not sufficient to permit my sinking in the snow;—in case I had, the guide with snowshoes was near to render me assistance. We were now frequently compelled to wander about on the borders of precipices, directing our route by the shade or appearance of the snow; habit having accustomed me, as well as the people of the country, to a pretty accurate calculation whether or not the snow would bear me. I have even seen the horses refuse to proceed, their sagacity in that case being equal to man's; nor will the leading dog of a narte, if he is good, run the vehicle into a track where there is deep snow or water.

The third terrible day brought us to a solitary tree, from which many horsehair offerings were suspended. Having overcome this abominable route, no less than sixty miles, in the evening we reached a fertile spot, and halted on the banks of a lake, from which, it is said, the rivers Okota and Koudousou, running in counter directions, have their source; a circumstance which recalled to my recollection those words in an able work by Mr Barrow upon rivers, where it is said, that “although it is not a physical impossibility that two rivers should flow in opposite, or indeed in any

direction, out of the same lake, yet the contrary approaches so near to an axiom in geography, that no instance is perhaps known of such an occurrence ;" nor is it unworthy of remark, that, while I was writing this, I read in the Literary Gazette of a similar circumstance having been reported by the Esquimaux ; indeed, from charts which *I have since seen* of that part of the world, I have no doubt of the fact. Query, do not several rivers emanate from the Baikal and Caspian Seas, or *Lakes* ?

We had now only one day's meat left, but were fortunate in shooting a couple of partridges, which the guides brought me. We had still some rye flour and butter, and with that hoped to cross the river and reach our destination, without any subsequent difficulty. At four in the morning we had 13° of frost by Reaumur, and at noon 73° of heat of Fahrenheit. After forty miles of severe travelling, we at length reached the river which was to close this terrible journey, and which was full of shoals and rapids, and may be declared useless. The islands in it abound with birches, larches, and alders, as also with the poplar, and a few pines. There is also an abundance of wild berries of a fine flavour ; and the pastures are exceedingly rich. The scenery was, in many places, highly beautiful ; and the river afforded a novel spectacle, being confined by the most beautiful natural quays of crystal ice, while the river actually roared from the velocity of its current.

As we continued our melancholy route, we fell in with two white bears bound to the north, but fear, probably, on either side, kept us apart. Still along the Okota, we reached twenty-five miles, the horses enjoying very fine pastures, but our provisions entirely at an end. The rains had again

overtaken us, and were rapidly swelling the rivers. Of the last of the rein-deer, the flesh was so far gone that I could not eat it; the Yakuti, however, are so fond of putrid meat, termed in England game, for indeed it was nothing else, that they finished it, regretting only that it was so little in quantity. The second day without food, and in a torrent of rain, we made near fifty miles, the horses swimming and wading through thirty or forty little rapid streams. These are formed by the rains, and the melting of the snow from the eastern range of elevated mountains; they subside and dry up about the month of September. We lost one horse, which was carried by the stream into the Okota.

At length, by great labour, we reached the fording place at the Okota. It was, however, impossible to attempt it, the guides observing that the horses might pass the river, but not loaded. We therefore halted, and next morning found a place where there was a canoe on the opposite bank. Thereupon unloading the horses, we turned them into the river, and they all reached the opposite bank in safety. The question then was how to get the canoe over; I was the only person who could swim, but the water was still so cold that I felt no preference to that mode. Necessity at last compelled me, and having procured a short stout piece of drift wood, which was very buoyant, I crossed at a narrow part of the stream, with a leather thong fast to my waist. The rapidity of the stream carried me down above a hundred yards, but the Yakuti, keeping, by a sort of run, in a parallel line, were ready to haul me back, if necessary. I, however, reached in safety; and, instantly throwing off my clothes, took violent exercise. The breadth of the swimming part might only have

been fifteen or twenty yards, and across the strength of the stream possibly not more than four or five yards ; yet I barely accomplished it. The feat was thankfully acknowledged by the astonished Yakuti when I returned with an excellent canoe.

Lord Byron swam the Hellespont, and John Cochrane the Okota. Of the two feats, mine was surely the most difficult ; his lordship was neither fatigued, hungry, nor cold, nor compelled to his undertaking ; while I had each and all of those evils to contend with.

By perseverance we reached twenty miles farther, halting at one of the fishermen's summer villages. I broke open all the cellars in search of fish, but was not so fortunate as to find any. The evening proving fine, we aired and dried our clothes in lieu of supper, and next day, over a rugged but well-wooded country, walked and rode twenty miles, encamping upon the left bank of the Modon ; one solitary partridge being the day's food for four people. The Okota here becomes formidable from the waters of the Nater and Modon, which enter it from opposite points. The former river inconvenienced us much, we being obliged to ford it three times in the short space of seven miles, and with no inconsiderable risk. After the passage of the Nater, ascending an elevated and rugged mountain, whence we enjoyed a fine view of the surrounding country, we descended and entered upon a swampy overflowed country, covered with fallen trees which impeded our progress terribly. A desolated forest was our companion for many miles ; here and there we found a few berries, especially of the moroshka (*rubris chamaemorus*), a yellow berry, about the size of a strawberry ; there were also some bilberries. We halted on

an island where the remains of a post-house are to be seen. It rained during the night, and we had some heavy thunder, a sound become unusual to me.

The next day, about one mile farther, we reached the junction of the Arka and Okota, but they had swollen so much from the rains, that we were again detained. I therefore went in search of game with our Yakut's gun, but unhappily, the powder, which had been kept in a rag, was so wet as to be entirely useless; we had, therefore, nothing but patience left, independent of four fat horses, which my finances would not allow me to sacrifice. The poor Yakuti would willingly have allowed it, but I could not think of permitting them, upon my account, to suffer so great a loss, and therefore determined to let them act as for their own welfare, knowing, as I did, that none of their nation would deem it necessary to kill a good horse, till his owner had been nine days without animal food.

The number of islands in the river increased to an astonishing degree the velocity of the stream in the channel, which brings down with it immense masses of ice and trees; and even had I been possessed of a canoe, or had the river been more tranquil, it appeared impossible for the horses to ascend the quays on the opposite bank, which run into the river in a shelving manner, eight or ten feet out of the water. Now and then a mass of ice, or a tree, would strike the quay, and tearing away the shelving part, would leave a perpendicular spot of some yards. I walked along the banks of the river in search of a place to cross, but in vain; we therefore began to fell timber, to be employed in the formation of a raft if necessary. More rain came in the evening, and we passed an unpleasant night,

anxiously watching the rise or fall of the river. We had eaten nothing for two days, and only a few berries on the two preceding them. At noon on the following day I had completed the raft, and as I felt extremely hungry, determined to attempt the passage of the river with one Yakut and the Cossack. The other Yakut I left with the horses, as he could not possibly perish for want of food, and appeared only anxious for the necessity which should compel him to knock one of the animals upon the head,—that is, that the nine days should expire. To starve on one side of the river, be drowned in it, or die upon the other side, appeared alike to me ; and I accordingly embarked our little baggage upon the raft, composed of ten logs of trees about fifteen feet long, crossed by five others, and again crossed by two more, to form a seat for the person taking charge of the baggage, which was lashed to the raft. The spars were lashed together by leather thongs, and two or three leather bags were cut up to increase their length. Each spar was also connected to the one on each side of it by three grummetts, formed out of the green branches of the trees on the banks of the river ; and the raft appeared to me strong enough to resist a severe concussion. We also provided ourselves with drift spars, formed into oars, to serve to steer, and assist in gaining the shore should an accident happen. My papers and journals were fastened round my body, and I took my station in the bow, in order that I might avoid danger, and keep in the centre of the river.

It was with difficulty we moved our vessel into the main channel, from the number of eddies ; but having once reached it, we descended in a most astonishing manner, sometimes actually making the

head giddy as we passed the branches of trees, rocks, or islands. No accident happening, and the river widening, I began to congratulate my companions on the probability of breakfasting the next day in Okotsk; but as yet I had not got upon the proper side of the stream, the islands and shoals perpetually turning us off. The Cossack and Yakut continued in a state of alarm, not entirely without cause, for, upon rounding a point of land, we observed a large tree jutting into the river, with a tremendous and rapid surf running over it, the branches of the tree preventing the raft from passing over the body of it, which was so deep in the water as to preclude a hope of escaping with life,—it was at least impossible to avoid being wrecked. The Cossack and Yakut crossed themselves, while I was quietly awaiting the result in the bow. We struck, and such was the force of the rebound, that I was in hopes we should have been thrown outside the shaft in the subsequent approach. I was, however, disappointed, for the forepart of the raft was actually sucked under the tree, and the afterpart rose so high out of the water, that it completely turned over, bringing the baggage under water; the whole then, with the Yakut and Cossack, proceeded down the stream, and fortunately brought up upon an island about one hundred yards below. In the meanwhile my situation was dangerous; being in the bow, I could not hold on the raft as my companions had been able to do, for fear of being jammed in between the raft and the tree. I therefore quitted my hold, and, with infinite difficulty, clung to the outer branches on the rapid side of the tree; my body was sucked under, and no part of me was out of the water but my head and arms. I could not long remain in such a state;

and making, therefore, one vigorous effort, on the success of which it was clear my life depended, I gained the top of the tree. I was throwing off my upper park, when the branch gave way, and I dropped down, half drowning, to the island. It was a fortunate circumstance that the raft upset, as otherwise it could not have brought up at the island; which it did in consequence of the baggage lashed to the raft being so deep in the water.

Our situation, notwithstanding, upon the island, was by no means pleasant. On either side of us was a rapid channel, and I was as far as ever from accomplishing the object I had in view, which was that of getting upon the right bank of the river; for then I might expect to reach some habitation, there being none upon the left bank nearer than six hundred miles, half way to Idgiga. My first care was to change my wet clothes, and warm myself by exercise; the next was to unlash and land the baggage, and to save as much of the raft as possible, our deliverance depending upon it. By hard work we accomplished it ere the sun had set; after which it soon began to be very cold. The appearance of the night was unfavourable, as it foreboded rain; it would therefore have been highly indiscreet to remain longer than necessary, as the river might, in one night, so increase as to cover the island.

To launch a raft into the channel I could not attempt, as by that time it would be dark, and we should certainly meet with the same accident, and probably worse results. I therefore walked towards the end of the island, till I came opposite to a large tree which had fallen from the continent nearly half way across the narrowest part of the channel, which might be about fifty or sixty feet. To swim through

the central part of it was impossible; but it appeared to me probable, with the help of nautical ingenuity, to save not only ourselves, but also the baggage; and this I accomplished in a true sailor-like fashion.

The baggage and spars were first removed from the place of wreck to that we purposed departing from. These spars were, as I have said, about fifteen feet long, a length which would not more than one-third reach to the tree, allowing a proportion to be within the beach. I therefore placed the heaviest baggage in the water, consisting of four bags lashed together, to which I lashed the inner ends of two of the stoutest spars, keeping a line fast to the outer ends, to prevent the strength of the stream from carrying them down. I should say, that the place where I sunk the baggage was past the parallel of the tree, to which I desired to get, five or six feet, in order that the last of the studding sail booms which I should rig out might come on the rapid side of the tree, and thus form a bridge. I then carried out two more spars, and lashed their *centres* to the *outer* ends of the *two* first spars, while the *inner* ends were lashed to the *centre* of the two inner spars; the second two spars had also a guy fastened to their outer ends, as a support. I had now reached within eight or nine feet of the tree, a space including the most rapid part of the stream. I accordingly sent *one* more spar, dropping it between the others in such a manner that it should fall tides-way of, and two or three feet beyond, the nearest part of the tree. Of course it required no guy, and but one inner lashing, as it could not get adrift or fall to leeward, unless the tree gave way. My reason for sending one spar at last, was to prevent, as much as possible, an extra surf; for, as it

was, I had great difficulty in reaching the tree. The Cossack followed in safety ; but of course I could not expect the Yakut to attempt it ; the bare idea was death to him. I therefore returned, and making another long line out of leather strips from two bags, I flung it over to the Cossack, keeping one end fast to the island. My bridge thus appeared

To enable me to ferry over my Yakut, the baggage, and lastly, myself, I converted the bridge into a raft, which had a line fast to it from each side of the river, the Cossack hauling it to his side, and I back again. When it came to my turn, I had not the advantage of a check line, for there was no place to make it fast to. The consequence was, in rounding the tree, the raft upset, and I got a severe ducking. I held on, however, and was pulled ashore in such a state, from the effects of the cold, that my clothes became like a firm casing of ice. Notwithstanding, I could not but be thankful for two such escapes ; the last of which, I suppose, occurred at ten o'clock at night.

We immediately had recourse to flint and steel,

to produce fire, which was soon found to be impossible, as the tinder was all wet. A forest of fine trees, most of them in a fit state to burn, inspired us, and my Yakut soon produced fire by friction. From the danger of perishing by cold, I was now hurried into that of being consumed by fire. The height of the grass and the dryness of the wood all around, were such, that the whole forest was enveloped in flames, and we were obliged to work hard to prevent its being fatal to us.

This immense fire raging round us, had the effect of inducing the other guide to swim the horses across the river to our relief, either supposing we were there, or that other assistance to himself was at hand : a service which must have been performed with no small difficulty or peril. For the sake of the Yakuti, it was a happy accomplishment ; as, from the general want of food, and the distance to their home, it was impossible for them to have returned without a fresh supply. Now, upon the right bank of the river Okota, we were certain of assistance in twenty-four hours. The distance we had arrived, by the winding of the river, was fifteen or sixteen miles ; but in a direct line to the junction of the Arka and Okota, not more than three miles ; so that the fire was readily distinguished by the Yakut I had left with the horses. I therefore felt delighted with his good conduct in having so well divined our situation ; and the night was passed in drying our clothes, and preparing to resume the journey the following day. The appearance of the raft, upon the second trip, was thus :

The third day without any food had now passed; and the fifth, with only a few berries to keep our spirits up, had arrived, when, on the dawn of the sixth (18th June), we again took to the horses, forded the Rounar, and passing over a mountainous and sterile country, for near forty miles, arrived at the habitation of a Yakut prince, called Gregory Grosloff, upon an island in the Okota. My host was neither civil nor hospitable; but by a sort of force I got some horse-meat from him, and which I considered, at that time, a great delicacy, added to some bread which I procured from the sailors and carpenters employed in felling timber for the dock-yard of Okotsk.

Fresh horses were given to me at this station, and I proceeded on to Okotsk. The route lay through some fine park-like scenery, and then over a thick sandy forest of tall pine-trees; the weather was most unfavourable, as it rained hard. At length I reached the eastern sea-coast, that is, the North Pacific Ocean, and was compelled to halt at a miserable hut, affording scarcely a shelter from the elements. The following morning, to assist the Yakuti, who begged of me to leave their horses in the pasture, I paddled along the stream to the old

town of Okotsk ; and calling on the police-master, was by him, in the government boat, carried over, with all the formality and respect due to my rank, to the abode of the chief of Okotsk, Vladimir Ushinsky, than whom I have never found a better man, or one who possesses more real goodness of heart under the most severe and forbidding countenance.

I was provided with quarters at the abode of the police-master, whose brother had that day been drowned in floating a raft down the Okota, not far from where I was wrecked. I waited upon the chief of Okotsk as soon as I could put on a clean dress, afforded me through the kindness of a Mr Gardner, a Bostonian, settled in Okotsk as an agent or retail trader. The chief felt much surprised at my haggard and miserable appearance. My face was completely frosted, and bore the effects of exposure to the wind in no ordinary degree. My long red beard, longer red locks, and almost frightful aspect, now suggested to me the propriety of shaving myself as well as of getting my hair cut, neither of which I had permitted for fifteen months. To this measure, however, I did not consent, till I had determined, in consequence of the information I received, and the general circumstances attending my situation, to return to Europe. I did, however, shave in the forenoon, and had my hair also cut ; and receiving as a present a surtout and pair of blue trowsers, I became once more a genteel dressed man.

Through the hospitality and kindness of Captain Ushinsky, I was enabled to pass a most pleasant day in the agreeable company of the officers both of the naval and civil service of Okotsk. The chief had long been expecting me, and continued so to ex-

pect, until he heard of my departure *from* Yakutsk *for* the Kolyma ; when, to use his own expression, “ *he gave me up for lost.*” I do, however, say that whatever are his, and may be others’, opinions, I feel certain, that one half the difficulties, and nearly all the dangers and exposures, to which travellers, *in any climate*, are most commonly subjected, and of which they so much complain, are the result of either their own physical incompetency, or want of prudential foresight. I certainly do not understand making much ado about nothing, nor writing expensive quartos upon a subject which might be compressed into a duodecimo, so far as regards the value of the information ; but this I do understand, that were a similar, and apparently a difficult journey, left open for *me* to perform, which could in the least tend to the benefit of mankind, and, in the event of *success*, to my own advantage, I would no more think of refusing to undertake such a journey, than I would that of exploring Africa to-morrow ; for which purpose, and with slender means, I am ready in six hours. I did utter these sentiments at Okotsk ; I have now again uttered them in England, conscious that my plan is economical, prudential, and feasible.

CHAPTER IX.

Reasons for determining to return to Europe—Description of Okotsk—Observations on the navigation of the Amour—Kurile Islands—St Peter and St Paul's—Captains Vasilieff's and Kotzebue's Expeditions.

THE circumstances which induced me to determine upon a return to Europe, previously visiting Kamtchatka, I will beg to lay before my readers, in the words of part of a letter I addressed to the same purport, to the governor-general of Siberia. It is as follows :

“ Okotsk, July 8, 1821.

“ MOST EXCELLENT SIR,

“ From the river Kolyma I had last the honour of addressing your excellency ; since when I have come over a large tract of desolate country, nearly two thousand miles, with great labour and some peril. The difficulties I have had to contend with surpass every thing of the kind I have before seen, and required every exertion of mine to conquer ; which I did not do under seventy-five days of hard labour. My route lay along the Kolyma, Zyzanka, Indigirka, Omekon, and Okota ; all of which are, at this season of the year, large, rapid, dangerous, and almost impassable rivers. Besides these, there

are numerous other streams, as well as lofty mountains of frozen snow, large overflowed marshes, crowded and decayed forests, and half-frozen lakes, which present themselves in every part of this journey; suffering at the same time cold, rain, hunger, and fatigue, with forty-five nights' exposure to the snow; at times without fire in a frost of thirty degrees; and, latterly, five days being passed without food; never having seen an individual during four hundred miles, and but one habitation in the extent of one thousand; being frequently bewildered and lost in the snow mountains;—all these circumstances tend to weary and dispirit a traveller upon a like journey, and render him incapable of addressing your excellency in a proper style. But I am unwilling to allow a post to escape, without communicating my past and future movements.

“ I was induced to undertake the late journey, in order that I might reach Okotsk in time to proceed to America or Kamtchatka, as circumstances should render most desirable or necessary; otherwise the proper route from the Kolyma to Okotsk is *viâ* Yakutsk, the route of the Omekon having been discontinued thirty years, in consequence of the difficulties and perils which ever attend it.

“ I waited upon the chief of Okotsk, who received me with distinguished hospitality and friendship, and who informed me that there was no vessel of any description lying in the port bound to America; and although two vessels were expected to arrive in the course of the summer, it was by no means certain, or probable, that either of them would return to the opposite continent during the same season. Such being the case, the chief of Okotsk, agreeable to a request I made, has consented to my embarking in the imperial transport,

bound to Kamtchatka : there I purpose passing the remainder of the summer in travelling about the peninsula, and propose to return to this place by way of Idgiga, during the early part of the winter, and thence to Europe, where I hope to arrive in the fall of the ensuing year, passing through such places in Siberia as I could not visit upon my outward journey.

“ The circumstances which have arisen since my last letter to your excellency, are such as to render useless my proceeding to America, even if a conveyance offered ; but, as no opportunity does exist, I must remain a long time in Okotsk if I persist in my plan. Thus I hope that your excellency and the imperial government will not feel displeased with me, in consideration of the reasons I have given for retracing my steps, in preference to proceeding beyond the peninsula of Kamtchatka.

“ Your excellency is well aware, that the object I had in view, when I undertook this long and painful journey, was first to ascertain the situation of Shelatskoi Noss, then to cross from Asia to America, at Behring’s Straits, and trace the latter continent as far as possible to the north-east.

“ The first problem is entirely solved by the fortunate issue of Baron Wrangel’s expedition. The north-east boundary of Asia being thus established beyond all doubt, I could no longer have any reason for remaining in the vicinity of the Kolyma, which place I accordingly quitted the moment the fair held with the Tchuktchi upon the Aniuy was finished.

“ My original desire, or intention, of proceeding to America, is now become as delicate as was my situation on the Kolyma, as a naval expedition is there also, having the same object in view that

I have. I cannot be allowed to act with them, for the reasons before assigned: I will not act against them; and, therefore, I cannot act at all. It would be madness and presumption in me to attempt a task of the kind while an expedition is there. I cannot get to Behring's Straits but with their assistance, or that of the Tchuktchi, and thus I cannot get there at all, and can only wish for a successful termination of Captain Vassilieff's exertions. Should that officer withdraw entirely, I will hereafter undertake the same journey, and may possibly do that by good fortune, which even more zeal and talents cannot execute!

“Had I known, when in Europe, of the expeditions on the Kolyma and in Behring's Straits, I do not think I should have taken this route to employ and improve myself. I shall, however, remember my journey with gratitude, pleasure, and pride. I confess to your excellency, that I do not see the necessity for continuing my journey merely for the sake of consistency. I am not afraid of the task, and I am as happy in a wild desert as in a proud capital; but I conceive I can better employ myself, more improve myself, and possibly do better altogether. I have much to see and learn during the ensuing fifteen months which I shall pass in Siberia, and, therefore, I hope I am about to adopt that line of conduct which, under all the circumstances of the case, appears most proper, however much I regret the *necessity* of retracing my steps. I have the honour to be,” &c.

Such were the ideas suggested to me, and such was the conduct I felt it necessary to adopt, in consequence of the conversation I had with the chief of Okotsk, and the head of the American Company, who told me that he had no idea of any

vessels offering this year for the opposite continent. No other vessel could offer, as the ports of Okotsk and Kamtchatka had become shut to all strangers since I had left St Petersburg, thus, in fact, compelling me to adopt the most proper line of conduct, as will hereafter appear, upon my arrival at Kamtchatka. I will therefore abstain from touching any more upon that point until I reach that peninsula, and content myself with viewing the wonders of Okotsk.

Okotsk is situated in the north-east part of a bay formed by the rivers Okota and Kouktui, and is approaching to more respect and consideration than it ever did before, owing, I believe, principally to the active and honest exertions of the present chief. The town was formerly situated on a low sandy beach close to the sea-side. Its exposure and inconvenience were never pointed out till by the late chief, now commanding at Yakutsk, who was, in consequence, ordered to transfer the town from the old to the new site, which is on the left bank of the Okota, as the old one was on the right. The order for the removal has been issued several years, yet little was done till lately: even at present the new site contains but the government buildings, and those belonging to a few of the Cossacks and sailors. The more considerable part, which are erecting by the American Company, will, it is said, be transferred hither in the ensuing winter. The plan upon which the town is building is good, and, when finished, will be, after Barnaoule, the neatest place in Siberia, although upon a small scale; for there are not more than fifteen or sixteen hundred people in it. The country round Okotsk is highly productive of fine timber, in consequence of which a dock-yard has been

made, and some fine vessels have been built, to enable the government to transport provisions to Idgiga and Kamtchatka.

The chief of Okotsk is generally a captain of the navy of the second rank, and subject only to the orders of the governor-general of Siberia, although the governor of Irkutsk has some power in civil cases. At present the establishment consists of three captains and four lieutenants, with corresponding officers of all classes, and nearly six hundred seamen and artificers; the allowance for maintaining and paying whom is less than two thousand pounds per annum, independent of their bread, which is about eight thousand bushels. The people are employed in building vessels and storehouses, in rigging and sailing the former, and filling the latter with flour and stores. The receiving and sending away of flour is a serious and laborious duty, and open to much abuse and pilfering. Besides these works there is a salt concern, under the charge of an officer who commands the convicts, at present ninety in number, the maintenance of whom, including provisions, clothing, and pocket-money, is about a thousand pounds per annum. These extraordinary expenses are occasioned by the allowance of double rations, in consideration of their hard work. The allowance to a convict is as follows;—Eighty pounds of rye flour for each man per month, one hundred and twenty pounds of the same flour for each man who has a wife, and forty pounds in addition for each child, male or female. Each man is also allowed ten pounds of oatmeal, or rice, and twenty pounds of butter per month. They are also allowed two complete suits of clothing, and about twenty shillings per annum in money. Such an allowance of provi-

sions is commendable and liberal; indeed it is so great, that the poor wretches are enabled to sell one-half of the bread for the purchase of tea, sugar, and meat; and of the latter there is not so much necessity, when the superabundant quantity of fish is taken into consideration, which is so great that I believe from twelve to fifteen hundred dogs are fed with it during the greater part of the year.

The quantity of salt made by the convicts is about two thousand five hundred poods, or one thousand six hundred bushels, which is sold alike to rich and poor, at the rate of three shillings a bushel, equal to two hundred and fifty pounds for sixteen hundred bushels; so that the salt, although a necessary, is a losing establishment of seventy-five per cent. The liberality and consideration of the Emperor upon this head cannot, therefore, but be duly appreciated.

There are also at Okotsk fifty Cossacks, whose allowance of flour is thirty poods, or one thousand two hundred pounds weight, per annum, and oatmeal and butter in proportion. The children have half that allowance, and widows and orphans are considered as entitled to the same, thus bringing the establishment of Okotsk to about two hundred and fifty thousand roubles, or ten thousand pounds, per annum. To meet this, the yasack, or tribute, paid by Yakuti and Tongousi is two thousand eight hundred and twenty-eight roubles, or less than one hundred and twenty pounds, and the duties upon imported goods amounted, in three years, to less than seven hundred pounds. These are the only sources of revenue to Okotsk, if I except that arising from the American Company, who are supposed to pay a tenth of their imports to the crown at St Petersburg, as also a tenth of

the furs imported from Kamtchatka; neither of which payments take place, I believe, in so correct a manner as they should.

Of the expenses of building and fitting out a transport brig of one hundred and sixty to one hundred and eighty tons, I have the account, which states it at less than two thousand pounds; the building was one-half the amount of the stores, and their transport from Irkutsk the other half. Upon the whole, however, the vessels are eminently strong, and worth the money. The art of ship-building has considerably improved, if I may judge from the different samples lying in Okotsk; three brigs have been built within the last three years, which ought to last at least twenty.

Such are the official returns of Okotsk. Of the state of society little can be said, no merchants residing in it, and the chief being the only married man belonging to the navy, and but three or four, who have wives, that belong to the civil service; in short, there is very little society, and less education, although a school has been established by the present chief, which may hereafter do well if the existing discipline be kept up. There are seventy-six boys in it, who cost nothing either to the empire or their families, being supported on the, so called, *economy money*, i. e. the money saved from the sums allowed by government for the maintenance of the equipage, which savings the present governor, much to his honour and credit, employs for the education and other benefit of the children.

Much credit is also due to the exertions of Captain Ushinsky, in having redressed many of the grievances under which the aborigines laboured, as well as the abuses in the public departments.

Formerly when an officer wanted money, he had only to go to the dock-yard and take such things from it as he could sell to raise it ; and so recently has this abuse been exercised, that an officer, high in rank, did, even in the last year, take articles to a considerable amount from one of the storehouses ; not in a shy or shamefaced manner, but openly, as an act justified by habit and long usage, and not at all questionable. I can see no reason why such conduct should be practised here, as all officers receive double pay and extra provisions, besides being always considered as regular traders ; indeed it has, since my return from Siberia, been sanctioned by authority, that officers in certain departments or situations may trade. The consequences will be most fatal to the poor aborigines, and most destructive to the interest of the fair trader, who is taxed to an amount of at least ten per cent. per annum, upon the capital he professes to trade with.

The abuses under which this persecuted race of aborigines have existed, I shall forbear to mention. I will, however, give two samples of the manner in which an avaricious chief may make his fortune.

A Yakut applied to the orderly Cossack of the present chief, who spoke the language of the Yakuti, stating that he wished to speak to the chief in private. The poor fellow was admitted, when he beckoned the interpreter to withdraw. This, however, was impossible, as the man, who kept his hand in his breast, could not speak a word of Russian. The chief demanded what he wanted ; still he declined answering in the presence of the Cossack. At last, after many entreaties, he pulled out a paper from his bosom, and gave it to the chief, at the same time kissing his knee ; and observing that he was a poor man, and had never been

to Okotsk before. The paper was opened, and found to contain a hundred roubles, nearly five pounds. The chief demanded the purpose of the money ; and by reasoning with and threatening the poor fellow, he at last got out the truth, which was,—that an old custom prevailed among the Yakuti, in order to enable the chief of Okotsk to live well and support his station, that every Yakut should pay, upon his first entry into Okotsk, a sort of poll-tax to the chief ; and that he, the Yakut, in common with the rest, had now only to continue the custom, and to express his regret that he was so poor a man as not to be able to do more. I need not say the money was returned, the man made to understand that such practices were abolished, and a message sent to the princes of the Yakuti, to say, that should such conduct be again attempted with the present chief, a severe punishment would be inflicted upon the party offending. When the number of Yakuti who annually go to Okotsk are considered as not falling short of three or four thousand, it may be very readily guessed what the average receipts of a chief were, and might still be, upon the score of privilege and extortion. The charm of bribery and corruption is, however, now so decidedly broken at Okotsk, that I feel certain no place in Siberia will thrive more, although its chief will always be unpopular.

I will mention one instance more of the prevalence of corruption in this part of the world, and to the truth of which I can myself testify. A decent dressed woman called upon the present chief of Okotsk, with a petition that her husband should have his fetters taken off, and be allowed a total respite from the public services, in consequence of his age and infirmities. Upon inquiry, her hus-

band proved to be a convict, and, still more, one of the very worst. The woman was desired to call again, and was then told that the chief was sorry that the conduct of her husband was such, as prevented the chief's considering it necessary that he should be excused from the public works ; and that his health, his age, and circumstances were such, that no extra consideration of his case was necessary, and therefore he must continue to work in his fetters. The woman then put a letter into the hand of the chief, which, on opening, was found to contain bank notes to the amount of three hundred roubles, a sum equal to fifteen pounds. This was her last resort ; the money was returned, the former opinion was confirmed, and the chief, for having done his duty, and for having honourably refused the bribe, was denounced as the most arbitrary and tyrannical, insomuch that a parallel was drawn between his conduct and that of his predecessors, by whom it seems such things were practised.

These are in no way extraordinary cases, nor are they by any means the most grievous. Those arising from the oppressive acts of the commissaries, or tax-gatherers, are the worst. I feel confident that no real redress can be granted until the yasack is done away with entirely ; and this step, I hope and believe, will, ere long, be taken. The sacrifice would be small ; it might even be done with great advantage to the empire, and to the increase of the population as well as of the revenue ; but I have done, and am really tired of being under the necessity of telling such true tales.

During the latter part of my stay at Okotsk, two vessels arrived there from America, one of which was very valuable, worth about seventy

thousand pounds, the other about thirty thousand. They were brigs, and loaded with sea-otters, beavers, sea-cats, martins, river-otters, and various other less valuable skins. The vessels appeared well manned, and tolerably managed, which is more than I can believe is the case with the government transports; but as I am going in one, and shall have a fair opportunity of judging, I will, for the present, abstain from further remark. I remained in Okotsk a considerable time, and felt highly gratified with the attentions shown to me by the chief, his amiable lady, and the officers. Every thing that could tend to my comfort was done for me. I did not, however, receive from the American Company's representatives those attentions to which my situation might seem to entitle me, in consequence, I believe, of what had taken place at St Petersburg. One circumstance in particular occurred to me, which was calculated to lower them and the concern in my estimation. One of their brigs was to be examined,—visited for the purpose of ascertaining if the provisions were good, if the people were satisfied, and if the furniture of the vessel, in spare sails, &c. was as is directed by law. The chief and officers were invited. This was at a feast given by the chief, at which I was present, and where he was requested to bring me with him; I even heard the invitation, but I naturally considered that, if they *really* wished me to partake of the *déjeûne* to be given on board, they could as well have invited me upon the spot, as desire a second person to bring me. The day the survey was to take place, all the individuals expected repaired to the scene of action except myself; a boat was dispatched after me, but I declined the invitation *in toto*, conscious as I was that something existed which,

probably in obedience to directions, I ought not to see, and knowing, as they must, that I would expose, if I discovered it. I neither have nor had any hostility towards the American Company; on the contrary, I say, that I think their establishment in Okotsk is upon the most liberal scale, probably too liberal, and that there are fewer faults in the concern in Okotsk, than in any other of theirs that I have seen.

The prices of provisions and labour will conclude these remarks upon Okotsk. Bread is twelve roubles a-pood, and meat from four to five roubles the same quantity; that is, bread is sold by government at nine shillings for thirty-six pounds, while meat is four shillings and sixpence for the same quantity. Fish, from its abundance, is not vended. Tobacco, cottons, and earthenware, cutlery, and such articles as a poor people can want, are not exorbitant; while a common working man can earn four, five, and six shillings a-day, which are, however, sure to be spent at the kabak, or grog-shop. Wine of an infamous quality, the worst of spirits, and a sort of provincial naleefka, and fructovka (a spirit of the flavour of cherry-brandy) are most exorbitantly dear. Those who have industry, strength, or talent, cannot fail of making their situation comfortable in Okotsk, if they be so disposed. The place is generally considered healthy, yet for invalids there is a good hospital, with plenty of attendants. The gardens produce some vegetables, but commonly of an inferior growth; mushrooms are most abundant, and very fine. In other respects the government of Okotsk can only be termed an immense dreary waste, extending from the river Uda to Idgiga and Anadyr, and the whole population is less than four thousand souls. In spite of the

attentions and hospitality heaped upon me by the inhabitants of Okotsk, I could not regret my departure. It has such a sameness—so little to be seen—so little to interest—and what was worse than all, so much scandal circulating there, that every thing done in Irkutsk and St Petersburg was sure to be known in a very short time.

It was on the twenty-fourth of August that I embarked on board the imperial transport brig, Michael, to proceed to Kamtchatka. She was commanded by a lieutenant of the navy, and had on board thirty-two people, besides passengers. I mention the number, because it is considered in this part of the world that such a number falls far short of what is necessary to work a vessel in a case of emergency.

Our destination was St Peter and St Paul's in Kamtchatka : we cast off our lashings about noon, and were soon in the centre of the tremendous tides-way, which makes in and out of Okotsk every six hours. In attempting to cross the bar, she struck, and, as the vessel was rather late, the ebb-tide having made, of course she continued to strike, and in fact beat so hard, that it was necessary to get down the lower yards and topmasts, and even to prepare to discharge the cargo. Every exertion, but in vain, was made in the two following tides to get her off from the bank which received Captain Billings' vessel, the *Good Intent*—she was left so truly dry at low water, that I walked on shore to communicate with the chief.

On the afternoon of the twenty-sixth, by main force, we hove the brig into deep water upon the rising of the tide ; and as no damage had been apparently done to the vessel, of course resumed the voyage. We may be considered as fortunate ; the

surf is at times so terrific as to prevent the possibility not only of a boat, but of any vessel, outriding it many minutes. The shallowness of the water, a long way off from the entrance of the harbour, the rapidity of the tides, and the cross-setting of them at the harbour's mouth, preclude the possibility of Okotsk becoming an easily accessible port, except for a small merchant vessel. Necessity alone, resulting from the loss of the *Amour*, can induce the Russian government to keep it, at such an expense, and under such circumstances. If the *Amour* had not been sacrificed through the bad generalship of the count, whose name I do not recollect, or the superior duplicity of the Chinese, all the productions of the Pacific might have entered and ascended that river, nearly to the fortress of Kiakhta; but in the present state of the limitation of the Chinese and Russian empires, the produce of the Pacific is necessarily sent to Okotsk, as there is no other eligible place.

The produce arriving at Okotsk has to choose betwixt the dangers of a bad roadstead, and of a very difficult port. From Okotsk to Irkutsk and Kiakhta, are near three thousand miles of the most difficult and dangerous land-carriage in the world; a journey which cannot be accomplished during the season in which the vessels generally arrive at Okotsk; consequently one year's interest of the money is sunk, besides the exposure of the goods to the ignorance and negligence of warehouse-keepers, and the dampness of the atmosphere.

The only period in which the port of Okotsk can be approached or departed from, is between the months of July and October, or only four months. The general period for vessels arriving is the latter part of July or beginning of August; too late in

the season to admit of their cargoes being forwarded to Yakutsk in time to take the winter road, and reach the fair of Kiakhtha during the same season, as the fair commences in February. Were the American Company to dispatch their vessels from the continent of America in the month of May, they would always arrive at Okotsk before the 1st July; their cargoes might be transported to Yakutsk by the end of August, at a cheap rate, by means of the return horses, and then to Irkutsk by water, previous to the winter setting in, and so be ready for disposal at Kiakhtha in January. The furs would arrive in a better state, and of course fetch a better price. What incalculable advantages would result to the American Company and to merchants in general, to say nothing of its convenience to the government, from the employ of steam-engines upon the rivers Lena, Angara, Selenga, and Baikal lake! What country in the world has such advantages for the employment of steam as Siberia; and what a relief would it not give to the aborigines, in saving them at least *fifty thousand* horses every year, which are now, through fatigue, cold, hunger, and being overladen, left to perish!

The value of the Amour is, however, so generally known, and its loss so sensibly felt, that it were needless to point out the benefits which would arise from the purchase of it; all that surprises me is, that the Russians have not attempted to open a treaty even for the privilege of navigating the river; then the direct trade between Irkutsk and Kamtchatka, Japan, and the Pacific in general, would be astonishing, while now it is at best contemptible.

To return to the voyage, which occupied us four-

teen days, with mild and favourable weather, and but little fog; on the seventh day we passed the Kurile Islands in safety, and on the tenth made the Avatcha Peak. Strong north winds, and a still stronger and perpetual south-east current, together with the want of practical knowledge in the commanders of the vessels in this part of the world, retarded our progress, so that we did not anchor until the fifteenth day, when I was received under the roof of the amiable and hospitable chief, Captain Rikord—the gentleman, as will be remembered, who rescued Captain Golovnin from the hands of the Japanese. I arrived in time to partake of the feast given in honour of the saint after whom the lady of the chief is named. It was attended by all the youth, beauty, and fashion of the town of St Peter and St Paul's.

During our passage across the sea, little of interest was excited. I had occasion, during calm weather, to witness the struggles of the whale, and listen to its groans, when attacked by the kasatki, a species of sword-fish. We had frequent opportunities of ascertaining the state of the currents, which were invariably found setting to the S.E. at the rate of two and three miles per hour. In one of these excursions, and when I was in a small punt-boat, with a deep sea-lead down for an anchor, the laziness of the crew got the better of their prudence, and nearly prevented my now relating the tale. Although in a small punt, the crew persisted in pulling towards the brig, with the deep-sea-lead down; the consequences were, as might be expected, the moment we ceased rowing, to enable us to take hold of a rope thrown to us, that moment, of course, the punt got sternway, and continued it until the lead was brought up and down;

but although the boat was nearly swamped by this unsailorlike conduct, yet, in spite of remonstrance, was it again fruitlessly attempted. Whether this conduct proceeded from obstinacy, ignorance, or fearlessness, I leave the reader to judge. At length the crew took my advice, and we gained the brig. I had also an opportunity of establishing the latitude of Povorotnoi Noss, and which is correctly laid down in the old chart of Admiral Saretcheff, while the more modern one of Admiral Kruzenstern is incorrect by nineteen miles. The longitudes of Nishney Kolymusk, of Okotsk, and of the island of Eon, have, however, 3° of error in the former admiral's chart; this may probably have proceeded from inadvertency, and not from error of calculation, as Captain Billings used English books to calculate by, while Admiral Saretcheff must have used French;—the former only understood his own English, and of course used the meridian of London; the latter, most likely, used the meridian of Paris, as he did not understand English. I mention the circumstance of exculpation, because the errors are known to exist. Three degrees must be added to the longitude of the place according to the charts extant; in short, it ought to be about 146° east of London. In passing the Kurile islands, the general line of them appeared to be well laid down, with the exception of the second and fourth islands, which, with Cape Lopatka, should be placed farther to the east, to bring them upon a north-east line with the islands to the southward of them; or the southern islands should be placed more to the westward, to bring them upon a south-west line from Cape Lopatka, for that is their exact direction, although the charts lay them down otherwise. I had no other means than half-a-dozen

compasses of ascertaining where the fault lies. The islands and peninsula are elevated, bold, and very accessible; passages may be run for during the night in spite of the fogs, and there is no danger anywhere but in the Lopatka channel, where a strong south-east current always sets. The average temperature of the atmosphere was 15° of heat.

In the harbour of St Peter and St Paul's, I found the Russian expedition under the orders of Captain Vassilieff, who had returned from a fruitless attempt to get round the American continent. They rounded Icy Cape about thirty miles beyond Captain Cook, although they fell short of him on the Asiatic side by two degrees. Little increase of knowledge will be gained to the world by this expedition; the most valuable is the having ascertained that a strong current runs round Icy Cape to the north-east and east,—so strong that it was with great difficulty Captain Vassilieff could get back his fast-sailing sloop. She certainly was not provided with the means, nor was she a fit vessel, for wintering on the American coast, separated from her consort, a large transport of six hundred tons. What would Captain Parry have given for such a *fair current*? Had the state of Captain Vassilieff's ship permitted his running for the accomplishment of the voyage in general, he certainly had the fairest opportunity that ever man had, for the result of Captain Parry's first voyage was known at Kamtchatka, as a correct chart of that voyage, and the situation of Melville Island, had been forwarded, and had actually reached there a few days after Captain Vassilieff arrived. Little or no doubt can exist that he could have reached Melville Island;—that there was an open sea to

7
the east, and a current of three knots per hour, I have reason to know. Unfortunately, however, the expedition was not in a fit state to make the attempt again ; but what may be done by Captain Kotzebue, time alone will show ; though I believe his instructions are so limited, that he is not to attempt the passage, but to survey the sound named after him, and protect the Russian commerce in that part of the world. I am, however, free to think that the passage by Behring's Straits is the best. Should Captain Kotzebue be determined to attempt the passage round Icy Cape, he will, no doubt, find a place for wintering ; or he may winter in the sound called after, and *re-discovered* by him, for it has been known to the Russians more than one hundred years. The winter may be employed to great advantage, as there are natives in the vicinity, with dogs and rein-deer ; and I should think that, with proper caution and people qualified for the task, the coast as far as M'Kenzie's river might be surveyed in one winter. Dogs to assist could also be procured at Kamtchatka.

I found also in St Peter and St Paul's, a brig under Portuguese colours, as well as one from the Sandwich Islands. The former brought a cargo of flour from Macao, the other a cargo of salt as a present to the Emperor from the sable Majesty of those islands, and in return received as a present such things as seemed most desirable ; among others, some animals, with a view of propagating the breed ; though it may be doubted whether the propagation of bears, which they also received, will be beneficial or acceptable. The Sandwich brig was a fine American vessel, officered by three Englishmen, and entirely manned by natives. The conduct of the executive here towards the Sand-

wichers was flattering ; and it is not a little singular that the first voyage undertaken by them should be to Kamtchatka, almost the least known part of the world. What with the expedition, transports, and foreigners, this place had, at one time, as many as eight vessels in it ;—the largest number it ever counted before.

It may readily be believed that I felt great pleasure in meeting with three Englishmen, independent of three on board of the Sandwich vessel, in such a distant part of the world. One was the Russian consul-general to the Pacific Ocean, Peter Dobell, Esq., formerly a merchant of Canton, residing in Manilla, whither he had returned after escaping the dreadful massacre in that place. I found him, during the long stay I had in Kamtchatka, a polite, hospitable, and finished gentleman, a sincere friend, and, in short, a *real Irishman*. He had some few years ago been so fortunate as to contribute to the safety of a Russian frigate, under the command of Captain Krusenstern, which ship was upon the point of being seized by the Chinese authorities at Canton. Secret intelligence communicated to Mr Dobell, was as readily given to the captain, and reported to the Court of St Petersburg, when the Emperor Alexander, ever alive to reward the meritorious, presented him with a valuable brilliant ring, and gave him his present situation ; which last was the more acceptable, as he was compelled to quit Canton, and forfeit his business. A second was a plain, good, honest Bostonian, encumbered with six children and a wife, else a man who ought to return to his native land, where his circumstances are good ; I experienced much civility and kindness from him. The last was a cockney, who had

been exiled from Moscow for forgery; and, although he had been flogged, knouted, &c. was still well received in every house. I know not how such things are managed in this country, but no doubt can exist that in Siberia, and probably in Botany Bay, the convicts are well received, that is, if their situation in life was formerly respectable. For my own part, I could only pity him, and rejoice that the punishment inflicted was so merciful; had he been a Russian, the case would have been different.

Time rolled away in the agreeable society of the chief and his amiable lady, together with the very fine young men who composed the officers belonging to the expedition and to the port. I felt anxious to get away from the perpetual course of balls, routs, dinners, and masquerades, which were alternately given by the chiefs of Kamtchatka and the expedition, as well as by the officers of them. Nor did the representative of his sable majesty of the Sandwich Islands fail to honour all individuals of rank and fashion with a splendid *dejeune*. The last fête given was by the author of this narrative, when the British flag, for the first time, waved over the land of Kamtchatka. However much the chief felt inclined to grant me the means of departing, it was impossible until the expedition had quitted the bay; only one post could be sent, and that I desired to accompany. Two months passed in this manner before the expedition departed, when I was left to the free enjoyment of a passion which was crowned with the reward of marriage;—so much then for my travellership. However, I had no alternative, and the day that Captain Vassilieff left the harbour of St Peter and St Paul's, I put the question. My

airy phantoms, my bold desires, and my eccentric turn, being thus dissipated by one woman, I prepared to make a tour of the peninsula before I led my intended bride to the altar.
